Governor Quinn Announces Up to $13 Million in New Relief for Southern Illinois Communities

Governor Secures State, Federal Resources to Help Southern Illinois Families, Businesses, and Local Governments Recover from Tornado

HARRISBURG – April 2, 2012. At the direction of Governor Pat Quinn, the heads of a number of state agencies today announced in Harrisburg up to $13 million of financial aid and construction projects to help families, businesses and local governments recover from the deadly tornado that ravaged several Southern Illinois communities on Feb. 29. The package put together at the Governor's instruction includes reimbursements to local governments for some of their disaster-related expenses, road improvements, grants to help homeowners repair or rebuild damaged homes, and low-interest business loans to create jobs and help businesses recover.

"This assistance package offers real solutions for the long-term recovery effort in Harrisburg and other communities," Governor Quinn said. "Recovery from this tornado won't happen overnight, but these resources will help residents and businesses of hard hit areas in Southern Illinois begin to rebuild their lives."

Following FEMA's denial of assistance for people affected by the tornado on March 10 and denial of an appeal on March 21, Governor Quinn moved quickly to secure support for people and businesses through the U.S. Small Business Administration (SBA). That request was approved the following day, and the SBA began meeting with people interested in the low-interest, long-term loans on March 23.

"In the weeks since the severe storms and tornadoes hit Southern Illinois in February and early March, I have met with representatives from federal, state, and local emergency management agencies to discuss the ongoing recovery efforts in Harrisburg, Ridgway and surrounding areas," said U.S. Senator Dick Durbin (D-IL). "I will continue to work with Governor Quinn and the Illinois Congressional Delegation to seek further opportunities for federal assistance to help these communities rebuild."

In addition to the SBA loans, the state's multi-agency relief package includes:

- **Assistance from Illinois Department of Commerce and Economic Opportunity (DCEO) –** Up to $5 million from the Community Development Assistance Program (CDAP) will pay for public infrastructure improvements, housing rehabilitation and reconstruction efforts. In partnership with Ameren Illinois, another $1 million from the Energy Efficiency Trust will fund energy efficiency incentives through Ameren's Act on Energy program to benefit customers affected by the disaster. Additionally, DCEO will make as much as $750,000 in Workforce Investment Act grants available to cover wages for dislocated workers to participate in disaster

OFFICE OF GOVERNOR PAT QUINN **NEWS**

cleanup and structured work-based learning.

- **Assistance from Illinois Finance Authority (IFA)** - Up to $2 million in U.S. Department of Agriculture-Rural Development (USDA-RD) business loans will be available through IFA under a relending in Gallatin, Saline and Williamson counties. Loans from a minimum of $50,000 up to a maximum of $250,000 may be used for the purchase of land, construction or renovation of an industrial or commercial building or purchase of machinery and equipment. The IFA will partner with local banks to market the program to local businesses hurt by the recent storms and tornadoes.

- *Assistance from Illinois Department of Transportation (IDOT) – Twenty-one municipal road* improvements in Harrisburg will be completed at an estimated cost of $1.58 million.

- **Assistance from Illinois Emergency Management Agency (IEMA)** – Reimbursements up to $1.5 million to affected local governments for some of their disaster-related expenses will be made through the state's Disaster Response and Recovery Fund, which supports emergency response and recovery efforts.

- **Assistance from Illinois Housing Development Authority (IHDA)** – IHDA will commit up to $1 million in federal HOME Funds using the Single Family Owner Occupied Rehabilitation (SFOOR) Program. Up to $40,000 per household in forgivable non-payment loans will be made available to homeowners in affected areas. The funds can be used to build or renovate destroyed or damaged homes.

- **Delta Regional Authority** – Governor Quinn secured $400,000 in federal funding to reimburse local governments for expenses related to debris removal.

"Ameren Illinois is delighted to partner with the Illinois Department of Commerce and Economic Opportunity to help make recovery a little easier for residents of the Harrisburg and Ridgway areas," said Michael Moehn, Ameren Illinois senior vice president of customer operations. "Through our ActOnEnergy® program and the Warm Neighbors Cool Friends Home Repair Program, residents will be able to receive the financial assistance they need to meet the highest energy efficiency standards as they repair and rebuild. This will allow them to save money today and in the years to come."

Governor Quinn has directed his staff to continue to work with local, federal and non-governmental agencies to secure additional support for families in the affected areas.

This assistance package is in addition to nearly $1.4 million of in-kind state assistance already provided to the affected region. Shortly after the tornado stuck, Governor Quinn surveyed the damaged area and activated the State Emergency Operations Center to coordinate the deployment of state resources and personnel in support of local response and recovery efforts. The state's response included large deployments from IDOT, the Illinois Department of Corrections and the Illinois State Police, as well as assistance from several other state agencies and mutual aid organizations.

"The state of Illinois has been a trusted partner with us since the day the tornado struck," said Harrisburg Mayor Eric Gregg. "Recovery after a disaster of this magnitude isn't easy. This state assistance package will give our recovery efforts a significant boost. I appreciate Governor Quinn's continued commitment to helping our communities recover."

OFFICE OF GOVERNOR PAT QUINN **NEWS**

Governor Quinn directed state officials to start developing the state assistance package immediately after the state's request for FEMA assistance for individuals and subsequent appeal were denied. The administration has been exploring all possible opportunities to deliver relief and assistance to Southern Illinois' impacted communities.

Additional information about the state's response efforts is available at www.Ready Illinois.gov.

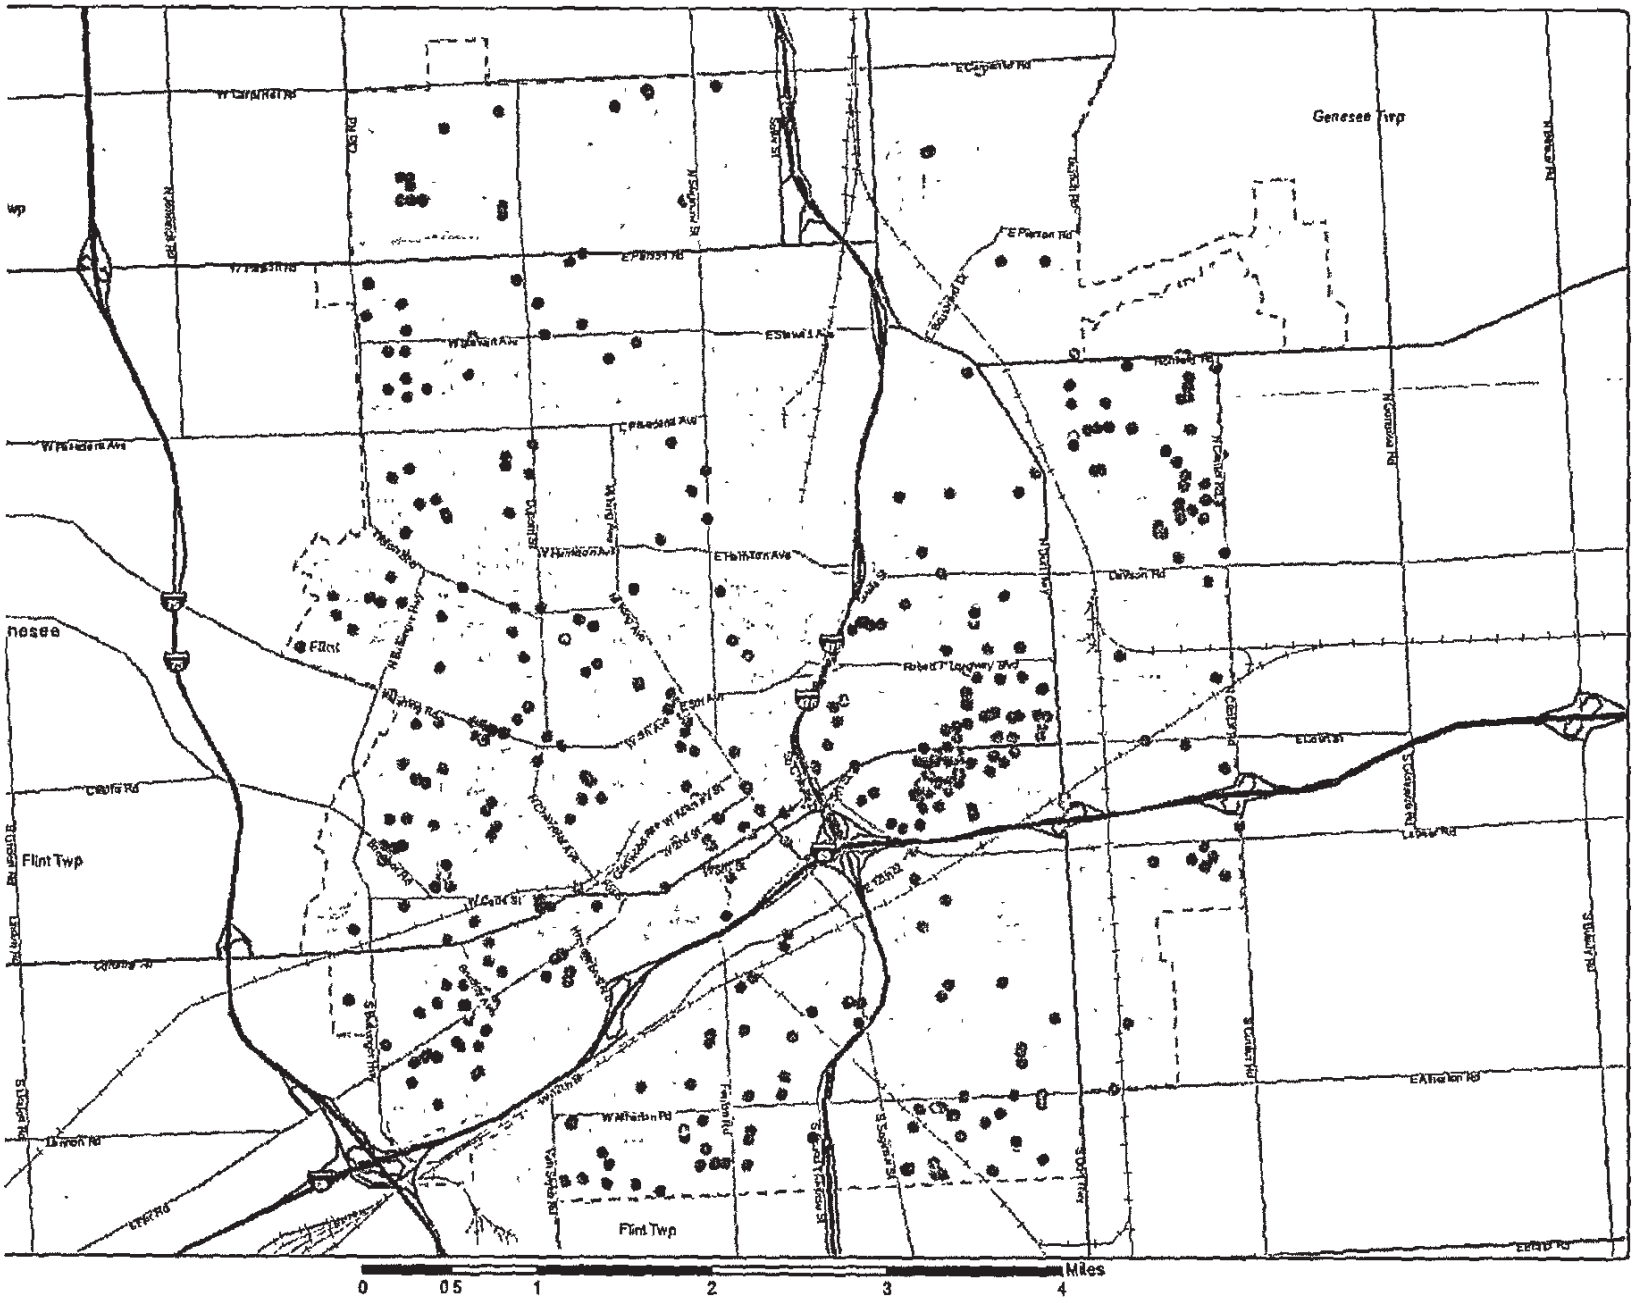
City of Flint-Water Contamination / Shortage

(1/6/2016)

Water Monitoring Results - 11/25/2015

(1/6/2016)



Requirements for Licensed Food Establishments Using City of Flint Water

January 12, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test". Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 A.M. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF AGRICULTURE
AND RURAL DEVELOPMENT

JAMIE CLOVER ADA
DIRECTOR

January 12, 2016

Attention: Food Establishments using City of Flint water supply

Dear Food Establishment Operator:

On October 5, 2015, you were sent a document recommending actions to take to avoid the risk of serving lead contaminated water to your customers. Effective immediately, the recommendations have been changed to a legal requirement, and food establishment license enforcement action may be taken if non-compliance is found until the public health emergency declaration has been lifted.

Please see the updated attached requirements sheet. Immediate action may be needed by your establishment to come into compliance.

Your establishment has three options:

1. Demonstrate your establishment is not using the City of Flint water supply for drinking, processing or cooking.
2. Demonstrate your water has been tested and is safe to use. You may request free testing by a regulatory official. To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939, M-F, and state you're a "Flint food establishment requesting a water test". Be prepared to provide a sampling time when your entire water system won't have been used for at least 6 hours. Sampling appointments between 5 a.m. and 4 p.m. are available. State offices are closed on January 18, 2016.
3. Install water filters as needed, and do daily flushing of unfiltered faucets and hard plumbed equipment. (Discontinuing use, flushing, etc. will still be needed until a safe water test is obtained).

Michigan Department of Agriculture and Rural Development inspectors are assisting the Genesee County Health Department in conducting sampling and inspections, so you may work with a different person other than your regular food safety inspector. Inspectors will also be making visits to establishments in the coming weeks to provide assistance and verify compliance.

For additional information, call 1-800-292-3939 or for the latest information on the Flint water response visit www.michigan.gov/flintwater.

We look forward to assisting you in any way possible.

Sincerely,

ion: This applies to licensed restaurants, grocery stores, con
ors and food warehouses.

STATE OF MICHIGAN

RICK SNYDER
GOVERNOR

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: *State of Michigan Procurement Leadership*

FROM: DTMB Procurement

SUBJECT: *Genesee County Water Emergency Response - Purchasing Guidance*

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well. Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must first be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director. This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts.

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Questions, concerns, or comments should be directed to:

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in your drinking water.

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

1. **The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**

2. Select a cold water faucet in the **KITCHEN** or **BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? Date 1/31/16 TIME 6:30 (AM) PM

Is there a faucet-mount filter? ☐ YES ☒ NO If YES, was it bypassed? ☐ YES ☐ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ☐ YES ☒ NO

If YES, please describe: _____

If YES, was it bypassed? ☐ YES ☒ NO

3. Open sample bottle and place below the faucet and gently open the **COLD** water tap. If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.

4. Tightly cap the sample bottle

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: N/A

5. Fill out the collection information on the front, answer the questions below and sign the form.

6. Attach this form to the bottle and return it to either **Flint City Hall or the Flint Water Plant.**

7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.

If you have any questions contact:

City of Flint Water Plant 4500 N. Dort Hwy. Phone: 810-787-6537 ext. 3501

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Edible Flint Works to Address Water Emergency through Urban Gardening

Urban Agriculture Organization Makes a Positive Impact in Flint Communities

Flint, Mich. – Since 2009, Edible Flint has been working with individuals and institutional partners to support Flint residents in growing and accessing healthy food in order to reconnect with the land and each other. As a part of their continuing outreach to Flint's residents, Edible Flint is gearing up to ensure a bumper crop of lead fighting vegetables and address concerns over urban gardening in Flint.

Edible Flint supports more than 300 community and individual gardens in the city through its Garden Starters program. This program provides gardening classes, technical expertise, resources and supplies. In response to the recent Flint water emergency, the organization has plans to expand their programs as they prepare for the upcoming gardening season.

Not only are they looking to support additional food gardeners through their Garden Starters program, they are currently reviewing the selection of seeds and transplants being distributed this year to ensure vegetables that fight lead exposure are included. In addition, Edible Flint, which tests approximately 50 new gardens each year, will be increasing the number soil tests (including lead screening) for Flint's food gardens. They also intend to provide hose filters for garden irrigation for program participants.

"Edible Flint is committed to supporting Flint residents by providing access to resources to grow nutritious fresh food," said Terry McLean, Michigan State University Extension (MSUE) Educator, and Edible Flint Leadership Board Member. "Through our urban gardening program we hope to provide a catalyst for recovery and community engagement."

McLean added, Edible Flint has been working with MSUE partners to reassure gardeners of the safety of eating and growing vegetables grown in Flint's community gardens.

For more information on Edible Flint, visit http://www.edibleflint.org.

FDD Flint Water Emergency Response

Incident Action Plan

Michigan

Department of
AGRICULTURE
& Rural Development

Operational Period

02/08/2015 0500 to 02/012/2016 1700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From: 2/8/2016	Date To: 2/12/2016
FDD Flint Water Emergency Response		Time From: 0500	Time To: 1700

3. Objective(s):

- Ensure responder and public safety
- Continue scheduling and performing "first draw" water sample collection for testing as requests arrive to Division staff, including 100% high risk establishment water supplies sampled.
- Conduct follow up assessments at food establishments on the City of Flint water supply that were found to be non-compliant with requirments during initial or follow up assessments.
- Conduct in-use water sampling, for verification purposes, at firms identified with 1) initial "first draw" results where lead was detected, and 2) at re-assessments of previously non-compliant firms.
- Mail water sample test results to all firms with telephone notification of firms where lead was detected.
- Verbal notfications of water results to firms
- Enhance data management procedures to support field operations and daily update reporting.
- Provide timely updates to Agency Administrators and the State Emergency Operations Center, and appropriate partner agencies.
- Re-assess criteria for risk prioritization of firms based on latest data.
- Conduct initial assessments and first draw water sampling at food facilities newly re-classified as high or medium risk due to risk prioritization re-assessment

4. Operational Period Command Emphasis:

Initiate Phase 2: Verification and Compliance Assistance

- Site visits will be conducted in teams of two inspectors, to address possible negative community reaction. Be mindful of safety while out in the field. Immediately contact the Operations Section Chief / Safety Officer with any concerns.
- Be aware that the FDD response is taking place within the scope a much larger state and local response effort. New information may come in at any time, everyone's flexibility is appreciated.
- Follow the chain of command as appropriate.

General Situational Awareness

Inspectors encountering potentially violent situations should leave the area immediately. All needing access to Flint Water Plant need to have access cards issues. Flint weather for the operational period. Staff in State cars should be aware of potential risks due to negative reactions to State government.

Field Team 5	Harris/Prellwits			
Field Team 6	Keltner/Russell			
Office Team	Clemens			Manages appointments and tracking at Constitution Hall
GIS/IT manager	Metiva	1	Email	

6. Work Assignments:

- Teams will continue follow-up assessments and sampling in-use water, if not already sampled previously. Teams will continue collection of first-draw samples at firms that have been scheduled by appointment.
- Teams will initiate assessments and sampling at firms newly re-classified as "High Risk" by LHD. Additional assessments and sampling may be assigned as other Medium Risk firms are identified.
- In-use water samples will be collected at firms where initial sampling found lead in any concentration >"Not Detected". (Assignments are given to field teams by OSC based on risk and scheduled sampling requests by 4:00 pm for the next day). OSC and Deputy OSC will verify assignments prior to sending out to teams.
- Handouts and FI-101 are left as instructed. Staff continue to report significant problems or concerns to OSC. Fields teams will also complete a survey monkey for follow-up assessments.
- Field teams have been given instructions for capturing costs and time associated with this response.
- Office will verify sampling appointments each day for the following day. These appointments will be sent to OSC by 2:00 pm for the next day.

7. Special Instructions:

Field staff have been instructed to work in pairs until further notice. If they are not in pairs, they must notify Tom T. (Safety Officer). All follow up visits will be suspended for Feb 9-10, 2016, however, ANY WATER RESULTS RECEIVED ON THOSE DAYS >15ppb will be visited immediately for follow up. During this timeframe (February 9-10) Joel Vansant will be the Deputy Operations Chief and Kathleen Muzia and Marianne Courey will help as needed.

A few residents have raised concerns about lead being present in the bottled and canned water that is being distributed through the water distribution sites.

We believe these concerns might originate from individuals using a total dissolved solids test strip in an attempt to test for lead. PER MANUFACTURER OF ZERO WATER, this test strip does not measure lead, and therefore would not give an accurate result. {Statement attached for reading}

However, we take every concern seriously, and therefore we are expeditiously testing the bottled and canned water being distributed in Flint to ensure it is lead free. In the meantime, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. IN THE MEANTIME, IF YOU WOULD LIKE TO RETURN THE PRODUCT, IT CAN BE RETURNED TO XXXXXX, FLINT, MI XXXXX.

To assure incoming product is lead free, we will begin testing batches of new product and are working with the manufacturer to assure product integrity moving forward.

> Typically, if there is an issue with product (eg, a recall), consumers are told to return it to the manufacture or place of purchase for a refund. If it's a consumer advisory, then MDARD or the company may offer discard informational tips. I can't speak to testing the bottled water itself or if the state can replace it. That's a DEQ and/or SEOC question.

Subject: RE: please review -

> It's my understanding the local health department determines what is considered an approved source. They, along with DEQ, test at the source. MDARD inspects the facilities bottling in Michigan, but does not routinely test the final bottled product. If we do take a sample, we don't test for lead. We're looking

for bacteria and pathogens. I don't know about those companies bottling water outside the state of Michigan.

Also, I am not clear on the issue with a specific product/manufacturer.

The statement reads a little bureaucratic to me. Suggestions below.

As a few residents have raised concerns about lead possibly being in bottled or canned water, we are expeditiously testing the bottled and canned water to ensure it is lead free. Additionally, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. We will also, out an abundance of caution, we will be testing batches of all new bottled water coming in to the distribution sites and working in partnership with the manufacturer to assure product integrity.

Jen

Jen, and all,

I can confirm that the DEQ stated that they would be testing the bottled water identified out of an abundance of caution.

From conversations here it appears that the testing device that is used by the public does not detect lead

directly but looks for total dissolved solids (TDS). TDS is acceptable in Drinking water as it gives water taste versus the flat taste of distilled water.

MDARD does sample bottled water during our inspection of the bottlers during our normal operations. Let me know if you have any additional questions and I will try to answer the questions as best I can.

Subject: Re: REVIEW AND ADVISE

We will give it to 211 to advise callers this morning.

If it remains an issue tonight still we will add it to the night press release. I don't want to draw too much additional attention to it.

Thanks Mel.

However, we take every concern seriously, and therefore we are expeditiously testing the bottled and canned water being distributed in Flint to ensure it is lead free. In the meantime, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. IN THE MEANTIME, IF YOU WOULD LIKE TO RETURN THE PRODUCT, IT CAN BE RETURNED TO XXXXXX, FLINT, MI XXXXX.

To assure incoming product is lead free, we will begin testing batches of new product and are working with the manufacturer to assure product integrity moving forward.

Thanks Jen. This reads better, but it still does not tell people what to do if they have concerns about their water. Should they be taking it somewhere; can we replace it? Also, I'm wondering if we should be providing 211 with the label names or product numbers so they can determine what water is the water being tested/in question.

Subject: RE: please review -

It's my understanding the local health department determines what is considered an approved source. They, along with DEQ, test at the source. MDARD inspects the facilities bottling in Michigan, but does not routinely test the final bottled product. If we do take a sample, we don't test for lead. We're looking for bacteria and pathogens. I don't know about those companies bottling water outside the state of Michigan.

Also, I am not clear on the issue with a specific product/manufacturer.

The statement reads a little bureaucratic to me. Suggestions below.

As a few residents have raised concerns about lead possibly being in bottled or canned water, we are expeditiously testing the bottled and canned water to ensure it is lead free. Additionally, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. We will also, out an abundance of caution, we will be testing batches of all new bottled water coming in to the distribution sites and working in partnership with the manufacturer to assure product integrity.

Jen, and all,

I can confirm that the DEQ stated that they would be testing the bottled water identified out of an abundance of caution.

From conversations here it appears that the testing device that is used by the public does not detect lead directly but looks for total dissolved solids (TDS). TDS is acceptable in Drinking water as it gives water taste versus the flat taste of distilled water.

MDARD does sample bottled water during our inspection of the bottlers during our normal operations. Let me know if you have any additional questions and I will try to answer the questions as best I can.

Subject: RE: Businesses and water access
Attachments: Water Handout 2016_Jan 13.pdf; Lead sheet cover letter - Holton JIC Jan 14 2016.docx

Eden –
First off, this only applies to food related businesses – we have not had any activities with other types of businesses. In October, we sent a jointly developed (MDARD, MDHHS, MDEQ, and Genesee Co. LHD) to all food businesses under both state and county jurisdiction alerting them to the issue and suggesting they take action. Up through last week that was on the Michigan.gov/flintwater page. In October, MDARD contacted the food processors and checked on the status of their water supply and water use; the FDA also checked on some of the facilities under their jurisdiction.
Last week, our jointly developed guidance was updated and is now a requirements document. It was approved through the JIC and the SEOC and was mailed on Thursday of last week. Per conversations with the Genesee Co. Health Dept., due to their staffing levels they have asked us to assist in outreach to restaurants/food service. The notices contain new guidance and direct businesses to contact us and we'll schedule an appointment to test their water (attached). I've heard that we started getting those calls today.
Wed morning we are training 14 of our Food & Dairy Division staff on water sampling and the process for getting testing kits and dropping them off, etc., and Wed. afternoon they will get out to the 11 businesses in the most impacted area – overlaying our maps on the published "hot zone" map – that's where we'll start first to do an initial assessment of the building and schedule a time to collect a sample. From there we'll keep working on the total list, prioritizing those businesses that call for an appointment as well as those that are more likely to serve at risk populations. Additionally, MDARD's Motor Fuels Quality & Weights & Measures staff will hand deliver the notice to every one of the 90+ gas stations with a Flint address. Some are likely not on Flint water, but we've found sometimes that the addresses we have for them are business offices, so by the end of the week, they'll all get a personal visit.
MDARD has set up an internal Incident Management Team, with Sandra Walker as our Incident Commander.
The LHD total list also included schools; since Dept. of Education has already been working on that we are not working with them.

Hope that helps. I'm sure as we have more interactions with businesses we'll have more to report.

Hi Brad,

We met with Representatives today about the Flint issue, and there were a few questions about business access to clean water and filters. Can you summarize what activities are going on (since Oct 2015) to address the needs of businesses in Flint, particularly restaurants, etc.? Are there still need to be met, and if so, what are they?

Subject: Retail firm guidance in Flint, Michigan

Good afternoon, MDARD,

Please see CFSAN's guidance on retail firms below:

- FDA/CFSAN does not have a thorough and up-to-date understanding of the situation in Flint, MI and the current advisories, if any, that have been issued by the State and local regulatory authorities.
- FDA's advice to retailers and foodservice operators in Flint, MI should be to closely follow the directives and recommendations of the regulatory authority that has issued their permit/license to operate.
- Any advice or technical assistance that FDA provides should only be at the request of, and be directed to the public officials who are engaging the local businesses.
- FDA's Food Code – Chapter 5 - has information regarding water source, quality, quantity, availability and distribution for foodservice/retail establishment. If officials from HHS or other Federal agencies are in need of information about FDA's guidance on safe operation of foodservice/retail establishments for their own awareness, they can find this information at the following link – http://www.fda.gov/Food/GuidanceRegulation/RetailFoodProtection/FoodCode/ucm374275.htm Another good source of general information is the Emergency Action Plan for Retail Food Establishments developed by the Conference for Food Protection (CFP), with assistance from FDA. That document can be found at:
- http://www.foodprotect.org/media/guide/Emergency%20Action%20Plan%20for%20Retail%20food%20Est.pdf . The CFP guidelines address the interruption of water supply and issues surrounding the **microbiological quality** of water supplies. Given the unique and evolving situation in Flint, care should be given to recognize that current directives from health officials on the ground take precedence over the general guidelines and advice that is provided in these documents.

We will pass along to our consumer complaint coordinator, as well, in the event that we receive inquiries from retail locations.

Please let me know if you have any questions,
Lisa

Subject: Today's Update

This is what I provided for today's Situation Report: Primary activities today: coordination with FDA Detroit District on their and MDARD's upcoming activities related to food, inquiry into a possible animal facility requiring follow up; draft of a document outlining federal resources that may be available to assist with broader recovery issues.

I talked with Lisa Joseph of FDA Detroit District, who said FDA is planning to conduct inspections at 5 watering points at Flint Bishop Airport starting on Tuesday, 1/19/15. They also plan to conduct a seafood HACCP inspection on Donlan Fisheries to determine the status of their water use (they were using municipal water in October and had not yet received a filter) to process seafood/make ice, and they will let us know. I confirmed that she had our updated Requirements documents and shared what our plans are for this coming week.

Confirmed that one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, Animal Industry will visit the location to check status.

Started a Resource Document – State Emergency Operations Center wants a document containing applicable potential resources available for long term recovery; SEOC has requested this back by COB Tuesday (Peter, Nancy, and Maria – need you to review/edit/add to by 4pm Tuesday). I only included some USDA grants/loans info I could find. If there's more please add.

With the Governor's request for a federal Emergency Declaration approved, FEMA's Incident Mgmt Team will be coming in tonight / tomorrow and will be looking to coordinate with state agencies. Byron Beerbower has agreed to come in for Sunday morning, and afternoon if necessary; I will be available by phone and be back in the SEOC Monday.

FDD asked for a resource request for a meeting place for Wednesday for training on water sampling; it has not been submitted since we need more details (start time, how long we need the room for, etc.)

Provided an update to the SEOC on Indiana's HPAI outbreak.

Can you confirm this is the correct address for the clinic?

Reese Veterinary Clinic G-1170 E. Hemphill Rd, **Burton** MI 48529

If so then I can follow up with GIS here or with Dan Metiva who now has access to some of the GIS mapping functions.

> Dr. Averill advised I email you regarding a situation that has come up. In following up with the various veterinary practices in the greater Flint area regarding the Flint water situation, I spoke with Dr. Susan Shanks with Reese Veterinary Clinic in Burton, MI today. Dr. Shanks states that she is unsure if she is on City of Flint water. Dr. Shanks states that (she believes) she is not paying for City water, but states that coverage maps for Burton show her practice as being on City water. Dr. Shanks states that their practice has been taking precautions with their patients for some time (giving bottled water), but would really like to know for sure if she is or is not on City water. Is there any way we can for sure determine this for her? (FYI, I did discuss with her the availability of free testing and filters, as well as gave her the website (www.michigan.gov/flintwater) for more information).

Subject: RE: please review -

Typically, if there is an issue with product (eg, a recall), consumers are told to return it to the manufacture or place of purchase for a refund. If it's a consumer advisory, then MDARD or the company may offer discard informational tips. I can't speak to testing the bottled water itself or if the state can replace it. That's a DEQ and/or SEOC question.

Thanks Jen. This reads better, but it still does not tell people what to do if they have concerns about their water. Should they be taking it somewhere; can we replace it? Also, I'm wondering if we should be providing 211 with the label names or product numbers so they can determine what water is the water being tested/in question.

Cc: Eisner, Jennifer (DHHS); Walker, Sandra (MDARD)
Subject: RE: please review -

It's my understanding the local health department determines what is considered an approved source. They, along with DEQ, test at the source. MDARD inspects the facilities bottling in Michigan, but does not routinely test the final bottled product. If we do take a sample, we don't test for lead. We're looking for bacteria and pathogens. I don't know about those companies bottling water outside the state of Michigan.

Also, I am not clear on the issue with a specific product/manufacturer.

The statement reads a little bureaucratic to me. Suggestions below.

As a few residents have raised concerns about lead possibly being in bottled or canned water, we are expeditiously testing the bottled and canned water to ensure it is lead free. Additionally, we have taken the extra steps to hold back product bearing similar product codes until the test results come back. We will also, out an abundance of caution, we will be testing batches of all new bottled water coming in to the distribution sites and working in partnership with the manufacturer to assure product integrity.

Jen, and all,

I can confirm that the DEQ stated that they would be testing the bottled water identified out of an abundance of caution.

From conversations here it appears that the testing device that is used by the public does not detect lead directly but looks for total dissolved solids (TDS). TDS is acceptable in Drinking water as it gives water taste versus the flat taste of distilled water.

MDARD does sample bottled water during our inspection of the bottlers during our normal operations. Let me know if you have any additional questions and I will try to answer the questions as best I can.

This is the map that was generated by one of the researchers and is from a published paper, with the MDARD Food establishments as an overlay.
Byron is in the State EOC today.

Our tech folks developed the attached - a list of the establishments that are in the High (Red) and Medium (Orange) zones from the map that was generated for us.

Subject: hot bed map?
Importance: High

Brad,
You mentioned that you had an overlay may showing where the higher levels of lead were found through testing, and that MDARD would be focusing on the food firms in those areas to start. A few follow-up questions:

1) Do you have a map showing the geographical area that received water from the Flint River? We've been using firms in Flint proper... are there any outside of the city?
2) Is Donlan Fisheries (3116 Corunna, Flint, MI) or inside one of these hotbeds? Could you pass along the map?
3) Nothing new on our end (yet).

Let me know if there's anything we can do to help,
Lisa

Food and drink being an MDARD issue, I took the liberty of drafting for you – but am now turning this statement over to you for your MDARD magic.
Upon approval by MDARD, Shannon can send to MSP Command for final vet and go for dissemination to 2-1-1.

Call me with any questions
Thanks
Mel.

A few residents have raised concerns about lead being present in the bottled and canned water that is being distributed through the water distribution sites. We take every concern seriously therefore we are expeditiously testing the bottled and canned water to ensure it is lead free. In the meantime, we have held back the product bearing similar product codes while we test. To assure incoming product is lead free, we will begin testing batches of new product and are working with the manufacturer to assure product integrity moving forward.

MSP-EOC-MDARD

From: Averill, James (MDARD)
Sent: Monday, January 18, 2016 3:06 PM
To: MSP-EOC-MDARD
Subject: RE: Draft for a potential Governor disaster declaration for avian influenza

Brad,

I received a call today from the Genesee Animal Control Shelter veterinarian, Dr. Cathy Anderson. She has been asked to brief their animal control officers for potential questions about Flint Water and pets. She has been to the flint water website and feels there is not enough information there for her to create what I believe are talking points. As I shared with her, be careful and do not incite hysteria, which she agrees.

Went over the need to follow same recommendations in humans is applicable to pets. Make sure family has a filter, instruct them on where to get filters, encourage pet owners to work with their local veterinarian.

I shared we would pay for testing if all other options have been ruled out and samples would be submitted to DCPAH and they would bill us.

In the end she is just looking for an FAQ that Animal Control Officers can use if they get questions. I would assume a similar document exists for the door knocking that is taking place. Is this something the JIC can develop or do we need to go another route?

Thanks,
James

Subject: Draft for a potential Governor disaster declaration for avian influenza

Plenty of other issues going on right now, but with Indiana's discovery of highly pathogenic Avian Influenza on Friday (in very southern Indiana) I wanted to get this draft document off the to-do list. I had a law student intern look at prior Michigan disaster declarations as well as those issued last year in Minnesota, Iowa, and Wisconsin during their outbreaks. If we got highly pathogenic avian influenza in our large commercial poultry farms, we'd need assistance from other state agencies and coordination through the State Emergency Operations Center. Livestock disease outbreaks are covered in the Michigan Emergency Management Plan's Animal Care Support Plan. We have made substantial progress in planning for Avian Influenza and this is one more piece to have ready or mostly ready if we need it.

I've done some further editing, and it is a big long – but easier to cut out what isn't needed at the time. One of the big issues the other states had was trucking, so that's included as a starting point. Let me know if you have any questions.

Thanks for including MDOT. Based on the draft document, it looks like a designation of specific routes could be needed if this type of incident occurs.

Subject: Today's Update

This is what I provided for today's Situation Report: Primary activities today: coordination with FDA Detroit District on their and MDARD's upcoming activities related to food, inquiry into a possible animal facility requiring follow up; draft of a document outlining federal resources that may be available to assist with broader recovery issues.

I talked with Lisa Joseph of FDA Detroit District, who said FDA is planning to conduct inspections at 5 watering points at Flint Bishop Airport starting on Tuesday, 1/19/15. They also plan to conduct a seafood HACCP inspection on Donlan Fisheries to determine the status of their water use (they were using municipal water in October and had not yet received a filter) to process seafood/make ice, and they will let us know. I confirmed that she had our updated Requirements documents and shared what our plans are for this coming week.

Confirmed that one of the locations in USA Herds with a Flint address appears to be in an area served by City water; though the premise is listed as inactive in our database, Animal Industry will visit the location to check status.

Started a Resource Document – State Emergency Operations Center wants a document containing applicable potential resources available for long term recovery; SEOC has requested this back by COB Tuesday (Peter, Nancy, and Maria – need you to review/edit/add to by 4pm Tuesday). I only included some USDA grants/loans info I could find. If there's more please add.

With the Governor's request for a federal Emergency Declaration approved, FEMA's Incident Mgmt Team will be coming in tonight / tomorrow and will be looking to coordinate with state agencies. Byron Beerbower has agreed to come in for Sunday morning, and afternoon if necessary; I will be available by phone and be back in the SEOC Monday.

FDD asked for a resource request for a meeting place for Wednesday for training on water sampling; it has not been submitted since we need more details (start time, how long we need the room for, etc.)

Provided an update to the SEOC on Indiana's HPAI outbreak.

Cases Found Through Surveillance Testing in Initial Control Area

WASHINGTON, January 16, 2016 -- The United States Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) has confirmed the presence of H7 avian influenza in 9 flocks in southwestern Indiana. These new cases were identified as part of surveillance testing in the control area surrounding the initial highly pathogenic avian influenza (HPAI) case. Testing is currently ongoing at the National Veterinary Services Laboratories in Ames, Iowa to determine the pathogenicity of these new cases.

No cases of HPAI H7N8 virus infection have been reported in humans at this time, and no human infections associated with avian influenza A viruses of this particular subtype (i.e., H7N8) have ever been reported. As a reminder, the proper handling and cooking of poultry and eggs to an internal temperature of 165 °F kills bacteria and viruses, including HPAI.

APHIS continues to work closely with the Indiana State Board of Animal Health on a joint incident response. State officials quarantined the affected premises and depopulation of birds on the affected premise has already begun. Depopulation prevents the spread of the disease. Birds from the flock will not enter the food system.

As part of existing avian influenza response plans, Federal and State partners continue to work on additional surveillance and testing in the nearby area. The rapid testing and response in this incident is the result of months of planning with local, state, federal and industry partners to ensure the most efficient and effective coordination. Since the previous HPAI detections in 2015, APHIS and its state and industry partners have learned valuable lessons to help implement stronger preparedness and response capabilities. In September, APHIS published a HPAI Preparedness and Response Plan that captures the results of this planning effort, organizing information on preparatory activities, policy decisions and updated strategy documents.

The United States has the strongest AI surveillance program in the world, and USDA is working with its partners to actively look for the disease in commercial poultry operations, live bird markets and in migratory wild bird populations.

Anyone involved with poultry production, from the small backyard to the large commercial producer, should review their biosecurity activities to assure the health of their birds. To facilitate such a review, a biosecurity self-assessment and educational materials can be found at http://www.uspoultry.org/animal_husbandry/intro.cfm.

In addition to practicing good biosecurity, all bird owners should prevent contact between their birds and wild birds and report sick birds or unusual bird deaths to State/Federal officials, either through their state veterinarian or through USDA's toll-free number at 1-866-536-7593. Additional information on biosecurity for backyard flocks can be found at http://healthybirds.aphis.usda.gov.

Additional background

Avian influenza (AI) is caused by an influenza type A virus which can infect poultry (such as chickens, turkeys, pheasants, quail, domestic ducks, geese and guinea fowl) and is carried by free flying waterfowl such as ducks, geese and shorebirds. AI viruses are classified by a combination of two groups of proteins: hemagglutinin or "H" proteins, of which there are 16 (H1–H16), and neuraminidase or "N" proteins, of which there are 9 (N1–N9). Many different combinations of "H" and "N" proteins are possible. Each combination is considered a different subtype, and can be further broken down into different strains. AI viruses are further classified by their pathogenicity (low or high)— the ability of a particular virus strain to produce disease in domestic chickens.

Subject: Potential Assistance Programs

State Emergency Management Coordinator:

As discussed in this morning's briefing, your agency has been identified to research potential assistance programs (private, state, federal, etc.) that may be available to address the short- and long-term recovery needs in response to the Flint water incident. Earl Zuelke, FEMA Long-Term Recovery, has made contact with some federal agencies to assist with this research. Feel free to touch base with him in the SEOC.

Attached is a copy of the Non-Stafford Act Recovery Guide. Appendix 2 (pg. 24-26) provides a list of some potential federal programs. This list is **not** all-encompassing; however, it will provide a starting point if any of these programs may apply to the response and recovery for this incident.

Provide the following information, *at a minimum*, on potential assistance programs for individuals and/or government support in response to this incident:

- Program Name
- Agency Responsible for program
- Point of Contact
- Type of Support (Individual or Government)
- Eligibility Guidelines
- *Benefits Available*
- Application Process

This information shall be submitted to Brianna Briggs, the Recovery Branch Chief, at briggsb3@michigan.gov by **COB Friday, January 15.**

Let Brianna (cell phone below) know if you have any questions on this request.

Thank you,

Brianna Briggs
Recovery Branch Director

AID - I've heard back from the GIS staff at the State Emergency Operations Center about the five premises in our livestock database with Flint addresses. They indicate that only one is in the Flint water service zone, the one on our list as "inactive" - Joann
(Neither Dr. Smith nor Dr. Vanderklok were able to reach anyone at that number).
Could AID put this into an assignment for a field staff visit to check conditions on the ground?
thanks - please let me / whoever is in the SEOC know what happens.
Brad

Subject: Updates - Water and Birds

Hi, Brad.

We are working diligently on Indiana HPAI related activities this afternoon. We are sending out communications to AID staff, MAPI,
MSU-E, and all Michigan veterinarians. This could generate calls over the weekend so we wanted to give you a heads up. We will send you copies of the messages we send to MSU-E and veterinarians.

We have nothing additional to report on the Flint water situation. Has anyone at the SEOC had a chance to determine whether or not any of the potential livestock facilities are on city water?

Subject: Requested Information - Health and Environmental Branch

Lt. Covey,

Below, please find the bullets of information requested from the Health and Environmental Branch. Please let me know if you have any questions.

MDARD

- Updated requirements for food establishments using City of Flint water; mailed on 1/14 and includes offer to collect samples for free.
- Visiting food businesses to ensure they understand requirements.
- Will be visiting restaurants, in coordination with Genesee County Health Department
- Reached out to veterinary clinics and coordinated with the Genesee County Animal Control to contact animal related businesses to see what water system they're on and ensured that they were familiar with the Flint water situation.
- Reached out to Flint Food Works / Food Hub and the Food Bank of Eastern Michigan and offered additional assistance.

MDHHS – Health

- Activated the Community Health Emergency Coordination Center (CHECC)
- Staffing a hotline to field calls that were to be sent to the Local Health Department while the LHD is closed for furlough, weekends, and holidays
- Developing a nutritional plan for education and messaging
- Gathering information in preparation for disaster behavioral health response, if a presidential declaration is approved.
- Epidemiology branch continues to assist work with local health department on blood lead testing and case management
- Communicating to healthcare providers through WebMD Medscape.
- Coordinating health information messaging with the JIC.

MDLARA

- Ongoing effort to reached out to all licensed Healthcare facilities in the affected area to gather information and access any needs they may have, to include: Child Care facilities, Adult Foster Care, and others.
- LARA and it's Bureau of Construction Codes - Plumbing Division will complete the "Freeman School Faucet Replacement Pilot." This weekend to include:
    - On-site assessment plumbing to identify plumbing components of concern and prioritize sample sites.
    - Identify and replace faucets, lines, connectors with lead free components.
- Re-collect water samples to test and analyze.
- Offered to assist with lab testing, utilizing the MIOSHA Lab and Scientists as appropriate in coordination with DEQ.
- Provided MDHHS with a list of licensed healthcare facilities to coordinate the distribute nutritional information.
- Worked with the Office of New Americans to assist with translation of messaging

MDEQ

- Facilitating supply of water test kits to all Flint Water Treatment Plant customers in collaboration with City and County personnel.
- Laboratory services is processing samples for lead and copper analysis.
- Providing staff at SEOC during all operational hours to coordinate agency services, capabilities, activities and response to resource and information requests.
- Providing staff support at the Joint Information Center.
- Coordination and cooperation with various state agencies for sampling plans and implementation strategies for all state regulated facilities to include the provision of resources.
- Staffing at the local level to assist with resource and response management
- Verified NSF/ANSI 53 certifications of products delivered to citizens
- Produced a video of a water test sampling video for public guidance

Thank you,
Jennifer

Subject: call on nutrition for Flint

Good morning,
I just wanted to let everyone know about the conference call this morning.
There was a conference call this morning with Gloria Zunker on nutrition. MDE was also on the call.
We will be coordinating nutrition efforts and adding UDIM, WIC, Flint food Bank(s) and MI Fitness Foundation to the group.

A few things discussed

- Handout on nutrition being finalized, then MDE to send to schools and licensed day care centers
- MDE has been in touch with USDA to see if they can increase fruit and vegt's to schools
- Superintendent of schools to talk with superintendent of Flint schools on having breakfast in the classroom, which is not currently being done
- Want to work on getting foods high in iron, including heme Iron foods, vitamin C and Calcium for schools, daycare, and pantries.
- They are aware of the MDARD notification sheet going out to businesses.
  We will be having a conference call next Thursday to discuss other items the departments are doing in regards to nutrition and our current list of items from today's meeting.
  There is federal money that could help with efforts.
  I mentioned that UDIM may be working on milk donations. They will be invited to the call next week.

MSP-EOC-MDARD

From: State of Michigan <MISOM@govsubscriptions.michigan.gov>
Sent: Thursday, January 14, 2016 5:29 PM
To: MSP-EOC-MDARD
Subject: Volunteer Opportunity in Flint

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, https://www.surveymonkey.com/r/28NVJBL

To volunteer on Sunday, January 17, https://www.surveymonkey.com/r/26NMJKK

To volunteer on Monday, January 18, https://www.surveymonkey.com/r/26P7P5G

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Hello,

Attached is a list of the establishments that are in the High (Red) and Medium (Orange) zones from the map that was generated for us.

I was able to take the spreadsheet, import it into a web based mapping software, allow it to map all the establishments within those zones then replicate the "Zone" lines from the map. It then let me export any of the establishments within those lines.

If you have any questions, please let me know! ☺

Thank you,

Yes, a picture really is not any help to us. If we could get it in the .pdf format, that would help a bit, but the best would be a listing of addresses rather than a plotted map. That way we can populate our own maps for inspectors, etc.

Thank you,

Subject: AID Flint Water Update for January 13, 2016

Brad,

AID is continuing to refine the list of commercial pet animal facilities and veterinary clinics. We have no additional contacts made to report.

The potential livestock facilities have been called again with no phones being answered. AID is assembling a map of the farms and is planning to have staff visit the farms in person.

Phil - At this time I don't see that we (MDARD) will be looking for federal assistance for the things we do with food and agriculture. We have updated our guidance for food factilities and that is going out today and we'll be doing follow up with those facilities. We may be looking for assistance with long term recovery related to food and nutrition, but that involves multiple state agencies here in Michigan.

Hi Brad,

I have been following the situation in Flint including updates on the MI website, Taking Action on Flint Water.

This morning, I attended the FEMA Region V brief and there was no talk of the RRCC activating in regard to the Flint water situation.

Any needs you foresee in regard to Federal assistance for food and agriculture at this time?

Yes, a picture really is not any help to us. If we could get it in the .pdf format, that would help a bit, but the best would be a listing of addresses rather than a plotted map. That way we can populate our own maps for inspectors, etc.

Thank you,

Subject: observations from yesterday

Cap,

Here's a summary of things that were brought up in the two meetings I attended yesterday and some thoughts on possible improvements. I offer them with the understanding I may not have the full backstory on every situation.

SEOC

- GIS is being asked to do A LOT. Do we have all the staff we need there?

EOC

- Michelle needs assistance:
  - She is attending outside meetings and lunches with voluntary orgs
  - If Ginna is designated for the role, she should cover the meetings, or a deputy ops person should be assigned. Henrik could not get sit rep sent to SEOC because Michelle wasn't available to review.
- Chris is out there self-congratulating (I'm the IC doing all xyz); going off message (won't recommend bathing in water)
- Lauren – see below, but she is giving direction (mis-direction) in local eoc, saying she represents SEOC, and also mis-directing ARC (state doesn't need as much data as they say, it slows us down too much)

ARC

- I believe Dave is trying hard to cooperate, but he's getting mixed messages from Ginna/Lauren/SEOC. Chain of Command is not consistent from top to bottom.

VRC

- ARC is aware of complaints but has timed people waiting; have managers going through the lobby every 5 minutes to make sure no one is waiting.
- They have a mechanism (form) for receiving requests for volunteers, but it doesn't seem they're getting mission assignments.
- I'm not sure there's a broad understanding that volunteers can be requested for anything or by anyone other than EOC/SEOC.

Lauren

- Data by Red Cross: Dave G is trying to be as responsive as possible. Lauren was at meeting and said as close to verbatim as possible "the state says they need all this data, but they really only need this." She represents herself as being part of the SEOC, so they feel they're getting accurate information.
- Lauren indicates NG trucks are coming back full. Supplies are not actually going out because people won't open their doors to uniforms/government. Is she trying to boost ARC? I suspect truth is in the middle. But it's worth checking into the claim I think.
- Lauren was insistent that the end goal was to have a verified filter in every hand (or a rejection). Does that set the bar too high for what we communicate at the end of Sunday?

Ginna

- ARC teams. They had been asked to provide 12. Ginna suggested they didn't need to send that many. They hadn't heard of a change to their mission from SEOC so were planning to stick with 12.

- Picking winners/losers. Spreading rumors about ARC being incapable.
- Tony Lasher, Director of the Flint Red Cross, communicated he was very upset and frustrated at the comments passed to him through the United Way that Ginna had stated in a meeting with the Mott Foundation that Red Cross is not capable and should not be coordinating community meetings. Mott and United Way are both funders of American Red Cross, and he needs to maintain their (currently good) working relationships with those community partners.
- Tony specifically also asked several times for an explanation of Ginna's role/assigned tasks because they couldn't detect that there were any boundaries. I indicated that it involved donations management, but I would follow up.
- Deals with people behind closed doors; doesn't keep information flowing freely. Holds too much close.

Messaging

- JIC is not making space for local partner agencies (I believe Michelle may have reported this to you already)
- Local agencies should have direct line to JIC (info does not need to be passed through EOC).
- Businesses/restaurants/chamber are concerned that good messaging is not getting out (no water quality problems on Main Street, etc.)
- Messaging is very mixed: Chris doesn't believe water is safe for bathing; some are getting message bottles aren't safe. Some filters aren't safe. Britta has an image problem because early on, the cartridges in Britta filters weren't of the appropriate rating. People lump them all together.)

Logistics

- Lauren indicated NG trucks are coming back full and not going through inventory much at all. Blames it on people not wanting to open doors for government. She made it sound extreme. I did hear it from a couple of people at the community leaders' meeting, but difficult to ascertain how bad it is.
- If true, can we use more volunteer agencies to spearhead with their vehicles and add volunteers?

Community Leaders/Partners

- MTA is stepping up significantly, providing transportation for volunteers to/from ARC HQ/VRC
- MTA exec director indicated they have 83 busses that can be utilized mid-day between rush hours.
- There are many engaged community groups that have been working this for a long time. The local organizations are very much engaged, and there are several potential leaders.
- Of the "usual" MI-VOAD partners, Red Cross, Team Rubicon and Salvation Army are currently engaged. Others nationally are expressing interest through the FEMA VAL.
- A bright spot of the SE MI Recovery, a United Methodists startup, are bringing help from Detroit.

Recommendations

- Assure a ready reserve of GIS techs.
- Assign Deputy Operations Chief at EOC
- Define Lauren's role and limitations
- Require daily bullets of tasks/accomplishments from Lauren and Ginna.
- Not enough info makes it into MICIMS. (Lauren, Ginna, Chad Veeser do not have logins as far as I know. Perhaps they shouldn't, but there needs to be a daily reporting mechanism).
- Define Ginna's role: Limit to RECRUIT donations and acquire volunteer commitments from NCCC and Americorps. Once recruited (and not steered away from other organizations) leave assignments and deployment to logistics and VRC.
- External Affairs is being covered ad hoc by multiple people. An external affairs person/liaison needs to be assigned to the EOC to handle requests for info and VIP visits.
- Business Community: Identify a Liaison.
- MIVOAD.
- Investigate the ability to provide an interactive Google Map people could geolocate on and see ALL PODS, not just ours, would be great.

- Chris also said we should limit PODs to "get the most even coverage." I get that logistics is challenging, but with an in demand commodity, shouldn't we have as many PODs as we can maintain inventory status from?
- Giving shout outs to good partners (MTA, Penske, ARC, etc)
- Logistics needs additional support (e.g., one person for trucks, one person for water, etc.)
- Logistics is three lanes (one lane recruiting/acquiring; one lane deploy; one lane track)
- A board for incident plans or a secure website with basic plans, protocols, and contacts would boost coordination.

Subject: urban

Hello –

I'm not sure whether any use has yet been found for the background text I had provided to you earlier this month, framing the current emergency in the context of long-term historical trends involving our older urban areas, but as part of longer-term planning beyond the current emergency, a broader approach should probably be taken. Our own internal news/media overview emails have pointed to various articles (e.g. below) referring to detected lead problems in other areas. Such problems do not necessarily stem from those urban water systems (i.e. paint, faucets, and pollution effects might be bigger causes in these areas) but it is something that probably needs to be put on a list for consideration, especially since there is such a large population living in the older urban districts where some indications of a problem have been reported, as in the following report summary:
http://bridgemi.com/2015/12/far-from-flint-lead-remains-an-irreversible-scourge/

A speaker has been scheduled by MSU next week about the Flint situation.
I'm not sure what the tone will be, although the inability to distinguish between "lead" (Pb) and "led" (past tense) in the description suggests that it might have been thrown together opportunistically.

Thanks Michael, I hadn't seen that, but it's great! The only question I had, and you might check with Catholic Charities, in terms of donating specifically of filters, since they have to have a certain NSF/Ansi rating to filter Lead, Catholic Charities might prefer that only come in terms of money.

Tom -

Thanks for your note. The diocese is not setting up any new funds, but asking our parishes to partner with Catholic Charities of Shiawassee and Genesee, to promote the option of making direct contributions by visiting http://www.catholiccharitiesflint.org/ .

We've also been pointing pastors and bulletin editors to Bishop Boyea's most recent statement: http://dioceseoflansing.org/bishop_boyea_flint_012016

I hope this helps.

Good morning Michael,

I was talking with Fr. Mattson about this, and he suggested I get in touch with you. Is the diocese setting up any fund, or is the Faith in Flint initiative doing anything specific with regards to the water situation in Flint?

I'm being tasked here to serve as liaison between MSP and the regular "Voluntary Organizations Active in Disaster" which includes the national arms of Catholic Charities and St. Vincent de Paul (and they're both pretty heavily involved locally). I just wanted to make sure we weren't missing any opportunities for the diocese or the schools.

Thanks for any ideas, and I'm available to help find answers if there are any questions.

shot captures their list of items that we're interested in them addressing, but Ann asked that we get a sense from the team (and I want to get it from the staff and PPC as well) of what we would prioritize in terms of renovation work that we'd like to have done first.

If you would, please take a look at this sheet, and then fill out the form ranking the top four priorities for our master planning process. I've added "renovation of church sanctuary and lighting" as well.

<Master Planning Aspects.png>

If possible, please take some time to complete the form by the end of the day on Thursday.

Thanks,

Subject: RE: Sample Silver Jacket team charters attached, something to start Michigan's with

As you know, I'm SOMEWHAT familiar with Silver Jackets, but not in depth.

I note in each state's agreement, the vision is stated slightly differently...Iowa mentions sustainability but limits it to flood hazards, Wisconsin generalizes "hazards," Minnesota specifies "natural hazards."

Thinking of our current emergency/disaster, how could we broaden the scope to milk every droplet of technical assistance we could hope to get from USACE? And though they have specific missions, it seems to me the vision should be "all hazards" commensurate with national "doctrine," if not practice.

I'll be in Flint the rest of the day.

Thanks for your thoughts.

Hello -
Silver Jackets has been the means by which the U.S. Army Corps of Engineers coordinates with state government departments and other agencies. Most states have formalized a Silver Jackets team, but Michigan still hasn't.
http://silverjackets.nfrmp.us/
Matt, Joel, and I have been participants in these meetings for several years, and it feels comfortable to make the coordination official, using USACE's preferred method of agreeing to a charter.
I'm not sure whether Matt has discussed this at all, but it looks like something that would eventually go beyond my authority to make official. Therefore, I'm passing along some info about it, in this message to you.

Thanks,

Subject: Sample Silver Jacket team charters attached, something to start Michigan's with

All,

If you are interested in working with a small sub-team to work on a draft charter for Michigan, please see the attached samples of other state charters and let me know what you'd like to see in Michigan's document. Wisconsin just had theirs drafted and signed. Minnesota is currently working with the attached copy for updating it. Indiana is in the process of updating theirs also.

Please let me know if you will have a chance to collaborate on this before our next MI SJ meeting on Jan 29th. It would be great to have a draft document to discuss at that meeting.

Thank you,
Mary

Subject: RE: Flint water crisis impacts

Catherine, thanks, this is great info to have.

And yes, the reason we ask is because FEMA programs cannot duplicate benefits. So, while FEMA would do a more in depth analysis if and when their programs are implemented, it helps at the beginning of emergencies and disasters to have a fairly reliable baseline number of how many properties are insured.

Tom,
DIFS conducted a data call of authorized Michigan insurers and asked them to provide the number of total current homeowner policies in the zip codes that you provided below.

The insurers that responded to the data call reported an aggregate number of 31,087. While we are still waiting for some additional responses, the insurers that represent the majority of the market for premium written have reported. Any additional numbers will be minimal. We did receive some inquires (from both our leadership and insurance industry groups) as to why we requested this information. Is there an answer that you can share with me at this time that I can share with them?

Also, I feel I should reiterate that a homeowner's policy insures property against risks of direct physical loss that are not specifically excluded under the policy. A homeowner's policy excludes "discharge, disbursable, seepage, migration or escape of pollutants" unless it was caused by a covered cause of loss. The situation that occurred in the City of Flint would not be a covered loss.

Let me know if you any additional questions.

Thanks.
Cathy

Thanks Cathy, That's very helpful. We're trying to get the number for the presidential request, and we can make a call to the city, though they are usually not very precise, but we can work with that. I think going forward, any assistance we are able to get from FEMA is still going to need those numbers, so if you could go ahead with that, that would be great.

Subject: RE: Flint water crisis impacts

Tom,
Though DIFS does not collect policy information from insurers, we do have the ability to request from them the number of Flint homeowners policies they write by conducting a data call. Please provide me with the exact zip codes that you would like included, we will issue the call and gather the information. It is possible we could provide you with an aggregate number early next week.

I have attached a copy of the relevant pages from the City of Flint's 2014 Comprehensive Annual Financial Report (CAFR) that outlines their commercial insurance coverage. This is the last report we have on file. The City does have the 2015 CAFR posted to their website. I did review the report and it appears the coverage is the same.

Please let me know if you have any questions.

Cathy,

Does the state have a database, or is there an easy way to find out what percent of homeowners have property insurance? And what levels of insurance a city such as Flint has itself?

Tom,
We can track complaints and/or calls from consumers with questions or issues with claim denials. However, DIFS would not have immediate access to the number of claims filed with health or property insurers relating to elevated blood lead levels.

As of today, we have received no formal complaints or consumer calls relating to elevated blood lead levels. DIFS will continue to track complaint and/or calls and I will let you know if we do.

Tom,
The Department of Insurance and Financial Services (DIFS) offers the following in response to your request for a summary of agency information relating to the water crisis in Flint:

Similar to Medicaid coverage, individuals with private health insurance would have testing and treatment covered as long as a doctor ordered the services. Anyone with questions regarding their health insurance coverage or any health

insurance claims that are not approved by their health insurer can contact DIFS toll free at 1-877-999-6442 for assistance.

A homeowner's policy insures property against risks of direct physical loss that are not specifically excluded under the policy. A homeowner's policy excludes "discharge, disbursable, seepage, migration or escape of pollutants" unless it was caused by a covered cause of loss. The situation that occurred in the City of Flint would not be a covered loss.

DIFS stands ready to assist anyone who has questions regarding their health or property insurance.
Let me know if you have any questions.

Subject: Flint water crisis impacts

Good morning all,

We are preparing the draft of the letter from the governor to the president to request assistance. We are attempting to send this as quickly as humanly possible.

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

Thanks very much for your assistance,

My understanding is that the local EM has to make the call. If that's been done, I think Dave Gutierrez would be a good point of contact on the ground in Flint. If not, I believe we need Chris DeVriendt to get in touch with the 2N EMs and make the official ask, at which point we can get them in touch with the VRC (unless Chris has another mission assignment he'd like to put them on).

Wendy, am I correct in that?

Subject: RE: Volunteers for CERT

My understanding is that the local EM has to make the call. If that's been done, I think Dave Gutierrez would be a good point of contact on the ground in Flint. If not, I believe we need Chris DeVriendt to get in touch with the 2N EMs and make the official ask, at which point we can get them in touch with the VRC (unless Chris has another mission assignment he'd like to put them on).

Wendy, am I correct in that?

Subject: Volunteers for CERT

Tom & Virginia,

I have had a couple of requests from EM programs in 2 North about the possibility of sending their CERT to Flint to help out. I was in the SEOC yesterday and was given the name of Victoria from ARC at 810-730-5922. When I disseminated this information out, the person at the end of this tx number was not Victoria or helpful. Can you provide contact information for me to give to my programs in case they want to assist?

Thanks.

211 sounds like a great option. If Chris didn't call them, can they still deploy as a CERT? or could they deploy together but as "unafilliated" volunteers?

I will be in the EOC in a few minutes. I will talk to Chris and we will coordinate.

I am waiting to hear from Tom Page regarding the 211 calls - this could be a very nice role for CERTS to assist with the call volume. We will be first trying to utilize other state resources before going to volunteers.

We have a lot of volunteer groups at this point and we are trying to find roles for them. If Chris does make the decision to call them in, I will recommend he have Chad Veeser be the point of contact in coordination with Red Cross and the Untied Way. As of Friday, I believe a Untied Way staff member is taking the role of Victoria.

Subject: Wednesday Jan. 20 update from the Flint Water Response Team

FLINT WATER RESPONSE TEAM

UPDATE | WEDNESDAY, JANUARY 20, 2016

This daily update is being issued in order to provide the latest information regarding actions and available resources.

Yesterday, Governor Snyder delivered the State of the State address, in which he focused on Flint, a proud city in which residents are unable to drink the water that comes into their homes. Governor Snyder acknowledged that this is unacceptable and stated that this is a problem that we will fix, and fix quickly.

The Governor announced a new $28 million state supplemental spending bill that will fund additional bottled water, faucet filters and lead-testing kits for Flint households. The first step will also provide wraparound services, such as diagnostic testing, nurse visits and environmental assessments, as well as access to child and adolescent health centers.

Today, Governor Snyder is meeting with legislators and urging them to take immediate action on his Flint recovery plan.

This will not be the last budget request for Flint. Additional resources will be needed and asked for in the FY 2017 budget presentation.

A new website was also announced where you can sign up to volunteer in Flint: **www.HelpForFlint.com.** This site also has information on how to donate to the organizations working to get clean water resources to residents and who are focused on the long-term impacts on Flint's children.

In addition, Gov. Snyder has submitted an appeal to President Obama after the President denied a major disaster declaration-- a move that could potentially bring additional and much-needed resources to help the people of Flint.

REMINDERS

- For Flint water assistance: Dial 211 or visit www.mi.gov/FlintWater
- To volunteer or donate: visit www.HelpForFlint.com
- Residents should install filters to their taps to ensure they have immediate and ongoing access to safe water. Only run cold water through the water filter and use filtered water for drinking and cooking. Monitor the cartridge on the filter and replace as needed.

WATER RESOURCE LOCATIONS
These sites are open seven days a week from 9 a.m. to 9 p.m. with the following resources:

- Bottled water
- Water filters
- Replacement cartridges for water filters
- Water testing kits pick-up
- Drop-off location for water testing kits

Fire Station #1
310 East 5th St.
Flint, MI 48502

Fire Station #3
1525 Martin Luther King Ave.
Flint, MI 48503

Fire Station #5
3402 Western Rd.
Flint, MI 48506

Fire Station #6
716 West Pierson Rd.
Flint, MI 48505

Fire Station #8
202 East Atherton Rd.
Flint, MI 48507

We will continue to work to improve the water situation in Flint. Community members and local officials are working together to make sure we hear and respond to concerns. Governor Snyder will continue to keep you updated on the latest news and information. **If you don't find the resources you need by dialing 211 please call the Governor's office directly at 517-335-7858.**

Subject: RE: 2-1-1

Richard,

My technology manager pulled the statewide call records for last night and the single longest wait time for all eight regions was 14 minutes at the Detroit center. Detroit was not taking Flint calls at that time. If the governor's office can share the voice mail or provide the number the caller used, we can pull the specific call information and determine when they called and if there was some delay our reporting system somehow missed.

Today is another story.

We are experiencing long delays today and do not have any additional capacity available to meet the goal of answering calls in under two minutes. Every available agent in the state, as well as supervisors and managers are handling calls, but the demand is so high that wait times are as long as 25 minutes. We are using our callback feature to offer callers the option of keeping their place in the queue and having 2-1-1 call them back when an agent is available, but the times are still much longer than we would like. The volume today appears to be a combination of demand based on the governor's speech and direction from the state web site to call 2-1-1, along with today being the first day call 2-1-1 to schedule to appointments for free tax preparation.

We doing everything in our power to respond to callers in a timely manner, but unless the volume goes down or a way is found to increase 2-1-1's capacity, we are at our limits.

Richard,

We're checking the call records for last night to verify wait times. Michigan 2-1-1 had additional staff on duty until 8:30 pm last night to handle any surge in call volume resulting from the governor's state of the state address. Through 9:00 pm there was no waiting time to get through to 2-1-1.

Will let you know what I learn from the overnight shift.

Subject: RE: FYI: follow-up to meeting

Thanks Joel,

Here were just a few thoughts from DCH and LARA. Pretty specific for what you needed now, but we can hang on to these as it gets fleshed out more.

DCH
"Wondering if it would be possible to add a question to the script. If they answer that they have filters, could the question be asked, "how long have they been lasting, or how often are you having to change them?"

They were curious once questions are scripted if they could have input.

And from LARA:
"LARA licensing staff have been contacting each licensed facility asking the following questions:

Are you on the Flint water system
Have you received filters
Have you received cartridges
Have you received bottled water
Are you aware of Michigan.gov/FlintWater
Do you need any other supplies, if so what
How many faucets are for drinking water
How many residents in your facility
Are you testing your water
If yes, when was the last test completed
Do you need your water tested

These questions are being asked to determine the resources needed for the specialized facilities. Once we have numbers and needs accumulated, we plan to have our staff go to these facilities and provide the supplies. This was a plan developed last week. I have looked at the questions on the IPAD and believe that over half of them have already been answered due to our survey. We could include someone with the IPAD to enter the data that hasn't been already provided.

Perhaps since each agency has specialized licensed facilities, we need to have a sit down - excluding MDE since the schools are already on our lists and in the works."

Good afternoon,

We are putting together an abbreviated plan for distribution/canvassing protocols for the phase 2 canvassing. Since I had spoken with Karen about this before Tony asked several of us to put together a plan, could I ask each of you to quickly breeze through this to see if its consistent with anything your department may be planning? And if there are any things left out that you think should be there?

Karen, I had already outlined a few things in red that I added to the first draft given to me, so please let me know if those are off base or need something added.

Thanks, Tony is asking for this by 2. If there's any chance you could get a quick review back to me by 1230 or 1, that would be very much appreciated.

Thanks much!

Importance: High

All,
Attached is my attempt to capture the essence of our meeting with Tony this morning. Get out your big red pen and have at it! Please send me your edits in "red" font. I will compile them and then send the final to Tony. I would appreciate having your edits by 1:30 at the latest as Tony would like the final version by no later than 2:00pm.

Thanks,
Joel

Attachments: Commodity Distribution ConOps 2016-01-20.docx

Importance: High

Good afternoon,

We are putting together an abbreviated plan for distribution/canvassing protocols for the phase 2 canvassing. Since I had spoken with Karen about this before Tony asked several of us to put together a plan, could I ask each of you to quickly breeze through this to see if its consistent with anything your department may be planning? And if there are any things left out that you think should be there?

Karen, I had already outlined a few things in red that I added to the first draft given to me, so please let me know if those are off base or need something added.

Thanks, Tony is asking for this by 2. If there's any chance you could get a quick review back to me by 1230 or 1, that would be very much appreciated.

Thanks much!

Hi Kasey,

This particular program is the public schools in cooperation with the Genesee County Health Department. Any child is free to come for testing.

I was able to make contact with Suzanne Cupal from the health department, and she said you could contact her directly at 810-768-7970. She also indicated there will be a clinic at Freeman Elementary on the 26th from 3-6pm.

She also indicated this page on the county health website could possibly provide you some more info as well:

http://www.gchd.us/flint_drinking_water_resources.php

Let me know if there's anything else I can do.

Also, there's a community partners meeting in Flint on Thursday at the Red Cross. I'll be there on behalf of the state. If you or someone at the schools is interested, I should be able to get you an invite to that.

Tom,

Thank you for checking in with me. I apologize for not getting back with you sooner. Right now we have three schools that are on Flint water. In each location we have been receiving donations of bottled water to give to students and staff, so we are in good shape. I couldn't tell you how stocked up they are though. The best person to speak to regarding this would be Kasey Cronin, Executive Director for Genesee County Catholic Schools. She is our "boots on the ground" administrator in that region and she will have better answers for you. She can be reached at or at kcronin@powerscatholic.org

If you have any questions or would like a further explanation from me, don't hesitate to ask. I hope this helps. Thank you for all you do.
God bless,

Good afternoon Sean,

I'm Father Mattson's soon to be former business manager at Res. But I'm currently with the Michigan State Police Emergency Management. Since Governor Snyder's proclamation of a State of Emergency on Tuesday, we're coordinating response and recovery activities. I wanted to check in with you and see if you've been getting all the support/communication you need from the Department of Education or otherwise on the needs the schools in Flint may have relative to emergency water and testing.

Please let me know if you need anything.

Sincerely,

Tom Weber

Subject: CRITICAL NEED from MI VOAD and Partners: Door-to-Door Work in Flint
Importance: High

There is an urgent need for up to 200 volunteers a day to support door-to-door delivery of water, test kits, and filters in Flint. **This is a critical provision of water necessities for the residents of Flint.** And we need your help!

Individual volunteers will need to go to the VRC directly. People coming to the Volunteer Reception Center will receive a brief training and orientation. Volunteers should plan on being available for a minimum three-hour assignment. While many assignments will occur on the same day the person registers at the Volunteer Reception Center, some assignments for tasks such as data entry, warehousing, operations support, and water testing kit assembly (kid and family friendly) may begin on later dates.

For groups/VOADs only, please contact Victoria Fryer (see cc'ed email: victoria.fryer@redcross.org). To engage in this opportunity, please reach out to her to determine how your organization can plug-in.

Registering through the VRC will occur at the Red Cross building on 1401 S. Grand Traverse Street in Flint, before you start work in the community. The Volunteer Reception Center is open on Monday, January 18, Martin Luther King Day, from 9:00 a.m. to 7:00 p.m and throughout the week (7 days/week).

For additional details or questions, *please call Justin Bays, cell number: (justin.bays2@redcross.org)*. The United Way of Genesee County along with its partners, 211, and with support from the Michigan Community Service Commission, continue to partner with the Red Cross to stand up this Community VRC, and you may also inquire w/ 211 directly for additional details re: the Flint Water Recovery.

Thank you!

Thank you – I did get this from Chad.

I also touched base with Tom Page at 2-1-1 today. It has not been confirmed that United Way will take over VRC operations. They are considering it, but concerned about their ability to staff and physical space so they have not yet made this commitment.

Date: Wed, 13 Jan 2016 21:28:50 +0000

1. The overview is good detail to use re: the VRC. Please send along to the group.

2. Notes (my apologies for innacuracies):

- Jeannie – Region 5 FEMA Val. Will be out of the country and Katie Halliday will fill in for the interim.
- Zach Baker – State Police/Homeland Security. Update on current big picture details.
- Peter Plumb – United Methodists. Have multiple sites at churches in the Flint area. Would like help getting word out. JIC needs info, and 211 could also list as a partner.
- Annette and Raven Wright – Alafia. Starter water distribution last year, and have partnered with Pierce Elementary.
- Nick Meijer – Hope Animal-Assisted Crisis Response. Can have teams come in to volunteer. K-9 support (3 teams). Alafia would like support. *Is there housing for volunteers?* Justin to look in to this
- Virginia Zimmerman – DHHS/EMS Emergency Response and Medical Reserve Corps. Level 2 activation. Info gathering now. Mon-Sun availability, 8am-8pm. Willing to support door-to-door, data entry, etc. Medical and general volunteer lists. 8000 in total database state-wide, 83 general category in Genesee. *Need official request from SEOC to activate.*
- Diana Brook – Adventists Community Services. 300+ volunteers available. Also have water. Would like to send along water (see below).
- Ken Sutter – MDS and President of MI VOAD. Gene Rivers and LDS Church has water and volunteers. Chad gave details earlier (and see below).
- Mary Lloyd – Presbyterians and Secretary MI VOAD. Will notify Presbyterians and will work w/ Peter re: communications of United Methodist Church sites. Peter to help w/ language for release of info.

- Justin Bays – Red Cross. Review of VRC and general job opportunities – as many as possible (for now) to staff *firehouse (just found out the hand over timing and amounts are in flux as of this moment), door-to-door canvassing, data entry, Community VRC staffing, and more to come!*
- Chad Veeser – MCSC. Will send details (here). Supporting response and will facilitate volunteer requests and job descriptions from EOCs to and from VRC.

3. Details re: water donations:

AMERICAN RED CROSS - EAST CENTRAL BAY CHAPTER
1401 South Grand Traverse Street Flint, MI 48503
(810) 232-1401 Main

> **Subject:** FW: Freeman - New Faucets
>
> Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division, will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following DEQ's initial testing. Twenty-two outlets did not show elevated lead

exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets- $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Subject: text

Number 8
In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

Number 9
All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

Subject: RE: final agency edits

Here is what I have now:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare a Major Disaster and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Assuming that we request both, I think this will be sufficient. Thanks!

Subject: RE: Data request for Flint Water Crisis

Teri,

In response to the urgent request for average employment by establishment in Genesee County/Flint, Corporate Research has prepared the following assessment.

Because proprietary sources (i.e. Dun & Bradstreet, InfoUSA) tend to have incomplete and/or exaggerated employment estimates, we rely upon the Bureau of Labor Statistics, which provides the information at the county level. This gives an idea of the situation in Flint.

Genesee Covered Employment/Establishments, Private	Preliminary
Total covered employment (Jun '15)	116,090
Number of (covered) establishments (Q2 2015)	6,723
Average no. employees per establishment	17.3

Source: BLS, QCEW June 2015 preliminary employment/establishment estimates.

Genesee Covered Employment/Establishments, Private, Less GM	Estimated
Total covered employment (Jun '15)	109,796
Number of (covered) establishments (Q2 2015)	6,717
Average no. employees per establishment	16.3

Source: BLS, QCEW June 2015 preliminary employment/establishment estimates; GM reported estimates.

GM observed employees, Genesee County	*6,294*
GM locations, Genesee County	*6*

Source: http://media.gm.com/media/us/en/gm/plants-facilities.html

http://media.gm.com/media/us/en/gm/company_info/facilities/cca/davison.html

http://media.gm.com/media/us/en/gm/company_info/facilities/stamping/fmc.html

http://media.gm.com/media/us/en/gm/company_info/facilities/toolling-ctrs/flint.html

http://media.gm.com/media/us/en/gm/company_info/facilities/cca/flint.html

http://media.gm.com/media/us/en/gm/company_info/facilities/assembly/flint.html

http://media.gm.com/media/us/en/gm/company_info/facilities/powertrain/flint.html

Though we do not generally rely upon the employment numbers from Dun & Bradstreet (D&B), the detailed information can be useful. For that reason, we have also included (in the attached spreadsheet) two lists of businesses: one for the City of Flint, and one for Genesee County (includes Flint records). Each business record includes a physical address, location type, and a NAICS description. Please note that the D&B lists include both public (government, nonprofit sectors) and private establishments, and attempt to account for business locations that are not covered by unemployment insurance (UI). This means that the count of establishments from D&B will greatly exceed the establishment count from the BLS (which includes only covered employment and businesses).

If we can assist with anything else, please let us know.

Best,

Lauren Branneman

Karen Towne from LARA just called me and asked for a report showing the average # of employees for each business in Flint. She says that the info that they current have shows 900+ registered businesses. She would like 2 runs, one with GM and one without.

Please let me know if this is something you can assist with.

Thank you!
Teri

Subject: *FW: Freeman - New Faucets*

Peter,

This is some text LARA wanted to add to the letter. I think all the other agencies have reviewed with minor comments. One DHHS made was that in one of the early paragraphs where the Legionnaires issue is mentioned, to strike the last sentence and to leave it that the source is being investigated.

From: MSP-EOC-MDLARA
Sent: Thursday, January 14, 2016 2:49 PM
To: Weber, Thomas (MSP); Zimmer, Mike (LARA); Moon, Jason (LARA)
Subject: *FW: Freeman - New Faucets*

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division, will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following DEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets- $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Good morning, Tom!
You are correct. We did have$6m in micro loans available through our MSF-CDBG program for the Deep Freeze project. Unfortunately, we cannot spend CDBG in Flint or Genesee County since Flint receives their own direct allocation. However, we are evaluating if Flint could ask for direct dollars from HUD for an "emergency" situation (assuming the locals have not already done this).

From: Deacon, Brad (MDARD)
Sent: Tuesday, January 12, 2016 5:14 PM
To: Weber, Thomas (MSP)
Subject: RE: Flint water crisis impacts

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Dept. of Ed) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we can identify higher priorities and have been doing that. All of those received the letter in October with guidance; all of them will receive the revised guidance as soon as it is approved. There are 97 gas stations within the city and we think all of those are within those food license numbers and we are planning additional outreach to them as part of our efforts.

Correct, no animal shelters in the water service area from what we've been told. The primary focus is and should be on homeowners/residences where they also have pets. There are two vet clinics in the City and we were making individualized follow up calls to them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

We don't have anything definitive on next steps for the Flint Farmers' Market. We have provided them assistance in the past few years (trying to get a historical document for what that's been) but we've helped them to expand and grow their facility. We'll be talking with them about potential next steps.

Yes, MDARD has been in close coordination with DEQ, DHHS, and Genesee Co. Health Dept. on the protocol for using water (washing dishes is ok; using it in a pop machine may not be). The guidance put out last fall was jointly issued by all four agencies. We have also worked with them on protocol for us to use when collecting samples – same protocols as other sampling going on.

As for restaurants, it may be all of the things you mentioned. That will be part of our follow up to evaluate compliance.

To: Deacon, Brad (MDARD)
Subject: RE: Flint water crisis impacts

Thanks Brad,

Are there any numbers we could put to number of messages or populations reached by messaging?

I think I saw a number, but can't find it at the moment, there are no animal shelters in the water service area, is that correct? So the impact would be on homes and vet offices. Do we know how many vet offices there are?

Are there any plans or strategies in the works for increasing the number of distribution points for the Farmers' Market?

Does the Department have the number of food related businesses in the City? Is MDARD involved in any way of identifying their protocol for using water? i.e., where do most restaurants get water from for cooking, do they have required filtration systems? Or are they bringing water in?

Thanks very much for all your help.

Tom – some of these sentences / phrases may help – let me know if you need more.
Part of our coordinated outreach also includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.
Water safety also impacts animals. As a precautionary measure, we have included pets, service animals, and other domestic animals in our messages to families about water. We have also reached out to the veterinary and animal care communities to bring their attention to this issue.
Through Michigan's funds and USDA's Rural Development's programs we have been working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system.

Subject: RE: Flint water crisis impacts
Importance: High

Good afternoon.
The Michigan Department of Talent and Economic Development (MTED) is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the City of Flint and/or Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

This analysis was based on a study by the University of Michigan Risk Science Center and the Michigan Network for Children's Environmental Health. The study, linked below, cited studies that showed the direct correlation in loss of IQ with elevated lead levels. This loss of IQ was directly correlated to loss of lifetime income potential, as well as costs for treatment, costs for special education, and ADHD treatment for cohorts under 5 years old.

The excel chart uses the findings from this study and applies it to Flint's population of 0-5 year olds. We're not sure what number to use in the field labeled "estimated percent of population impacted", but it's saved at 6% of 0-5 year olds impacted. Depending on the lead levels, the lifetime earnings loss ranges from $33 Million to over $89 Million if 6% of 0-5 year olds were impacted. The % of population can be changed for each blood lead level to get the impact.

http://www.riskscience.umich.edu/wp-content/uploads/2013/12/Economic-Impact-of-Lead-in-Michigan-Web.pdf

Again, this analysis is based on the study linked above. If the findings and methodology of the study aren't acceptable, then the attached Excel calculations shouldn't be used. Also, we have not reached out to UM to see if any of their assumptions have changed since this was done in 2014 or if our correlations and methodology are acceptable. With additional time, we would confirm our method with the UM team.

With input from the Department of Treasury, we assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water like restaurants will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses are also having to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems reasonable, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term there would be the cost of a new water system, which would have a significant cost. Direct health related costs would be on top of this estimate.

This is a very rough estimate. With additional time and information/data, we can develop a more thorough estimate.

To: Weber, Thomas (MSP)
Subject: RE: unemployment

The latest full 1-year-average stats, from the Census Bureau's American Community Survey, are as follows:

United States (population age 16+):	7.2%
State of Michigan:	8.3%
Genesee County:	11.9%
City of Flint:	23.9%

Hope you received by other message about BLS not producing its latest monthly data for a single city of Flint's size... So this source provides all 4 levels of interest, and 2014 is the newest currently available.

Subject: unemployment

Mike, where/what time frame did the unemployment rates come from? I don't think the state unemployment rate is nearly that high. I think given the nebulous time frame of the disaster, but assuming it's late September from when the County Health Department began the emergency, we should use unemployment rates from early September.

Tom,
Though DIFS does not collect policy information from insurers, we do have the ability to request from them the number of Flint homeowners policies they write by conducting a data call. Please provide me with the exact zip codes that you would like included, we will issue the call and gather the information. It is possible we could provide you with an aggregate number early next week.

I have attached a copy of the relevant pages from the City of Flint's 2014 Comprehensive Annual Financial Report (CAFR) that outlines their commercial insurance coverage. This is the last report we have on file. The City does have the 2015 CAFR posted to their website. I did review the report and it appears the coverage is the same.

Please let me know if you have any questions.

Tom,
We can track complaints and/or calls from consumers with questions or issues with claim denials. However, DIFS would not have immediate access to the number of claims filed with health or property insurers relating to elevated blood lead levels.

As of today, we have received no formal complaints or consumer calls relating to elevated blood lead levels. DIFS will continue to track complaint and/or calls and I will let you know if we do.

Cc: Pepper, Joel (MSP); Lisabeth, Nicole (MSP)
Subject: RE: Flint water crisis impacts

Tom,
The Department of Insurance and Financial Services (DIFS) offers the following in response to your request for a *summary of agency information relating to the water crisis in Flint:*

Similar to Medicaid coverage, individuals with private health insurance would have testing and treatment covered as long as a doctor ordered the services. Anyone with questions regarding their health insurance coverage or any health insurance claims that are not approved by their health insurer can contact DIFS toll free at 1-877-999-6442 for assistance.

A homeowner's policy insures property against risks of direct physical loss that are not specifically excluded under the policy. A homeowner's policy excludes "discharge, disbursable, seepage, migration or escape of pollutants" unless it was caused by a covered cause of loss. The situation that occurred in the City of Flint would not be a covered loss.

DIFS stands ready to assist anyone who has questions regarding their health or property insurance.
Let me know if you have any questions.
Cathy

Good morning all,

We are preparing the draft of the letter from the governor to the president to request assistance. We are attempting to send this as quickly as humanly possible.

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

To: Weber, Thomas (MSP)
Cc: McPharlin, Pat (DIFS); Miller, Andrea (DIFS); Morante, Teri (DIFS)
Subject: RE: Flint water crisis impacts

Tom,
Though DIFS does not collect policy information from insurers, we do have the ability to request from them the number of Flint homeowners policies they write by conducting a data call. Please provide me with the exact zip codes that you

would like included, we will issue the call and gather the information. It is possible we could provide you with an aggregate number early next week.

I have attached a copy of the relevant pages from the City of Flint's 2014 Comprehensive Annual Financial Report (CAFR) that outlines their commercial insurance coverage. This is the last report we have on file. The City does have the 2015 CAFR posted to their website. I did review the report and it appears the coverage is the same.

Please let me know if you have any questions.

Tom,

We can track complaints and/or calls from consumers with questions or issues with claim denials. However, DIFS would not have immediate access to the number of claims filed with health or property insurers relating to elevated blood lead levels.

As of today, we have received no formal complaints or consumer calls relating to elevated blood lead levels. DIFS will continue to track complaint and/or calls and I will let you know if we do.
Cathy

Subject: RE: Flint water crisis impacts

Tom,
The Department of Insurance and Financial Services (DIFS) offers the following in response to your request for a summary of agency information relating to the water crisis in Flint:

Similar to Medicaid coverage, individuals with private health insurance would have testing and treatment covered as long as a doctor ordered the services. Anyone with questions regarding their health insurance coverage or any health insurance claims that are not approved by their health insurer can contact DIFS toll free at 1-877-999-6442 for assistance.

A homeowner's policy insures property against risks of direct physical loss that are not specifically excluded under the policy. A homeowner's policy excludes "discharge, disbursable, seepage, migration or escape of pollutants" unless it was caused by a covered cause of loss. The situation that occurred in the City of Flint would not be a covered loss.

DIFS stands ready to assist anyone who has questions regarding their health or property insurance.
Let me know if you have any questions.
Cathy

Cc: Pepper, Joel (MSP); Lisabeth, Nicole (MSP)
Subject: Flint water crisis impacts

Good morning all,

We are preparing the draft of the letter from the governor to the president to request assistance. We are attempting to send this as quickly as humanly possible.

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

Thanks very much for your assistance,

Subject: RE: response

DTMB has been helping to procure water, filters and refill cartridges, drivers and trucks to assist with delivering supplies to PODs and assisting with neighborhood visits. Setup a JIC at the Flint State Office Building and provided additional security at the building. Have setup a lease agreement for 100,000 of warehouse space in the city to use for water, filters and supplies. Provided guidance and assistance with agencies in their contracts along with IT needs.

We have purchased 32 truckloads of water and today procured:
Brita faucet filters – 27,000
Brita Replacement filters – 1,600

PUR faucet filters – 12,500
PUR 3-pack replacement filters – 40,000

How's this?

Sent: Tuesday, January 12, 2016 7:15 PM
To: Wolf, Jennifer (DNR); Krisztian, George (DEQ)
Cc: Creagh, Keith (DEQ); Thelen, Mary Beth (DEQ)
Subject: PER REQUEST: Timeline, Costs and Public Notice

PLEASE NOTE: Please be advised that there is a meeting with department directors on Thursday and these numbers may be adjusted as an outcome of the meeting.

1. Timeline Attached

2. Costs:

15,000-34,000 Lead Service Line Replacement $60m – $136m

Supplemental #1 $9.5m
- Pay for 50% of the water back to DWSD
- Lead testing
- 2 FTEs

Supplemental #2 $6.9m
- Water from July 1, 2016 thru Dec 31, 2016
- 10 FTEs (half year)

Additional testing / Sampling $1.3m
- Lead / Copper
- 30,000 residences
- 35,000 – 50,000 schools

3. Regarding Public Notices:
The County is responsible for issuing these. On October 1, 2015 the county issued an Emergency Advisory recommending that people not drink the water coming from the city using Flint water as a source unless it has been tested to assure it does not contain lead and unless it is being filtered.

Healthy foods. MSU-E has been giving out recipes but residents must be able to purchase it. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden but necessity.

In some homes the plumbing is so poor and as a result the faucet filter may not fit. The cost of paying for city water that the residents can't use it astronomical. As a scenario, residents have to make a choice buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for family of 2 is $98 per month. For family of 4 with leaks etc. you are looking at about $150 or more per month.

Additional ongoing testing will be required for those with the blood levels- treatment long-term, tutoring, behavior specialists, mental health services are all long-term effects.

I can go on and on.

I'm not sure if I am adding the numbers up wrong, but could you put together a one paragraph summary of those costs that I can place in the letter. I'll reference the table by attachment.

This is good baseline information, thanks. Are there any gaps or unmet needs we can identify based on the needs generated by bulk water distribution or elevated lead levels?

Subject: RE: Flint

My draft had made use of data from Wikipedia. I finally got to double-check it with all but the 1990 census (which wouldn't load online), and had to correct two errors. If you're using this table, please replace the earlier draft with this new data:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

Thanks,
Mike

Hi Tom,

Can you please provide additional instructions as to the specifics you are looking for? Are you looking for a detailed description of each cost associated with the estimate? Are there specific health components that you want to ensure are included?

We just want to make sure that we provide you with the information you need.

Thank you,
Jen

Good morning all,

We are preparing the draft of the letter from the governor to the president to request assistance. We are attempting to send this as quickly as humanly possible.

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

Thanks very much for your assistance,

To: Weber, Thomas (MSP)
Subject: RE: response

DTMB has been helping to procure water, filters and refill cartridges, drivers and trucks to assist with delivering supplies to PODs and assisting with neighborhood visits. Setup a JIC at the Flint State Office Building and provided additional security at the building. Have setup a lease agreement for 100,000 of warehouse space in the city to use for water, filters and supplies. Provided guidance and assistance with agencies in their contracts along with IT needs.

We have purchased 32 truckloads of water and today procured:
Brita faucet filters – 27,000
Brita Replacement filters – 1,600

PUR faucet filters – 12,500
PUR 3-pack replacement filters – 40,000

How's this?

Tom,
We can track complaints and/or calls from consumers with questions or issues with claim denials. However, DIFS would not have immediate access to the number of claims filed with health or property insurers relating to elevated blood lead levels.

As of today, we have received no formal complaints or consumer calls relating to elevated blood lead levels. DIFS will continue to track complaint and/or calls and I will let you know if we do.

Tom,
The Department of Insurance and Financial Services (DIFS) offers the following in response to your request for a summary of agency information relating to the water crisis in Flint:

Similar to Medicaid coverage, individuals with private health insurance would have testing and treatment covered as long as a doctor ordered the services. Anyone with questions regarding their health insurance coverage or any health insurance claims that are not approved by their health insurer can contact DIFS toll free at 1-877-999-6442 for assistance.

A homeowner's policy insures property against risks of direct physical loss that are not specifically excluded under the policy. A homeowner's policy excludes "discharge, disbursable, seepage, migration or escape of pollutants" unless it was caused by a covered cause of loss. The situation that occurred in the City of Flint would not be a covered loss.

DIFS stands ready to assist anyone who has questions regarding their health or property insurance.
Let me know if you have any questions.
Cathy

To: Deacon, Brad (MDARD)
Subject: RE: Flint water crisis impacts

Thanks Brad,

Are there any numbers we could put to number of messages or populations reached by messaging?

I think I saw a number, but can't find it at the moment, there are no animal shelters in the water service area, is that correct? So the impact would be on homes and vet offices. Do we know how many vet offices there are?

Are there any plans or strategies in the works for increasing the number of distribution points for the Farmers' Market?

Does the Department have the number of food related businesses in the City? Is MDARD involved in any way of identifying their protocol for using water? i.e., where do most restaurants get water from for cooking, do they have required filtration systems? Or are they bringing water in?

Thanks very much for all your help.

Tom – some of these sentences / phrases may help – let me know if you need more.
Part of our coordinated outreach also includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.
Water safety also impacts animals. As a precautionary measure, we have included pets, service animals, and other domestic animals in our messages to families about water. We have also reached out to the veterinary and animal care communities to bring their attention to this issue.
Through Michigan's funds and USDA's Rural Development's programs we have been working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system.

Hi Tom,

Can you please provide additional instructions as to the specifics you are looking for? Are you looking for a detailed description of each cost associated with the estimate? Are there specific health components that you want to ensure are included?

We just want to make sure that we provide you with the information you need.

Thank you,
Jen

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

Thanks very much for your assistance,

Subject: RE: Flint

The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Saginaw, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Some reference might ultimately be made to equity planning ideas (e.g. Krumholz and later persons), such as regional revenue sharing or "suburban" support for central city infrastructure like we'd seen resulting from the 2014 Detroit flooding. I have a cool new book about "legacy cities" of the type I've just described, and the book probably has lots of action ideas to be found once I get the time to peruse it. Some of these ideas were already presented in the MHMP, such as on pages 524-526 and 531-532. I know these offhand since I'd written them myself. (Some other stuff may also be in there that Doran had initially written.) Also of note might be stuff like p 456-457 – esp public confidence in government and esp potential mismatch between scientific understanding and public perception.

This 4pm deadline seems very sudden to me. When were we given that deadline?

Tom,
We are working on something. Without a full economic impact study (which will take time) it may be less than ideal, but we will attempt to make some assumptions and representative projections.

No, this is more long-term stuff. I'll work to fill the Genesee County data needs right now. But will start thinking about uses for more variables, and at multiple levels.
I would soon like to take the scheduled A/L break (after 2pm) for my MSU class which is scheduled for 3 hours, but will return afterward, including availability for early evening duty. (It's the first week of the semester, so the class might even get out early, in which case I'll be back here early.)

Thanks,
Mike

Ok. Additional census variables include other relevant things such as housing units with plumbing, (foreign) language spoken at home, foreign-born population, perhaps even linguistically isolated households. Such things do vary a bit over time but are often available – of course they are summary level, but allow focus toward specific neighborhoods, and could help guide the language translation patterns in the area (if they haven't already done so), availability of an automobile to each household, poverty status, employment status, ethnic minority status, disability status and general type (i.e. mobility limitation, self-care limitation), etc.

There is probably also a formula (e.g. a certain number or proportion of housing units built before a certain time, within central city utility areas) that could be applied more widespread to other Michigan cities in general.

Mike, that could be useful. If GIS isn't too backed up, that sounds fine to me. But given that the Governor wants this tonight, and the number of customers outside the city proper is fairly small, I'd say let's do it if it's easy, but if it's going to be a challenge to get it by the end of the day or complicate GIS's work today, we can live with just city and county numbers.

I'll let you two have a meeting of the minds and advise!

By the way, despite our early impression that the Flint system roughly matched the city limits, there was talk about additional townships being involved.
Rather than individual retrieve each tidbit of info (Genesee county right now, perhaps later followed by Flint Twp, Mundy Twp, etc.), the use of GIS could allow a quick summary or analysis of this info (and more) at any scale – region, county, city, census tract, perhaps even block group and block (down to the scale where confidentiality is no longer guaranteed and data thus becomes unavailable).

Would it be worth my going to our GIS about getting these variables on more local scales? The only catch is that some might need to come from census 2010 rather than ACS 2014, but perhaps not – I wouldn't know until I check. I'm pretty sure they already have ready access to all official 2010 census variables.

Subject: RE: Flint

Mike, that could be useful. If GIS isn't too backed up, that sounds fine to me. But given that the Governor wants this tonight, and the number of customers outside the city proper is fairly small, I'd say let's do it if it's easy, but if it's going to be a challenge to get it by the end of the day or complicate GIS's work today, we can live with just city and county numbers.

I'll let you two have a meeting of the minds and advise!

To: Weber, Thomas (MSP)
Subject: RE: Flint

By the way, despite our early impression that the Flint system roughly matched the city limits, there was talk about additional townships being involved.
Rather than individual retrieve each tidbit of info (Genesee county right now, perhaps later followed by Flint Twp, Mundy Twp, etc.), the use of GIS could allow a quick summary or analysis of this info (and more) at any scale – region, county, city, census tract, perhaps even block group and block (down to the scale where confidentiality is no longer guaranteed and data thus becomes unavailable).

Would it be worth my going to our GIS about getting these variables on more local scales? The only catch is that some might need to come from census 2010 rather than ACS 2014, but perhaps not – I wouldn't know until I check. I'm pretty sure they already have ready access to all official 2010 census variables.

Subject: Flint water crisis impacts

Good morning all,

We are preparing the draft of the letter from the governor to the president to request assistance. We are attempting to send this as quickly as humanly possible.

What we need from each agency is a complete but as brief as possible summary of the impacts to the people and economy of Flint resulting from the water crisis, prepared by the best qualified person in your agency.

This would include quantification of past, current, and future or potential future impacts including:

Health
Economic
Insurance (is there any coverage on the part of individuals, or the city or state that might help to cover damages?)
Contributions of voluntary agencies
Environmental; and
Infrastructure

There will be an opportunity to review the entire draft as it is pieced together, to make sure we are including every potential impact that will help to describe the severity of this crisis to the City of Flint and State of Michigan.

If there's any chance of getting summaries by the end of today (let me know what the minimum timeline is that you need), that would be great.

Thanks very much for your assistance,

Subject: RE: water

That's a fantastic idea - I should've thought of that, too! ;)

The first name that comes to mind is Ken Skalitzky. This should be a familiar name to you, but I'm not sure how closely worked with him. Ginna knows him well. He's a long-time former FEMA VAL from our busy states in Region 4 (Atlanta), and now the Director of Volunteer Florida - the state's lead for Volunteer Coordination. As an added bonus, between jobs he led the All Hands mission in Detroit for many months early on, and he's from Michigan so he knows the state well.
ken@volunteerflorida.org
cell

If you want to keep it in-region and build relationships, Dennis Walter from MN HSEM would be your best bet. He's been a state "VAL" for a long time and is particularly good with state/VOAD coordination and information sharing.
Dennis.walter@state.mn.us
- cell

Michelle Hanneken in IL would be a great choice but she's busy here with flooding.

Some of the other go-to State VALs that I'm familiar with around the country have recently retired, are busy with activity in their states, or training over the next few weeks. If you are uncomfortable with either of the choices above for any reason, or they're not available, let me know and I'll reach out to our VAL cadre for suggestions.

Hi Tom,

Thanks for the info below - it's really helpful. A few additional thoughts come to mind. It may be possible for the Adventists to come in and take over warehouse management, tracking and inventory - this is their area of expertise. It would free up some of the Red Cross volunteers to help with distribution, and meet the needs you have at the state level.

I will be on the NVOAD Disaster Health Committee call and will put some feelers out to these partners. If you have a minute to peruse, attached is a draft of the resources available through these partner agencies. As always, they may be flexible and responsive to unique situations like Flint as well.

What I would suggest as your best option to bring visibility, coordination and resources into the area would be to talk to Ken about setting up a joint State/MI VOAD call which we can blast out to the State and National VOAD network. The fact that you have specific "asks" at the state level, and situational awareness that you can share is super helpful to the partners. Fully ground-truthed or not, any information is better than none, and you guys are in the best position to describe the situation and needs.

Let me know what you think. Jeannie & I would be happy to get the word out and invite partners on a call.

Subject: RE: water

Tomorrow morning would be almost impossible. It's our planning day, and I'm the planning chief rather than the VAL, which we don't technically have at this point (me and Richard and Zach amongst our other duties).

I could probably make either Zach or Amanda Bresler available for a call. They've been working mostly on the resources and tracking, but we're getting very little good data from the field.

There are a few areas where I can see needs: the most pressing being acquisition and distribution of water. We have five fire stations and some secondary distribution points, plus city hall and the water department itself.

We also have limited people with any sort of logistical experience to help track inventory and report out when trigger points to order more water has been reached. There's currently one main distribution warehouse, and they are also short staffed, but that's where the Red Cross logistics team will report.

The care dogs might deploy, and there will be a lot of long term case management for health care and lead poisoning, but I don't know if the medical side of things would be practical at all for any voluntary organizations other than those that are long term parts of the community.

Also, there are faucet replacement programs and eventually replacing pipes in the homes, that will be interesting, but it might end up being something some of the groups like All Hands, Southern Baptists or Mennonites might be able to help with?

It would free up some of the Red Cross volunteers to help with distribution, and meet the needs you have at the state level.

I will be on the NVOAD Disaster Health Committee call and will put some feelers out to these partners. If you have a minute to peruse, attached is a draft of the resources available through these partner agencies. As always, they may be flexible and responsive to unique situations like Flint as well.

What I would suggest as your best option to bring visibility, coordination and resources into the area would be to talk to Ken about setting up a joint State/MI VOAD call which we can blast out to the State and National VOAD network. The fact that you have specific "asks" at the state level, and situational awareness that you can share is super helpful to the partners. Fully ground-truthed or not, any information is better than none, and you guys are in the best position to describe the situation and needs.

Let me know what you think. Jeannie & I would be happy to get the word out and invite partners on a call.

Thanks for this, Tom.

Katie is going to reach out to the Disaster Health Committee for NVOAD to see what's possible. As for long-term needs, I think you're right to think of All Hands, Mennonites, etc. Is Ken looped into all of this?

More soon!

Subject: RE: water

Tomorrow morning would be almost impossible. It's our planning day, and I'm the planning chief rather than the VAL, which we don't technically have at this point (me and Richard and Zach amongst our other duties).

I could probably make either Zach or Amanda Bresler available for a call. They've been working mostly on the resources and tracking, but we're getting very little good data from the field.

There are a few areas where I can see needs: the most pressing being acquisition and distribution of water. We have five fire stations and some secondary distribution points, plus city hall and the water department itself.

We also have limited people with any sort of logistical experience to help track inventory and report out when trigger points to order more water has been reached. There's currently one main distribution warehouse, and they are also short staffed, but that's where the Red Cross logistics team will report.

The care dogs might deploy, and there will be a lot of long term case management for health care and lead poisoning, but I don't know if the medical side of things would be practical at all for any voluntary organizations other than those that are long term parts of the community.

Also, there are faucet replacement programs and eventually replacing pipes in the homes, that will be interesting, but it might end up being something some of the groups like All Hands, Southern Baptists or Mennonites might be able to help with?

Hey Tom,

Let us do a little research. What kind of needs short and long-term are there that voluntary agencies might help with.

Any chance we could grab you for a phone call tomorrow morning? We want to get a better idea of what's going on out there so we can try to find you some help.

well, Michigan's at it again. Have you gotten any requests from Ginna, Richard, or Ken?
We're struggling with water supply. Red Cross is going to bring in a warehouse management team. They are also setting up a VRC. I think we're beginning to get water rolling in on a more continual basis, but I'm curious what might be out there for water, distribution, canvassing??

Also, do any VOAD members to MEDICAL case management?

Subject: Volunteer assistance with Flint water

Kasey/Justin,

Thanks Kasey for the response and the offer of assistance. I spoke with Paul Spata, our Red Cross representative here in Lansing, and asked who prospective volunteers could contact there in Flint. Justin, he said you are the volunteer coordinator boots on the ground right now.

Kasey, Red Cross will be establishing a volunteer reception center in the next day or two, and there are things I am pretty sure for which help is needed (staffing the reception center, helping with water distribution or logistical support (inventory) at water resource sites, canvassing/helping distribute information, water, filters, and test kits (at parishes? SVDP locations?). So it could be a mix of "office" jobs, warehouse jobs, and moving inventory jobs, that could also be good for either individuals or teams.

Kasey's number is nd Justin's number is

Thanks again for all your interest and willingness to help!

Hi Kasey,

Sean recommended I get in touch with you. I just wanted to see if the schools were being reached out to, and if you had what you need relative to Flint's water emergency. I was also curious if you might have a good St. Vincent de Paul contact that we could get in touch with about helping to distribute donated water?

Tom,

Thank you for checking in with me! I apologize for not getting back with you sooner. Right now we have three schools that are on Flint water. In each location we have been receiving donations of bottled water to give to students and staff, so we are in good shape. I couldn't tell you how stocked up they are though. The best person to speak to regarding this would be Kasey Cronin, Executive Director for Genesee County Catholic Schools. She is our "boots on the ground" administrator in that region and she will have better answers for you. She can be reached at 810-240-3471 or at kcronin@powerscatholic.org

If you have any questions or would like a further explanation from me, don't hesitate to ask. I hope this helps. Thank you for all you do.

> > - Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database. The GIS Leader visited Flint and will prepare

a memo this evening explaining some of the difficulties discovered and some ideas for work arounds or solutions.
- Attempted to get data on the zip codes. It will be more effective to use parcel info to cross reference with zip codes.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines.
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):
- Finalize updated list on water filter distributions map.
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Volunteer and Donations Management:
- SEOC staff, Local EOC, and local organizations had a call with General Motors about possible donations.
- MCSC has been working on this event for a while through United Way and 211. They will begin providing situation reports and updates through MDHHS.

Please let me know if there's anything else you need. I will be in at 8am.

Subject: Re: MCSC Support

Richard,

Great to hear from you.

I was asked early on to sit in on some of the community meetings. But without a declared disaster, we could not deploy any of the AmeriCorps assets. But with the declaration, we are able to offer some resources.

There will be an announcement today (Friday) that Flint United Way will be receiving a NCCC AmeriCorps team. (the information is embargoed until CNCS makes the announcement) I will forward you the Press Release and so you are aware. Jessi has forwarded it to Ron to keep him informed as well.

The NCCC team is to arrive Feb. 2 and will be here through April. United Way will be taking care of getting them their housing and provide their overall support and management. I have a call in the morning with Wendy Spencer, the CEO of the Corporation for National and Community Service and Harvey Hollins, from the Governor's Office to discuss the announcement of the team and determine if there are other resources to consider.

I am wondering who is overseeing the operations in Flint and what needs have been identified that volunteers could assist with meeting? We can make some resources available from AmeriCorps - but it is best to know what the needs are and then determine what options to use.

Once you have a clear understanding of the needs, we can determine if any of the following additional resources could be of assistance:

1. American Red Cross AmeriCorps members can be redeployed. There are currently 34 in the state, we are able to ask 17 at a time to be redeployed to Flint. They could be of help this month - if you identify there is a need.

2. American Red Cross Case Management. We have given an AmeriCorps grant to Red Cross in Detroit and they have had a tough time getting it set up because they do not have the match. This could be an opportunity for us to serve both Flint and Detroit. We could have 10 members in each community trained to work with residents and help them get the resources they need. For Flint - provide information, filters, blood level checks, other identified resources. For Detroit - provide the housing support services they need to recover from the flood. I would need to find about $100,00 in match money - but with the current concerns in Flint, there may be options to do this. The good news is Red Cross will manage the members - we just need to determine if there is a need. Chad could assist with helping to get this set up. If we stand this up - they would be full time members serving for a full year. This would be a more consistent option that could provide longer term benefits. This grant could be renewed up to three years.

3. Operation AmeriCorps - Flint received this new AC program and there may be an option to have some of the members assist if an identified need develops. They are serving in the schools and so we could think of a unique way to have them provide information and assistance to families in the school.

4. CNCS state office is determining what RSVP and Senior Corps members could do to assist with the effort.

5. Chad Veesar from MCSC is available to assist with managing the volunteer component and provide ideas regarding how AC members could be used in this situation. As you know, he has plenty of direct experience in Detroit that could be an asset.

If you could give us an indication of what you are seeing the needs are for volunteers, that would be helpful. It will give us a heads up as to how we can best offer our support. I do understand if you are still at the assessment stage.

Let me know if you would like to have a call to discuss options available and what roles everyone will take.

Hi Lynne,

I copied Jaclyn Barcroft who is our MI CIMS manager. She can get you set up with a log in now and then the training for it. She did mention that Teri Martin has access currently if that helps in the short term.

Thanks!

Tom Weber
State Planning Unit Manager

Good afternoon, Pam.
I do not have anything additional to report on behalf of MTED. However, since we do not have access to the SIMs database, I cannot view tasks or assignments. We have been attending the 9:30a SEOC update calls.

Please advise if further information is required.

Thank you,
Lynne A. Feldpausch, CHRO

Subject: MTED
Importance: High

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
4. Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.
5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. Allowable: public awareness through HDF grants

- The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

- We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

- MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I *am* receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Regional Weather and Impacts

Alexander County levee break will bring more challenges
(The Southern Illinoisan)
Alexander County, IL: The grim reality of unseasonable flooding that led to a levee break in Alexander County last week might be compounded when high waters finally recede. After the 1993 flood, it cost about $4 million to repair the Len Small Levee, said Alexander County Board Chairman Chalen Tatum. He also pointed out that the '93 levee break was smaller than last week's breach. It's too early to know how much the latest breaks will cost, additionally, a second, smaller breach occurred sometime after Friday's breach. Tatum believes repairs will cost more than they did 23 years ago, considering inflation factors. The good news is the U.S. Army Corps of Engineers will likely cover 80 percent of those costs if the Levee District meets a long list of conditions, a Corps spokeswoman said. The bad news — in a sparsely populated area of small towns and farmland in one of the state's poorest counties, there's still the 20 percent to come up with.

Receding waters allowing some to return home, clean up, return to normalcy
(The Southern Illinoisan)
Cairo, IL: As floodwaters began to recede in parts of Southern Illinois, some communities are turning to cleanup and even returning to the homes they might have left. As the water recedes in Alexander County, many of the side roads still remain closed, said Alexander County Sheriff Tim Brown. The major roads, like Illinois 3 and 127, were never closed and are still open to travel, he said. A Mississippi River flood warning is still in effect for Alexander County for the next few days, according to Greg Meffert, lead forecaster for the National Weather Service. The river measured 4In Jackson and Union counties, emergency management officials lifted their evacuation recommendation and voluntary evacuation order at 8 a.m. Wednesday. Road-closure signs have been removed from most of the blockaded streets, Union Sheriff Scott Harvel said Wednesday afternoon. "It's looking a lot better because the river is really starting to drop," Harvel said. Since

Sunday, the river has fallen almost six feet, from its high of 48.8 feet on Sunday to 41.48 feet on Wednesday, he said. Crews were out Wednesday cleaning up, he said.

Durbin looks for answers as flood victims plead for delayed funds
(WSIL 3)
Alexander County, IL: Flooding in Alexander County brings a reminder of unfilled promises for many. County Leaders say owners of 127 properties who opted for the buyout program are still waiting for that money, so residents pleaded with U.S. Senator Dick Durbin to find out why. "The federal funds are there available for use. It's the 25 percent state matching funds that the state has locked up," said a county official. "Well, clearly the answer is the state budget," said Durbin. "We've waited a long time, the sooner the better. In the meantime, I'll contact the Rauner administration to see if they can do a release when it comes to these funds." News 3 asked if that would require a court order and Durbin said "Beyond the current court order, I can't say. I just can't say at this point. But if it discretionary on the part of the state of Illinois to have this decision to release state funds then that's the governor's decision. News 3 also spoke with the governor's office, who says there's been no appropriation for the contribution at the state level and the federal contract makes Alexander County responsible to provide and/or secure the matching funds.

Damage assessments begin as evacuations lifted
(WPSD)
Grand Tower, IL: Evacuation notices have been lifted in Union and Jackson counties in Illinois, giving the all clear for people to return home for the first time in over a week. Jackson County Emergency Manager Derek Misener says the county is just now starting to get a sense of how much damage was done. "The most devastated areas are really just now starting their damage assessments," said Misener. "One of the things with flooding is you don't really know if a road is ruined until the water goes down." Misener says it's crucial that people report any damage because the state of Illinois has to hit an $18 million damage threshold to receive any assistance from the federal government. He says while that may not seem like a lot now, during the next flood it could keep the water in the rivers and out of your town. According to Misener, levee improvements and a new flood gauge are needed before the water rises again.

Flooding Disaster Declaration Could Lead To Federal Relief, but There's No Guarantee
(Peoria Public Radio)
Iroquois County, IL: Governor Rauner toured the flooded areas of Illinois and continued on Tuesday with a visit to Watseka, about 100 miles south of Chicago near the Indiana border, in Iroquois County, one of the counties that's just received the disaster designation. Rauner says that does two things. "One, it frees up state resources so we can bring state personnel and equipment and supplies to help the first responders and volunteers everywhere," he said. It's also the initial step in requesting federal disaster relief. "We are going to try to get the federal government to reimburse losses as a result of this flood," Rauner said. But it's no guarantee; the Federal Emergency Management Agency has denied some of Illinois' requests in the past, for example, after tornadoes. Higher damage costs could increase the state's chances. Affected homeowners are asked to submit their financial information to county officials. The new additions are Cass, Cumberland, Iroquois, Lawrence, Marion, Menard, Moultrie, Pike, Richland, Sangamon and Vermilion counties. Last week, Alexander, Calhoun, Christian, Clinton, Douglas, Jackson, Jersey, Madison, Monroe, Morgan, Randolph and St. Clair counties received the designation.

Fort Wayne to receive delayed FEMA money for buying 18 homes in flood-prone area
(News Sentinel)
Fort Wayne, IN: The City of Fort Wayne was scheduled Thursday to receive a check from the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) for $862,946 to buy and demolish 18 homes in flood-prone areas. Receipt of the FEMA award was announced in July. Plans for its distribution had been put on hold early last year by a dispute between FEMA and a Kokomo project to build a baseball stadium that reportedly extended onto flood-prone land. City officials provided additional details about the Fort Wayne project in December during an update to City Council. The city and Maumee River Basin Commission must contribute 25 percent in matching funds — nearly $288,000 — increasing the total funds available to about $1.15 million. The homes the city hopes to purchase are located in various locations throughout the community, but the largest share are near Junk Ditch and Fairfield Ditch in southwest Fort Wayne. None of the 18 homes has been purchased yet, and buyouts would take place only if the homeowners voluntarily agree to sell to the city. After the homes are demolished, the land will be maintained as green space. The project is part of pre-disaster mitigation efforts, which provide grants so state and local governments can take long-term steps to reduce the risk of flood damage, the city's announcement said in July.

Water Sector

Water crisis in Flint, Michigan, draws federal investigation

(CNN)

Flint, MI: High levels of lead have plagued Flint's municipal water supply for at least a year, prompting extensive emergency measures to keep residents safe. Flint returning to Detroit water amid lead concerns. On Tuesday, Michigan Gov. Rick Snyder declared a state of emergency for Genesee County as a result of the water crisis. The U.S. attorney's office for the Eastern District of Michigan is also investigating, office spokeswoman Gina Balaya said Tuesday. Curt Guyette of the American Civil Liberties Union of Michigan called the probe "an important step that needs to be taken in order to get to finding the root causes of the disaster that has occurred in Flint and to hold everyone involved responsible." Flint council OKs funds for return to Detroit water after lead concerns. In November, Flint citizens filed a class-action lawsuit on behalf of victims of high levels of lead against Snyder, the state of Michigan, the city of Flint and other state and city officials. The investigation by the U.S. attorney's office comes more than a year after the city of more than 100,000 people began getting water from the Flint River instead of from Lake Huron via Detroit's water system. The move was announced as a temporary, cost-cutting measure until Flint could get Great Lakes water on its own, according to the class-action lawsuit. But then came residents' complaints about strangely colored tap water. Studies showed that lead piping elevated lead levels 10 times higher than they had previously measured. A local hospital discovered that the percentage of Flint children with elevated lead levels nearly doubled after the switch. The health effects listed in the class-action suit include: skin lesions, hair loss, high levels of lead in the blood, vision loss, memory loss, depression and anxiety. Keith John Pemberton and his wife, Jacqueline, who are in their late 60s, allege in court documents that they suffered property damage because of the corrosive water, loss of value in their home, skin lesions and "psychological disorders such as depression, chronic anxiety and an inability to cope with normal stress." These conditions, according to the suit, were the result of bathing, washing and normal household activities. The Pembertons' allegations mirror those of Rhonda Kelso, 52, who, along with her 12-year-old daughter, said she suffered skin lesions and psychological problems. Kelso and her daughter have pre-existing disabilities, which they said the lead buildup in their blood compounded. The complaints prompted a host of actions to address what was labeled a public health emergency. The city ordered public schools to stop running water for taps and water fountains, according to WEYI-TV. Government agencies passed out more than 6,000 water filters, said Nick Lyon, director of the Michigan Department of Health and Human Services. The situation could affect the city for years. In a state of emergency declaration, Flint Mayor Karen Weaver indicated that more funding will be needed for special education services because lead "can cause effects to a child's IQ, which will result in learning disabilities." The water from the Flint water plant, according to an October public health emergency declaration from the Genesee County Board of Commissioners, meets all federal standards. But the declaration said that lead in service lines, or solder connections, can leach into individuals' homes because "of the corrosivity of the water since changing to the Flint River as the source supply." The governor's office has said Snyder "requested funding to switch the source back to the Great Lakes Water Authority," to combat the lead leaching, and "appointed an independent task force to identify possible missteps and areas for improvement." The situation got under control after city and state officials announced last fall that Flint would switch back to Detroit's water supply.

Communications/Information Technology Sector

Time Warner Cable says up to 320,000 customers' data may have been stolen

(Reuters)

National: Time Warner Cable Inc said on Wednesday up to 320,000 customers may have had their email passwords stolen. The company said email and password details were likely gathered either through malware downloaded during phishing attacks or indirectly through data breaches of other companies that stored Time Warner Cable's customer information, including email addresses. The company said it has not yet determined how the information was obtained, but there were no indications that Time Warner Cable's systems were breached. Time Warner Cable spokesman said it was recently notified by the Federal Bureau of Investigation that some customers' email addresses including account passwords "may have been compromised." The company said it is sending emails and direct mail correspondence to encourage customers to update their email passwords as a precaution.

Transportation Sector

Inbound Stevenson Expressway Shut Down Near Central Avenue after 5-Vehicle Crash

(NBC Chicago)
Chicago, IL: All lanes on the inbound Stevenson Expressway were shut down near Central Avenue during the evening rush hour Thursday due to a five-vehicle crash, state police said. At least one person was injured in the accident. All lanes had reopened around 5 p.m., but extensive delays were still reported on the roadway.

Law Enforcement & Intelligence Sector

Milwaukee Suspect among Three Arrested In ongoing Terror Sweep
(CBS 58)
Milwaukee, WI: Arrests were made Thursday in Houston, Sacramento and Milwaukee in an ongoing terrorism investigation, according to law enforcement sources. "I can confirm that there were two national security related arrests today, one in Houston and one in Sacramento," Department of Justice spokesman Marc Raimondi told CBS News' Paula Reid. "There is no current threat to public safety associated with these arrests." The Milwaukee division of the FBI confirms that three subjects were arrested in Wisconsin today. Those charges are unrelated to terrorism. The subjects are expected to be in court tomorrow and more information will be released then. The FBI wants everyone to be aware that there is no threat to the public in Wisconsin.

Ardent Mills Says Resumes Operations At Illinois Flour Mill After Flooding
(Reuters)
Alton, Illinois: The largest U.S. flour miller Ardent Mills has resumed bulk shipments at a mill in Alton, Illinois, as floodwaters along the Mississippi River receded while a mill in Chester, Illinois, "likely will be down for multiple weeks," company spokeswoman Mary Ann Strombitski said on Tuesday. Near-record high floodwaters following deadly winter storms forced the company to shut down the mills a week ago.

Federal Officials Make Recommendations To Prevent Future Flood Damage
(WSIL ABC 3)
Grand Tower, Illinois: Federal development officials are touring areas affected by flooding throughout the southern Illinois region. They are assessing ways government aid can help communities recover and rebuild. A group of Delta Regional Authority employees made several stops, including the levee in Grand Tower. Their goal is to figure out exactly what investments will help make local flood protection sustainable for years to come. As federal officials tour Jackson County with Delta Regional Authority - they also recommend installing a better river gauge on the Big Muddy and creating an overpass road above the Cora levee to prevent Route 3 from closing down. Damage in Jackson County varies. Most levees along the Mississippi River held up, while chunks of the Big Muddy levee were eroded away. Some say Jackson County got lucky. The Len Small Levee near Olive Branch in Alexander County did breach, flooding dozens of properties and putting some local residents out of a job.The levee could take months to repair. Emergency officials are considering how soon to lift their recommendation for voluntarily evacuation.

Alexander County Levee Break Will Bring More Challenges
(Southern Illinoisan)

Illinois: The grim reality of unseasonable flooding that led to a levee break in Alexander County last week might be compounded when high waters finally recede. After the 1993 flood, it cost about $4 million to repair the Len Small Levee, said Alexander County Board Chairman Chalen Tatum. He also pointed out that the '93 levee break was smaller than last week's breach. It's too early to know how much the latest breaks — a second, smaller breach occurred sometime after Friday's breach — but Tatum believes repairs will cost more than they did 23 years ago, just considering inflation. The good news is the U.S. Army Corps of Engineers will likely cover 80 percent of those costs if the Levee District meets a long list of conditions, a Corps spokeswoman said. The bad news — in a sparsely populated area of small towns and farmland in one of the state's poorest counties, there's still the 20 percent to come up with It is too soon to tell how bad the levee damage was, at Len Small or elsewhere in Southern Illinois. Most levees in the region, as well as the state within the Corps' St. Louis District, are currently at minimally acceptable or unacceptable status of Corps standards. That means repairs needed outside of flood damage must be locally funded. Most of those levees are also Corps built, unlike the Len Small Levee. For those levees, the Corps will pay 100 percent of the cost for flood-related repairs. Several districts, including the Grand Tower Levee District and the Degonia and Fountain Bluff Levee District have enrolled in a Corps program designed to provide technical advice to restore systems to acceptable levels. Officials in Jackson and Union counties said it is still too early to assess damage, though it appears the flood did not cause significant damage. The worst might be at the Degonia and Fountain Bluff Levee and Drainage District, President Carl Heins said. Some sliding on the levee wall did occur that will likely need to be built back up.

Michigan Governor Declares State of Emergency over Flint's Toxic Tap Water

(Weather.com)

Michigan: Michigan Gov. Rick Snyder has declared a state of emergency in Flint and Genesee County due to a contaminated drinking water crisis. Coincidentally, this declaration came on the same day that the U.S. Attorney's Office confirmed its investigation into the contamination of Flint's water supply, according to the Detroit Free Press. "The health and welfare of Flint residents is a top priority and we're committed to a coordinated approach with resources from state agencies to address all aspects of this situation," said Snyder in a press release. "Working in full partnership with the Flint Water Advisory Task Force, all levels of government and water quality experts, we will find both short-term and long-term solutions to ensure the health and safety of Flint residents." In 2014, Flint swapped over from Detroit's water system to water from the Flint River in an effort to cut costs, reports FOX News. It was a temporary set up until a pipeline was built from Lake Huron. The change did not go unnoticed by residents, who complained about the taste of the water, as well as its smell and appearance. The issues worsened as elevated levels of lead were found in children as a result of drinking the water. In October 2015, the city returned to Detroit's drinking water. "The damaged water infrastructure and leaching of lead into the city's water caused damage to public and private water infrastructure, and has either caused or threatened to cause elevated blood lead levels, especially in the population of children and pregnant women, and causing a potential immediate threat to public health and safety and disrupting vital community services," said Snyder in the declaration. The emergency declaration makes federal aid possible. Snyder can request a damage assessment from the Federal Emergency Management Agency (FEMA) to use as a basis for determining eligibility for federal aid.

Federal Officials Probe Lead-Tainted Water In Flint, Michigan

(Reuters)

Michigan: Federal officials are investigating the lead contamination of drinking water in Flint, Michigan, after the financially beleaguered city switched sources to save money, a spokeswoman for the U.S. Attorney in Detroit said on Tuesday. Michigan Governor Rick Snyder apologized in late December for the state's mishandling of lead contamination of Flint's water supply and accepted the resignation of the state official whose department is responsible for overseeing water quality. The U.S. Attorney's Office is working closely with the U.S. Environmental Protection Agency to address the concerns of Flint residents and investigate the contamination of Flint's water supply, said Gina Balaya, a spokeswoman for the U.S. Attorney. Snyder later on Tuesday declared a state of emergency in Genessee County, which includes Flint, authorizing additional state resources to address the health and safety issues. The city declared a local emergency in mid-December. Snyder spokesman Dave Murray said the state would cooperate with any requests from the U.S. Attorney's Office "as it looks into Flint's water challenges." The governor has appointed an independent panel to review local, state and federal actions related to the drinking water situation and is working with city and county leaders, he said.

Boil Water Advisory Issued For Belle Isle

(The Detroit News)

Michigan: There is a boil water advisory in effect on Belle Isle after low water pressure and low chlorine levels were detected Tuesday, according to the Michigan Department of Natural Resources. "Bacteria levels came out negative which means that's OK, but the chlorine levels are still low," said Ron Olson, chief of parks and recreation for the DNR. "The suspicion is because the water pressure is low, that may affect the chlorine levels." The issue was detected around 12 p.m. Tuesday after city officials tested water near the island's Coast Guard outpost, which recently had been experiencing varying levels of water pressure, Olson said. Belle Isle is hooked up to the city's water and sewerage system. Further testing showed no harmful bacteria in the water but officials determined the water "may not be potable" due to the low pressure and low chlorine, Olson said. The advisory was issued "as a precautionary measure." Several agencies including the city, the DNR and the Michigan Department of Environmental Quality are working to pinpoint the cause of the low water pressure, Olson said. Meanwhile, Olson said aquatic life at the island's aquarium are protected in their controlled tank environments.

Communications/Information Technology Sector

DHS Issues Process and Privacy Guidance on State and Local Drones

(Electronic Frontier Foundation)

National: Just before the holidays, a Department of Homeland Security (DHS) working group released guidance for state and local agencies using drone aircraft. The document, Best Practices for Protecting Privacy, Civil Rights & Civil Liberties In Unmanned Aircraft Systems Programs, addresses concerns over the implications of high-tech tools that, without rigorous controls and oversight embedded in law and embodied in code, can easily be abused. Some aspects of the guidance construct a robust process surrounding the adoption of drones. For instance, it suggests consultation with legal counsel and issue experts, as well as a clear definition of a program's mission and scope. The guidance also recommends ongoing assessment of privacy impacts and a redress program. Other more substantive provisions address the use of drones themselves. For instance, the DHS guidance suggests limits on how drones collect data, how the data used, how long it is retained, and to whom and for what purposes it is disseminated. At root, the guidance remains advisory, binding neither state nor local agencies, nor even agencies within DHS itself. Longstanding concerns about inadequate transparency and protections by DHS component agencies will remain and continue to mount. The guidance is also limited to particular settings. The working group said its guidance was "intended for first responders (e.g., emergency management, emergency medical service, fire departments, and security professionals responding to disasters and other emergencies) and does not seek to provide guidance in regard to investigative use of [drones]," despite the group's recognition of historical patterns of recurring abuses by law enforcement agencies.

Joel/Zach,

Cap would like this by ... well, the Governor's office wants it by 3, so if you could get it to me in the next half hour or so, that would be great.

Just give it a review. Zach, if you could look for any specificity on dates, that would help.

I am 99% sure Flint's system only serves the City. Their "damage assessment" is supposed to identify exactly which pipes are affected. It would be worth looking into getting a map of their water system's service area.

Sounds good.
I'm "pretty good" at putting together census-based descriptions. Have been doing it for at least 20 years...
Since Genesee County has declared an emergency now, do you know if the focus is still specifically and exclusively on the city of Flint? (Were there any adjacent areas that also shared the Flint water system, such as Flint Township?) That would be the first question I'd need answered.

Thanks,
Mike

Glad you asked! While the Governor has not yet made the decision, it is virtually certain we'll be going to the feds with some sort of request for assistance, even if it's not through FEMA. So I think it would be well for us to get started on the demographic component, and it makes as much sense to use our past formats for declaration request letters as anything. Here's a copy of the one used for the SE MI flooding in '14. We can meet on this tomorrow if you'd like. I figured you two could work on this together.

Nothing major this morning at the Monday meeting. The following points came up:

- Keep in mind your contributions to points within the Strategic Plan and report out on them when possible.
- The Flint County Commission met this morning and declared emergency. A request for the Governor to declare emergency was also made.
- The move is on track. Labels were passed out to everyone today. Boxes were also delivered.
- The Terrorism Tabletop was moved to January 22.
- Cap/we will be heavily involved in the response to assist Flint.

Subject: RE: Flint IAP

Captain,

The State Planning Unit has reviewed the IAP, and offer the following comments:

- The Incident Management Team is referred to in the document. It would be helpful to have the roster included in the document. It would also be helpful to have the roster listed in terms of a traditional ICS format, but the "function" references are workable.
- Not included in the IMT are anyone from Planning, Community & Economic Development, or Information Services. They do or could have beneficial roles in the response (documentation, CDBG, information technology logistics, and resource procurement).
- An Emergency Management Team is referenced but is not defined. It may actually be a reference to the IMT.
- The JIC and PIO "team" are referenced, but their composition and organization is unclear.
- EPA assistance with public information is mentioned. Should the state/DEQ be aware of this and communicating this to us?
- Who is "determining the total cost of damage done to the public health and infrastructure?"
- State needs to clarify with the city what any state role in replacing the whole water system may or may not include. Various funds and forgivable loans have been referenced, but the state should have (perhaps the Executive Office does have) an overall Project Manager who can coordinate all state and federal activities that are occurring.
- State should provide assistance/guidance if possible to help develop the capital improvement project for the water system
- An organization chart with contact information should be prepared by either the City or the County EM. The County EM could be serving as a coordinating/liaison role between city/county/state agencies.

- A county IAP with the City IAP as an appendix may be beneficial.
- Most of what is being requested echoes previous resources. Financial assistance is first and foremost what is being requested. Most resources (health monitoring programs) still do not have any cost projection attached. Infrastructure costs are the exception which, as noted, would need outside review for confirmation (or source of the existing estimates).

I would stress that with MSP/EMHSD, MDEQ, MCSC, MDHHS, and potentially MSHDA all providing input, the state needs a project manager for this. Which could take the form of an SEOC activation in the monitoring mode, or something less formal. But coordination is needed.

Good morning, I received a call from Chris Devriendt advising he was sending this email to me. Chris basically advised the City of Flint is handing over their IAP to the County on Monday and the County is going to ask for a Governor's declaration. I asked what resources have been used and exhausted by the City and the County as well as what resources are being asked for. Chris is caught in the middle here. The City's IAP is basically asking for millions of dollars to fix their infrastructure and asking for the 2 million they spent to make the switch back to Detroit water be forgiven. I also asked if they had GIS mapping to show which service lines are lead in the city. Chris advised the city is working with Wayne State University on those and to his knowledge no maps are available yet. He further advised maps contained in Dr. Mona's article are "locked" by the Institutional Review Board until her article is published. The city is going to request the Board to release the maps to them but that is not a given.

Once again, they are basically asking for money to fix their infrastructure problem. And, Sean Kammer is asking Chris if there is a link to MICIMS that he can share with the public. One word- clueless. Sorry , I know you will delete it if you need to send any of this info on. I will plan on being at the meeting Monday unless I hear otherwise. Please let me know your thoughts. BJ

Dear LT Roach,

This missive is to invite yourself and any other MSP EMHS personnel to the commissioners' meeting on 1/4/2016. The meeting will be held at the County Admin Building, 1101 Beach Street, Flint, MI 48502 on the 3rd floor in the Harris Auditorium at 9:00am. This is the building just south of the Sheriff's Office and the room is to your immediate left as you exit the elevator.

It is anticipated that at this meeting, the County will declare a state of emergency and quite possibly elevate it to the State level at the same time. I am attaching the City of Flint IAP, County Declaration, and Governor's request for your review and comment. I understand that this is short notice and lacking on proper protocol but I value your input and guidance.

To illustrate the dire need this situation calls for in regards to professional intervention, the City PIO just left me a message asking if there is a link to the IAP on MI CIMS that he can share with the public...

If you or your colleagues have any questions, comments, or observations feel free to share my personal cell phone number with them

Very Respectfully,

Chris DeVriendt, LVT, MPH

Subject: FW: City of Flint Emergency / Invitation
Importance: High

Good morning, I received a call from Chris Devriendt advising he was sending this email to me. Chris basically advised the City of Flint is handing over their IAP to the County on Monday and the County is going to ask for a Governor's declaration. I asked what resources have been used and exhausted by the City and the County as well as what resources are being asked for. Chris is caught in the middle here. The City's IAP is basically asking for millions of dollars to fix their infrastructure and asking for the 2 million they spent to make the switch back to Detroit water be forgiven. I also asked if they had GIS mapping to show which service lines are lead in the city. Chris advised the city is working with Wayne State University on those and to his knowledge no maps are available yet. He further advised maps contained in Dr. Mona's article are "locked" by the Institutional Review Board until her article is published. The city is going to request the Board to release the maps to them but that is not a given.

Once again, they are basically asking for money to fix their infrastructure problem. And, Sean Kammer is asking Chris if there is a link to MICIMS that he can share with the public. One word- clueless. Sorry, I know you will delete it if you need to send any of this info on. I will plan on being at the meeting Monday unless I hear otherwise. Please let me know your thoughts. BJ

Dear LT Roach,

This missive is to invite yourself and any other MSP EMHS personnel to the commissioners' meeting on 1/4/2016. The meeting will be held at the County Admin Building, 1101 Beach Street, Flint, MI 48502 on the 3rd floor in the Harris Auditorium at 9:00am. This is the building just south of the Sheriff's Office and the room is to your immediate left as you exit the elevator.

It is anticipated that at this meeting, the County will declare a state of emergency and quite possibly elevate it to the State level at the same time. I am attaching the City of Flint IAP, County Declaration, and Governor's request for your review and comment. I understand that this is short notice and lacking on proper protocol but I value your input and guidance.

To illustrate the dire need this situation calls for in regards to professional intervention, the City PIO just left me a message asking if there is a link to the IAP on MI CIMS that he can share with the public...

If you or your colleagues have any questions, comments, or observations feel free to share my personal cell phone number with them

Very Respectfully,

Chris DeVriendt, LVT, MPH

Subject: Modification to DCDS PPE 01-02-16

Tom,
I need to modify my time & attendance in DCDS for the PPE 01-02-16, but you have already approved it so I can't modify my time in DCDS. I spoke with Michelle and she made the changes pending your approval. The changes are:

1. Monday (12-21-15) I reported (7:30 am – 4:30 pm) for 8.0 hours regular time. Due to the Flint City meeting my actual time was (7:30 am – 5:00 pm with no lunch break) for a total of 9.5 hours regular time.
2. Tuesday (12-22-15) I reported (8:00 am – 5:00 pm) for 8.0 hours regular time. My actual time was (8:00 am – 5:00 pm with 0.5 hour lunch) for 8.5 hours regular time.
3. Wednesday (12-23-15) I reported 8.0 hours annual leave. Due to the changes on Monday and Tuesday, the actual annual leave is reduced to 6.0 hours.

Since I am on annual leave for the rest of the pay period, there will be no further changes.

Please advise Michelle of your approval via email. Let me know if you have any questions.

Thanks,
Joel

Good afternoon all,

From this morning's meeting:

- EMPG supplemental guidance has went out.
- 14s and above need to take a PIO training (MSP or G290) so if you haven't please let me know.
- Flint's water issue continues to get media attention, staff from EMHSD are going over to Flint today to meet with the mayor on this issue.
- The National Terrorism Advisory system has changed. They will include a "bulletin" in an effort to increase awareness and stress vigilance.
-

- January 19th is still the date that we move, additional emails will be following so please plan accordingly

Thanks,
Gabe

Leadership has cleared distribution of the department's situation report.

There are also blood lead testing data for Flint that can be accessed via the Michigan.gov web page where there is a link for Flint water. The documents contain information on how many children have been tested and how many had elevated BLLs (5+). The website also contains some documents on MDEQ activities in schools.

Would Thomas Weber be the MSP point of contact for our distribution list? If so, we can add him and then he will receive the report that will be distributed today.

Corinne

Hi Jennifer,

We're going to be meeting with Flint's mayor later today. I'm curious what actual statistics the county health department may have on EBLs in Flint children between the time before Flint was on its own water vs. now. And also, how many kids are actually being treated or receiving extra treatment like chelation therapy?

Are those numbers you'd be able to get a hold of fairly easily?

Also, do we know what MDHHS and/or MDEQ are doing action wise? I know the mayor wants a Stafford Act declaration, but they make it seem as though that's the only avenue for real assistance which, in the case of an infrastructure failure, is the least likely avenue.

Thanks for anything you might be able to shed light on!

> FLINT, MI -- The federal government may have never recognized a man-made water crisis like Flint's as a disaster before, but asking for the assistance has been Mayor Karen Weaver's plan since before she was elected Nov. 3.
>
> "Our city is in a crisis -- a water crisis," Weaver said. "So far, what we've had are Band-Aid fixes, (and) it's not enough ... I don't see any other option."

On Monday, Dec. 21, the mayor plans to meet with Genesee County Board of Commissioners Chairman Jamie Curtis and others involved in emergency planning to discuss the city's incident response plan, a step-by-step outline aimed at addressing the water crisis.

"Things are falling together nicely," she said Friday, Dec. 18. "(The plan) is going to say, 'We need this, this and this,' and attach numbers where we can."

The Michigan Emergency Management Act outlines the process for seeking federal disaster assistance, which starts with the local declaration of a state of emergency. In that statement, a local jurisdiction says it has sustained widespread or severe damage, injury or loss of life.

Communities that have typically been granted disaster aid have suffered from natural disasters such as severe storms, flooding and fires, but Weaver believes that Flint's disaster with lead in its water is just as devastating.

There are cases in which less-common disasters have been recognized with federal aid, including one for severe hardship to the salmon industry in Alaska in 1953, a chlorine barge accident in Louisiana in 1962 and dam failure in Colorado in 1973, according to FEMA records.

"The president can declare an emergency or major disaster for any natural or manmade event that the president determines has caused damage of such severity that it is beyond the combined capabilities of state and local governments to respond," FEMA spokesman Mark J. Peterson said in an email to The Flint Journal-MLive

"We're being positive and optimistic" with Flint's application, Weaver said.

The city's state of emergency says, "Flint children have experienced increased blood lead levels since the switch to the Flint River, and this damage to children is irreversible and can cause effects to a child's IQ ... (resulting) in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system."

Weaver has so far not assigned a dollar figure to damage done to children who drank Flint River water since April 2014, and she said this week that Flint's old water distribution system was also damaged by corrosive river water. "So that's where we are (also) going to need some help."

Although Flint City Council members have been generally supportive of Weaver seeking the disaster declaration, and the Michigan Legislative Black Caucus is supporting the request, Flint City Councilman Josh Freeman said he doesn't believe it will be granted.

"It's giving false hope to people that the problem is going to fixed" with a disaster declaration, Freeman said. "At some point we have to stop playing politics and start governing."

The councilman said state and federal officials are unlikely to send disaster relief to Flint because other parts of the county and the state have childhood blood lead levels -- from all sources -- that are similar to children in Flint.

"Maybe I'm wrong. Hopefully I'm wrong," he said.

FEMA's Web site shows 77 disaster declarations nationwide so far in 2015 and eight current disasters.

The current declarations cover damage caused by fire in California; severe storms and flooding in Wyoming; straight-line winds, flooding and severe storms on the Pine Ridge Indian Reservation in South Dakota; severe storms, tornadoes, straight-line winds and flooding in Texas; severe storms, tornadoes, straight-line winds and flooding in Oklahoma; severe storms, tornadoes, straight-line winds and flooding in Arkansas; and severe storms and flooding in South Carolina.

To reach the desk of President Obama, Weaver's disaster declaration must be approved by county Chairman Curtis and both officials must determine that the disaster is beyond the capabilities of the city or county to handle. Curtis has said he is "fully on board" to do whatever he can to help the city of Flint.

In Michigan, all requests for assistance are channeled through the Michigan State Police, Emergency Management and Homeland Security Division. The MSP reviews requests and makes recommendations to the governor, according to Ron Leix, a spokesman for the division.

The governor has the authority to mobilize state agencies to provide assistance, and if the state cannot cope with the disaster, Gov. Rick Snyder could request assistance through FEMA.

The federal agency makes disaster recommendations to the president.

State Rep. Sheldon Neeley, D-Flint, urged Snyder to get Flint's application for help to the president as quickly as possible.

"Issuing a health emergency is the most responsible thing to do," Neeley said in a news release. "This is a public health crisis, and our children are most at-risk. A state-declared health emergency will allow the city to access federal funding."

To: Leix, Ron (MSP); Katarsky, Anthony (MSP)
Subject: *RE: State of emergency*

On the first, I would say, either a declaration of Disaster or Emergency provide the Governor the ability to respond with all state capabilities and would be up to his discretion as to which one is appropriate to the situation.

On the second, the MSP EMHSD would forward any request for a declaration to the Governor's office with a recommendation. At this time, we have not received a request from Genessee County for either a declaration or additional state resources.

Take 2:

- It would be up to the Governor to determine which, if any, declaration is appropriate.
- At this time, the Michigan State Police, Emergency Management and Homeland Security Division has not received any formal requests for state assistance through the Michigan Emergency Management Act.

How does this sound?

- Either "state of disaster" or "state of emergency" declaration could be appropriate. Both types of Governor's declarations provide the same assistance from the state of Michigan. Most individuals don't know there are two broadly defined types of declarations in the Michigan Emergency Management Act. It would be up to the Governor to determine which one is appropriate.
- At this time, the Michigan State Police, Emergency Management and Homeland Security Division has not received any formal requests for state assistance through the Michigan Emergency Management Act.

Subject: State of emergency

Hi Ron,

So today the legislative black caucus called on the administration to declare a state of emergency in Flint. Wondering if that could happen given the main problem in Flint has already occurred. Considering the water situation in Flint, would a request for a disaster declaration (is this the right term?) be more appropriate?

Also has MSP received anything formal in requesting a state of emergency or something like it?

Thanks,

Alethia Kasben

Importance: High

How does this sound?

- Either "state of disaster" or "state of emergency" declaration could be appropriate. Both types of Governor's declarations provide the same assistance from the state of Michigan. Most individuals don't know there are two broadly defined types of declarations in the Michigan Emergency Management Act. It would be up to the Governor to determine which one is appropriate.
- At this time, the Michigan State Police, Emergency Management and Homeland Security Division has not received any formal requests for state assistance through the Michigan Emergency Management Act.

Hello –

Yes, officially, Genesee County is currently covered by a FEMA-approved hazard mitigation plan, and Flint was one of the adopting participants, thus also counted as having FEMA approval.
Mitch had done the review, but would you like me to look through the document to see whether it gave any coverage to the current issues of infrastructure and public health?

Subject: RE: Fridays strategic planning meeting

My thoughts prior to discussing:

1. Yes, we need more, reassigning Mitch will only go so far; Giving Mike tighter deadlines is necessary, but I'm not sure what the response will be or how much more we'd get. How much technical support we give to locals should be up for discussion and how its provided or how deep it goes.
2. I had worked just a little bit with Lt. Johnson on this; I think it's a good adjunct to planning/working with the voluntary agencies. We have a lot of work to do with both to increase ours and their capacity.
3. I see revamping this as part of reworking the DA procedures; the current plan is only a rough starting point. As you say, the inclusion of actual SMEs vs. SEMCs is important.
4. No comment on this yet.
5. I'd like to see us work more with the universities with planning and em programs to get more students on internships.
6. On item 1 and the debacle; we are being expected to support the locals more; and from a larger em perspective, we need to integrate more and work with the locals more. This involves not only more people, but more engagement in state and local activities/conferences. We need to be leaders in the field, and we can promote a paradigm in MI that I think would be a leading mindset nationally.

Michelle and Tom,

I just spoke with Mr. Katarsky and he advised that we would be going through our strategic plan and look for any updates, changes etc. (I know you already know that).

He also advised that the 20 minute session that I have on "Emergent issues" needs to cover items that we feel are a concern or what we should be putting into the plan that isn't. Mr. Katarsky is going to talk about the need for more staffing, funding, etc., but we need to focus our 20 minutes on what we need, not just issues, but solutions as well. I have a few topics that will need some horse power added to it:

1. More planners (local level- Michelle) to assist. Maybe highlight what New Jersey has and what we should have, also the debacle in Grand Traverse and Leelanau with them not having the staffing and we had to hold their hand(s).
2. Business EOC (Tom?/Michelle?). I have a little bit to speak on reference this, but am certainly not an SME. My only experience was with the Flint water crisis and me "cold calling" companies to see if they could help.
3. Michigan's Rapid Impact Assessment team (Weber)- Currently the staff that would do this is the same staff that is in the SEOC during an event?- which won't work.
4. State Resource Database (Michelle).

Anything else? Keeping in mind that we only have 20 minutes and this presentation involves discussion on the topics above. Should these four stay in the list of topics?

I will be talking to both of you this afternoon.

Thanks,
Gabe

FEMA
Region V

Region V Readiness

Operational Status

- **RRCC:** Watch/Steady State
- **Region V IMAT:** Blue
  - Alpha: MI-3375-EM (Lansing, MI)
  - Bravo: HHS UCG (Flint, MI)
  - Charlie: Collateral
- **Region V LNO:** Cornelius Miller
- **NTAS:** No Active Alerts

State EOC Status

• **Illinois**	**Normal Operations**
• **Indiana**	**Normal Operations**
• **Michigan**	**Full Activation**
• **Minnesota**	**Normal Operations**
• **Ohio**	**Normal Operations**
• **Wisconsin**	**Normal Operations**

Exercise Events

- **Feb 18:** FEB COOP Devolution FSE; Detroit, MI
- **Mar 3:** Indiana Cyber (Power Disruption) TTX; Camp Atterbury, IN
- **Mar 16:** FEB COOP Devolution FSE; Cincinnati, OH
- **Mar 30:** RV/RII Devolution TTX (Phase II); Chicago/New York via VTC
- **Apr 6:** Braidwood REP; IL
- **Apr 18:** FEB COOP Reconstitution TTX; Chicago, IL
- **Apr 20:** NSSE RNC SL TTX; Cleveland, OH
- **Apr 26:** Palisades REP; MI
- **Apr 27:** America's Preparathon

Training Events

- **Feb 17-18:** L-213 Application Review; Indianapolis, IN
- **Feb 29-Mar 1:** REP Core Concepts Course (RCCC); Manitowoc, WI
- **Mar 1-2:** L-276 Benefit Cost Analysis, Indianapolis, IN
- **Mar 2-4:** REP Plan Review Course (RPPR); Manitowoc, WI
- **Mar 3-4:** L-214 Hazard Mitigation Assistance Implementation & Closeout
- **Mar 21-24:** REP Exercise Evaluator Course (REEC); Madison, WI
- **Mar 25:** REP Exercise Controller Course (RECC); Madison, WI
- **Apr 4-7:** L580 EM Framework for Tribal Governments; Leech Lake Band of Ojibwe, Minnesota.
- **Apr 18-21:** REP Exercise Evaluator Course (REEC); Springfield, IL
- **Apr 22:** REP Exercise Controller Course (RECC); Springfield, IL
- **May 3-5:** L207 Introduction to Hazard Mitigation Field Operations; Chicago, IL

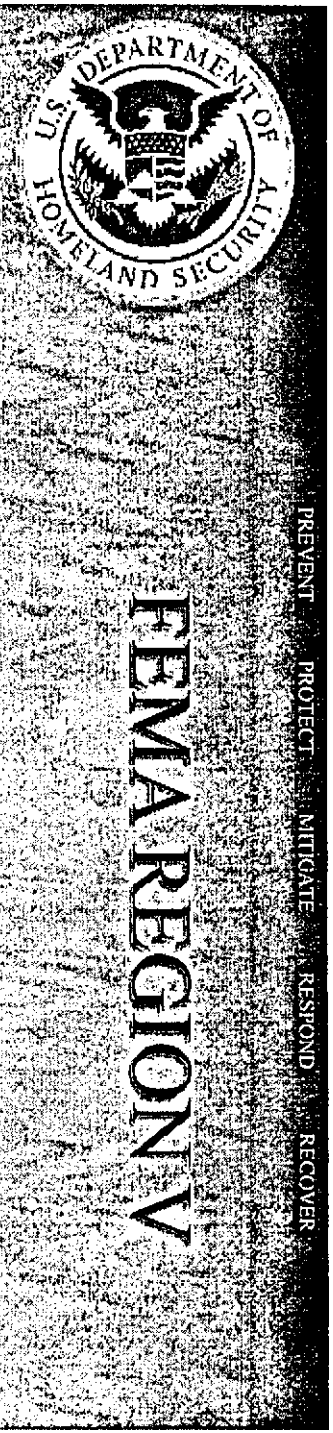
Declarations

State	Event	Event Date	Approved On	County Approvals	Remarks
MI FEMA-3375-EM	Water Emergency	April 25th and ongoing	Jan 16, 2016	1	Provides emergency assistance for water, water filters, water filter cartridges, water test kits and other necessary related items for a period of no more than 90 days for Genesee County.

FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain and improve our capability to prepare for, protect against, respond to, recover from and mitigate all hazards.



LONG TERM DISTRIBUTION
COA BRIEF

DRAFT PREDECISIONAL

PREDECISIONAL
NOT FOR FURTHER
DISTRIBUTION

Long-Term Distribution COA Facts & Assumptions

Facts

- Move to long term distribution plan in 2-4 weeks
- EM Dec expires 14 April 2016
- FEMA can only procure H20 for 90 day
- One filter in every residence
- Stewardship {reports, oversight}
- Restore Confidence in Government at the Federal/State/Local level
- Desire to move to direct distribution of:
  - H2O filters
  - H2O Cartridges
  - Pitchers
  - H2O would still be at Pods

Assumptions

- Move State Distribution
- State will maintain commodities past 90 days?
- Does state want to pre-purchase commodities other than water?

DRAFT PREDECISIONAL

PREDECISIONAL
NOT FOR FURTHER
DISTRIBUTION

Long-Term Distribution COA Criteria

- Ease of Sustainability (5)
  - Must be sustainable for a year or longer with no disruption of service to the affective population. (less is better = fewest days of disruption)

- Ease of Implementation (5)
  - Time and effort to operationalize COA (less is better = least amount of time and effort)

- Cost (1)
  - Ability to implementation and sustain (less is better = fewer $$$)

- Public Perception (3)
  - Public has confidence in the long term distribution plan (less is better = measured as # of negative social media posts)

- Survivor Centric (4)
  - Most convenience to population (less is better = distance and available hours to pop)

DRAFT PREDECISIONAL

PREDECISIONAL
NOT FOR FURTHER
DISTRIBUTION

Long-Term Distribution COA Evaluation

DRAFT PREDECISIONAL

		COA				
Factor	**Weight**	**1**	**2**	**3**	**4**	**5**
Sustainable	5	10	25	16	6	18
Implementation	5	8	18	15	13	11
Cost	1	15	10	13	21	19
Public Perception	3	14	12	8	15	7
Survivor Centric	4	12	14	13	8	14

	Ranking	**2**	**5**	**4**	**1**	**3**

PREDECISIONAL NOT FOR
FURTHER DISTRIBUTION

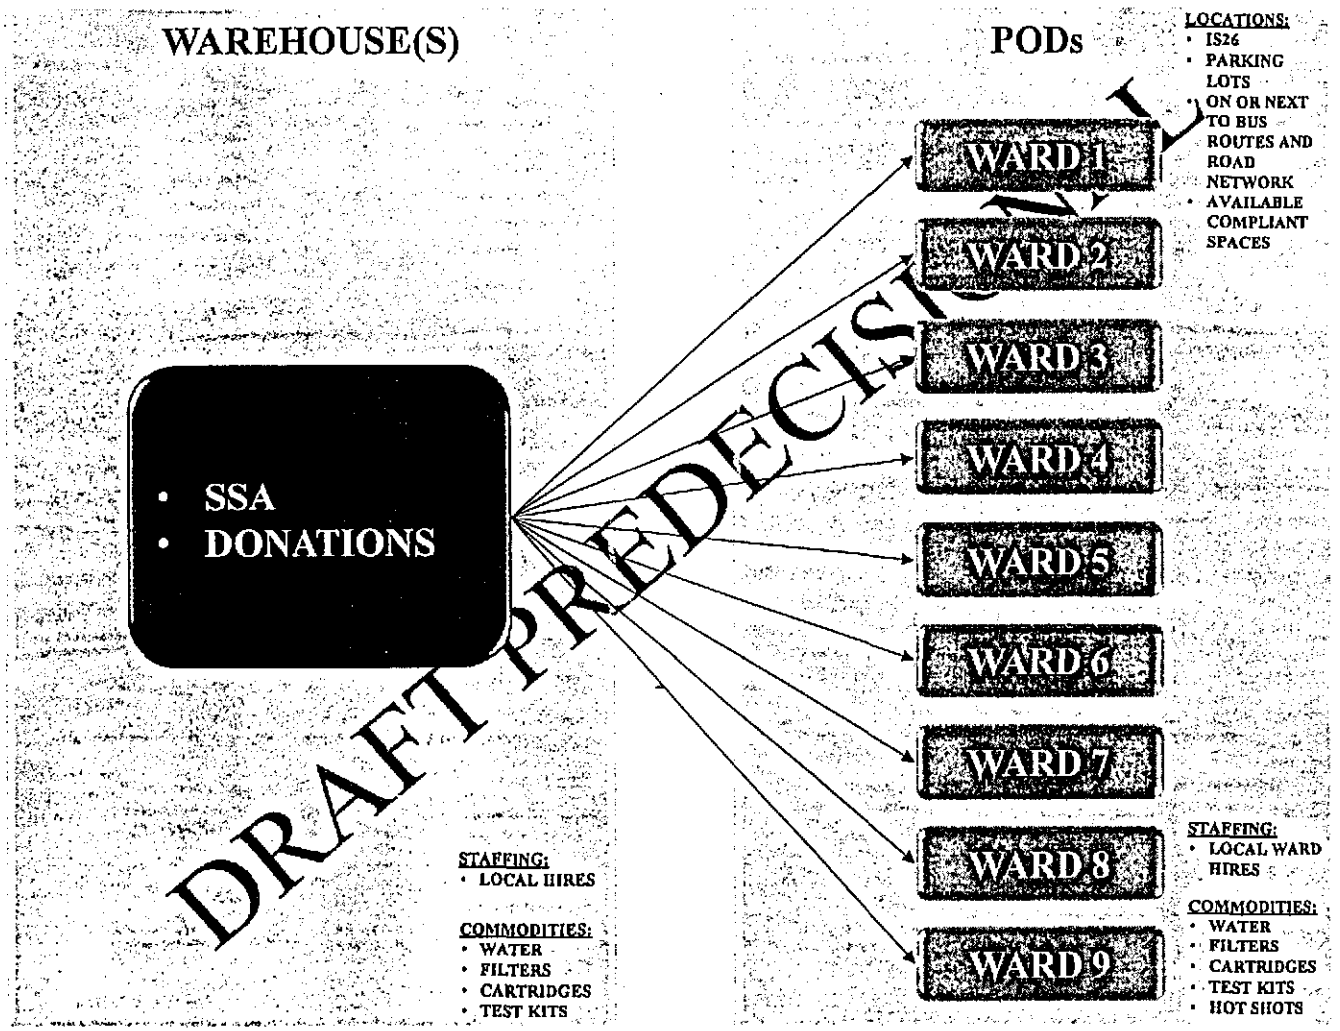
COA #1: IS26

- **One Point of Distribution (POD) per Ward**
- **IS26 compliant checklist to identify locations**
- **Minimum Staffing: 9 per POD for 81 personnel**
- **Staffing would be provided all or in part by workforce development grants**
- **Location based upon**
  - Fixed Location (parking lots)
  - Utilize semi/box truck w/just in time commodities
  - Parking lot next to bus route &/or transportation route
- **Full Service POD:**
  - H2O, Filters, cartridges, test kits (only advertise H2O, cartridges and test kits) + Recycling
- **Rapid Response Teams for 211:**
  - 1 x 16' Penske
  - 2 personnel per POD to address vulnerable population in this COA
  - Approx. 3,000 vulnerable people; many are not mobile

DRAFT PREDECISIONAL

PREDECISIONAL NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #1



NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #1 Talking Points

STRENGTHS

- JUST-IN-TIME DELIVERY
- EFFICIENT, DEVELOPED, AND PROVEN SYSTEM
- ACCOUNTABILITY OF RESOURCES
- EASILY LOCATED
- MORE ABLE TO TRACK BURN RATES
- FOLLOWS FEMA-APPROVED GUIDELINES
- BUY IN AT ALL LEVELS OF GOVERNMENT
- ON-LINE TRAINING (EMI-IS)
- SCALABLE & FLEXIBLE
- WARD BASED
- BRIDGING STRATEGY USING NATIONAL GUARD & VOLUNTEERS W/IN LESS THAN 7 DAYS
- ROLE FOR FAITH BASED ORGANIZATIONS
- SUSTAINABLE LOCAL JOBS FOR 12 MONTHS
- PROVEN DISTRIBUTION STRATEGY
- # OF LARGE SITES TO PICK FROM
- STIMULATE FLINT ECONOMY
- ON BUS/TRANSPORTATION ROUTES
- NO PREDETERMINED SITES
- COUNCILMEN ACTIVE PARTNERS

RISKS

- POLITICAL RAMIFICATIONS
- STAFFING
  - TRAINING
  - RETENTION
  - VETTING

WEAKNESSES

- TRAINING AND CERTIFICATION
- TRACKING OF COMMODITIES
- HIGH COST OF BRIDGING STRATEGY ~$1M FOR 71 NG PERSONNEL PER MONTH
- STAFF SCALIBILITY LIMITED TO GRANT
- UNKNOWN BURN RATE
- WOULD REQUIRE MOU

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SEE EQUIP. LIST FOR IS26
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

DRAFT PREDECISIONAL

PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

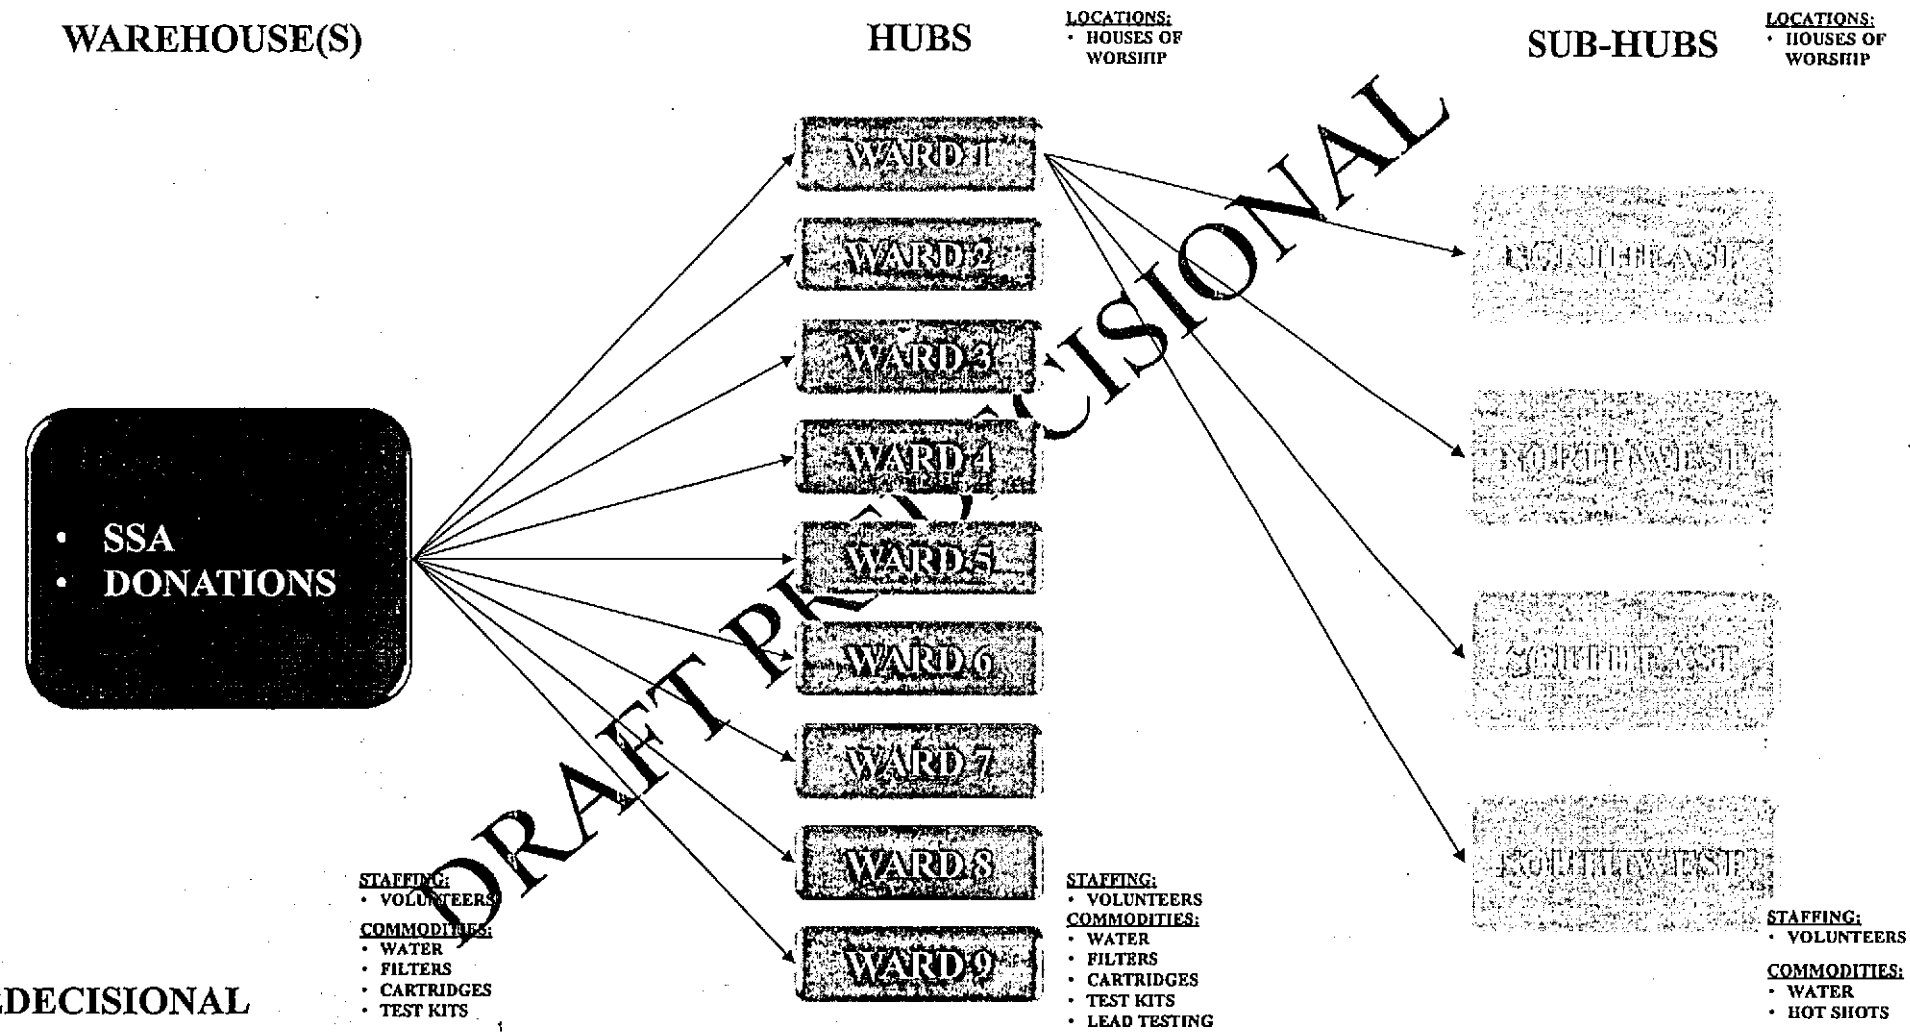
COA #2:Faithbased – 9 Wards - 9 Hubs /36 Sub Hubs

- **Staff: Volunteers**
- **This plan is based on distribution centers to faith based organizations utilizing Food Bank and Red Cross distribution**
- **9 Wards; 1 Hub in each ward; 4 Sub-hubs in each ward**
- **Hubs:**
  - 4 commodities
  - Mobile lead testing clinic twice per week
    - For individuals without insurance; to include lead awareness testing, nutrition, and education
- **Sub hubs**
  - Recycling center
  - will do water distribution only
  - Transportation to senior citizen complexes in the ward

DRAFT PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #2



DRAFT PREDECISIONAL

PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #2 Talking Points

STRENGTHS

- WHOLE COMMUNITY
- ACCESS TO POPULATION
- LARGER GROUP VIABLE PROPERTY
- STATE INVESTMENT AND COMMUNITY ORGANIZED
- COMMUNTY GENERATED PLAN
- NO LABOR COSTS
- INCORPORATES STRATEGIC PARTNERS
- REDUCES TRAVEL TIME FOR RESIDENTS
- SURVIVORS CAN BE VOLUNTEERS

RISKS

- LOCATION SELECTION/AVAILABILITY: QUANTITY OF SITES
- RELIGIOUS SENSITIVITY (Internal discord among interfaith network)
- POLITICAL RAMIFICATIONS (Competing political interests)
- APPEARANCE THAT STATE IS WALKING AWAY AND GIVING MISSION TO FAITH BASED
- COMMUNITY BUY-IN MAY BE AFFECTED BY DISRUPTIONS TO LOCAL COMMUNITY ACTIVITIES

WEAKNESSES

- STAFFING OF 459 VOLUNTEERS (ABILITY TO SUSTAIN)
- IDENTIFY 45 SUITABLE FACILITIES THAT MEET IS26
- VOLUNTEERS MUST BE TRAINED AND CERTIFIED
- VOLUNTEERS REQUIRE SPECIFIC SKILLS
- BACKGROUND CHECKS REQUIRED FOR RAPID RESPONSE TEAMS
- HOST ORGANIZATION MUST COMPLY WITH VOLUNTARY LABOR LAWS
- LACK OF CONTINUITY IN STAFF
- DIFFICULT TO MAINTAIN A SUPPLY CHAIN ACCOUNTABILITY OF COMMODITIES
- RAPID RESPONSE TEAMS WOULD NEED TO WORK OUT OF HUBS TO GET FILTER, CARTRIDGES, & TEST KITS
- IMPACTS & FINANCIAL CONCERNS AT CHURCHES/COMMUNITY CENTERS
- POTENTIAL SUDDEN TERMINATION AFFECTS OPERATIONAL STABILITY
- EXCEEDS SPAN OF CONTROL RELATED TO STAFFING AND SITES
- INTERIOR SPACE REQUIREMENTS STORAGE 10X10 CLIMATE CONTROLED ADMIN FOR 2 PERSONNEL INTERNET AND PHONE
- DISRUPTION OF COMMUNITY TRAFFIC FLOW
- POTENTIAL SECURITY COSTS
- BRIDGING STRATEGY UTILIZING THE NG IS NOT VIABLE
- LACK OF EQUIPMENT/WEAR AND TEAR
- RELIGIOUS SENSITIVITY

EQUIPMENT, POLICY, PROCEDURES, ETC.

- 45 SITES
- EQUIPMENT LOG LIST
- STAFFING: VOLUNTEER POLICY CONSIDERATIONS
  - AGE, ABILITY
  - INSURANCE
- OFF-SITE EBL TESTING IS NOT SUPPORTED BY MEDICAL COMMUNITY
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS
  - RENTAL
  - MOU

DRAFT PREDECISIONAL

PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

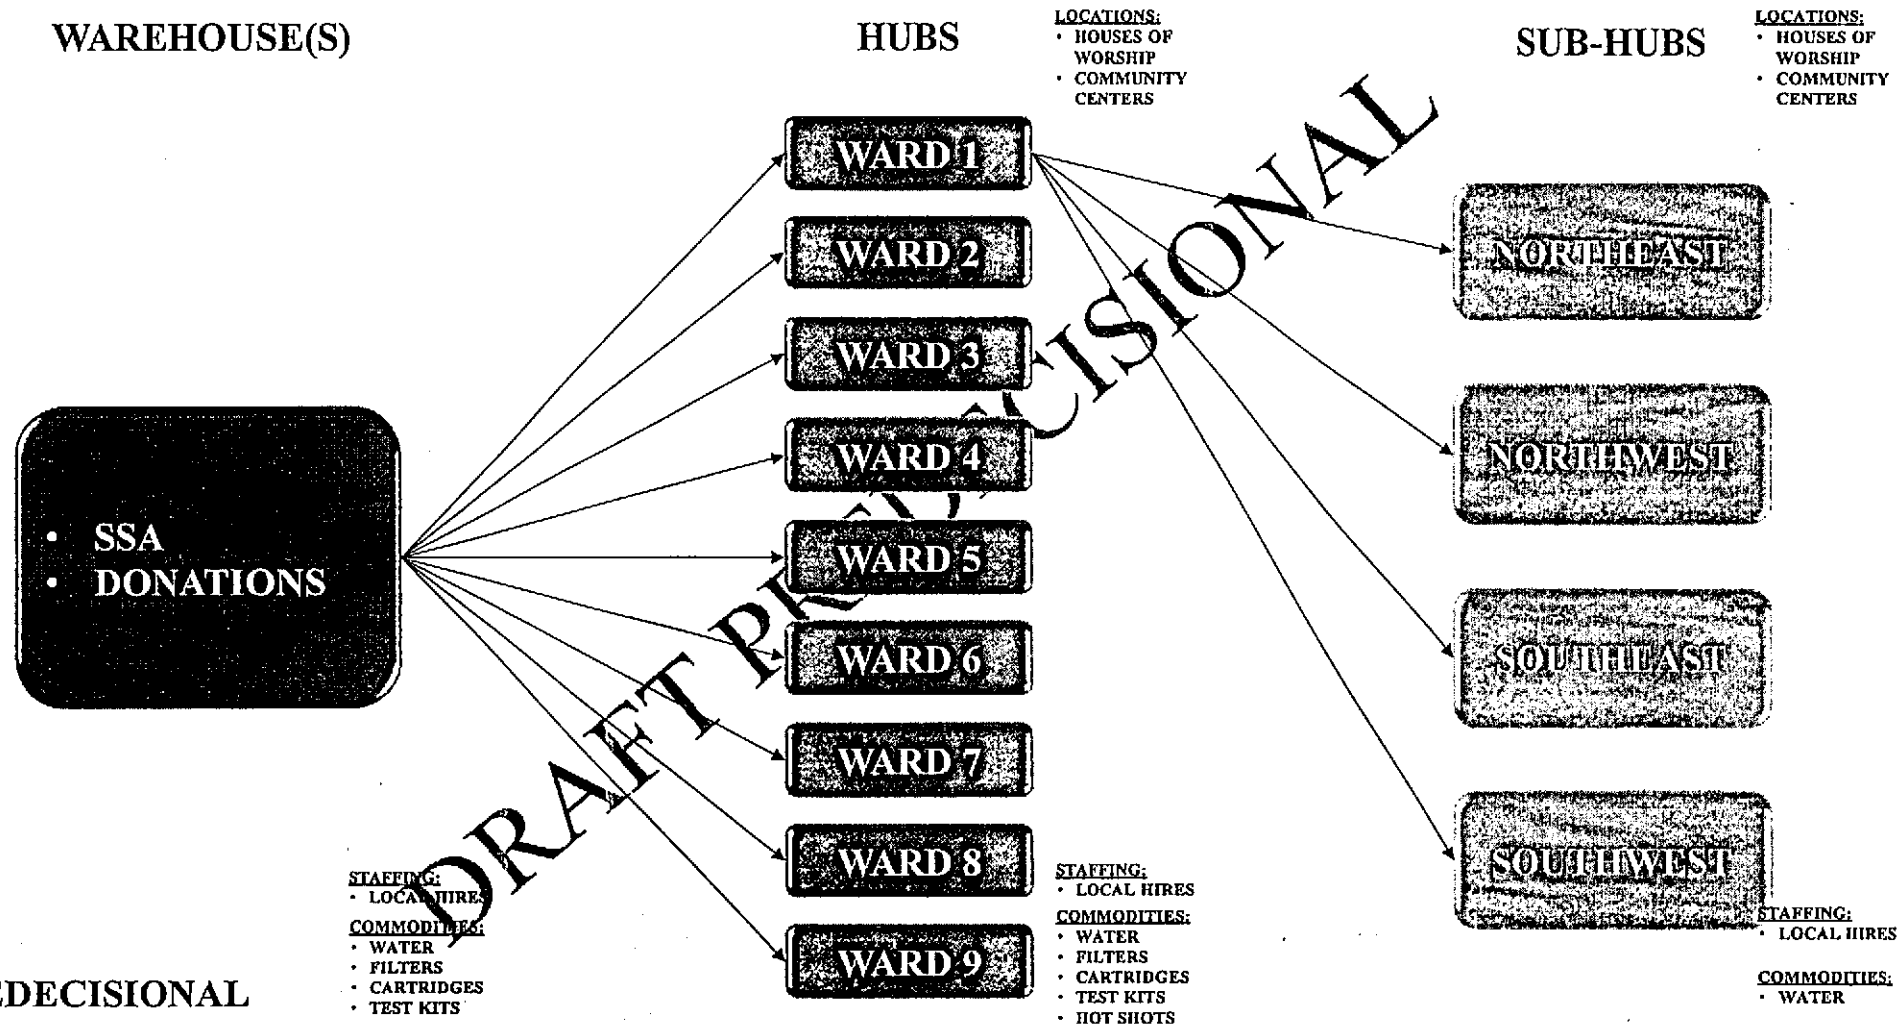
COA #3:WARDS: 9 HUBS/36 SH – LOC HIRE

- Staffing is hired full and part time
- This plan is based on distribution centers to faith based organizations utilizing Food Bank and Red Cross distribution
- Utilizing one hub in each ward and four sub hubs in each ward.
- Hubs will have all four commodities
- A mobile lead testing clinic twice per week for individuals without insurance at each hub (where they receive lead awareness testing, nutrition, and education on lead prevention tips for families)
- Sub hubs
  - Recycling center
  - will do water distribution only
  - Transportation to senior citizen complexes in the ward

DRAFT PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #3



DRAFT PREDECISIONAL

PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #3 Talking Points

STRENGTHS

- WHOLE COMMUNITY
- SKILLED LABOR POOL
- RELIABLE WORK FORCE
- MONEY STAYS WITHIN COMMUNITY
- ACCESS TO POPULATION
- LARGER GROUP VIABLE PROPERTY
- STATE INVESTMENT AND COMMUNITY ORGANIZED

RISKS

- LOCATION SELECTION/AVAILABILITY
- RELIGIOUS SENSITIVITY
- POLITICAL RAMIFICATIONS
- STAFFING
  - LOCAL HIRING
  - TRAINING
  - RETENTION
  - VETTING
- APPEARANCE THAT STATE IS WALKING AWAY AND GIVING MISSION TO FAITH BASED
- POTENTIAL CHANGING COMMUNITY CONCERNS

WEAKNESSES

- STAFFING OF 459 EXCEEDS GRANT CAPACITY (~200)
- FINDING 45 SUITABLE FACILITIES
- TRAINING AND CERTIFICATION
- FUNDING SOURCE
- CONSISTANCY
- ACCOUNTABILITY OF COMMODITIES
- HOW DO RAPID RESPONSE TEAMS GET FILTER, CARTRIDGES, & TEST KITS WORKING FROM SUB HUBS
- IMPACTS AND FINANCIAL CONCERNS AT CHURCHES & COMMUNITY CENTERS
- POTENTIAL SUDDEN TERMINATION
- EXCEEDS SPAN OF CONTROL
- INTERIOR SPACE REQUIREMENTS STORAGE 10X10 CLIMATE CONTROLED ADMIN FOR 2 PERSONNEL INTERNET AND PHONE
- DISRUPTION OF COMMUNITY TRAFFIC FLOW
- POTENTIAL SECURITY COSTS

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SITES
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

PREDECISIONAL

DRAFT PRE-DECISIONAL

NOT FOR FURTHER DISTRIBUTION

COA #4: FILTER DIRECT DELIVERY

- Direct delivery for filters, cartridges, and pitchers
- PODS water only and recycling
- Rapid Response - could use one per Ward
- Designated Officials will arrange pickup for Franchise customers from SSA
- MI Department of Technology Management and Budget would issue request for proposals (RFP) for direct delivery of the three commodities
- Tracking and protection of Personally Identifiable Information is responsibility of contractor
- Write RFP to incorporate an upper limit per household per month
- State to provide addresses
- This COA may be supplemented by faith and community based distribution centers at their discretion
- Distribution Model
  - FEMA procured commodities delivered to SSA
  - Vender assumes commodities at SSA
  - PODs in each of 9 wards using IS26 protocol for water distribution only

DRAFT PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #4 Talking Points

STRENGTHS

- TURN KEY FOR THREE COMMODITIES
- IMPROVED EFFICIENCIES, ACCOUNTING AND TRACKING
- FLEXIBLE AND RESPONSIVE
- CONVIENENT/SURVIVOR CENTRIC
- INDIVIDUAL AGENCIES' PRE-EXISTING COMPETENCIES MAXIMIZED
- MEETS ALL IS26 STRENGTHS
- AS DEMAND FOR H2O DECREASES ALLOWS A TRANSITION TO COMMUNITY LED H2O PODS

RISKS

- LOCATION SELECTION/AVAILABILITY
- POLITICAL RAMIFICATIONS
- CONTRACTOR PERFORMANCE
- STAFFING OF PODS
  - INCREASES
  - FUNDING
  - TRAINING
  - EQUIPMENT

WEAKNESSES

- COST
- DUPLICATION OF EFFORTS
- UNKNOWN BURN RATE
- WOULD REQUIRE MOU FOR PODS
- NO PREDETERMINED SITES FOR PODS
- TIME REQUIREMENTS TO START
- INCREASED POSSIBILITY FOR RETAIL FRAUD

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SITE
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE FOR WATER PODS
- ACCOUNTABILITY SYSTEM
- CREDENTIALING FOR PODS & RAPID RESPONSE TEAMS
- BACKGOUND CHECKS FOR RAPID RESPONSE TEAMS
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

PREDECISIONAL

DRAFT PREDECISIONAL

NOT FOR FURTHER DISTRIBUTION

COA #5: FOOD BANK DISTRIBUTION

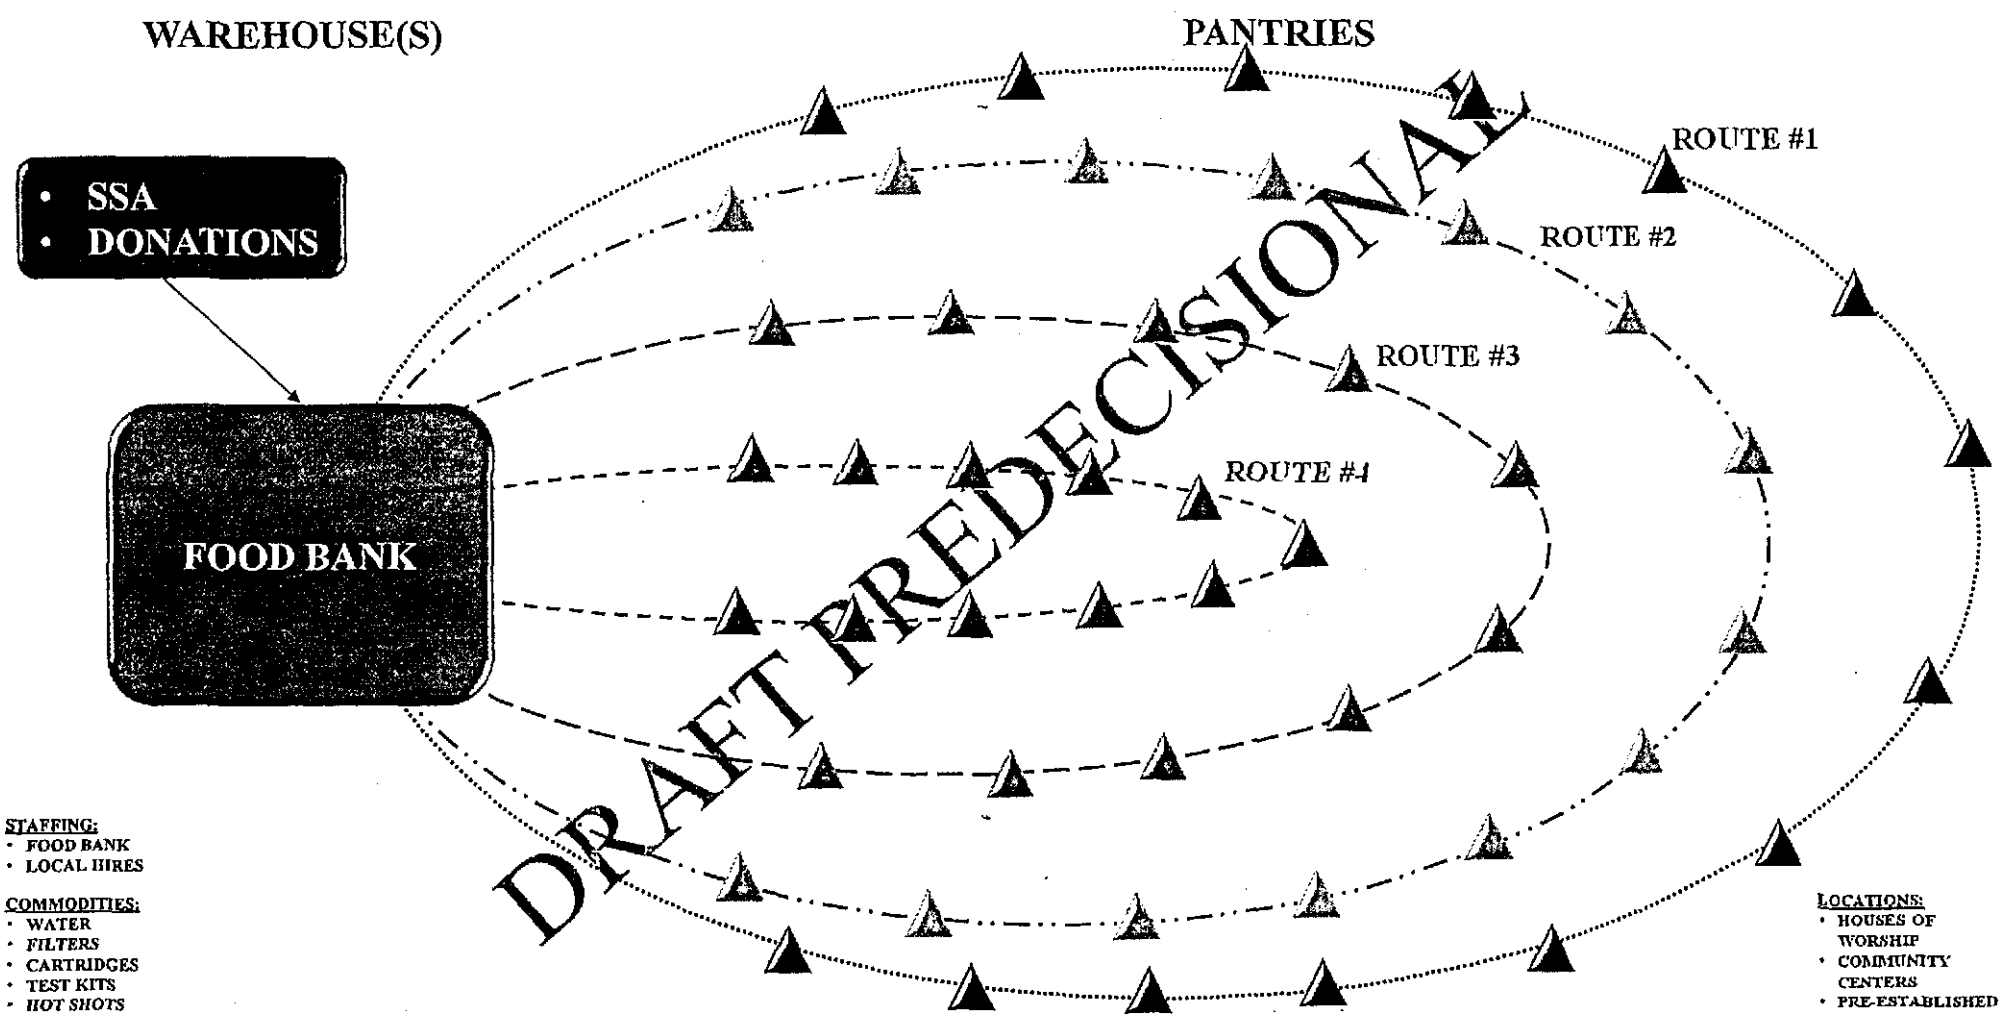
- Expands on Food Bank (FB) distribution model
- Expand on existing four routes per week
- Contract with Food Bank of Eastern Michigan for distribution services
- 86 existing pantry locations
- Utilizes existing community partners
- Staffing would be based upon current FB staffing model
- All four commodities at every site
- Mix of paid and volunteer staffing

DRAFT PREDECISIONAL

PREDECISIONAL

PREDECISIONAL NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #5



NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #5 Talking Points

STRENGTHS

- RAPID EXECUTION AFTER GRANT IS SIGNED
- COMMUNITY BASED
- TRACKING SYSTEM TO PANTRIES
- *GOVERNMENT AND NGO BOTH HAVE ROLES*
- HIRED WORKFORCE
  - SUPLEMENTED WITH VOLUNTEER AND FAITH-BASED
- WELL DISTRIBUTED
- PRE-ESTABLISHED LOGISTICS SYSTEM (FOOD BANK *ROUTES*)
- EXPANSIVE CONNECTION TO PANTRIES
- ALREADY SELECTED SITES

RISKS

- LOCATION SELECTION/AVAILABILITY
- POLITICAL RAMIFICATIONS
- STAFFING
  - INCREASES
  - FUNDING
  - TRAINING
  - EQUIPMENT

WEAKNESSES

- RECRUITMENT OF VOLUNTEERS
- POTENTIAL ROUTE ADJUSTMENTS TO REPRESENT EACH WARD
- IMPACTS TO CURRENT BUSINESS PLAN
- FUNDING SOURCE
- LARGE NUMBER OF LOCATIONS
- CAPACITY/CAPABILITIES (SUITABILITY OF FACILITIES)
- NUMBER OF DELIVERY VEHICLES
- RESTOCKING PROCEDURES FOR PANTRIES
- ACCESSABILITY (ADA, HOURS, TRAFFIC)
- ACCURATE BURN-RATE (LITER/CASES VS POUNDS)
- COMMODITY SOURCE TRACKING MECHANISM TO HOUSEHOLDS
- LOSE CONTROL OF HOURS OF OPERATION AND LOCATION
- *TIME FOR RFP PROCESS*
- UNKNOWN TOTAL COST
- NOT EVENLY DISTRIBUTED
- UNKNOWN EQUIPMENT STAFFING MODEL, RFP SPACE, INTEREST
- UNKNOWN IF THEY WILL DELIVER CARTRIDGES/FILTERS

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SITE
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

DRAFT PRE-DECISIONAL

PREDECISIONAL

QUESTIONS

- What are limitations on each site's usage; i.e., churches?
- Can limitations be waived?
- Max number of personnel to support?
- How much advance notice is required?

Potential Local Hire Program
Meeting Notes – 2/12/16

Participants

Maggie Sayles, MTED
Tom Weber, MSP/EMHSD
Brianna Briggs, MSP/EMHSD
Zach Baker, MSP/EMHSD
LTC Seeley, National Guard
Alisha Tate-Nadeau, FEMA
Jason Gamble, FEMA
Jeannie Moran, FEMA

Notes

Workforce Innovation and Opportunity Act (WIOA)
National Dislocated Worker Grant/National Emergency Grants

- Handles the humanitarian effort to include training, workforce money for unemployed, temporary work assignments
- Grant funding could be used to support attire, equipment leases, etc.
- Should be thinking about apprenticeships and training for positions that could turn into long-term hiring
- Timeline - USDOL has indicated, with the Presidential Declaration, turnaround could be as quick as 48 hours
- TEGL 2-15 is the guidance document
- Training and background checks could be paid under the grant
- Maximum award? – No indications there is a maximum
    - Estimates put us around at least $12 million, potentially $15 million (additional asks can be made as needs arise)

Who can be the employer of record?

- It can be NGO or a governmental entity (city or county)
- Employer of record would write paychecks
- MI Works would provide case management to employees

****Need to identify at least one employer of record (very important next step)**

- Maggie to provide a list of criteria we could use when approaching potential employers to provide details on what this would entail (would be based on the Fair Labor Standards Act)
- No matter who the employer of record is, the employee should be working closely with MI Works
- Could have multiple employers of record, if needed

General MI Works Information

- Often Workforce Development Agency has a work/school based employment
    - 35 hours work, 5 hours school (training/work enhancement opportunities), generally
- LTC Seeley will provide Maggie with information for the Youth Conservation Corps
    - Could potentially fit as one employer of record
    - Focuses on youth hires (16-24 years of age)
    - Would hire locally in Flint
- Other grants currently being used by MI Works could be realigned to assist in the short term in getting people out there doing some of this work
- They initially pull from people they already have signed up for work opportunities, particularly with special skills.
- MI Works (GST Works – locally) has space in their facility near downtown that could be used for training or meeting space for these operations

**Need to work on list of jobs with descriptions (FEMA and Brianna are putting together based on COAs)

- MI Works could help determine appropriate pay scale for jobs

Maggie – Research

- Reached out to California (received $18 million previously) and received information
- Reached out to Missouri on Joplin tornado response and received some information from them (MO uses this program fairly regularly now after declared disasters)

**-Action items for MSP/EMHSD

Pastor Ellison, Harris, and Overton,

Below is a list of churches that have volunteered to be Church Distribution Hubs. I had direct contact with the pastors and their point of contacts. I have also conducted site assessments at their facilities.

It was conveyed to them that this initial plan was a collaborative effort, and may change with input from all parties involved.

It was discussed, and agreed that the HUB churches would network with the surrounding churches, and set up their own agreed upon distribution schedule. It was requested that the HUB church provide a list of churches that are obtaining their water from the HUB church. This list can be sent via email to Lt. Roach at Roachb@michigan.gov.

Hopefully this plan will further assist and augment our initiative of getting water to our residents more efficiently.

Request for Water

At this time the Church HUB point of contact is Lt. Roach 517-819-0841. The Church HUB will call and provide the quantity of water, and schedule the delivery time. This should be scheduled at least 24 hours in advance.

Deliveries

The deliveries will be conducted by a Mi DTMB driver, and truck. They have a pallet jack and the capability of moving pallets from their truck to a staging area. If the water needs to be transported to an upper or lower level, there needs to be people to assist off-loading.

Church Distributions

The Church Distribution HUB would be responsible to network with the surrounding churches, and set up a distribution schedule, along with amounts of water needed.

Michigan State Police Points of Contact

Lt. B.J. Roach , Roachb@michigan.gov

Lt. Mark A. Russo Russom2@michigan.gov

CHURCH DISTRIBUTION HUBS

NORTH

Foss Avenue Baptist Church
1159 East Foss Avenue
Flint MI
Pastor Flynn 810-965-1515
Point of Contact: Jackie Scott 810-787-9019

Delivery: 4 pallets starting 2-2-2016 @ 12:30 pm

NORTH WEST

St. Mark Baptist Church
3020 DuPont NE
Flint MI
Pastor Thompson 810-280-9985
Point of Contact: Angie George 810-955-6297/810-234-6609

Delivery: 25 pallets starting 1-29-2016 @ 11:00 am

SOUTH CENTRAL

El-Shaddai Church of God in Christ

Additional Options available:

Are you a UPS Customer	
Do you have a UPS Shipping Account? If so, please provide account number (six digit # *combination of alpha and numeric* characters)	
Would you be interested in setting up UPS discounted shipping program for your domestic and international small package needs, designed specifically for non-profits?	

Please Note that other information such as an invoice PDF and a Shipper Declaration PDF will also be required if your In-Kind request is approved. Please be ready to supply these documents.

NOT FOR FURTHER DISTRIBUTION
DRAFT/PRE DECISIONAL

Long-Term Distribution COA Facts & Assumptions

Facts

- Move from State to ??? distribution method
- EM Dec expires 14 Apr 16
- Distro COAs included faith based
- DEQ 3rd party H2O safe
- FEMA provide H2O 90 day
- FEMA 3 commodities
- One filter in every residence
- State engaged – high level
- Stewardship {reports, oversight}
- Restore Confidence in Govt F S L

Assumptions

- Move to long term distribution plan in 2-4 weeks
- Move State Distribution
- Distro command defined as
  - H2O filters
  - H2O Cartridges
  - Pitchers
  - H2O Pods
- ***State will maintain commodities past 90 days?**
  - **Does state want to prepurchase commodities other than water?**

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA Criteria

- **Ease of Sustainability (5)**
  - **Must be sustainable for a year or longer with no disruption of service to the affective population. (less is better=fewest days of disruption)**
- **Ease of Implementation (5)**
  - **Time and effort to operationalize COA (less is better=least amount of time and effort)**
- **Cost (1)**
  - **Ability to implementation and sustain (less is better=fewer $$$)**
- **Public Perception (3)**
  - **Public has confidence in the long term distribution plan (less is better=measured as # of negative social media posts)**
- **Survivor Centric (4)**
  - **Most convenience to population (less is better = distance and available hours to pop)**

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #1

- One Point of Distribution (POD) per ward
- IS26 Compliant Use IC26 checklist to ID Locations
- Staffing minimum of 9 per pod for 81 PAX
- Location based upon
  - Fixed Location (parking lots)
  - Utilize semi/box truck w/just in time commodities
  - Parking lot next to bus route &/or transportation route
- Full Service H2O, Filters, cartridges, test kits (only advertise H2O, cartridges and test kits) + recycling
- Rapid response to 211 calls one 16' penskes with 2 pax per POD to address vulnerable population in this COA
  - approx. 3000 question of how many are mobile
  - Potential existing homecare assist delivery
  - Some in assisted living and addressed there.
- This COA will likely be supplemented with faith and community based distribution centers

NOT FOR FURTHER DISTRIBUTION

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #1 Talking Points

STRENGTHS

- JUST-IN-TIME DELIVERY
- EFFICIENT, DEVELOPED, AND PROVEN SYSTEM
- ACCOUNTABILITY OF RESOURCES
- EFFICIENT
- EASILY LOCATED
- ABILITY TO HAVE ACCURATE BURN RATES
- FOLLOWS FEMA-APPROVED GUIDELINES
- BUY IN ALL LEVELS OF GOVERNMENT
- ON-LINE TRAINING (EMI-IS)
- SCALABLE FLEXIBLE
- BRIDGING STRATEGY USING NG & VOLUNTEERS W/IN LESS THAN 7 DAYS
- WARD BASED
- ROLE FOR FAITH BASED ORGANIZATIONS
- SUSTAINABLE LOCAL JOBS FOR 12 MONTHS
- PROVEN DISTRIBUTION STATEGY
- # OF LARGE SITES TO PICK FROM
- STIMULTATE FLINT ECONOMY
- ON BUS/TRANSPORTATION ROUTES
- NO PREDETERMINED SITES
- COUNCILMEN ACTIVE PARTNERS

RISKS

- POLITICAL RAMIFICATIONS
- STAFFING
  - TRAINING
  - RETENTION
  - VETTING

WEAKNESSES

- STAFF RECRUITMENT AND RETENTION
- LOCATION SEARCH
- TRAINING AND CERTIFICATION
- FUNDING AND FUNDING SOURCE
- FINDING SITES FOR DRIVE-THROUGH PODS
- TRACKING OF COMMODITIES
- NO PREDETERMINED SITES
- HIGH COST OF BRIDGING STRATEGY~$1M FOR 71 NG PAX PER MONTH
- *STAFF SCALIBILITY LIMITED TO GRANT*
- UNKNOWN BURNRATE
- WOULD REQUIRE MOU
- FEMA CAN ONLY PURCHASE THRU 14 APR

EQUIPMENT, POLICY, PROCEDURES, ETC.

- *SITE*
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS
- CONEX BOXES

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #2

- Staffing is utilizing volunteers
- This plan is based on distribution centers to faith based organizations utilizing food bank and Red Cross distribution
- Utilizing one hub in each ward and four sub hubs in each ward.
- Hubs will have all four commodities
- A mobile lead testing clinic twice per week for individuals without insurance at each hub (where receive lead awareness testing, nutrition, and education on lead prevention tips for families
- This COA will likely be supplemented with faith and community based distribution centers
- Sub hubs
  - Recycling center
  - will do water distribution only
  - Transportation to senior citizen complexes in the ward

NOT FOR FURTHER DISTRIBUTION

COMMODITIES:
- WATER
- HOT SHOTS

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #2 Talking Points

STRENGTHS

- WHOLE COMMUNITY
- ACCESS TO POPULATION
- LARGER GROUP VIABLE PROPERTY
- STATE INVESTMENT AND COMMUNITY ORGANIZED
- COMMUNTY GENERATED PLAN
- NO LABOR COSTS
- INCORPORATES STRATEGIC PARTNERS
- REDUCES TRAVEL TIME FOR RESIDENTS
- SURVIVORS CAN BE VOLUNTEERS

RISKS

- LOCATION SELECTION/AVAILABILITY: QUANTITY OF SITES
- RELIGIOUS SENSITIVITY (Internal discord among interfaith network)
- POLITICAL RAMIFICATIONS (COMPETING POLITIAL INTERESTS)
- APPEARANCE THAT STATE IS WALKING AWAY AND GIVING MISSION TO FAITH BASED
- COMMUNITY BUY IN MAY BE AFFECTED BY DISRUPTIONS TO LOCAL COMMUNITY ACTIVITIES

WEAKNESSES

- STAFFING OF 459 VOLUNTEERS (ABILITY TO SUSTAIN)
- IDENTIFY 45 SUITABLE FACILITIES THAT MEET IS26
- VOLUNTEERS MUST BE TRAINED AND CERTIFIED
- VOLUNTEERS REQUIRE SPECIFIC SKILLS
- BACKGROUND CHECKS REQUIRED FOR RAPID RESPONSE TEAMS
- HOST ORGANIZATION MUST COMPLY WITH VOLUNTARY LABOR LAWS
- LACK OF CONTINUITY IN STAFF
- DIFFICULT TO MAINTAIN A SUPPLY CHAIN ACCOUNTABILITY OF COMMODITIES
- RAPID RESPONSE TEAMS WOULD NEED TO WORK OUT OF HUBS TO GET FILTER, CARTRIDGES, & TEST KITS
- IMPACTS AND FINANCIAL CONCERNS AT CHURCHES/COMMUNITY CENTERS
- POTENTIAL SUDDEN TERMINATION AFFECTS OPERATIONAL STABILITY
- EXCEEDS SPAN OF CONTROL RELATED TO STAFFING AND SITES
- INTERIOR SPACE REQUIREMENTS STORAGE 10X10 CLIMATE CONTROLED ADMIN FOR 2 PAX INTERNET AND PHONE
- DISRUPTION OF COMMUNITY TRAFFIC FLOW
- POTENTIAL SECURITY COSTS
- BRIDGING STRATEGY UTILIZING THE NG IS NOT VIABLE
- LACK OF EQUIPMENT/WEAR AND TEAR
- RELIGIOUS SENSITIVITY

EQUIPMENT, POLICY, PROCEDURES, ETC.

- 45 SITES
- EQUIPMENT LOG LIST
- STAFFING: VOLUNTEER POLICY CONSIDERATIONS
  - AGE, ABILITY
  - INSURANCE
- EBL TESTING IS NOT SUPPORTED BY LOCAL MEDICAL COMMUNITY
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS
  - RENTAL
  - MOU

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #3

- Staffing is hired full and part time
- This plan is based on distribution centers to faith based organizations utilizing food bank and Red Cross distribution
- Utilizing one hub in each ward and four sub hubs in each ward.
- Hubs will have all four commodities
- A mobile lead testing clinic twice per week for individuals without insurance at each hub (where receive lead awareness testing, nutrition, and education on lead prevention tips for families
- This COA will likely be supplemented with faith and community based distribution centers
- Sub hubs
  - Recycling center
  - will do water distribution only
  - Transportation to senior citizen complexes in the ward

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #4

- Direct delivery for filters, cartridges, and pitchers,
- PODS water only and recycling
- Rapid Response could use one per Ward
- Designated Officials will arrange pickup for Franchise customers from SSA
- DTMB would issue request for proposals (RFP) for direct delivery of the three commodities
- Tracking and protection of PII is responsibility of contractor
- Write RFP to incorporate an upper limit per household per month
- State to provide addresses
- This COA will likely be supplemented with faith and community based distribution centers
- Distribution Model
  - FEMA procured commodities delivered to SSA
  - Vender assumes commodities at SSA
  - PODs in each of 9 ward using IS26 protocol for water distribution only

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #4 Talking Points

STRENGTHS

- TURN KEY FOR THREE COMMODITIES
- IMPROVED EFFICIENCIES , ACCOUNTING AND TRACKING
- FLEXIBLE AND RESPONSIVE
- CONVIENENT/SURVIVOR CENTRIX
- INDIVIDUAL AGENCY PREEXISTING COMPETENCIES MAXIMIZED
- MEETS ALL IS26 STRENGTHS
- AS DEMAND FOR H2O DECREASES ALLOWS A TRANSITION TO COMMUNITY LED H2O PODS

RISKS

- LOCATION SELECTION/AVAILABILITY
- POLITICAL RAMIFICATIONS
- CONTRACTOR PERFORMANCE
- STAFFING OF PODS
  - INCREASES
  - FUNDING
  - TRAINING
  - EQUIPMENT

WEAKNESSES

- COST
- DUPLICATION OF EFFORT
- UNKNOWN BURNRATE
- WOULD REQUIRE MOU FOR PODS
- NO PREDETERMINED SITES FOR PODS
- TIME REQUIREMENTS TO START
- INCREASED POSSIBILITY FOR RETAIL FRAUD

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SITE
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE FOR WATER PODS
- ACCOUNTABILITY SYSTEM
- CREDENTIALING FOR PODS & RAPIDS RESPONSE TEAMS
- BACKGOUND CHECKS FOR RAPIDS RESPONSE TEAMS
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

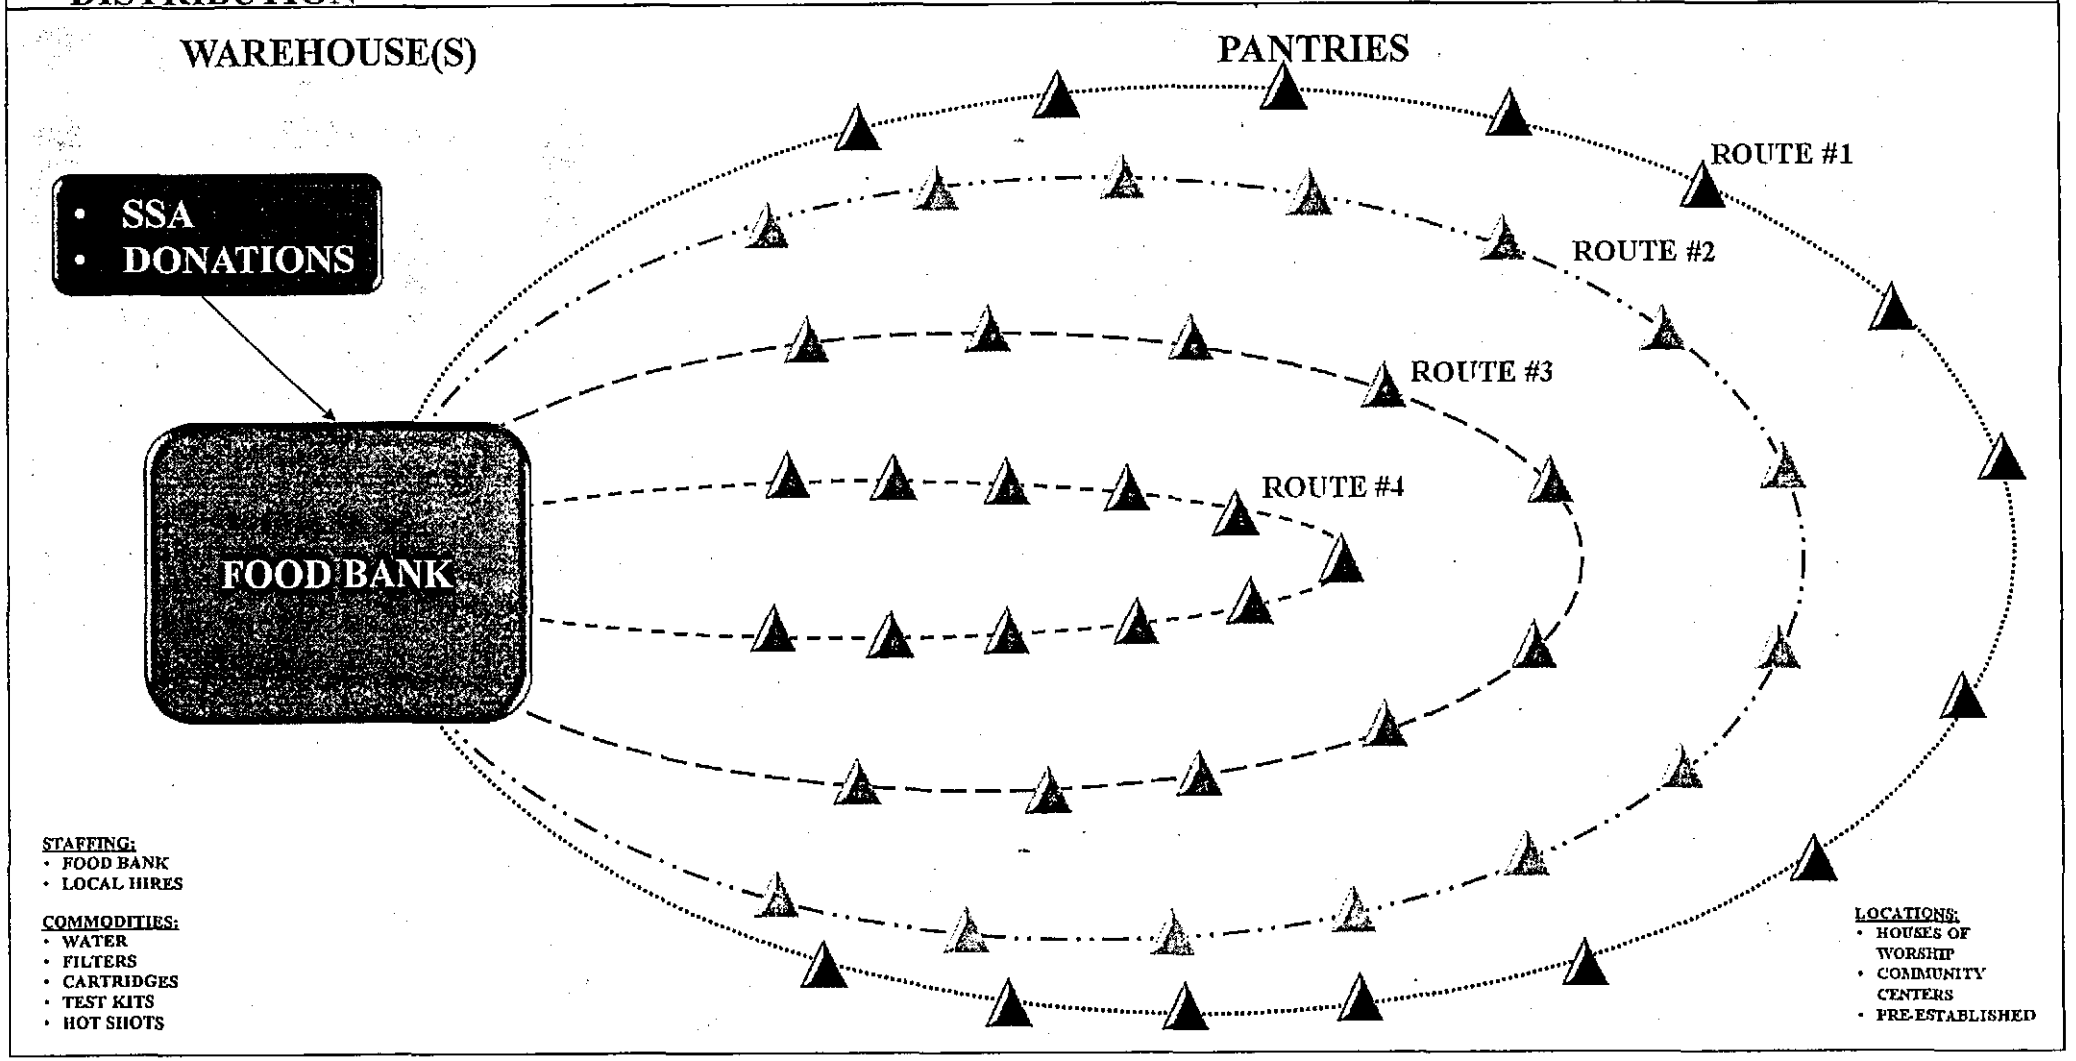
NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #5

- Expands on Food Bank (FB) distribution model
- Expand on existing four routes per week
- Contract with Food Bank of Eastern Michigan for distribution services
- 86 existing pantry locations
- Utilizes existing community partners
- Staffing would be based upon current FB staffing model
- All four commodities at every site
- Mix of paid and volunteer staffing

NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #5



NOT FOR FURTHER DISTRIBUTION

Long-Term Distribution COA #5 Talking Points

STRENGTHS

- RAPID EXECUTION AFTER GRANT IS SIGNED
- COMMUNITY BASED
- TRACKING SYSTEM TO PANTRIES
- GOVERNMENT AND NGO BOTH HAVE ROLES
- HIRED WORKFORCE
  - *SUPLEMENTED WITH VOLUNTEER AND FAITH-BASED*
- WELL DISTRIBUTED
- PRE-ESTABLISHED LOGISTICS SYSTEM (FOOD BANK ROUTES)
- EXPANSIVE CONNECTION TO PANTRIES
- ALREADY SELECTED SITES

RISKS

- LOCATION SELECTION/AVAILABILITY
- POLITICAL RAMIFICATIONS
- STAFFING
  - INCREASES
  - FUNDING
  - TRAINING
  - EQUIPMENT

WEAKNESSES

- RECRUITMENT OF VOLUNTEERS
- ROUTE ADJUSTMENTS (WILL EACH WARD BE REPRESENTED?)
- IMPACTS TO CURRENT BUSINESS PLAN
- FUNDING SOURCE
- LARGE NUMBER OF LOCATIONS
- CAPACITY/CAPABILITIES (SUITABILITY OF FACILITIES)
- NUMBER OF DELIVERY VEHICLES
- RESTOCKING PROCEDURES FOR PANTRIES
- ACCESSABILITY (ADA, HOURS, TRAFFIC)
- ACCURATE BURN-RATE (LITER/CASES VS POUNDS)
- COMMODITY SOURCE TRACKING MECHANISM TO HOUSEHOLDS
- LOSE CONTROL OF HOURS OF OPERATION AND LOCATION
- TIME FOR RFP PROCESS
- UNKNOWN TOTAL COST
- NOT EVENLY DISTRIBUTED
- UNKNOWN EQUIPMENT STAFFING MODEL, RFP SPACE, INTEREST
- UNKNOWN IF THEY WILL DELIVER CARTRIDGES/FILTERS

EQUIPMENT, POLICY, PROCEDURES, ETC.

- SITE
- EQUIPMENT
- STAFFING
- ADA COMPLIANCE
- ACCOUNTABILITY SYSTEM
- CREDENTIALING
- SKILL-SETS AND TRAINING
- MIOSHA
- USER AGREEMENTS

QUESTIONS

- What is limitation on sites usage i.e churches?
- Are they waivable?
- Max number of personnel support?
- How much advance notice?

Potential Local Hire Program
Meeting Notes – 2/12/16

Participants

Maggie Sayles, MTED
Tom Weber, MSP/EMHSD
Brianna Briggs, MSP/EMHSD
Zach Baker, MSP/EMHSD
LTC Seeley, National Guard
Alisha Tate-Nadeau, FEMA
Jason Gamble, FEMA
Jeannie Moran, FEMA

Notes

Workforce Innovation and Opportunity Act (WIOA)

National Dislocated Worker Grant/National Emergency Grants

- Handles the humanitarian effort to include training, workforce money for unemployed, temporary work assignments
- Grant funding could be used to support attire, equipment leases, etc.
- Should be thinking about apprenticeships and training for positions that could turn into long-term hiring
- Timeline - USDOL has indicated, with the Presidential Declaration, turnaround could be as quick as 48 hours
- TEGL 2-15 is the guidance document
- Training and background checks could be paid under the grant
- Maximum award? – No indications there is a maximum
    - Estimates put us around at least $12 million, potentially $15 million (additional asks can be made as needs arise)

Who can be the employer of record?

- It can be NGO or a governmental entity (city or county)
- Employer of record would write paychecks
- MI Works would provide case management to employees

****Need to identify at least one employer of record (very important next step)**

- Maggie to provide a list of criteria we could use when approaching potential employers to provide details on what this would entail (would be based on the Fair Labor Standards Act)
- No matter who the employer of record is, the employee should be working closely with MI Works
- Could have multiple employers of record, if needed

General MI Works Information

- Often Workforce Development Agency has a work/school based employment
    - 35 hours work, 5 hours school (training/work enhancement opportunities), generally
- *LTC Seeley will provide Maggie with information for the Youth Conservation Corps*
    - Could potentially fit as one employer of record
    - Focuses on youth hires (16-24 years of age)
    - Would hire locally in Flint
- Other grants currently being used by MI Works could be realigned to assist in the short term in getting people out there doing some of this work
- They initially pull from people they already have signed up for work opportunities, particularly with special skills.
- MI Works (GST Works – locally) has space in their facility near downtown that could be used for training or meeting space for these operations

**Need to work on list of jobs with descriptions (FEMA and Brianna are putting together based on COAs)

- MI Works could help determine appropriate pay scale for jobs

Maggie – Research

- Reached out to California (received $18 million previously) and received information
- Reached out to Missouri on Joplin tornado response and received some information from them (MO uses this program fairly regularly now after declared disasters)

**-Action items for MSP/EMHSD

Donations Management Template

Developed by

Adventist Community Service

The Seventh-day Adventist Church began providing assistance to disaster survivors in 1874 following a flood in Michigan and continues to respond to disasters under the name of Adventist Community Services (ACS). ACS is a founding member of the National Voluntary Organizations Active in Disaster (NVOAD) and has chosen to focus primary expertise in donations management. This includes managing the collecting, sorting, inventorying, warehousing, and distributing of donated goods, including the massive, unsolicited donations sent by the well-intentioned.

ACS has trained and affiliated thousands of volunteers to support donation management operations in all 50 of the United States. ACS management teams are particularly useful supporting large scale donations operations that necessitate multi-agency warehouses. An ACS managed multi-agency warehouse is one that is managed by ACS and provides goods to all vetted entities providing support to disaster survivors and responders.

ACS has a Statement of Understanding with the Federal Emergency Management Agency (FEMA) and the American Red Cross to provide donations management assistance in times of disaster. ACS has donations management teams available for deployment to support federal, state, local, and tribal agency operations. National subject matter experts are also available to assist during all phases of the disaster cycle.

The template that follows is a suggested starting point for the development of an agreement with ACS to provide donations management support. The attached basic needs list is intended to be adapted based on the type, scale, scope, and particular circumstances of each disaster.

For more information, go to: www.communityservices.org.

(This initial page need not be included in the final written agreement.)

Letter of Agreement between
The State/County of _____ and
Adventist Community Services

Purpose

The purpose of this Letter of Agreement (Agreement) is to describe the working relationship between the State/County of _____ (s/c) and Adventist Community Services (ACS) in managing donations following a state/local disaster event.

Activation

Following a state/local disaster, if the s/c determines that assistance is needed to process donated goods, s/c will submit a request for support to ACS. It is understood that ACS will respond based upon its capacity and resources at the time of the event. At the same time, it is understood that ACS will make every good faith effort to respond given both its regional and national disaster response network.

General Terms of Agreement

Due to both its previous disaster experience managing donated goods and warehouse expertise, ACS is the pre-designated lead agency with s/c for managing large amounts of donated goods following a disaster event. This may include the collecting, sorting, warehousing, and distributing of donated goods.

In an effort to provide support and stability to community-based voluntary agencies distributing donated goods, s/c and ACS agree to the following:

ACS Agrees to:

1. Provide management of a multi-agency warehouse, when needed, and supervise volunteers in receiving, inventorying, sorting, packing, and shipping donated goods.
2. Assist s/c in locating and evaluating a facility to be utilized for warehouse operations.
3. Utilize existing relationships to secure donations of any equipment, supplies, and services needed to support operations; otherwise, s/c will provide the necessary material support.
4. Make goods available to local organizations that are distributing goods and are recognized/approved by s/c.
5. Will provide access to the most current warehouse inventory for FEMA, State, Local, and/or Tribal officials.
6. Incorporate community volunteers to assist with donations management operations as needed.
7. Maintain and report to s/c daily volunteer hours for each operation location.
8. Will turn over operations to local volunteer organizations when they are able to assume and accept this responsibility if needed.
9. Will provide a liaison, when available, to the Emergency Operations Center if requested.
10. Will participate as a member of the s/c Donations Coordination Team.
11. May provide management and operation of distribution sites and/or mobile distribution if needed and when personnel are available.
12. Keep s/c informed of ongoing ACS donations management operations.
13. Assist s/c with operations required to process or dispose of unwanted donations.
14. Make necessary purchases upon receiving written authorization from s/c. These purchases will be in compliance with s/c procurement policy for purchasing such items.

15. Provide workers compensation and/or liability insurance for all ACS employees and registered ACS volunteers. These individuals shall not be considered employees of s/c for the purposes of third party tort claims or personal injury.

s/c Agrees to:

1. Notify ACS of Donations Management Branch activation so that ACS may provide donations management support to s/c.
2. Locate a mutually agreeable site for ACS to set up a multi-agency warehouse if the event requires such a facility.
3. Serve as the responsible party for any costs associated with the opening and operating of the multi-agency warehouse (i.e., lease or rental and utility expenses).
4. Provide all equipment, supplies, services, and software necessary for ACS to run multi-agency warehouse operations (see Attachment 1 for a list of basic warehouse needs). Both s/c and ACS will attempt to fill many of these resource/equipment needs through donations.
5. Provide a liaison to ACS from s/c government.
6. Provide ACS with a list of approved entities to receive donations, including those relief organizations that will act as distribution sites for donated goods.
7. Provide transportation as required by ACS to move donated goods.
8. Provide additional personnel/volunteers, as needed, to support ACS personnel at the multi-agency warehouse.
9. Provide a seat for ACS with the s/c section of the s/c EOC.
10. Invite ACS to participate as a member of the s/c Donations Coordination Team.
11. Reimburse travel, lodging, and per diem expenses for ACS management personnel involved in support of s/c, based on proper and sufficient receipts or other supporting documentation provided by ACS to verify expenses. Lodging, per diem, and mileage will be reimbursed at the s/c rate which will be outlined to ACS at the onset of operations.
12. Provide necessary forms and guidelines necessary to receive reimbursement for expenses.
13. Identify to ACS to whom necessary documents should be submitted to receive reimbursement.
14. Provide ACS with regular situation updates on the status of incoming donations and current identified needs for donations.
15. Allow ACS to retain its own identity and follow its own internal management principles, processes, and procedures during disaster operations.

Notices and Communications

All written communications sent by the parties may be by U.S. mail, email, or fax and shall be addressed as follows:

To s/c:
Name
Title
Agency
Address
Telephone
Cell Phone
Fax
Email

To ACS:
Name
Title
Organization

Address
Telephone
Cell Phone
Fax
Email

Each party agrees to provide to the other party, in a timely fashion, updated information should there be a change in their primary point of contact.

Term

The term of this agreement shall be from _____ through _____, and may be extended by mutual agreement of the parties. The parties shall review the terms of this Agreement annually, and may modify this agreement at any time by written amendment executed by both parties.

Termination

This agreement may be terminated by either party with 30 days advance written notice to the other party.

ATTACHMENT 1

BASIC WAREHOUSE NEEDS

Needs may vary and must be evaluated based on the circumstances, scale and scope of each disaster response.

Facility Specifications:

- 100,000 – 250,000 sq. ft.
- 4 or more loading docks (minimum of 2) with dock plates (1 per dock)
- Forklift access between interior and exterior of warehouse
- Office space to accommodate management team
- Personnel support/break area
- Adequate ventilation and climate control
- Indoor lighting
- Outdoor lighting if night operations are anticipated
- Toilets and sinks
- Safety shower & eye wash station (preferred)
- Showers (preferred)

Utilities/Services:

- Land line or generated electrical power
- Potable water and sanitation
- 6 Phone lines (4 lines rollover) (cell phones may be considered)
- 2 Fax lines
- High speed internet access for 10 devices
- 30-40 cubic yard dumpster with on demand emptying service

Transportation:

- 2 Box trucks with driver, fuel, and lift gate for use in distribution

Equipment:

- 4 Propane forklifts with 6 extra propane tanks and refilling contract (specifications to be determined once warehouse facility is identified)
- 4 Pairs wheel chocks (minimum 1 pair per loading dock)
- 6 Pallet jacks
- 6 Hand trucks (2 appliance, 4 convertible)
- 2 Pallet pullers with chains
- 6 Desks
- 6 Rolling office chairs
- 6 Computers with necessary software (minimum 2 laptops)
- 2 Multi-function printer, copier, fax, and scanner machines with extra toner/ink cartridges
- 6 4-Line phones with hold, forward, speaker, and headset capability
- 4- or 5-Drawer locking file cabinet
- 10 6' folding tables
- 20 4'x8'x 3/4" Sheets of plywood and 40 sawhorses (or equivalent number of 8' folding tables for use as sorting tables)
- 30-35 Folding chairs
- Multi-purpose fire extinguishers (number as required by local jurisdiction)
- 10 Communication radios
- 2 Weather alert radios
- 2 Electric Golf Carts (at least one with cargo box)

Supplies:

- 200 Pallets per week (number may vary with activities)
- 100 double or triple wall pallet/Gaylord boxes (re-order capability)
- 1000 Boxes (200 small, 600 medium, 200 large) (re-order capability)
- 24 Rolls 15"x1500' stretch wrap (re-order capability)
- 2 Stretch wrap handles
- 9 Tape guns
- 9 Cases 2" packing tape (re-order capability)
- 6 Rolls yellow caution tape
- 2 Dozen retractable box knives with extra blades
- 6 30-40 Gallon trash cans
- 6 Wastebaskets
- 2 Push brooms
- 2 Dustpans
- 1 Mop
- 1 Mop bucket
- 1 Basic first aid kit
- Office supplies:
  - 2 4'x8' White boards
  - 12 Stackable letter trays
  - 1 Case copy paper
  - 2 Dozen 8 ½"x11 ¾" writing pads
  - 6 3" Three-ring binders
  - 2 Sets alphabetical tab dividers
  - 12 3"x3" Post-it notes
  - 1 Dozen clipboards
  - 6 Scissors
  - 1 3-Hole paper punch
  - 2 Standard staplers
  - 2 Boxes standard staples
  - 2 Tape dispensers
  - 1 Dozen rolls ¾" transparent tape
  - 100 File folders
  - 1 Dozen dry erase markers
  - 5 Dozen black permanent markers
  - 4 Dozen pens
  - 1 Pencil sharpener
  - 4 Dozen No. 2 pencils
  - 6 Boxes regular paper clips
  - 2 Boxes jumbo paper clips

Donations Management Template
Developed by
Adventist Community Service

The Seventh-day Adventist Church began providing assistance to disaster survivors in 1874 following a flood in Michigan and continues to respond to disasters under the name of Adventist Community Services (ACS). ACS is a founding member of the National Voluntary Organizations Active in Disaster (NVOAD) and has chosen to focus primary expertise in donations management. This includes managing the collecting, sorting, inventorying, warehousing, and distributing of donated goods, including the massive, unsolicited donations sent by the well-intentioned.

ACS has trained and affiliated thousands of volunteers to support donation management operations in all 50 of the United States. ACS management teams are particularly useful supporting large scale donations operations that necessitate multi-agency warehouses. An ACS managed multi-agency warehouse is one that is managed by ACS and provides goods to all vetted entities providing support to disaster survivors and responders.

ACS has a Statement of Understanding with the Federal Emergency Management Agency (FEMA) and the American Red Cross to provide donations management assistance in times of disaster. ACS has donations management teams available for deployment to support federal, state, local, and tribal agency operations. National subject matter experts are also available to assist during all phases of the disaster cycle.

Letter of Agreement between
The State/County of _____ and
Adventist Community Services

Purpose

The purpose of this Letter of Agreement (Agreement) is to describe the working relationship between the State/County of _____ (s/c) and Adventist Community Services (ACS) in managing donations following a state/local disaster event.

Activation

Following a state/local disaster, if the s/c determines that assistance is needed to process donated goods, s/c will submit a request for support to ACS. It is understood that ACS will respond based upon its capacity and resources at the time of the event. At the same time, it is understood that ACS will make every good faith effort to respond given both its regional and national disaster response network.

General Terms of Agreement

Due to both its previous disaster experience managing donated goods and warehouse expertise, ACS is the pre-designated lead agency with s/c for managing large amounts of donated goods following a disaster event. This may include the collecting, sorting, warehousing, and distributing of donated goods.

In an effort to provide support and stability to community-based voluntary agencies distributing donated goods, s/c and ACS agree to the following:

ACS Agrees to:

1. Provide management of a multi-agency warehouse, when needed, and supervise volunteers in receiving, inventorying, sorting, packing, and shipping donated goods.
2. Assist s/c in locating and evaluating a facility to be utilized for warehouse operations.
3. Utilize existing relationships to secure donations of any equipment, supplies, and services needed to support operations; otherwise, s/c will provide the necessary material support.
4. Make goods available to local organizations that are distributing goods and are recognized/approved by s/c.
5. Will provide access to the most current warehouse inventory for FEMA, State, Local, and/or Tribal officials.
6. Incorporate community volunteers to assist with donations management operations as needed.
7. Maintain and report to s/c daily volunteer hours for each operation location.
8. Will turn over operations to local volunteer organizations when they are able to assume and accept this responsibility if needed.
9. Will provide a liaison, when available, to the Emergency Operations Center if requested.
10. Will participate as a member of the s/c Donations Coordination Team.
11. May provide management and operation of distribution sites and/or mobile distribution if needed and when personnel are available.
12. Keep s/c informed of ongoing ACS donations management operations.
13. Assist s/c with operations required to process or dispose of unwanted donations.
14. Make necessary purchases upon receiving written authorization from s/c. These purchases will be in compliance with s/c procurement policy for purchasing such items.

15. Provide workers compensation and/or liability insurance for all ACS employees and registered ACS volunteers. These individuals shall not be considered employees of s/c for the purposes of third party tort claims or personal injury.

s/c Agrees to:

1. Notify ACS of Donations Management Branch activation so that ACS may provide donations management support to s/c.
2. Locate a mutually agreeable site for ACS to set up a multi-agency warehouse if the event requires such a facility.
3. Serve as the responsible party for any costs associated with the opening and operating of the multi-agency warehouse (i.e., lease or rental and utility expenses).
4. Provide all equipment, supplies, services, and software necessary for ACS to run multi-agency warehouse operations (see Attachment 1 for a list of basic warehouse needs). Both s/c and ACS will attempt to fill many of these resource/equipment needs through donations.
5. Provide a liaison to ACS from s/c government.
6. Provide ACS with a list of approved entities to receive donations, including those relief organizations that will act as distribution sites for donated goods.
7. Provide transportation as required by ACS to move donated goods.
8. Provide additional personnel/volunteers, as needed, to support ACS personnel at the multi-agency warehouse.
9. Provide a seat for ACS with the s/c section of the s/c EOC.
10. Invite ACS to participate as a member of the s/c Donations Coordination Team.
11. Reimburse travel, lodging, and per diem expenses for ACS management personnel involved in support of s/c, based on proper and sufficient receipts or other supporting documentation provided by ACS to verify expenses. Lodging, per diem, and mileage will be reimbursed at the s/c rate which will be outlined to ACS at the onset of operations.
12. Provide necessary forms and guidelines necessary to receive reimbursement for expenses.
13. Identify to ACS to whom necessary documents should be submitted to receive reimbursement.
14. Provide ACS with regular situation updates on the status of incoming donations and current identified needs for donations.
15. Allow ACS to retain its own identity and follow its own internal management principles, processes, and procedures during disaster operations.

Notices and Communications

All written communications sent by the parties may be by U.S. mail, email, or fax and shall be addressed as follows:

To s/c:
Name
Title
Agency
Address
Telephone
Cell Phone
Fax
Email

To ACS:
Name
Title
Organization

Address
Telephone
Cell Phone
Fax
Email

Each party agrees to provide to the other party, in a timely fashion, updated information should there be a change in their primary point of contact.

Term

The term of this agreement shall be from _____ through _____, and may be extended by mutual agreement of the parties. The parties shall review the terms of this Agreement annually, and may modify this agreement at any time by written amendment executed by both parties.

Termination

This agreement may be terminated by either party with 30 days advance written notice to the other party.

ATTACHMENT 1

BASIC WAREHOUSE NEEDS

Needs may vary and must be evaluated based on the circumstances, scale and scope of each disaster response.

Facility Specifications:

- 100,000 – 250,000 sq. ft.
- 4 or more loading docks (minimum of 2) with dock plates (1 per dock)
- Forklift access between interior and exterior of warehouse
- Office space to accommodate management team
- Personnel support/break area
- Adequate ventilation and climate control
- Indoor lighting
- Outdoor lighting if night operations are anticipated
- Toilets and sinks
- Safety shower & eye wash station (preferred)
- Showers (preferred)

Utilities/Services:

- Land line or generated electrical power
- Potable water and sanitation
- 6 Phone lines (4 lines rollover) (cell phones may be considered)
- 2 Fax lines
- High speed internet access for 10 devices
- 30-40 cubic yard dumpster with on demand emptying service

Transportation:

- 2 Box trucks with driver, fuel, and lift gate for use in distribution

Equipment:

- 4 Propane forklifts with 6 extra propane tanks and refilling contract (specifications to be determined once warehouse facility is identified)
- 4 Pairs wheel chocks (minimum 1 pair per loading dock)
- 6 Pallet jacks
- 6 Hand trucks (2 appliance, 4 convertible)
- 2 Pallet pullers with chains
- 6 Desks
- 6 Rolling office chairs
- 6 Computers with necessary software (minimum 2 laptops)
- 2 Multi-function printer, copier, fax, and scanner machines with extra toner/ink cartridges
- 6 4-Line phones with hold, forward, speaker, and headset capability
- 4- or 5-Drawer locking file cabinet
- 10 6' folding tables
- 20 4'x8'x 3/4" Sheets of plywood and 40 sawhorses (or equivalent number of 8' folding tables for use as sorting tables)
- 30-35 Folding chairs
- Multi-purpose fire extinguishers (number as required by local jurisdiction)
- 10 Communication radios
- 2 Weather alert radios
- 2 Electric Golf Carts (at least one with cargo box)

Supplies:

- 200 Pallets per week (number may vary with activities)
- 100 double or triple wall pallet/Gaylord boxes (re-order capability)
- 1000 Boxes (200 small, 600 medium, 200 large) (re-order capability)
- 24 Rolls 15"x1500' stretch wrap (re-order capability)
- 2 Stretch wrap handles
- 9 Tape guns
- 9 Cases 2" packing tape (re-order capability)
- 6 Rolls yellow caution tape
- 2 Dozen retractable box knives with extra blades
- 6 30-40 Gallon trash cans
- 6 Wastebaskets
- 2 Push brooms
- 2 Dustpans
- 1 Mop
- 1 Mop bucket
- 1 Basic first aid kit
- Office supplies:
  - 2 4'x8' White boards
  - 12 Stackable letter trays
  - 1 Case copy paper
  - 2 Dozen 8 ½"x11 ¾" writing pads
  - 6 3" Three-ring binders
  - 2 Sets alphabetical tab dividers
  - 12 3"x3" Post-it notes
  - 1 Dozen clipboards
  - 6 Scissors
  - 1 3-Hole paper punch
  - 2 Standard staplers
  - 2 Boxes standard staples
  - 2 Tape dispensers
  - 1 Dozen rolls ¾" transparent tape
  - 100 File folders
  - 1 Dozen dry erase markers
  - 5 Dozen black permanent markers
  - 4 Dozen pens
  - 1 Pencil sharpener
  - 4 Dozen No. 2 pencils
  - 6 Boxes regular paper clips
  - 2 Boxes jumbo paper clips

Hub Based

This is a collaborative effort, and may change with input from all parties involved.

- What do we want to do?
- Who is responsible for doing it?
- How do we communicate with each other?
- What is the procedure?

Work SMART:
Safe – Keep our community safe! Let our police and fire fighters protect and serve us!
Measurable – How will achievements be measured?
Action Oriented – Is an action verb used to describe expected accomplishments?
Realistic – Is the outcome achievable with given available resources?
Time Sensitive – What is the timeframe?

HUB churches will network with surrounding churches and establish agreed upon distribution schedules.

HUB churches will provide the list of churches that will obtain their water from the HUB church. This list will be sent to Lt. Roach at Roachb@michigan.gov.

Each ward will have one central church to be the Hub for water distribution for that area/ward. Within that ward will be the 3 sub-Hubs that will provide services to that area. Each hub will have the following:

- Loaders (National Guard/Sheriff work detail)
- Admin (Address look-up to direct you to your nearest hub)
- Water
- Water filters/replacement cartridges
- Home water test kits
- Provide mobile lead testing clinic, twice a week for individuals without insurance. The mobile clinics will ONLY be at the ward hubs. There will be no door to door clinics. Once tested, residents will receive a lead awareness nutrition booklet which will provide education on lead prevention tips for families.
- Recycling center for the empty water bottles will be placed at all 9 ward hubs.

Current Burn Rates at Fire Station PODs

Location	Pallet Capacity	Burn Rate
Station 3	29	2,404 cases/day
Station 6	25	2,362 cases/day
Station 8	35	2,299 cases/day
Station 1	22	2,248 cases/day
Station 5	30	1,663 cases/day (industrial area and no drive through limit distribution)

Logistic Requirements

Warehouse

- Drivers

- Trucks 9- 20' or longer, 1 electric pallet jack, lift gate
- Trucks 16' Penske for Rapid Response Calls, lift gate
- 5 electric pallet jacks
- 6 manual pallet jacks
- 3 forklifts
- 1 laptop, 1 phone, 1 printer, office supplies
- Packing tape, shrink wrap, dispensers, cardboard pallet boxes to stabilize stacks of water
- 23 staff/100,000 sq. ft. warehouse
- Drivers for vehicles over 26k lbs require CDL
- *Forklift operators must be certified.*
- Pallet sizes 40x48
- Box cutters, side snips, etc to break down pallets and packing material
- Disposal arrangements

PODs

- *Loading dock or level sidewalk with smooth transition to storage area for pallet jack operation*
- Manual and/or electric pallet jack
- If storage areas are not indoors, an outdoor forklift or skyjack would be required.

Requests for Water

- The Hub point of contact is Lt. B.J. Roach 517-819-0841.
- *Hubs will call at least 24 hours in advance to provide the quantity of water needed, and schedule a delivery time.*

Deliveries

- Deliveries will be conducted by a MI DTMB driver, and truck.
- They have a pallet jack and the capability to move pallets from the truck to the staging area.
- If the water needs to be transported to an upper or lower level, Hub staff or volunteers will need to be available to help off-load.
- *MTA has committed to assisting with distribution.*

Church Distributions

- Hubs will network with and recruit surrounding churches and organizations to support as neighborhood PODs.
- Hubs will work with PODs to establish distribution schedules, including amounts of water needed.

Michigan State Police Points of Contact

EXISTING CITY DISTRIBUTION POINTS

Existing distribution points are listed on the attached spreadsheet

CHURCH DISTRIBUTION HUBS

NORTH
Foss Avenue Baptist Church
1159 East Foss Avenue, Flint MI
Pastor Flynn 810-965-1515
Point of Contact: Jackie Scott 810-787-9019
Delivery: 4 pallets starting 2-2-2016 @ 12:30 pm

NORTH WEST
St. Mark Baptist Church
3020 DuPont NE, Flint MI
Pastor Thompson 810-280-9985
Point of Contact: Angie George 810-955-6297/810-234-6609
Delivery: 25 pallets starting 1-29-2016 @ 11:00 am

SOUTH CENTRAL
El-Shaddai Church of God in Christ
920 Walnut, Flint MI
Pastor Steve Hawkins
Point of Contact: Elder Eddie Kennedy 810-513-6762
Delivery: 20 pallets starting 1-29-2016 @ 9:00 am

SOUTH EAST
Grace Emmanuel Baptist Church
3502 Lapeer Road, Flint MI
Pastor Jennings 810-743-3900
Point of Contact: Glenna Gates 810-449-7853
Delivery: 8 pallets starting 1-30-2015 @ 10:00 am

SOUTH
Divine Revelations
902 Huron Street, Flint MI
Pastor Williams 810-931-0310
Delivery: 25 pallets starting 1-30-2016 @ 11:00 am

Neighborhood PODs
Neighborhood PODs are listed on the attached spreadsheet.

Filter Distribution Plan

- Consider a plan of installing whole house filters in each customer household to alleviate questions about bathing and to reduce the time frame between cartridge replacements.

- Consider a plan with City to eliminate billing for a pre-determined period to encourage flushing of the system and reduction of latency.

- The community would like to be able to continue to make all resources available at all PODs.

    - Source: Mayor's office; Catholic Charities; United Way; Concerned Pastors; and Food Bank of Eastern Michigan

- Continue Rapid Response/home delivery for Functional Needs households and individuals.

    - 2-1-1, Local EOC, American Red Cross, and UPS
    - UPS has indicated they would like to assist with this. They are coordinating a conference call with their local operations to facilitate this.

- Provide stock in bulk to Catholic Charities and Food Bank (and other partners as identified).

    - CC and FBEM coordinating with SOM warehouse
    - The state would continue to distribute filters, with the assistance of UPS (conference call pending), to Rapid Response calls. This eliminates the need for Food Bank or Catholic Charities to track addresses.

- Maintain Fire Station PODs until community hubs and PODs are running adequately or demand at each POD is below 250 cases per day.

- Investigate possibility of a debit card or voucher system for people to obtain commodities at area stores.

    - MDHHS will identify costs with DTMB.
    - Planning Consideration – MOUs needed with vendors to supply the appropriate cartridges and maintain minimum stock.
    - Same stores would have "gift" card. Card is loaded periodically with specific commodity codes.

- Maintain availability of resources at PODs until daily burn rates are below 250 cases per day, and devolve operation to next higher POD/Hub.

- Once demand is below 250 cases per day, maintain availability of commodities in the Hubs and Rapid Response teams until the EPA, DEQ, and independent monitoring indicate the water is safe in all areas and any addresses that are an exception have an intervention/repair of infrastructure in place.

Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Time-bound).

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, and cartridges.
- Identify statistical trends in the Fire Station PODS and transition to more available and locally operated PODs, in locations identified by a data driven strategy, by February 14.
- Provide for smooth transition and soft openings of new PODs as they open.
- Identify water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Provide public messaging and mapping that makes locating a POD or calling for delivery to vulnerable populations both simple and quick.
- Utilize multiple methods of public communication; e.g., reverse 9-1-1, robo-calls, Nixle, Facebook, backpack notes, etc. Strategies will be coordinated with 2-1-1.
- Continue to collect and analyze all available geospatial and demographic data to identify needs and hot spots (and identify successes).
- Identify "Super PODs" that can resource smaller neighborhood PODs and identify their logistical requirements, including credentialing requirements.
  - Metric – a Super POD or Neighborhood POD within close proximity by walking or driving.
    - Assumption – MTA and ride share options as well as walking and delivery are considered.
- 2-1-1 will receive all calls/questions and serve as POC for special needs requests (Rapid Response Teams).
  - Assumption – Rapid Response Teams will transition from the local Emergency Operations Center to the ARC. The ARC and 2-1-1 will coordinate.
  - Metric – A measurable reduction in response times to Rapid Response Team requests.
- Volunteer Expansion target complete date: February 14.

Ongoing Resourcing

- Goal – Implement a medium-term logistics system of supplying filtration components which supports a long-term, workable process to sustain provision of potable water to residents.
  - Metric – All households and franchise customers have access to safe, clean drinking water from the Flint water system, which is augmented by adequately filtered water within the home.
    - Assumption – Identify average family size and consumption, including burn rate, cooking and hygiene utilizing any available research from military operations guides, Peace Corps, Samaritan's Purse or other sources which may identify consumption rates.

    - Assumption – Filter cartridges last 100 gallons.
    - Assumption – People will move to Flint who will need initial filtering supplies.
- Identify warehouse spaces adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution would be led by the city, food banks, faith-based or other volunteer groups.
- Messaging should strongly promote the use of properly certified filtration.
- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customers to participate in the ongoing *repair and improvements to the water system and fully leverage and maximize the benefits of all* available programs.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- Create a calendar of activities/distribution including the when and where of how the activities and missions will be provided to water system customers. Include decision points for planning teams.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable programs.
    - Is it supportable by FEMA's 90 day mission?
    - What are implications of over supply?

Long Term Recovery

- Goal – water distribution operations are normalized.
    - Metric 1 – Households are served by the Flint water system.
    - Metric 2 – All water tests meet or exceed all established water quality metrics and regulations.
    - Metric 3 – Households do not require filtration at the faucet.
- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customer to participate in the ongoing *repair and improvements to the water system and maximize the benefits of all available programs to* insure that we have leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Independent surveys indicate that residents and customers trust water test results.

**Dates are to be negotiated and confirmed by all parties involved.

Donations Management Template

Developed by

Adventist Community Service

The Seventh-day Adventist Church began providing assistance to disaster survivors in 1874 following a flood in Michigan and continues to respond to disasters under the name of Adventist Community Services (ACS). ACS is a founding member of the National Voluntary Organizations Active in Disaster (NVOAD) and has chosen to focus primary expertise in donations management. This includes managing the collecting, sorting, inventorying, warehousing, and distributing of donated goods, including the massive, unsolicited donations sent by the well-intentioned.

ACS has trained and affiliated thousands of volunteers to support donation management operations in all 50 of the United States. ACS management teams are particularly useful supporting large scale donations operations that necessitate multi-agency warehouses. An ACS managed multi-agency warehouse is one that is managed by ACS and provides goods to all vetted entities providing support to disaster survivors and responders.

ACS has a Statement of Understanding with the Federal Emergency Management Agency (FEMA) and the American Red Cross to provide donations management assistance in times of disaster. ACS has donations management teams available for deployment to support federal, state, local, and tribal agency operations. National subject matter experts are also available to assist during all phases of the disaster cycle.

The template that follows is a suggested starting point for the development of an agreement with ACS to provide donations management support. The attached basic needs list is intended to be adapted based on the type, scale, scope, and particular circumstances of each disaster.

For more information, go to: www.communityservices.org.

(This initial page need not be included in the final written agreement.)

Letter of Agreement between
The State/County of _____ and
Adventist Community Services

Purpose

The purpose of this Letter of Agreement (Agreement) is to describe the working relationship between the State/County of _____ (s/c) and Adventist Community Services (ACS) in managing donations following a state/local disaster event.

Activation

Following a state/local disaster, if the s/c determines that assistance is needed to process donated goods, s/c will submit a request for support to ACS. It is understood that ACS will respond based upon its capacity and resources at the time of the event. At the same time, it is understood that ACS will make every good faith effort to respond given both its regional and national disaster response network.

General Terms of Agreement

Due to both its previous disaster experience managing donated goods and warehouse expertise, ACS is the pre-designated lead agency with s/c for managing large amounts of donated goods following a disaster event. This may include the collecting, sorting, warehousing, and distributing of donated goods.

In an effort to provide support and stability to community-based voluntary agencies distributing donated goods, s/c and ACS agree to the following:

ACS Agrees to:

1. Provide management of a multi-agency warehouse, when needed, and supervise volunteers in receiving, inventorying, sorting, packing, and shipping donated goods.
2. Assist s/c in locating and evaluating a facility to be utilized for warehouse operations.
3. Utilize existing relationships to secure donations of any equipment, supplies, and services needed to support operations; otherwise, s/c will provide the necessary material support.
4. Make goods available to local organizations that are distributing goods and are recognized/approved by s/c.
5. Will provide access to the most current warehouse inventory for FEMA, State, Local, and/or Tribal officials.
6. Incorporate community volunteers to assist with donations management operations as needed.
7. Maintain and report to s/c daily volunteer hours for each operation location.
8. Will turn over operations to local volunteer organizations when they are able to assume and accept this responsibility if needed.
9. Will provide a liaison, when available, to the Emergency Operations Center if requested.
10. Will participate as a member of the s/c Donations Coordination Team.
11. May provide management and operation of distribution sites and/or mobile distribution if needed and when personnel are available.
12. Keep s/c informed of ongoing ACS donations management operations.
13. Assist s/c with operations required to process or dispose of unwanted donations.
14. Make necessary purchases upon receiving written authorization from s/c. These purchases will be in compliance with s/c procurement policy for purchasing such items.

15. Provide workers compensation and/or liability insurance for all ACS employees and registered ACS volunteers. These individuals shall not be considered employees of s/c for the purposes of third party tort claims or personal injury.

s/c Agrees to:

1. Notify ACS of Donations Management Branch activation so that ACS may provide donations management support to s/c.
2. Locate a mutually agreeable site for ACS to set up a multi-agency warehouse if the event requires such a facility.
3. Serve as the responsible party for any costs associated with the opening and operating of the multi-agency warehouse (i.e., lease or rental and utility expenses).
4. Provide all equipment, supplies, services, and software necessary for ACS to run multi-agency warehouse operations (see Attachment 1 for a list of basic warehouse needs). Both s/c and ACS will attempt to fill many of these resource/equipment needs through donations.
5. Provide a liaison to ACS from s/c government.
6. Provide ACS with a list of approved entities to receive donations, including those relief organizations that will act as distribution sites for donated goods.
7. Provide transportation as required by ACS to move donated goods.
8. Provide additional personnel/volunteers, as needed, to support ACS personnel at the multi-agency warehouse.
9. Provide a seat for ACS with the s/c section of the s/c EOC.
10. Invite ACS to participate as a member of the s/c Donations Coordination Team.
11. Reimburse travel, lodging, and per diem expenses for ACS management personnel involved in support of s/c, based on proper and sufficient receipts or other supporting documentation provided by ACS to verify expenses. Lodging, per diem, and mileage will be reimbursed at the s/c rate which will be outlined to ACS at the onset of operations.
12. Provide necessary forms and guidelines necessary to receive reimbursement for expenses.
13. Identify to ACS to whom necessary documents should be submitted to receive reimbursement.
14. Provide ACS with regular situation updates on the status of incoming donations and current identified needs for donations.
15. Allow ACS to retain its own identity and follow its own internal management principles, processes, and procedures during disaster operations.

Notices and Communications

All written communications sent by the parties may be by U.S. mail, email, or fax and shall be addressed as follows:

To s/c:
Name
Title
Agency
Address
Telephone
Cell Phone
Fax
Email

To ACS:

ATTACHMENT 1

BASIC WAREHOUSE NEEDS

Needs may vary and must be evaluated based on the circumstances, scale and scope of each disaster response.

Facility Specifications:

- 100,000 – 250,000 sq. ft.
- *4 or more loading docks (minimum of 2) with dock plates (1 per dock)*
- Forklift access between interior and exterior of warehouse
- Office space to accommodate management team
- Personnel support/break area
- Adequate ventilation and climate control
- Indoor lighting
- Outdoor lighting if night operations are anticipated
- Toilets and sinks
- Safety shower & eye wash station (preferred)
- Showers (preferred)

Utilities/Services:

- Land line or generated electrical power
- Potable water and sanitation
- 6 Phone lines (4 lines rollover) (cell phones may be considered)
- 2 Fax lines
- High speed internet access for 10 devices
- 30-40 cubic yard dumpster with on demand emptying service

Transportation:

- 2 Box trucks with driver, fuel, and lift gate for use in distribution

Equipment:

- 4 Propane forklifts with 6 extra propane tanks and refilling contract (specifications to be determined once warehouse facility is identified)
- 4 Pairs wheel chocks (minimum 1 pair per loading dock)
- 6 Pallet jacks
- 6 Hand trucks (2 appliance, 4 convertible)
- 2 Pallet pullers with chains
- 6 Desks
- 6 Rolling office chairs
- 6 Computers with necessary software (minimum 2 laptops)
- 2 Multi-function printer, copier, fax, and scanner machines with extra toner/ink cartridges
- 6 4-Line phones with hold, forward, speaker, and headset capability
- 4- or 5-Drawer locking file cabinet
- 10 6' folding tables
- 20 4'x8'x 3/4" Sheets of plywood and 40 sawhorses (or equivalent number of 8' folding tables for use as sorting tables)
- 30-35 Folding chairs
- Multi-purpose fire extinguishers (number as required by local jurisdiction)
- 10 Communication radios
- 2 Weather alert radios
- 2 Electric Golf Carts (at least one with cargo box)

Supplies:

- 200 Pallets per week (number may vary with activities)
- 100 double or triple wall pallet/Gaylord boxes (re-order capability)
- 1000 Boxes (200 small, 600 medium, 200 large) (re-order capability)
- 24 Rolls 15"x1500' stretch wrap (re-order capability)
- 2 Stretch wrap handles
- 9 Tape guns
- 9 Cases 2" packing tape (re-order capability)
- 6 Rolls yellow caution tape
- 2 Dozen retractable box knives with extra blades
- 6 30-40 Gallon trash cans
- 6 Wastebaskets
- 2 Push brooms
- 2 Dustpans
- 1 Mop
- 1 Mop bucket
- 1 Basic first aid kit
- Office supplies:
  - 2 4'x8' White boards
  - 12 Stackable letter trays
  - 1 Case copy paper
  - 2 Dozen 8 ½"x11 ¾" writing pads
  - 6 3" Three-ring binders
  - 2 Sets alphabetical tab dividers
  - 12 3"x3" Post-it notes
  - 1 Dozen clipboards
  - 6 Scissors
  - 1 3-Hole paper punch
  - 2 Standard staplers
  - 2 Boxes standard staples
  - 2 Tape dispensers
  - 1 Dozen rolls ¾" transparent tape
  - 100 File folders
  - 1 Dozen dry erase markers
  - 5 Dozen black permanent markers
  - 4 Dozen pens
  - 1 Pencil sharpener
  - 4 Dozen No. 2 pencils
  - 6 Boxes regular paper clips
  - 2 Boxes jumbo paper clips

FEMA REGION V EVENING SITUATIONAL AWARENESS REPORT (ESAR)
DATE: 02/15/2016

REGION V RESPONSE STATUS:

- **RRCC:** Watch / Steady State
- **IMAT:** Blue
  - o Alpha: Deployed to Lansing, Michigan in support of MI-3375-EM
  - o Bravo: Deployed to Flint, Michigan in support of HHS UCG
  - o Collateral IMAT: Charlie
- **LNO:** Cornelius Miller

REGION V SEOC STATUS:

- **Illinois:** Normal Operations
- **Indiana:** Normal Operations
- **Michigan:** Full Activation (Flint Water Emergency)
- **Minnesota:** Normal Operations
- **Ohio:** Normal Operations
- **Wisconsin:** Normal Operations

NATIONAL TERRORISM ADVISORY SYSTEM (DHS): Bulletin (12/16/2015 – 06/16/2016)

NOTEWORTHY EVENTS: Nothing significant to report

SIGNIFICANT WEATHER (NWS, SPC):

- **Tonight:** Snow and rain is forecast to continue overnight for southern and eastern Ohio. Based on current forecasts, the following watches and warnings are in effect within the Region:
  - o A Winter Weather Warning is in effect for eastern Ohio until 1200 CST, Tuesday due to 4-10 inches of accumulation over the next 24 hours and minor to moderate wind
  - o Winter Weather Advisories are in effect across southern and eastern Ohio until approximately 0900 CST, Tuesday. Overnight accumulation in northeastern Ohio could reach 3-6 inches; moderate winds are likely. Southern Ohio will continue to receive a winter mix and rain reaching 1.0-2.0 inches.
  - o An Areal Flood Watch is in effect for southern Ohio until Tuesday morning due to moderate rainfall combined with frozen ground and snowmelt
- **Tuesday:** Snow is forecast across northern Minnesota, northern Wisconsin, and much of Michigan; periods of heavy snowfall in western Upper Michigan is possible. Rain and snow is forecast across southern Illinois, southern Indiana, and southern and eastern Ohio.
- **Wednesday:** Snow is forecast for southern Minnesota, Michigan, and northern Ohio. A winter mix is forecast for southern Ohio.

HYDROLOGIC CONDITIONS (AHPS): Flood Warnings remain in effect along the Kaskaskia River in southern Illinois due to recent rain and snowfall and the Des Plaines River in northeastern Illinois due to an ongoing ice jam; no significant impacts have been reported and none are expected.

FIRE CONDITIONS (SPC): Nothing significant to report

REGION V DISASTER SUMMARY:

- **Declaration Requests:** None
- **PDA Summary:** None
- **Disaster Declarations:** FEMA-3375-EM provides emergency assistance for water, water filters, water replacement cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

FEMA REGION V OPEN SOURCE SUMMARY (OSS)
Regional Points of Interest
February 16, 2016

REGIONAL WEATHER & IMPACTS

Icy road conditions are blamed for multiple accidents along stretches of I-94 in Michigan
(Associated Press)
Chelsea, MI: Icy road conditions are blamed for multiple accidents along stretches of Interstate 94 in Michigan. The Ann Arbor News reports about 10 vehicles were involved in crashes Monday morning on eastbound and westbound I-94 in the Chelsea area, leading to traffic being shut down in both directions. Huron Valley Ambulance spokeswoman Joyce Williams says one person was injured. Icy roads conditions were reported throughout Washtenaw County. In the Battle Creek area, a five-vehicle crash Monday morning closed westbound I-94. Police say it appears a car entering the freeway lost control and hit a semi-truck. The Battle Creek enquirer reports the driver of the car was taken to a hospital for treatment. The crash was one of several in the area. Snow and cold temperatures left roads slippery.

PUBLIC HEALTH & SAFETY

Records show the water system serving Sebring isn't the only one that failed to notify Ohioans about lead-tainted drinking water within prescribed timeframes after testing
(Associated Press)
Columbus, OH: Records show the water system serving Sebring in northeast Ohio isn't the only one that failed to notify people about lead-tainted drinking water within prescribed timeframes after testing. The Columbus Dispatch reports Ohio Environmental Protection Agency records show 10 of the 14 systems that had advisories for lead contamination in effect last week had missed the mark. An Ohio EPA spokeswoman says all except Sebring did notify customers about excessive levels, but some didn't do so within the required 30 or 60 days and were given notices of violation. The Dispatch says in most cases, the EPA didn't issue violations until last week. The EPA says Sebring officials failed to notify all water users about high lead levels detected in some homes last summer. Most residents learned in January.

Gov. Snyder requests expanded Medicaid services for Flint residents
(WXYZ)
Lansing, MI: Michigan Gov. Rick Snyder is asking the federal government to expand Medicaid services to residents of Flint. According to a release issued on Sunday, Snyder wants Medicaid expansion for those up to age 21 and pregnant woman who are served from the Flint water system. "Children, teens and young adults exposed to lead need more coverage to get testing and the treatment they need," Snyder said. "Expanding these services and lead abatement efforts will mitigate the risks of lead exposure and result in better identifying any long-term health challenges, including behavioral issues." In a letter to Victoria Wachino, director f the Center for Medicare and Medicaid services, Snyder said the waiver request has three items. The first is to expand Medicaid eligibility, the second is to use targeted case management services to coordinate benefits and resources, and finally "provide a mechanism for expanded lead abatement activities in the impacted area. According to the press release, coverage is available to everyone of all incomes, but individuals with income over 400 percent of the poverty level will have the option to buy into a program for full Medicaid benefits.

ENVIRONMENTAL

Cleanup of coal slurry discharge underway
(The Southern Illinoisan)
Galatia, IL: A cleanup of a coal slurry discharge at an American Coal Co. mine in Galatia that entered a creek and forced an evacuation of one home is underway, company and state officials said. "Upon discovering the slurry leak, AmCoal promptly ensured the pump was turned off, reported the incident to appropriate governmental authorities, and took further action to assess and fix the leak, and to contain and clean up any affected area," the company said in a written statement. The company said a mixture of water, rock and coal escaped and entered Bethel Creek. Illinois EPA spokeswoman Kim Biggs said the state is waiting on test results to determine the chemical makeup of the mixture but at this time it is not considered a health safety risk. "We don't believe there are any health concerns," she said. The cause of the leak has not been determined, she said. Cleanup of the affected area, about 3.8 miles of Bethel Creek, has been ongoing around the clock since the leak was discovered, she said.

LAW ENFORCEMENT & NATIONAL SECURITY

Mich Tech prof developing drone to catch other drones
(Detroit News)
Detroit, MI: Interest in drones is soaring and experts predict their use will only skyrocket. But what happens when the unmanned aerial vehicles go rogue or enter restricted airspace? A Michigan Technological University professor is working on a way for agencies to safely take down runaway flying machines should they threaten air traffic, military bases, government buildings or sporting events. "I envision this technology being used by law enforcement to provide security and counter rouge drones," said Mohammad Rastgaar-Aagah, an associate professor with Michigan Tech's Mechanical Engineering Department in Houghton. "The system we're developing will quickly capture a drone and remove it from an area so it's no longer a threat to anyone's safety." Rastgaar's system involves a drone that can shoot a net at other unmanned aircraft and haul them in. He likens using the unmanned aircraft to catch other drones to falconry, the sport where falcons or other birds of prey are trained to hunt.

ENERGY & CRITICAL INFRASTRUCTURE

Xcel open to closing nuclear plant early
(Prairie Business Magazine)
Red Wing, MN: Xcel Energy is awaiting word from the Minnesota Public Utilities Commission to proceed with an 18-month study on the future of Prairie Island nuclear plant and the economics of potentially shutting down the two-reactor facility before its operating license expires in 2034. Though Xcel Energy believes the plant is a cost-effective part of its goal to reduce carbon dioxide emissions, the utility company is open to analyzing options for early decommissioning in response to higher-than-expected capital expenditures forecasted in the next two decades, according to a Jan. 29 filing with the PUC. "The Prairie Island plant provides good economic value to our customers, which we just detailed in our latest filing to the Minnesota Public Utilities Commission," according to an email statement Friday by Prairie Island Site Vice President Kevin Davison. "We look forward to working with the commission, local communities and other stakeholders to illustrate the value the plant brings to Red Wing, the state of Minnesota and electric customers across the upper Midwest." The filing, a supplement to Xcel Energy's 2016-2030 Upper Midwest Resource Plan, states the company anticipates a $175 million increase in expenditures in the next five years over what was predicted in 2012, as well as increases of $600 million to $900 million from 2021 through 2034. The driving costs are attributed to new requirements following the 2011 Diiachi nuclear disaster at Fukushima, Japan, and a general increase in regulations by the U.S. Nuclear Regulatory Commission. However, the increases are largely offset by lower-than-predicted operating and maintenance costs for the plant, Xcel Energy noted. The company expects to spend $1

billion less in fixed costs at Prairie Island through 2034. A decision on the plant's future could be reached as early as 2018 should the company move forward with its analysis. Retiring the plant early would require an additional seven years of shutdown and decommissioning planning, including steps to make up for the loss of energy generation, Xcel Energy says.

TECHNOLOGY AND CYBERSECURITY

Comcast Service Restored After Outages Sweep Country
(Associated Press)
National: Thousands of Comcast customers around the country lost Internet and television service Monday morning, according to DownDetector.com, which monitors telecommunications outages. Most services were restored by 1:30 p.m. EST, according to Comcast. "We have repaired the temporary network interruption that impacted some of our services this morning. Our engineers continue to work on this issue and almost all services have already been restored. We apologize for any inconvenience this has caused our customers," the company said in a statement Monday afternoon. DownDetector's map shows Comcast outages peaked at 17,033 around 11:30 a.m. EST. Outages have been reported in cities across the U.S., including Chicago, Houston, Philadelphia, Baltimore, New York, Boston, Hartford and Washington, D.C. Comcast — the parent company of NBCUniversal — offers phone, Internet and TV service in 40 states and Washington, D.C.

Russian Hackers Spying On Your Linux PC Using Sophisticated Malware "Fysbis"
(TechWorm)
National: A new malware family known as Fysbis (or Linux.BackDoor.Fysbis) is aiming Linux machines by setting up a backdoor that allows the malware's author to snoop on victims and perform further attacks. Fybis showed its first signs in November 2014. However, the security researchers from Palo Alto Networks only recently have been able to understand who is behind the danger and how this threat works. Researchers after carrying out a detailed inquiry guess that this is not your run-of-the-mill malware that affects computers for the criminals' monetary gain (adware, Bitcoin mining, banking operations), but a much more sophisticated threat, that's only used in cyber-espionage campaigns. However, you are probably safe, if you are a regular Linux user that enjoys playing games on Steam. While on the other hand, if you work in big multi-national corporations or are a government employee and take care of the highly-sensitive Linux servers, data centers, then you should expect at one point or another to come across Fysbis on your machines. According to Palo Alto researchers, this malware family was developed by none other than the infamous APT 28 cyber-espionage group, also known under the names of Sofacy or Sednit. This group is a fairly well known cyber espionage group believed to have ties to Russia. Their targets have spanned all across the world, with a focus on government, non-profits, defense organizations and various Eastern European governments. There have been numerous reports on their activities, to the extent that a Wikipedia entry has even been created for them. Most high-profile targets of its short list includes NATO, the Dutch Air Safety Board, the Electronic Frontier Foundation, the Polish government, and many financial institutions and banks.

Hub Based

This is a collaborative effort, and may change with input from all parties involved.

- What do we want to do?
- Who is responsible for doing it?
- How do we communicate with each other?
- What is the procedure?

Work SMART:
Safe – Keep our community safe! Let our police and fire fighters protect and serve us!
Measurable – How will achievements be measured?
Action Oriented – Is an action verb used to describe expected accomplishments?
Realistic – Is the outcome achievable with given available resources?
Time Sensitive – What is the timeframe?

HUB churches will network with surrounding churches and establish agreed upon distribution schedules.

HUB churches will provide the list of churches that will obtain their water from the HUB church. This list will be sent to Lt. Roach at Roachb@michigan.gov.

Each ward will have one central church to be the Hub for water distribution for that area/ward. Within that ward will be the 3 sub-Hubs that will provide services to that area. Each hub will have the following:

- Loaders (National Guard/Sheriff work detail)
- Admin (Address look-up to direct you to your nearest hub)
- Water
- Water filters/replacement cartridges
- Home water test kits
- Provide mobile lead testing clinic, twice a week for individuals without insurance. The mobile clinics will ONLY be at the ward hubs. There will be no door to door clinics. Once tested, residents will receive a lead awareness nutrition booklet which will provide education on lead prevention tips for families.
- Recycling center for the empty water bottles will be placed at all 9 ward hubs.

Current Burn Rates at Fire Station PODs

Location	Pallet Capacity	Burn Rate
Station 3	29	2,404 cases/day
Station 6	25	2,362 cases/day
Station 8	35	2,299 cases/day
Station 1	22	2,248 cases/day
Station 5	30	1,663 cases/day (industrial area, no drive through limits distribution)

Logistic Requirements

Warehouse

- Drivers

- Trucks 9- 20' or longer, 1 electric pallet jack, lift gate
- Trucks 16' Penske for Rapid Response Calls, lift gate
- 5 electric pallet jacks
- 6 manual pallet jacks
- 3 forklifts
- 1 laptop, 1 phone, 1 printer, office supplies
- Packing tape, shrink wrap, dispensers, cardboard pallet boxes to stabilize stacks of water
- 23 staff/100,000 sq. ft. warehouse
- Drivers for vehicles over 26k lbs require CDL
- Forklift operators must be certified.
- Pallet sizes 40x48
- Box cutters, side snips, etc to break down pallets and packing material
- Disposal arrangements

PODs

- Loading dock or level sidewalk with smooth transition to storage area for pallet jack operation
- Manual and/or electric pallet jack
- If storage areas are not indoors, an outdoor forklift or skyjack would be required.

Requests for Water

- The Hub point of contact is Lt. B.J. Roach 517-819-0841.
- Hubs will call at least 24 hours in advance to provide the quantity of water needed, and schedule a delivery time.

Deliveries

- Deliveries will be conducted by a MI DTMB driver, and truck.
- They have a pallet jack and the capability to move pallets from the truck to the staging area.
- If the water needs to be transported to an upper or lower level, Hub staff or volunteers will need to be available to help off-load.
- MTA has committed to assisting with distribution.

Church Distributions

- Hubs will network with and recruit surrounding churches and organizations to support as neighborhood PODs.
- Hubs will work with PODs to establish distribution schedules, including amounts of water needed.

Michigan State Police Points of Contact

Lt. B.J. Roach 517-819-0841, Roachb@michigan.gov Lt. Mark A. Russo 616-299-9312, Russom2@michigan.gov

EXISTING CITY DISTRIBUTION POINTS

Existing distribution points are listed on the attached spreadsheet

CHURCH DISTRIBUTION HUBS

NORTH
Foss Avenue Baptist Church
1159 East Foss Avenue, Flint MI
Pastor Flynn 810-965-1515
Point of Contact: Jackie Scott 810-787-9019
Delivery: 4 pallets starting 2-2-2016 @ 12:30 pm

NORTH WEST
St. Mark Baptist Church
3020 DuPont NE, Flint MI
Pastor Thompson 810-280-9985
Point of Contact: Angie George 810-955-6297/810-234-6609
Delivery: 25 pallets starting 1-29-2016 @ 11:00 am

SOUTH CENTRAL
El-Shaddai Church of God in Christ
920 Walnut, Flint MI
Pastor Steve Hawkins
Point of Contact: Elder Eddie Kennedy 810-513-6762
Delivery: 20 pallets starting 1-29-2016 @ 9:00 am

SOUTH EAST
Grace Emmanuel Baptist Church
3502 Lapeer Road, Flint MI
Pastor Jennings 810-743-3900
Point of Contact: Glenna Gates 810-449-7853
Delivery: 8 pallets starting 1-30-2015 @ 10:00 am

SOUTH
Divine Revelations
902 Huron Street, Flint MI
Pastor Williams 810-931-0310
Delivery: 25 pallets starting 1-30-2016 @ 11:00 am

Neighborhood PODs
Neighborhood PODs are listed on the attached spreadsheet.

Filter Distribution Plan

Consider a plan of installing whole house filters in each customer household to alleviate questions about bathing and to reduce the time frame between cartridge replacements.
Consider a plan with City to eliminate billing for a pre-determined period to encourage flushing of the system and reduction of latency.

The community would like to be able to continue to make all resources available at all PODs.
Continue Rapid Response/home delivery for Functional Needs households and individuals.
Provide stock in bulk to Catholic Charities and Food Bank (and other partners as identified).
Maintain the Fire Station PODs until community hubs and PODs are running adequately or when demand no longer supports the need.
Investigate possibility of a debit card or voucher system for people to obtain commodities at area stores.
- Planning Consideration – MOUs needed with vendors to supply the appropriate cartridges and maintain minimum stock.
- Same stores would have "gift" card. Card is loaded periodically with specific commodity codes.

As demand wanes, maintain availability and Rapid Response until resources are depleted/no longer requested.

FEMA REGION V OVERNIGHT SITUATIONAL AWARENESS REPORT (OSAR)
DATE: 02/16/2016

REGION V RESPONSE STATUS:

- **RRCC:** Watch / Steady State
- **IMAT:** Blue
  - o Alpha: Deployed to Lansing, Michigan in support of MI-3375-EM
  - o Bravo: Deployed to Flint, Michigan in support of HHS UCG
  - o Charlie: Collateral IMAT
- **LNO:** Cornelius Miller

- **Wisconsin:** Normal Operations

NATIONAL TERRORISM ADVISORY SYSTEM (DHS): Bulletin (12/16/2015 – 06/16/2016)

NOTEWORTHY EVENTS: Nothing significant to report

SIGNIFICANT WEATHER (NWS, SPC):

- **Today:** Snow is forecast across much of the Region. Rain and snow is forecast across western and southern Illinois, southern Indiana, and southeastern Ohio. The following watches and warnings are in effect:
  - o A Winter Weather Warning is in effect for eastern Ohio until 1200 CST, Tuesday due to 4-10 inches of accumulation over the next 24 hours and minor to moderate wind
  - o Winter Weather Advisories are in effect across southern and eastern Ohio until approximately 0900 CST, Tuesday. Overnight accumulation in northeastern Ohio could reach 3-6 inches; moderate winds are likely. Southern Ohio will continue to receive a winter mix and rain reaching 1.0-2.0 inches.
  - o An Areal Flood Watch is in effect for southern Ohio until Tuesday morning due to moderate rainfall combined with frozen ground and snowmelt
- **Looking Ahead:** Wednesday, a winter mix is forecast for southern Ohio. Thursday regional temperatures increase, and a winter mix is forecast for Minnesota, northern Wisconsin, and northern Michigan. Areas of the Minnesota Arrowhead, Upper Michigan, and northern Wisconsin could receive 0.1-0.1 inches of icing and freezing rain.

HYDROLOGIC CONDITIONS (AHPS): Flood Warnings remain in effect along the Kaskaskia River in southern Illinois due to recent rain and snowfall and the Des Plaines River in northeastern Illinois due to an ongoing ice jam; no significant impacts have been reported and none are expected.

FIRE CONDITIONS (SPC): Nothing significant to report

REGION V DISASTER SUMMARY:

- **Declaration Requests:** None
- **PDA Summary:** None
- **Disaster Declarations:** FEMA-3375-EM provides emergency assistance for water, water filters, water replacement cartridges, water test kits, and other necessary related items for a period of no more than 90 days for Genesee County.

Responding to the Flint Water Crisis:
Federal, State, County and City Partners
February 10, 2016 Update

Federal agencies continue to work with state and local officials to respond to the Flint, Michigan, water crisis. Some 70 representatives from Federal agencies are co-located with state and local partners in Flint.

All levels of government are focusing their capabilities and resources on helping Flint residents recover from the water crisis. The community has shown great resilience and fortitude as it has confronted these essentially unprecedented circumstances and carried on despite the challenges.

For Flint Residents

For your questions about safe water Email flintwater@epa.gov, or call EPA's free hotline: 800-426-4791, English, español and other languages.

To get your water tested for free Email flintwater@cityofflint.com or call the Flint Water Plant: 810-787-6537

To get your blood tested or ask about skin rashes Call your primary care provider, or call 2-1-1

Odor If you're worried about the smell of your water: Call 810-787-6537

Crisis Counseling and Support : Call (800) 985-5990 or text TalkWithUs to 66746

Business Recover Center : Call (800)659-2955 or email disastercustomerservice@ sba.gov

Actions

Water Quality

To address immediate needs, government partners are working to provide safe drinking water for all Flint residents, by:

- Conducting water testing in Flint homes; more than 1,000 samples from 150 home have been collected so far

- Providing lead-removal faucet filters and replacement cartridges, to reduce lead levels in the tap water; water filters have been installed in all 2,350 privately owned homes that are overseen by HUD,
- Inspecting home drinking water systems for lead; the State of Michigan is scheduled to begin regular sampling (every two weeks) to monitor the city's water system.
- Distributing water bottles and water filters to home-delivered meal recipients,
- Showing residents how to clean accumulated debris from their home faucets, hot water heaters, and whole-house water filtration systems,
- Helping seniors and the disabled community install their water filters, and

As of today, FEMA and the State of Michigan have distributed nearly two million liters of water (1,913,982 liters) and FEMA has distributed 127,764 water filter replacement cartridges, plus 40,000 faucet and pitcher filters. Additional water contributions have come from private organizations and individuals across the country.

CDC and EPA are visiting homes with high lead levels or skin rash complaints to investigate and help ensure that Flint's water supply is as safe as possible.

EPA is working to understand the extent of lead contamination in the city's water supply by collecting drinking water samples from Flint homeowners and testing the city's water distribution system. EPA continues to post Flint sampling results by location on an interactive map at www.epa.gov/flint . The Agency has also established a hotline (800-426-4791) and an email address (flintwater@epa.gov) so that Flint residents can find results of water testing. The hotline provides immediate telephone translations into multiple languages.

Community Impact

Government partners are also looking further down the road to address the longer-term issues that are likely to arise.

A Strike Team for High Lead Homes will soon begin visiting homes with the highest lead levels to gather follow-up samples and provide information to residents.

HHS is working with the city, county, and state to ensure that children under 6 have the opportunity to have their blood sampled and analyzed for lead levels.

U.S. Public Health Service Commissioned Corps officers assisted the county health department in clearing a backlog of blood lead level screening results. The Federal team cataloged results of almost 800 finger-prick blood tests and packaged letters to parents providing test results and educational materials.

Government partners are also helping Flint officials tap into existing government funds to help address lead contamination in water and follow-up challenges.

- **TANF**: Help low-income families with children travel to testing and water distribution sites, by using USDA's TANF funds to buy bottled water and gas cards/bus passes to reach testing sites. TANF is USDA's Temporary Assistance for Needy Families program.
- **Food**: Flint schools can use certain USDA funds to buy foods high in Vitamin C, calcium and iron; these foods help block lead from getting into the blood; these foods are also being identified das important for the Flint food bank, which then distributes them to soup kitchens and food pantries as well as to other local agencies involved in food delivery.
- **WIC**: Participants in the WIC program can use their WIC vouchers to buy ready-to-feed infant formula, which does not need to be mixed with water, WIC is USDA's Special Supplemental Nutrition Program for Women, Infants, and Children.
- **Food at Schools**: Flint schools can use certain USDA funds to purchase foods high in Vitamin C, calcium, and iron that help block lead from getting into the blood,
- **Mental Health**: Flint children and families who experience emotional distress can call **(800) 985-5990** or text TalkWithUs to **66746** to talk to a trained crisis counselor.
- **Small Business Loans**: Flint business owners affected by lead contamination can apply for Small Business Association (SBA) economic injury loans. SBA will open a Business Recovery Center in Flint to administer the loans on February 10.
- **Homebuyers**: Responding to concerns that homebuyers in Flint cannot secure Federal Housing Administration (FHA)-insured loans, the Department of Housing and Urban Development (HUD) posted guidance on its website reiterating that FHA-insured loans can be made to eligible borrowers in the impacted area provided that a sufficient supply of safe and potable water is available through the installation of an eligible water purification system.

Federal Partners

As this is primarily a public health crisis, the U.S. Department of Health and Human Services (HHS) was designated as the lead federal agency responsible for coordinating the federal response and recovery efforts.

HHS has joined together with other federal, state and local partners to mobilize and strengthen existing programs. They are working to identify the size and scope of the water problem and to identify and carry out actions that will improve health and decrease the impact of exposure to lead.

Federal partners include the Federal Emergency Management Agency (FEMA), the Environmental Protection Agency (EPA), Small Business Administration (SBA), Department of Housing and Urban Development (HUD), Department of Education (DoEd) and the Department of Agriculture (USDA).

CITY OF FLINT

INCIDENT ACTION PLAN

STATE OF EMERGENCY

Objectives:

To provide short term relief and long term solutions in addressing the man-made emergency of increased lead levels in the City of Flint (the "City") water system resulting from the switch to Flint River as the City's water source as well as the threat to public health related to elevated blood lead levels in Flint residents, without interruption of the provision of public safety and other essential public services. Due to the fluidic nature of emergencies and the complexity of the City of Flint's declared emergency, this plan serves as a framework and may be altered as the emergency develops.

The Response Framework

The purpose of this plan is to organize efforts on behalf of the city to assess the extent of the City's infrastructure needs and risks to public health, provide immediate relief to those who are at risk, and establish long term solutions. In addition, the city must ascertain what immediate relief and long term solutions the City is capable of implementing based on what resources are available. For any activities that are beyond the resource capacity of the City, external sources of funding, supplies, and manpower must be sought.

There are a number of steps that must be taken in accordance with the Flint Emergency Support Operations Plan (SEOP), in order for the City to be compliant with the Genesee County Emergency Action Guidelines. These include the activation of the Incident Management Team, the Emergency Operation Center, and the sharing of essential documents with the County, including this plan. Information must also be shared by the City's Public Information Officer on a regular basis, as required by the SEOP.

This plan calls for the provision of immediate relief to those at risk in our community. Special consideration must be given to residents who belong to underserved groups, such as those who are homebound, undocumented, in poverty, etc. Additional consideration must also be given to the equitable provision of services throughout our community in order to equally protect the health and safety of every member of our community.

Implementation of this plan is to be conducted by the Incident Management Team, which will monitor the effective delivery of goods and services in order to address the conditions of the emergency.

Understanding the Issue:

October 1, 2015, the Genesee County Health Department issued a Public Health Emergency after elevated blood-lead levels were found among children in the City of Flint. This incident correlates with elevated levels of lead found in the City's drinking water after the City switched water sources in April of

2014 to the Flint River. The scope of this problem appears to be limited to Flint City Water Customers and their dependents, not to exclude franchise customers (i.e. Burton, Flint Township, Genesee and Mount Morris Townships) Public agencies from several levels of government, as well as charitable, nonprofit organizations have partnered with the City to provide immediate relief to Flint residents, including the expansion of health services, the provision of bottled water and NSF rated water filters. The city is also seeking long term infrastructure improvements to eliminate lead and other contaminants from the water system.

Gov. Rick Snyder appointed a task force to review "actions regarding water use and testing in Flint" and to make recommendations for future guidelines: Members of the state task force are Ken Sikkema of Public Sector Consultants, Chris Kolb of the Michigan Environmental Council, Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center.

In an effort to halt the further escalation of this crisis, the City returned to receiving its water from the Detroit Water and Sewerage Department (DWSD) on October 16, 2015. Since that time, additional corrosion control program has started, estimating a reduction of lead levels over the next six months. In light of these efforts, concerns surrounding the quality of water and health of the residents persist to the point that Mayor Karen Weaver declared a State of Emergency on December 14, 2015 so as to resolve this crisis once and for all.

The current challenge facing the City is providing immediate relief and long term solutions of the quality of the water and health of residents while the City remains in a financially critical condition. It is hoped and expected that higher levels of government recognize this emergency as it pertains to the condition of the City's infrastructure and health of its residents, and do all things necessary to assist the City in the provision of relief and the execution of capital improvement projects that will eliminate the causes of this emergency.

Enhancing Understanding:

Information Collection

Essential Elements of Information (EEIs) can be qualified as the City's water tests containing lead results, the verification of lead water lines (both public and private), and health information. Water testing is performed by the City's water plant in cooperation with the MDEQ. The verification of lead water lines is being handled by University of Michigan Flint, who is currently digitizing the City's water line information and PSI Engineering, who is initiating the effort to verify lead lines by excavating an initial 150 residential lines. This information allows the Incident Management Team to assess the current

condition of the emergency by way of determining the water quality and the condition of the water distribution infrastructure.

Information Analysis

The City has sought partners to assist in the analysis and evaluation of complex data. Wayne State University's center for Urban Studies will serve a supporting role to assist the City efforts to document and track lead water lines, water test results, and filter distribution with geographic information system (GIS) technology. This allows for clear and precise information to be presented to officials.

Assessment of Impacts

The City will need assistance in determining the total cost of damage done to the public health and infrastructure. As of now, only portions of this damage are visible.

PSI is providing some assistance by excavating 150 residential water lines to verify that they are comprised of lead. This is an initial step, but not enough. More resources will be needed to continue this process.

Continuous Situational Awareness

It is important that the Incident Management Team receive continuous information regarding water testing results, lead water line numbers, and filter distribution information in order to gain a realistic and current perspective. Much of this information is currently available on the City's website (cityofflint.com) and more is added each week by the PIO team.

Actions taken in Response to the Emergency

Activation of the Incident Management Team

Upon the declaration of Emergency by Mayor Weaver, the Support Emergency Operations Plan (SEOP) was activated. The SEOP calls upon the Incident Management Team to generate the Incident Action Plan (IAP. Each member of this team serves a specific function as it relates to addressing the causes and effects of the emergency. The Emergency Management Team roster can be found in the SEOP on page 3, with a list of alternates on page 4 in case the need for succession arises.

Emergency Operations Center

The Emergency Operations Center (EOC) must be activated upon the declaration of a State of Emergency by the Mayor. This center is required by the SEOP and serves as a nerve center for the Incident Management Team. Here, emergency relief efforts are coordinated by key members of the

Incident Management Team. In this case, these relief efforts consist of the distribution of water filters at City Hall and community events, the distribution of bottled water throughout the city in conjunction with the efforts of community partners, and assisting with the circulation of water testing kits throughout the community. The EOC will also be monitoring and managing the inventory of relief supplies, such as water filters and bottled water.

According to the SEOP, the EOC must establish an incident tracking system. This system will serve as a work plan for the management of the emergency. In addition, it is essential that the IMT record water testing results, lead water line location information, and information about the distribution of water filters and bottled water all in one place so that information is readily available for the Incident Management Team. This information will also be sent out to the public and media in the form of daily regular updates by the City's PIO.

Communication

The EOC maintains a telephone system that exists to intake questions about relief efforts and to organize relief logistics. It is open from 8am to 5pm, Monday through Friday. A voicemail system and eventual email system will exist to handle requests and inquiries that occur outside of the normal operating hours. This system will be constructed by the City's IT department.

Public Awareness and Education

1. **Emergency Alerts and Updates:**
   The City's Public Information Officer will make available information as it relates to the emergency in the form of press releases, emails, and physical documents. Daily updates containing information on the distribution of water filters, bottled water, water testing, blood lead testing, and other relief efforts will be available on the City's website for the public to view. Information will be available at City Hall for residents. 211 is an important resource to receive information about where to get water filters and other important updates. The PIO will regularly be in contact with 211 personnel to ascertain the frequency and content of inquiries in order to continuously provide relevant information.

2. **Joint Information Center:**
   The City's PIO will establish a joint Information Center that is organized to coordinate the efforts of multiple agencies to communicate with the public. This includes the circulation of joint press releases, public health information, educational materials, and updates relating to the State of Emergency. This committee is comprised of public information officers and public relations personnel to coordinate efforts to keep the public updated and informed. Regular updates to the media regarding events and progress will be made as news develops.

The US EPA has offered assistance in the form of Public Information support. Additional support in this area has been provided by the Michigan State Police.

3. **Education:**
   Many government agencies and philanthropic organizations are already distributing information regarding the effects of lead on public health. It is important that the City assist in these efforts so vital information and knowledge is presented to all members of the community. The goal is to continue to eliminate misunderstandings and incorrect information as it relates to reducing lead in drinking water, pursuing medical help, and maintaining a healthy diet to reduce lead absorption in the body. Lead education is currently being performed by the Genesee County Health Department, the Michigan Department of Health and Human Services and Medical community at-large.

Assessment of Social Needs

In order to effectively and equitably provide immediate relief to Flint water customers, the City must take into account many of the socio-economic needs and limitations of the community. Some residents cannot get to City Hall for a water filter. Some residents do not have internet access. Literacy or a language barrier may also pose significant obstacles to the effective distribution of educational information and relief to those in need. These will be continuing challenges facing the community. At present these are the resources the City has available to mitigate some of those challenges.

Logistics

Logistics are being coordinated by the City Emergency Management Team's City's *Chief Logistics Officer*, who is the City Administrator. The CLO is responsible for the coordination, procurement, and transportation of goods and services, which is essential for effective implementation of the response plan.

Fixed Distribution Points

There are several locations throughout the City, coordinated by Genesee County Health Department, where residents may acquire a water filter. These locations are:

Flint City Hall
1101 South Saginaw, Flint MI 48502

Genesee County Community Action Resource Department (GCCARD)
601 North Saginaw, Flint MI 48502
and
2727 Lippencott Blvd, Flint MI 48507

Michigan Department of Health and Human Services
4809 Clio Road, Flint MI 48504
and
125 E. Union Street, Flint, MI 48502

Activation of Ward Distribution Centers

Each of the nine wards will have activated distribution centers that are primarily managed by City Council Members or their designees.

Flint City Council – Water Distribution Sites

WARD	COUNCILPERSON	LOCATION	ADDRESS
1	Eric Mays	Hasselbring Senior Center	1002 W. Home Avenue
2	Jackie Poplar	Joy Tabernacle Church	2505 N. Chevrolet Avenue
3	Kerry Nelson	Antioch Baptist Church	1083 E. Stewart Avenue
4	Joshua Freeman	Flint Fire Station No. 5	3402 Western Road
5	Wantwaz Davis	Doyle/Ryder Elementary School	1040 N. Saginaw Street
6	Herbert Winfrey	New Community Baptist Church	1375 Lavender Avenue
7	Monica Galloway	Brennan Community Center	1301 Pingree Avenue
8	Vicki VanBuren	Flint Southwestern Academy	1420 W. 12th Street
9	Scott Kincaid	Dort Mall Police Service Station	3600 S. Dort Highway

Mobile Distribution Centers

The city can help establish mobile distribution centers and delivery systems with the help of transportation agencies, like the Metro Transit Authority (MTA), Meals on Wheels, and GCCARD that can provide water filters, bottled water, and nutritious foods, among other types of relief accompanied by educational materials to neighborhoods and to homes of people who experience limited mobility.

- Mass Transportation Authority-MTA bus passes: Assisting residents with bus passes to improve their mobility will increase their chances of receiving help. Transportation services will also improve residents' access to medical care.
- MTA-Your Ride mobile distribution:
    - Estimated Costs: $25 per hour to deliver water and filters to homes throughout the City.

Problem 1. Public Health Emergency

The first objective in addressing this emergency is reducing, and eventually eliminating, the danger to public health. As City water coming out of faucets continue to contain lead, and copper and other harmful contaminants exceeding government guidelines and regulations, it poses a risk to the people of our community. Preventative measures must be taken to avoid the effects of toxicosis that are difficult if not impossible to completely reverse.

As far as preventative measures are concerned, education, water filters, and bottled water must be provided to every household in the City in order to reduce the chances of lead exposure, especially to our most vulnerable members of the community. If lead exposure has occurred, resulting in elevated blood lead levels, immediate and sustained medical attention must be available to those affected. Health services must be expanded in the area to accommodate increased numbers of case loads and specialized care regarding lead poisoning and its effects.

Immediate Relief for Public Health:

1. Prevention: Education, water filters and replacement cartridges, free water testing, and bottled water must be available to everyone.
2. Access to nutritious food that reduces the risks of lead absorption by the body. The City can coordinate activities with the County Health Department.
3. Genesee County Health Department comprehensive plan to address immediate and long term health issues for segments of the population.

Long Term Solutions: Maintaining Public Health and Coping with Lead Exposure

1. Work closely with the Genesee County Health Department and Michigan Department of Health and Human Services in order to provide sustainable care and monitoring of children exposed to lead. This care must be available for them for several years-preferably several decades.
2. Support and education for primary care providers regarding aggressive long-term neurodevelopmental screening and testing.
3. Improved access to developmental and behavioral (DBP) specialists, pediatric psychologists, pediatric psychiatrists.
    a. Pre-emptive referral to mental health/ toxic stress screenings.
    b. Support capacity building and or incentivize recruitment to allow Genesee Health System (GHS) to build this capacity which is currently needed and lacking.
4. Increase recognition and education regarding trauma informed care, social determinants of health (SDOH).
5. Expand State funded Genesee Health System (GHS) services.

a. Infant mental health (30 day capacity)
b. Child case management
c. Home based services
d. Trauma informed care- trauma focused CBT

Problem 2. Lead Contamination in the Water

Immediate Relief:

1. Education, water filters and replacement cartridges, free water testing for water customers, and bottled water must be available to everyone. Water filters can be obtained at any of the fixed distribution points throughout the City.
2. Identification and verification of lead water service lines throughout the city- both public and private.
3. Assistance to identify lead pipes within buildings and homes.

Distribution of Bottled Water:

At this point, we are directing all offers for donations to the Food Bank of Eastern Michigan. It is imperative that water be accessible to all members of the community through a variety of distribution channels. These channels are explained in the Logistics Section of this plan.

Distribution of Test Bottles:

Water testing kits can be picked up at City Hall with instructions. Test results are posted on the City's website to raise public awareness and encourage more participation.

Long term Solutions: Capital Improvements Needs

The distribution of filters, water, and food to counter the effects of lead are essential response efforts to keep people safe. However, long term solutions are required to keep people healthy, to eliminate lead from the public and private water distribution system distribution, and to provide affordable clean water. Our public infrastructure and utilities must be reliable, sustainable, and equitable in order for this community to rebound after this emergency. The following long term solutions must be implemented in order to set the City of Flint on a course for recovery. These solutions come at a heavy cost for a City that is currently in receivership. The City has experienced financial distress due to this Emergency, in addition to a two million dollar loss from switching back to DWSD. The City has diligently applied for Fiscally Distressed Cities, Villages, and Townships Grant in order to supplement funding for capital improvement projects. It is essential that these grants be awarded in order to achieve long term solutions.

1. COMPLETE **Transition to a Temporary Safe Water Source until the Completion of KWA:**
   This has already occurred. On October 16, 2015, Flint returned to receiving its water from DWSD on a 9 month agreement. This agreement will expire in June 2016, when the KWA is projected to be complete. The City had to pay $2 million out of its general fund to make this switch.

2. IN PROGRESS **Additional Corrosion Control added to the Water System:**
   This is already occurring. In early December, 2015, Flint began to add additional corrosion control to the water coming in from DWSD in attempts to rebuild the protective scale inside its pipes. This is estimated to reduce lead levels in two to six months.

3. **Faucet Replacement:**
   Replacement of Water faucets, and drinking fountains in the school system. It has been determined after state inspections that many sources of lead contamination in the School System's water were the faucets themselves. These faucets need to be replaced.

4. **Water Line Replacement:**
   Water Line Replacement to reduce antiquated infrastructure and lead service lines. These lines must be identified, verified, and replaced. Residents who are facing financial hardships must have access to assistance to cover the costs of these replacements through access to grants and (forgivable) loans made available through State and Federal agencies. The corrosion damage to public and private lines that Flint River water caused is still being determined.
   - Replacement of an estimated fifteen thousand (15,000) lead service lines at an estimated cost of three thousand dollars ($3,000) per line. Total costs forty –five million dollars ($45,000,000).

5. **Reimbursement of Critical Expenditures:**
   Seeking reimbursement of two million dollar cost of returning to DWSD and forgiveness of Water Revolving Loan Debt from the State of Michigan.

6. **KWA Capital Improvements:** The City has reconnected to Detroit temporarily until a water line from Port Huron is developed. The new water line known as the KWA pipeline or Karegnondi Water Authority is expected to bring water to the City from Lake Huron by July. The current cost agreement between Flint and DWSD is for nine months, therefore it is imperative that KWA be completed as soon as possible. Assistance relating to capital improvements to expedite this process will help to achieve long term goals.

KWA Capital Improvements:	Estimated Costs:

a.	*Transfer Station to Dort Reservoir*	*$4,500,000*
b.	*Raw water line to pump station #4*	*$636,000*
c.	*Phosphoric acid feed system*	*$186,000*
d.	*Alum Feed system*	*$40,000*
e.	*Post filtration system*	*$387,289*
f.	*SCADA Upgrades*	*$424,000*
g.	*Sewer Relining*	*$100,000*
	Total	***$6,273,289***

Ancillary Considerations: Public Safety during an Emergency

During a time of emergency public safety agencies need to be prepared to respond to threats to public safety and critical infrastructure. The City is facing a man-made emergency that is threatening the public health. Resentment and hostility toward local institutions and municipal government is at a significant level.

Critical infrastructure should be safeguarded if the need arises. This includes increasing security at City Hall to reduce potential for public safety risks. In the case of credible threats to public infrastructure, it may be required to hire private security company for first line of defense. Private Security is lower cost, thereby making it the first option. The minimum response is acted upon first, elevating only if the need arises. Credible or imminent threats of damage or destruction to critical infrastructure requires an elevated response. Such needs may require over-time police officers to address critical situations. Mutual aid from surrounding communities can be requested if Flint public safety is overextended.

Implementation:

Community Partners

Financial limitations of the city persist while it confronts this emergency. Many community partners have offered their assistance to perform various needed functions. The city is heavily reliant on the assistance that government agencies and nonprofit organizations have provided.

The Ruth and C.S. Mott Foundations

The C.S. Mott Foundation has provided financial assistance, especially in their generous contribution of $4 million for the reconnection to DWSD.

United Way

The Genesee County United Way has provided significant financial assistance in the way of purchasing and helping to distribute water filters since the Public Health Emergency began on October 1st, 2015.

Genesee County Community Action Resources Department (GCCARD)

GCCARD is organized to fight poverty and has been a primary partner in the distribution of water filters. It has also regularly supported the city with the logistics and availability of water filters at City Hall.

Genesee County Health Department

Has provided educational information to Flint Water customers concerning lead and public health. They have also diligently provided prevention information

Genesee County Board of Commissioners

The Board of Commissioners have pledged their support to help Flint seek solutions to this crisis. The Board has already assisted in making health and nutrition information available to the public. On October 1, 2015, Genesee County declared a Public Health Emergency recommending that people not drink the water coming from the City of Flint.

Assistance from Wayne State University

Wayne State University's Center for Urban Studies will be providing technical GIS support to assist in the documentation of emergency relief efforts and program evaluation guidance to ensure implementation effectiveness.

The US Environmental Protection Agency

Region 5 EPA has offered assistance with Public Information distribution during the emergency.

Outside Help is still needed...

The City of Flint is forever thankful to our community partners who have given so much to help so many people. However the magnitude of this emergency calls for more resources that are beyond the capacity of the combined local organizations and government agencies. Long term solutions will require a heavy investment in health care and capital improvement projects to upgrade the city's antiquated water distribution system.

- Help with Immediate Relief in terms of assuring allocative efficiency. Distribution should be equitable- assistance from other governments required to assure this.
- Reaching communities for the distribution of water filters, water, and educational materials.

- Help with Water Testing to increase participation and lead education.
- Increasing the rate of water testing
- Assistance is required to fund essential capital improvement projects to guarantee clean and safe water.

Prepared jointly by the City of Flint's Emergency Operations Center and the Genesee County Emergency Operations Center

Prepared by:
Sean Kenneth Kammer, City of Flint Assistant to the City Administrator and Interim Public Information Officer

Hub Based

This is a collaborative effort, and may change with input from all parties involved.

- What do we want to do?
- Who is responsible for doing it?
- How do we communicate with each other?
- What is the procedure?

Work SMART:
Safe – Keep our community safe! Let our police and fire fighters protect and serve us!
Measurable – How will achievements be measured?
Action Oriented – Is an action verb used to describe expected accomplishments?
Realistic – Is the outcome achievable with given available resources?
Time Sensitive – What is the timeframe?

HUB churches will network with surrounding churches and establish agreed upon distribution schedules.

HUB churches will provide the list of churches that will obtain their water from the HUB church. This list will be sent to Lt. Roach at Roachb@michigan.gov.

Each ward will have one central church to be the Hub for water distribution for that area/ward. Within that ward will be the 3 sub-Hubs that will provide services to that area. Each hub will have the following:

- Loaders (National Guard/Sheriff work detail)
- Admin (Address look-up to direct you to your nearest hub)
- Water
- Water filters/replacement cartridges
- Home water test kits
- Provide mobile lead testing clinic, twice a week for individuals without insurance. The mobile clinics will ONLY be at the ward hubs. There will be no door to door clinics. Once tested, residents will receive a lead awareness nutrition booklet which will provide education on lead prevention tips for families.
- Recycling center for the empty water bottles will be placed at all 9 ward hubs.

Current Burn Rates

Station 3	2,404 cases/day
Station 6	2,362 cases/day
Station 8	2,299 cases/day
Station 1	2,248 cases/day
Station 5	1,663 cases/day

Requests for Water

The Church HUB point of contact is Lt. Roach 517-819-0841. The Church HUB will call and provide the quantity of water, and schedule the delivery time, at least 24 hours in advance.

Deliveries

Deliveries will be conducted by a MI DTMB driver, and truck. They have a pallet jack and the capability of moving pallets from their truck to a staging area. If the water needs to be transported to an upper or lower level, people will need to be available to help off-load.

Church Distributions

The Church Distribution HUB will be responsible to network with the surrounding churches, and set up distribution schedules, including amounts of water needed.

Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Time-bound).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, and cartridges.

- Identify statistical trends in the Fire Station PODS and transition to more available and locally operated PODs, in locations identified by a data driven strategy, by February 14.
- Provide for smooth transition and soft openings of new PODs as they open.
- Identify water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Provide public messaging and mapping that makes locating a POD or calling for delivery to vulnerable populations both simple and quick.
- Utilize multiple methods of public communication; e.g., reverse 9-1-1, robo-calls, Nixle, Facebook, backpack notes, etc. Strategies will be coordinated with 2-1-1.
- Continue to collect and analyze all available geospatial and demographic data to identify needs and hot spots (and identify successes).
- Identify "Super PODs" that can resource smaller neighborhood PODs and identify their logistical requirements, including credentialing requirements.
  - Metric – a Super POD or Neighborhood POD within close proximity by walking or driving.
    - Assumption – MTA and ride share options as well as walking and delivery are considered.
- 2-1-1 will receive all calls/questions and serve as POC for special needs requests (Rapid Response Teams).
  - Assumption – Rapid Response Teams will transition from the local Emergency Operations Center to the ARC. The ARC and 2-1-1 will coordinate.
  - Metric – A measurable reduction in response times to Rapid Response Team requests.
- Volunteer Expansion target complete date: February 14.

Ongoing Resourcing

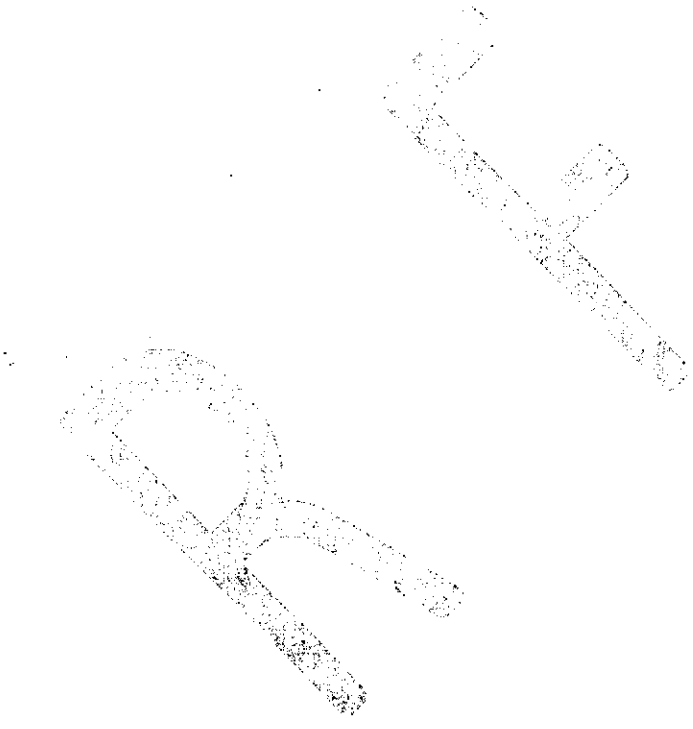
- Goal – Implement a medium-term logistics system of supplying filtration components which supports a long-term, workable process to sustain provision of potable water to residents.
  - Metric – All households and franchise customers have access to safe, clean drinking water from the Flint water system, which is augmented by adequately filtered water within the home.
    - Assumption – Identify average family size and consumption, including burn rate, cooking and hygiene utilizing any available research from military operations guides, Peace Corps, Samaritan's Purse or other sources which may identify consumption rates.
    - Assumption – Filter cartridges last 100 gallons.
    - Assumption – People will move to Flint who will need initial filtering supplies.
- Identify warehouse spaces adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution would be led by the city, food banks, faith-based or other volunteer groups.
- Messaging should strongly promote the use of properly certified filtration.
- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customers to participate in the ongoing repair and improvements to the water system and fully leverage and maximize the benefits of all available programs.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- Create a calendar of activities/distribution including the when and where of how the activities and missions will be provided to water system customers. Include decision points for planning teams.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable programs.
  - Is it supportable by FEMA's 90 day mission?
  - What are implications of over supply?

Long Term Recovery

- Goal – water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – All water tests meet or exceed all established water quality metrics and regulations.
  - Metric 3 – Households do not require filtration at the faucet.

- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the benefits of all available programs to insure that we have leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Independent surveys indicate that residents and customers trust water test results.

**Dates are to be negotiated and confirmed by all parties involved.



Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Time-bound).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, and cartridges.

- Identify statistical trends in the Fire Station PODS and transition to more available and locally operated PODs, in locations identified by a data driven strategy, by February 14.
- Provide for smooth transition and soft openings of new PODs as they open.
- Identify water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Provide public messaging and mapping that makes locating a POD or calling for delivery to vulnerable populations both simple and quick.
- Utilize multiple methods of public communication; e.g., reverse 9-1-1, robo-calls, Nixle, Facebook, backpack notes, etc. Strategies will be coordinated with 2-1-1.
- Continue to collect and analyze all available geospatial and demographic data to identify needs and hot spots (and identify successes).
- Identify "Super PODs" that can resource smaller neighborhood PODs and identify their logistical requirements, including credentialing requirements.
  - Metric – a Super POD or Neighborhood POD within close proximity by walking or driving.
    - Assumption – MTA and ride share options as well as walking and delivery are considered.
- 2-1-1 will receive all calls/questions and serve as POC for special needs requests (Rapid Response Teams).
  - Assumption – Rapid Response Teams will transition from the local Emergency Operations Center to the ARC. The ARC and 2-1-1 will coordinate.
  - Metric – A measurable reduction in response times to Rapid Response Team requests.
- Volunteer Expansion target complete date: February 14.

Ongoing Resourcing

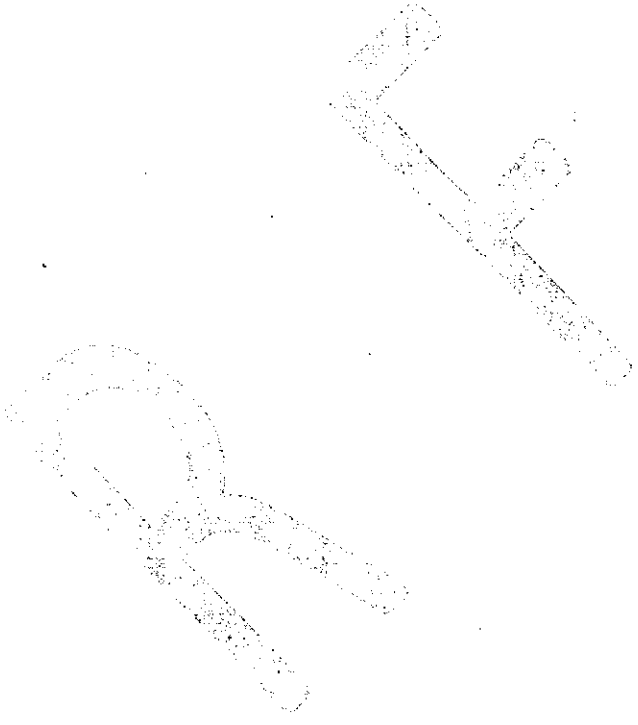
- Goal – Implement a medium-term logistics system of supplying filtration components which supports a long-term, workable process to sustain provision of potable water to residents.
  - Metric – All households and franchise customers have access to safe, clean drinking water from the Flint water system, which is augmented by adequately filtered water within the home.
    - Assumption – Identify average family size and consumption, including burn rate, cooking and hygiene utilizing any available research from military operations guides, Peace Corps, Samaritan's Purse or other sources which may identify consumption rates.
    - Assumption – Filter cartridges last 100 gallons.
    - Assumption – People will move to Flint who will need initial filtering supplies.
- Identify warehouse spaces adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution would be led by the city, food banks, faith-based or other volunteer groups.
- Messaging should strongly promote the use of properly certified filtration.
- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customers to participate in the ongoing repair and improvements to the water system and fully leverage and maximize the benefits of all available programs.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- Create a calendar of activities/distribution including the when and where of how the activities and missions will be provided to water system customers. Include decision points for planning teams.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable programs.
  - Is it supportable by FEMA's 90 day mission?
  - What are implications of over supply?

Long Term Recovery

- Goal – water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – All water tests meet or exceed all established water quality metrics and regulations.
  - Metric 3 – Households do not require filtration at the faucet.

- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the benefits of all available programs to insure that we have leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Independent surveys indicate that residents and customers trust water test results.

**Dates are to be negotiated and confirmed by all parties involved.



Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Time-bound).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.

- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Independent surveys indicate that residents and customers trust water test results.

**Dates are to be negotiated and confirmed by all parties involved.

Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, cartridges, and test kits.

- Identify statistical trends in the Fire Station PODS and transition to more available and locally operated PODs, in locations identified by a data driven strategy, by February 14.
- Provide for smooth transition and soft openings of new PODs as they open.
- Identify water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Provide public messaging and mapping that makes locating a POD or calling for delivery to vulnerable populations both simple and quick.
- Utilize multiple methods of public communication; e.g., reverse 9-1-1, robo-calls, Nixle, Facebook, backpack notes, etc. Strategies will be coordinated with 2-1-1.
- Continue to collect and analyze all available geospatial and demographic data to identify needs and hot spots (and identify successes).
- Identify "Super PODs" that can resource smaller neighborhood PODs and identify their logistical requirements, including credentialing requirements.
  - Metric – a Super POD or Neighborhood POD within 15 minutes.
    - Assumption – MTA and ride share options as well as walking and delivery are considered.
- 2-1-1 will receive all calls/questions and serve as POC for special needs requests (hot shots).
  - Assumption – Hot Shots will transition from the sheriff's office to the ARC. The ARC and 2-1-1 will coordinate.
  - Metric - _ (percent) reductions in calls to 2-1-1 for water issues should occur each month.
- Volunteer Expansion target complete date: February 14.

Ongoing Resourcing

- Goal – Implement a short/medium (define) -term filtration system which supports a long-term, workable process to sustain provision of potable water to residents.
  - Metric – All households and franchise customers have access to safe, clean drinking water from the Flint water system, which is augmented by adequately filtered water at each faucet within the home.
    - Assumption – Assume (or supporting statistic) 5 faucets per home.
    - Assumption – Identify average family size and consumption, including burn rate, cooking and hygiene utilizing any available research from military operations guides, Peace Corps, Samaritan's Purse or other sources which may identify consumption rates.
    - Assumption – Filter cartridges last x days/gallons
- Identify warehouse spaces adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution would be led by the city, food banks, faith-based or other volunteer groups.
- Messaging should strongly promote the use of properly certified filtration.
- Work with the federal HHS Unified Command Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customers to participate in the ongoing repair and improvements to the water system and fully leverage and maximize the benefits of all available programs.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- Create a calendar of activities/distribution including the when and where of how the activities and missions will be provided to water system customers. Include decision points for planning teams.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.
  - Is it supportable by FEMA's 90 day mission?
  - What are implications of over supply?

Long Term Recovery

- Goal –water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – Households do not require filtration at the faucet.
  - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.

- Work with the federal HHS Unified Command Group and the Governor's Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the benefits of all available programs to insure that we've leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Independent surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

Draft Flint Water Operations Plan

January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, cartridges, and test kits.
- Identify statistical trends in the Fire Station PODS and transition to more available and locally operated PODs, in locations identified by a data driven strategy, by February 14.
- Provide for smooth transition and soft openings of new PODs as they open.
- Identify water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Provide public messaging and mapping that makes locating a POD or calling for delivery to vulnerable populations both simple and quick.

- Utilize multiple methods of public communication; e.g., reverse 9-1-1, robo-calls, Nixle, Facebook, backpack notes, etc. Strategies will be coordinated with 2-1-1.
- Continue to collect and analyze all available geospatial and demographic data to identify needs and hot spots (and identify successes).
- Identify "Super PODs" that can resource smaller neighborhood PODs and identify their logistical requirements, including credentialing requirements.
  - Metric – a Super POD or Neighborhood POD within 15 minutes.
    - Assumption – MTA and ride share options as well as walking and delivery are considered.
- 2-1-1 will receive all calls/questions and serve as POC for special needs requests (hot shots).
  - Assumption – Hot Shots will transition from the sheriff's office to the ARC. The ARC and 2-1-1 will coordinate.
  - Metric - _ (percent) reductions in calls to 2-1-1 for water issues should occur each month.
- Volunteer Expansion target complete date: February 14.

Ongoing Resourcing

- Goal – Implement a short/medium (define) -term filtration system which supports a long-term, workable process to sustain provision of potable water to residents.
  - Metric – All households and franchise customers have access to safe, clean drinking water from the Flint water system, which is augmented by adequately filtered water at each faucet within the home.
    - Assumption – Assume (or supporting statistic) 5 faucets per home.
    - Assumption – Identify average family size and consumption, including burn rate, cooking and hygiene utilizing any available research from military operations guides, Peace Corps, Samaritan's Purse or other sources which may identify consumption rates.
    - Assumption – Filter cartridges last x days/gallons
- Identify warehouse spaces adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution would be led by the city, food banks, faith-based or other volunteer groups.
- Messaging should strongly promote the use of properly certified filtration.
- Work with the federal HHS Unified Command Group and the Flint Water Recovery Task Force to maximize opportunities for Flint water system customers to participate in the ongoing repair and improvements to the water system and fully leverage and maximize the benefits of all available programs.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- Create a calendar of activities/distribution including the when and where of how the activities and missions will be provided to water system customers. Include decision points for planning teams.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.
  - Is it supportable by FEMA's 90 day mission?
  - What are implications of over supply?

Long Term Recovery

- Goal –water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – Households do not require filtration at the faucet.
  - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Work with the federal HHS Unified Command Group and the Governor's Flint Water Recovery Task Force to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the benefits of all available programs to insure that we've leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Independent surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

Draft Flint Water Operations Plan
January 23, 2016

The State of Michigan's emergency response to the Flint water crisis will involve several operations: Initial Distribution; a distribution Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution - Complete

- Canvassing teams were initiated by the sheriff and fleshed out by MSP, American Red Cross, National Guard, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by National Guard.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Initial Distribution complete the morning of January 21 based on feedback from local EOC.

Surge – Complete February 24

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. Daily missions were intended to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Goal – Reach every residence with water, filters, filter cartridges, and test kits.
  - Metric 1 – Every household will be identified as having either been reached and resources distributed or information left at the door as to how to have resources delivered.
- Canvassing was based on geographic areas to provide manageable areas for each team and to assure that areas where risks of lead contamination and vulnerable populations are known to be more likely receive more coverage. Also, areas with lower percentages of positive contacts the Initial Distribution received additional support for re-canvasing.
- Points of Distribution (PODS) staffed by National Guard continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
- Surge completion is planned for COB January 24; remaining hot shots will be addressed by ARC or other volunteer teams.

Volunteer Expansion

- Goal – Move from manual distribution mechanism to less labor intensive processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (Suggested alternate: February 12).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by the target date.
- Volunteer Expansion complete by COB January 31 (or February 12).

Ongoing Resourcing

- Goal – Implement long-term, workable processes to sustain provision of potable water to residents.
  - Metric – X households and franchise customer have access to adequately filtered water at each faucet within the home.
- Develop messaging for implementation of this phase and transition to next phase.
- Water distribution by the city or by faith-based or other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.

Long Term Recovery

- Goal –water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – Households do not require filtration at the faucet.
  - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

Draft Flint Water Operations Plan
January 23, 2016

The State of Michigan's emergency response to the Flint water crisis will involve several phases: Initial Mass Distribution; a distribution Surge, Volunteer Expansion (an increase in the utilization of the volunteer force to distribute commodities over the longer term, Ongoing Resourcing, and Long Term Recovery. Dates given in this draft plan are all subject to agreement of all parties. Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution

- Canvassing teams were initiated by the sheriff and fleshed out by MSP, American Red Cross, National Guard, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by National Guard.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Initial Distribution complete the morning of January 21 based on feedback from local EOC.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. Daily missions were intended to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Goal – Reach every residence with water, filters, filter cartridges, and test kits.
  - Metric 1 – Every household will be identified as having either been reached and resources distributed or information left at the door as to how to have resources delivered.
- Canvassing was based on geographic areas to provide manageable areas for each team and to assure that areas where risks of lead contamination or vulnerable populations were known to be more likely were adequately covered. Also, where distribution in the Initial Distribution phase needed additional support were identified and re-canvassed.
- Points of Distribution (PODS) staffed by National Guard continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
- Surge completion is planned for COB January 24; remaining hot shots will be addressed by ARC or other volunteer teams.

Volunteer Expansion

- Goal – Move from manual distribution mechanism to less labor intensive processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (Suggested alternate: February 12).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.

- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by the target date.
- Volunteer Expansion complete by COB January 31 (or February 12).

Ongoing Resourcing

- Goal – Implement long-term, workable processes to sustain provision of potable water to residents.
  - Metric – X households and franchise customer have access to adequately filtered water at each faucet within the home.
- Develop messaging for implementation of this phase and transition to next phase.
- Water distribution by the city or by faith-based or other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.

Long Term Recovery

- Goal –water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – Households do not require filtration at the faucet.
  - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

    - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (*Suggested alternate: February 12*).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by *the target date.*
- Volunteer Expansion complete by COB January 31 (*or February 12*).

Draft Flint Water Operations Plan

January 22, 2016

Ongoing Resourcing

- Goal – Implement long-term, workable processes to sustain provision of potable water to residents.
    - Metric – Every household and franchise customer has access to adequately filtered water at each faucet within the home.
- Develop messaging for implementation of this phase and transition to next phase.
- Water distribution by the city or by faith-based or other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.

Long Term Recovery

- Goal –water distribution operations are normalized.
    - Metric 1 – Households are served by the Flint water system.
    - Metric 2 – Households do not require filtration at the faucet.
    - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

Operational Concept

Single Family Residence

- Canvassing by National Guard teams
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

Multi-unit residence

- Canvassing by volunteer agencies
- Locations provided by City of Flint (Building & Safety Department)
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- Specialized training provided to team members (different approach than single family residence canvassing)
- Contact made with each property owner or their designated agent (property manager) to identify the number of units occupied
- Each occupied unit at the address will be canvassed
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

All other targeted locations (Schools, churches, day care centers, restaurants, hospitals etc.)

- Canvassing by volunteer agencies and LARA teams.
- Locations provided by City of Flint (Building & Safety Department) and LARA.
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- Specialized training provided to team members (different approach than single family residence canvassing)
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? How many beds/registered children/clients/students, etc? Does your facility have special needs for filtered water?, etc.)

Other considerations

- Who will be the lead for this canvassing effort?
- What is the target date for completion for each of the target groups (single family residence, multi-unit residence, and all other targeted locations)?
- What additional data fields will be added to the iPad application and who is responsible for developing the data and coordinating with GIS for inclusion in the application?
- What (if anything) is needed to address functional needs populations within each of the identified target groups/

- How do we effectively and accurately merge the data form the PODs with the data from the canvassing teams?

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

I am submitting this letter of appeal in response to FEMA Administrator W. Craig Fugate's letter to me dated January 16, 2016. In that letter, he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint. I respectfully submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, to request a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a 'major disaster' under 42 U.S.C. § 5122." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster is analogous to the flood category, given that qualities within the water, over a long term, flooded and damaged the city's infrastructure in ways that were not immediately or easily detectable. Likewise, this disaster is a natural catastrophe in the sense that the contamination arose from the natural decay of Flint's aging infrastructure. These impacts will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. A narrow reading of this definition, restricting the hazards to which we can provide relief, does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

As additional support of this appeal, I offer the following information:

<u>State and Local Government Capabilities</u>

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions for much of the public water system damages can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million. The State is in the process of approving a second appropriation.

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local and state government. Unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated there will be significant unmet needs as identified in the following areas of impacts. The only other possible option would be a special Congressional appropriation.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community to recover with such a large percentage of its citizens living in poverty requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event

and now they have another major disaster to deal with, and few available resources to address the significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V

The ability of a community to recover with such a large percentage of its citizens living in poverty requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event

and now they have another major disaster to deal with, and few available resources to address the significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

Draft Flint Water Operations Plan
January 23, 2016

The State of Michigan's emergency response to the Flint water crisis will involve several operations: Initial Distribution; a distribution Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution - Complete

- Canvassing teams were initiated by the sheriff and fleshed out by MSP, American Red Cross, National Guard, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by National Guard.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Initial Distribution complete the morning of January 21 based on feedback from local EOC.

Surge – Complete February 24

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. Daily missions were intended to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Goal – Reach every residence with water, filters, filter cartridges, and test kits.
  - Metric 1 – Every household will be identified as having either been reached and resources distributed or information left at the door as to how to have resources delivered.
- Canvassing was based on geographic areas to provide manageable areas for each team and to assure that areas where risks of lead contamination and vulnerable populations are known to be more likely receive more coverage. Also, areas with lower percentages of positive contacts the Initial Distribution received additional support for re-canvasing.
- Points of Distribution (PODS) staffed by National Guard continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
- Surge completion is planned for COB January 24; remaining hot shots will be addressed by ARC or other volunteer teams.

Volunteer Expansion

- Goal – Move from manual distribution mechanism to less labor intensive processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (Suggested alternate: February 12).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by the target date.
- Volunteer Expansion complete by COB January 31 (or February 12).

Ongoing Resourcing

- Goal – Implement long-term, workable processes to sustain provision of potable water to residents.
  - Metric – X households and franchise customer have access to adequately filtered water at each faucet within the home.
- Develop messaging for implementation of this phase and transition to next phase.
- Water distribution by the city or by faith-based or other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.

Long Term Recovery

- Goal –water distribution operations are normalized.
  - Metric 1 – Households are served by the Flint water system.
  - Metric 2 – Households do not require filtration at the faucet.
  - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

I am submitting this letter of appeal in response to FEMA Administrator W. Craig Fugate's letter to me dated January 16, 2016. In that letter, he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint. I respectfully submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, to request a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a 'major disaster' under 42 U.S.C. § 5122." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster is analogous to the flood category, given that qualities within the water, over a long term, flooded and damaged the city's infrastructure in ways that were not immediately or easily detectable. Likewise, this disaster is a natural catastrophe in the sense that the contamination arose from the natural decay of Flint's aging infrastructure. These impacts will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. A narrow reading of this definition, restricting the hazards to which we can provide relief, does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

As additional support of this appeal, I offer the following information:

<u>State and Local Government Capabilities</u>

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions for much of the public water system damages can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million. The State is in the process of approving a second appropriation.

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government. Unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated there will be significant unmet needs as identified in the following areas of impacts. The only other possible option would be a special Congressional appropriation.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community to recover with such a large percentage of its citizens living in poverty requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with, and few available resources to address the significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 15, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/15/2016
  - 23 families contacted
  - **17 EBL investigations completed.**
  - **17 Water samplings completed.**
  - **10 EBL Reports Received.**
    - **9 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - **8 homes with lead-based paint hazards**
    - **5 homes with lead detected in tap water**
      - 1 home with lead water levels greater than 15 ppb
  - **4 investigations scheduled.**
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Developed metrics related to elevated blood lead testing among children < 6 years of age in Flint who are enrolled in Medicaid.**
- **Held conference call with CDC to discuss development of tools related to identification of and recommendations for facilities at greater risk for transmission of opportunistic pathogens.**
- Developed/updated Talking points to respond to Legionella questions.
- Completed Summary report describing second illness wave case investigations.
- Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.
- Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.

Filter & Water Distribution Sheryl Thompson

Filter report through 1/13/2016

	Received	Distributed	Remaining
Water Filters	22,000	13,008	8,992
Water Pitchers	720	409	311
Replacement Cartridges - Brita	19,400	3,367	16,033
Replacement Cartridges - PUR	5,706	375	5,331
Replacement Cartridges - Zero	375	205	170

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly HHS internal briefing.**
- **Weekly coordination call with GCHD.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers will replace fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122, as implemented at 44 C.F.R. § § 206.2(17), the incident was not caused by a natural catastrophe, nor was it caused by fire, flood, or explosion." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster expands and fits both within the categories of a storm and flood given that it was qualities within the water that, over a long term, flooded and damaged the city's infrastructure in a way that was not immediately or easily detectable and will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. A more narrow reading of this definition I feel does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels, if our primary mechanism for relief is read in a way that limits the hazards to which we can provide relief.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope that you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

While I greatly appreciate the emergency declaration and the assistance it provides for the city of Flint, I am disappointed that no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies.

As additional support of this appeal, I offer the following information:

State and Local Government Capabilities

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions to much of the public facility

damage can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water and is preparing a second. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million.

NOTE: What do we know about the new appropriation/what can we include?

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated. The only other possible option would be a special Congressional appropriation, which is unlikely.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community with such a large percentage of its citizens living in poverty to recover requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with and few available resources to address the damages to health and public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder

Chicago, IL, 60605

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122, as implemented at 44 C.F.R. § § 206.2(17), the incident was not caused by a natural catastrophe, nor was it caused by fire, flood, or explosion." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster expands and fits both within the categories of a storm and flood given that it was qualities within the water that, over a long term, flooded and damaged the city's infrastructure in a way that was not immediately or easily detectable and will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope that you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

While I greatly appreciate the emergency declaration and the assistance it provides for the city of Flint, I am disappointed no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies. In addition to this appeal through Stafford Act measures, I respectfully request assistance beyond providing "water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days."

As additional support of this appeal, I offer the following information:

<u>State and Local Government Capabilities</u>

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions to much of the public facility damage can only come about with significant federal assistance made available under a Presidential

Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water and is preparing a second. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million.

NOTE: What do we know about the new appropriation/what can we include?

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated. The only other possible option would be a special Congressional appropriation, which is unlikely.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community with such a large percentage of its citizens living in poverty to recover requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with and few available resources to address the damages to health and public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122, as implemented at 44 C.F.R. § § 206.2(17), the incident was not caused by a natural catastrophe, nor was it caused by fire, flood, or explosion." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster expands and fits both within the categories of a storm and flood given that it was qualities within the water that, over a long term, flooded and damaged the city's infrastructure in a way that was not immediately or easily detectable and will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope that you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

While I greatly appreciate the emergency declaration and the assistance it provides for the city of Flint, I am disappointed no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies. In addition to this appeal through Stafford Act measures, I respectfully request assistance beyond providing "water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days."

As additional support of this appeal, I offer the following information:

State and Local Government Capabilities

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions to much of the public facility damage can only come about with significant federal assistance made available under a Presidential

Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water and is preparing a second. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million.

What do we know about the new appropriation/what can we include?

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government unless a Presidential Major Disaster Declaration is granted and the PAGP is activated. The only other possible option would be a special Congressional appropriation, which is unlikely.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community with such a large percentage of its citizens living in poverty to recover requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

I have requested that the Small Business Administration (SBA) activate its Economic Injury Loan Program, under its own statutory authority, to provide much needed financial relief to the scores of businesses impacted by this disaster. If such assistance is approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up. But for others, another loan would add to the debt burden of already struggling businesses.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with and few available resources to address the damages to health and public facilities.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division continues to be my designated State Coordinating Officer for this request. He will work with the FEMA on program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I hereby respectively submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision. While this unique disaster did not result from natural catastrophe, fire, flood or explosion, it poses imminent and long-term threat to the citizens of Flint. I believe the severity of this disaster warrants all categories of the Individual and Public Assistance Programs in order to facilitate suitable recovery. In support of this appeal, I offer the following information:

State and Local Government Capabilities

While I agree with Mr. Brown's assessment that considerable local and state resources were brought to bear in response to this situation, I strongly disagree with the assertion that "effective response does not appear to exceed the combined capabilities of the State and local governments." In fact, nothing could be farther from the truth. State agencies and local governments were able to provide short-term solutions to many problems related to this flooding. However, permanent solutions to much of the public facility damage and environmental degradation can only come about if significant federal assistance is made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by the U.S. Army Corps of Engineers (USACE) and Natural Resources Conservation Service (NRCS), those efforts are simply not sufficient to meet the long-term recovery needs of this situation.

Limited Federal Assistance Has Not Addressed All Needs

The NRCS has identified eight "urgent and compelling" stream bank stabilization sites, totaling $733,000 in project costs, that it intends to address with Emergency Watershed Program (EWP) funding. The NRCS share of these eight projects would total $550,000, and the local governments would be expected to contribute the remaining $183,000. However, this assistance is only intended to provide a temporary "band-aid" for the affected sites until permanent restorative work can be completed. Unfortunately, the NRCS does not have provisions for that type of assistance under its emergency relief authorities and funding mechanisms. As a result, the affected counties are left without a ready funding source for the permanent restorative work unless the Public Assistance Grant Program (PAGP) is activated under a federal declaration.

The amount of permanent restorative work that needs to be done in the Dead River Watershed greatly exceeds available local, state and federal financial resources, absent a Presidential Major Disaster Declaration. The Central Lake Superior Watershed Partnership estimates the total flood-related damages in the Dead River Watershed to be $28.3 million. Of that total, $4.5 million is for temporary stream bank stabilization measures, $19 million is for soil restoration (1.9+ million cubic yards), $800,000 is for

sediment removal measures to be implemented over a five-year period, and $4 million is for habitat restoration projects. (It should be noted that the $19 million soil restoration estimate does not include over 1 million cubic yards of soil lost in the Silver Lake dike and Tourist Park dam. If that is included, the total soil restoration cost approaches $30 million. Also, the $4.5 million in stream bank stabilization measures are for stabilizing the stream banks in their current condition and not restoring them to their original, pre-flood condition.) As you can see, the considerable environmental needs brought about by this flooding greatly exceed the collective funding resources of local, state and federal government unless a Presidential Major Disaster Declaration is granted and the PAGP is activated. The only other possible option might be a special Congressional appropriation, which is highly unlikely given the current difficult status of the federal budget.

The dredging assistance provided thus far by the USACE has been instrumental in restoring the basic navigability of the Dead River and the Marquette Harbor, but it has not removed all impediments to navigation nor permanently restored the areas ravaged by the Dead River floodwater. Again, additional federal assistance is required to restore the Dead River and Lake Superior waters to their pre-flood conditions, thereby providing an acceptable level of safety for commercial navigation interests and boating public alike.

To help address a portion of the road and bridge damage in the four affected counties, the Michigan Department of Transportation (MDOT) will be submitting a formal request for $2.5 million in Federal Highway Administration (FHWA) funding assistance under the FHWA Emergency Relief Program. However, that assistance – if granted – will only address those damaged facilities that are part of the Federal-Aid System (FAS). The FAS damage amounted to approximately 50 percent of the identified $4.8 million in public road and bridge damage, leaving the remaining 50 percent of road and bridge damage (approximately $2.3 million) with no ready means of permanent repair, restoration and replacement. In addition, another $2.1 million in other public damages (under PAGP Categories A, B, D, E, F and G) have been left unfunded by the denial of our declaration request. The State of Michigan and the affected local governments do not have the available funding to address these unmet public damage needs and bring the affected facilities back to full operational status. As I indicated in my declaration request letter, the State and these same four counties are still dealing with another major flood disaster that occurred in this same area only a year earlier (1413-DR-MI) and we simply don't have the financial resources to address this additional, unexpected public facility damage.

Damage to Dams Not Completely Addressed

The Preliminary Damage Assessment (PDA) conducted for this disaster identified only $145,306 in damage to dams and other water control facilities, even though the flooding completely destroyed two publicly-owned and operated dams. I believe this damage figure is far too low and apparently does not include the complete cost of rebuilding the two dams (the Tourist Park Dam in Marquette and the Loughs Lake Dam in Baraga County) to their pre-flood condition. The Marquette Board of Light and Power estimates that the cost of restoring the earthen fill to the Tourist Park Dam alone will approach $1.1 million – far in excess of the $145,306 in total damage identified under PAGP Category D in the PDA. These dams together provide valuable water control and recreation functions for the local communities and the region; therefore, it is imperative that they be rebuilt as quickly as possible.

Unfortunately, the State and the affected local communities do not have the funding at this time to undertake such a project, and as you know, funding under the National Dam Safety Program cannot be used for this purpose because physical improvements and construction activities are not eligible grant activities. The USACE and NRCS have not identified or offered ready sources of funding for the reconstruction of these two dams. I believe FEMA's PAGP provides the best source of funding for rebuilding and restoring these valuable and needed public facilities, and that program can only be activated through the declaration of a Major Disaster by the President.

Lingering Public Health, Safety, and Environmental Threats

Although strides have been made in addressing the many public safety threats and the environmental degradation brought about by this severe flooding, there are considerable lingering issues yet to be addressed. For example, local governments have done an excellent job in identifying and cordoning off unstable stream banks and other unsafe areas. However, as I indicated earlier, permanent

solutions for those dangerous sites will not come about in a timely manner unless significant federal funding resources are made available to restore, repair and permanently stabilize the areas.

Similarly, while the Dead River is open for recreational use and warning signs have been posted at boat launch sites warning boaters and swimmers to be alert for dangerous conditions, those temporary preventive measures are hardly a final, permanent solution to the problem of subsurface flood debris, sedimentation, siltation, bacteria and chemical pollution brought about by the flooding. Again, permanent solutions are needed to eliminate these significant threats to public health and safety and the environment.

The environmental damage to the Dead River Watershed may also adversely affect future flood control activities because the river has changed its course and characteristics in many areas upstream of and in and around the city of Marquette. Unless the failed water control structures and stream banks are replaced / restored to their pre-flood condition, it will be difficult to predict exactly how well the Watershed will handle future flooding events. It is entirely possible that previously flood-free areas and structures will now be flood prone due to the new Watershed characteristics, and the generation of hydro power may be affected as well. These are all distinct possibilities unless the Watershed is restored to its pre-flood condition. In its pre-flood condition, the Watershed performed in a predictable manner and the flood control and power generation characteristics and capabilities were well documented. In its current post-flood condition, the Watershed has unknown characteristics and capabilities that may adversely affect the citizens of the city of Marquette and Marquette County in the years to come. I do not want to take a "wait and see" attitude in this situation, and I am certain the affected local citizenry does not want to be part of such an experiment either. Prompt and prudent action is called for to help rebuild and restore the environmental and hydraulic / hydrologic characteristics of the Dead River Watershed.

Unfortunately, the State and the affected local governments are in no position to provide those solutions without a significant infusion of federal disaster relief assistance. I believe that the direct federal debris removal assistance I requested in my June 4, 2003 letter would have addressed the majority of the health and safety concerns related to debris, sedimentation, siltation and water quality. Activation of the PAGP would have provided the ready means to restore many of the damaged public facilities that provide critical water control, power generation and transportation functions.

Vulnerable Power Generation and Distribution Capabilities

This flood disaster exposed the relatively fragile nature of the Upper Peninsula's power generation and distribution network. Even as bad as the situation has been, it could have been much worse had one or both of the remaining dams on the Dead River failed and severely damaged or destroyed the Presque Isle Power Plant in Marquette. Fortunately, the power plant survived mostly intact from a physical standpoint, but it took a major hit from an operational standpoint. The plant has been off-line for several weeks, and even now only six of the nine generating units are back on-line. As you know, the power generation situation has been precarious at best since the flooding occurred and has caused millions of dollars in economic injury to the central and western Upper Peninsula and temporarily idled two major iron ore mines that produce 20 percent of the U. S. iron ore supply.

Although the region voluntarily adjusted its power consumption to cope with the reduction in electrical power availability and it generally succeeded in that regard, had this disaster occurred in colder weather the situation could have been much more serious. To prevent that type of situation from ever occurring again and to reduce the vulnerability of this plant and the regional distribution network to all types of natural and manmade threats (up to and including acts of sabotage and terrorism), I believe that prudent mitigation measures may be called for. If federal disaster relief assistance is made available, we may be able to provide funding (under the Hazard Mitigation Grant Program or PAGP) to the affected utilities in the region to undertake needed measures to mitigate the vulnerabilities of the power generation and distribution facilities to all types of physical threats. Without such assistance, those measures will not likely be taken due to lack of funding.

Economic Injury to the Region

The economic injury to the four affected counties and the region from this flood disaster is significant. Only now are many of the negative economic impacts coming to light. As I indicated in my June 4 declaration request letter, the estimated economic impact to Marquette County alone is in excess of $80 million. I have requested that the Small Business Administration (SBA) activate its Economic Injury Loan Program, under its own statutory authority, to provide much needed financial relief to the dozens of businesses negatively impacted by this flood disaster. That request is currently pending. Even if the request is approved, the assistance rendered will be in the form of low-interest loans which must be paid back. For many struggling businesses, another loan is often the last thing that they need. However, for many other businesses the loans will provide much needed working capital and a margin of safety that will allow them to continue to operate until their business picks up.

One form of economic injury that will not be addressed by the SBA Economic Injury Loan Program is the increased costs of electric power generation and distribution brought about by this flood disaster. The two private utilities primarily affected by the flooding – the Upper Peninsula Power Company (UPPCO) and Wisconsin Electric (WE Energies) – have incurred increased costs in excess of $10 million. In all likelihood, the bulk of those costs will be passed on to electrical customers – individuals, families, businesses and institutions – in the form of electric rate increases allowed by the Power Supply Cost Recovery mechanism administered by the Michigan Public Service Commission. That $10+ million is $10+ million that will not be spent in other segments of the local and regional economy – at restaurants, retail establishments and other businesses, at colleges / universities, at travel and tourism destinations, etc. – effectively taking the money out of widespread economic circulation.

The economic injury to public agencies in the affected area is significant as well and unfortunately is also not covered under the SBA Economic Injury Loan Program. Unless the PAGP is activated, the State and the affected local communities will not have a ready funding source for repairing, rebuilding and restoring the many critical public facilities damaged or destroyed in this disaster. As I indicated earlier, this disaster comes on the heels of another Major Disaster (1413-DR-MI) that occurred just a year earlier in these same four counties. The counties and local municipalities are still recovering from that event, and now they have yet another major flooding disaster to deal with and not much in the way of available resources to address the public facility damage and the many public health, safety, and environmental threats.

I sincerely believe that a Presidential Major Disaster Declaration is warranted in this situation due to the extraordinary circumstances involved in this flooding disaster – the catastrophic failure of two dams, the widespread and severe public facility damage and environmental degradation, the prolonged reduction in electric power generation capability, and the severe economic injury inflicted upon the affected communities and the region. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

I have designated First Lieutenant Ralph Hobrat of the Michigan State Police, Emergency Management Division as the State Coordinating Officer for this appeal request. He can be reached by telephone at (517) 333-5048 and by e-mail at hobratr@michigan.gov. F/Lt. Hobrat will work with the FEMA in conducting additional damage assessments as necessary and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

I am submitting this letter of appeal in response to FEMA Administrator W. Craig Fugate's letter to me dated January 16, 2016. In that letter, he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint. I respectfully submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, to request a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a 'major disaster' under 42 U.S.C. § 5122." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster is analogous to the flood category, given that qualities within the water, over a long term, flooded and damaged the city's infrastructure in ways that were not immediately or easily detectable. Likewise, this disaster is a natural catastrophe in the sense that the contamination arose from the natural decay of Flint's aging infrastructure. These impacts will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. A narrow reading of this definition, restricting the hazards to which we can provide relief, does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

As additional support of this appeal, I offer the following information:

<u>State and Local Government Capabilities</u>

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions for much of the public water system damages can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million. The State is in the process of approving a second appropriation.

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local and state government. Unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated there will be significant unmet needs as identified in the following areas of impacts. The only other possible option would be a special Congressional appropriation.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community to recover with such a large percentage of its citizens living in poverty requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

~~As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."~~

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with, and few available resources to address the significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 14, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/12/2016
  - 23 families contacted
  - 16 EBL investigations completed.
  - 16 Water sampling completed.
  - 9 EBL Reports Received.
    - 8 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 7 homes with lead-based paint hazards
    - 4 homes with lead detected in tap water
      - 3 homes with lead water levels less than 5 ppb
      - 1 home with lead water levels greater than 15 ppb
  - 5 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Developed/updated Talking points to respond to Legionella questions.**
- **Completed Summary report describing second illness wave case investigations.**
- **Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.**
- **Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.**
- The Governor's office held a press conference on Legionnaires disease in Genesee County.
- Blood lead level testing report through 1/8/2016 submitted to the JIC.
- Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.

Filter & Water Distribution Sheryl Thompson

Filter report through 1/13/2016

	Received	Distributed	Remaining
Water Filters	22,000	13,008	8,992
Water Pitchers	720	409	311
Replacement Cartridges - Brita	19,400	3,367	16,033
Replacement Cartridges - PUR	5,706	375	5,331
Replacement Cartridges - Zero	375	205	170

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly HHS internal briefing.**
- **Weekly coordination call with GCHD.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers are replacing fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). NOTE: **Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☒ Major Disaster (Stafford Act Sec. 401) ☐ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date Apr 25, 2014 End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Contamination and Damage to Public Water System

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

On April 25, 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under age 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting elevated blood lead levels. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)
Expedited Major Disaster Declaration Request

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
Expedited Major Disaster Declaration Request

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☒ Crisis Counseling Program ☒ Disaster Unemployment Assistance

☒ All ☒ Disaster Case Management ☒ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee

We request all available programs. The Individual Assistance programs will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 to repair damaged lead service lines on private property. The damage estimate is based on damage assessments conducted by the City of Flint with the Genesee County Equalization Department.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☒ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☒ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Flint, Genesee and Mt. Morris; Cities of Burton and Flint; County of Genesee

We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, cartridges, and water test kits. Damage assessments conducted by the City of Flint with the Genesee County Equalization Department concluded that the total potential damages to the City of Flint water distribution infrastructure is estimated at $712,800,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☐ I do not anticipate the need for debris removal.

☒ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

N/A

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☒ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River on April 25, 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can not be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing

warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance, and Public Assistance, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MDTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MDTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MDTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain

blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water on April 25, 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and

will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The current focus is on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating replacement costs which could be as much as $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges. Seven trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More of the above resources are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water – 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuild efforts and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there could be an estimated need as much as $53 million to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River on April 25, 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing

warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance, and Public Assistance, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain

blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and

will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating replacement costs which could be as much as $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there could be an estimated need as much as $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance, and Public Assistance, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified

allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help

address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating replacement costs which could be as much as $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there could be an estimated need as much as $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance, and Public Assistance, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified

allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help

address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance ~~– IHP~~, and Public Assistance ~~– Category B~~, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified

allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help

address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of physicians at Hurley Medical Center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus, and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for lead levels and 50 residents have exhibited elevated blood lead levels. Of those, 28 are children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the MDHHS has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

Additionally, the economic and psychological impact this has had on the community is significant. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL

can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS)

MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal State Drinking Water Act. The City began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announced the Governor's Flint action plan. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. And on October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be

responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS)

The City of Flint is categorized as a food desert, and the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2006: 25.4%
  - 2012: 31.8%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2006: 35.4%
  - 2013: 47%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a

Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we have identified higher priorities for outreach. All of those establishments received a letter in October 2015 with guidance; all of them will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers, and we are planning additional outreach to them as part of our efforts.

No licensed animal shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.
Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban

Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County and particularly the City of Flint experience rates of poverty significantly higher than the rates of both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of

the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of eligible programs under both Individual Assistance and Public Assistance for all affected jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies whose resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare an Expedited Major Disaster with a Preliminary Damage Assessment to follow if a disaster declaration occurs, and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River on April 25, 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of physicians at Hurley Medical Center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,642 Flint residents have been tested for blood lead levels. Of those tested, fifty residents have exhibited elevated blood lead levels. Twenty eight of the persons found to have elevated blood lead levels are children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The MDHHS has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a significant economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the population. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned, and we are assuming it can't be used for potable purposes. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals Assistance Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing

warehousing management. On January 13, 2016, a Volunteer Reception Center (VRC) was established, and the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) conducted a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance, and Public Assistance, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the Michigan Department of Environmental Quality (MDEQ) is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and Women/Infants/Children (WIC) clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The City of Flint is categorized as a food desert. The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 8.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MDTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources and studies, MTED determined potential long-term impacts to the economy of Flint and its residents resulting from the water crisis. Potential long term costs associated with certain

blood lead levels could include lifetime earnings loss, lead health care treatment costs, ADHD treatment costs, and special education costs.

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water on April 25, 2014.

On October 1, 2015 the State Chief Medical Executive confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All establishments received a letter in October 2015 with guidance and

will receive revised guidance over the next few days. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts.

No animal licensed shelters exist in the water service area. The primary focus is and should be on residences where they may also have pets. There are two veterinary clinics in the City, and we have made individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Education (MDE)

The MDE is monitoring all child nutrition program providers operating in the Flint area. MDE food service program staff is working with all school meal operators and child and adult care operators to ensure they take all proper precautions if they have unsafe water.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating replacement costs which could be as much as $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is more than double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there could be an estimated need as much as $53 million to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief

assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden *the distribution of water, filters, and test kits throughout the water department's service area.*

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with *manufacturers and WIC retailers to address any supply or distribution issues with infant formula* availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

OMB No. 1660-0009/FEMA Form 010-0-13

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare a Disaster for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and EPA, and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update of January 8, 2016, 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes

by a large percentage of the populace. Mistrust in government is at a heightened level due to the mistakes made, and so, while water is safe for non-consumptive uses, people are understandably leery of the system. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with Individuals and Households Program, Crisis Counseling, Disaster Unemployment, Disaster Case Management, and Disaster Legal Services will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBL. The duration of an EBL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management, volunteers for canvassing and water distribution, and is also working to establish a Volunteer Reception Center (VRC). On January 13, 2016, with the establishment of the VRC, the MI-VOAD is conducting a conference call to determine how it can more fully activate (several member organizations have already activated) Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance and Public Assistance will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that both affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000. If appropriate funding can be secured, this emergency will provide an opportunity to implement hazard mitigation projects identified in these plans, in order to reduce the impact of future emergencies of this nature.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. However, we will likely not have a clear picture until the end of the week. Even

when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the city of Flint (City) started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an emergency backup source to the system.

Over time, the DWSD source became financially strenuous to the City and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary

Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014 the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City commenced two 6-month lead and copper monitoring periods. A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90^{th} percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. On March 30, 2015 the MDEQ notified the City of the 6ppb results.

On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90^{th} percentile), and required the City to install corrosion control equipment and begin treatment.

On July 28, 2015 the MDEQ received information from the Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside in certain zip codes in the City. This same date the MDHHS reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8%
  - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47%
  - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.

- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all

four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to PODs and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the JIC at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:
Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
Brita faucet filters – 27,000
Brita Replacement filters – 1,600
PUR faucet filters – 12,500
PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges.

Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Individual Assistance/Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

[The following information is required for requests for Public Assistance.]

Public Assistance

The two relevant categories under PA are B, Emergency Protective Measures, and F, Public Utilities.

In the October to December time frame, the State received an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $ in one time costs and $ in daily expenditures.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource in times of emergency. The County, from which we could normally obtain insurance coverage information, does not track this. In any case, per the Department of Insurance and Financial Services referenced above, normal property insurance would have this type of damage as an exclusion. The likelihood of coverage is very low.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county specified in this request, and activation of the Hazard Mitigation Grant Program (HMGP) for all counties within the state. Preliminary estimates of the types and amount

of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

No PDA has been conducted or requested at this point in time due to the obvious severity of the emergency and the immediacy of the need for emergency protective measures. I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $178,000,000, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

OMB No. 1660-0009/FEMA Form 010-0-13

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide
☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds
☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm
☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 over a period of 1 year to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ *I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407* of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:
Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) *Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work;* (2) *Hold and save the* United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

Not Required for Emergency Declaration Request

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the city of Flint (City) started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an emergency backup source to the system.

Over time, the DWSD source became financially strenuous to the City and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014 the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City commenced two 6-month lead and copper monitoring periods. A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90^{th} percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. On March 30, 2015 the MDEQ notified the City of the 6ppb results.

On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90^{th} percentile), and required the City to install corrosion control equipment and begin treatment.

On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside certain zip codes in the City. This same date the MDHHS reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the

DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date Apr 25, 2014 End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ *Other (please specify)* Contamination and Damage to Public Water System

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

On April 25, 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated cost as much as $54,619,500 over a period of 1 year to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs which could be in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

VRC Operations
Hours: 9 a.m. to 7p.m.
Location: American Red Cross
1401 South Grand Traverse
Flint, Michigan 48503
Dial 2-1-1

Cost Figures for Flint Water Response: Population and Community Health Administration (PHCSA)

Type	Priority	Intervention	Rationale	Cost
Education				
Secondary Prevetion				
		School nursing	To monitor, case manage, treat, promote wellness (socioemotional), school *nutrition, etc...*	$500,000
		Special Education	20 percent of children with BLLs greater than or equal to 25 @ age two receive special education for an average of 9 years.	$2,500,000
		Pre-Post school programming	To provide structured, safe supervised programming	$9,000,000
Nutrition				
Secondary Prevention				
		Expand WIC eligibility requirements	To increase availability of *healthy nutrition for impacted* children	$1,380,000
		Promote breastfeeding education and support *services*	To protect children from lead exposure, promote cognitive *development*	$85,000
Tertiary Prevention		Educate and promote lead-exposure diet	To limit absorption and promote excretion of lead in exposed children	$110,000
Medical Health				
		Immediate Treatment and treatment of lead-associated ADHD	Immediate treatment of childr	$18,280,849
		Promote caregiver capacity. Increase capacity of maternal infant suppport services	To support parents and *programs* to improve parenting skills and early Identification of developmental delays	$250,000 $325,000 $120,000
Secondary Prevention		Education for primary care providers regarding toxic stress	To indentify developmental delays early	$100,000
		Increase pediatric healthcare access to a patient centered medical home	To continuously drive patients to their primary care provider	$100,000

Tertiary Prevention	Creation of the Flint Children's Health and Development Fund	To support short and long-term health, medical care, and developmental needs of Flint children exposed to lead	$100,000,000
	Behavorial Health Services	To provide necessary mental/behavioral health services to exposed population	$7,000,000
	Identification and tracking of exposed children/cohort	To determine extent of injury and long-term neurodevelopmental, medical, socioeconomic impact. To allow for identification of exposed children and ongoing surveillance	$100,000
Assessment Subtotal			**$139,155,849**

Budget Estimates
FY16 Supplemental Request

Appropriation	**FTEs**	**Amount**
Cost for epidemiologists	2	$115,000
Cost to abate lead in homes in Flint	3.5	$1,687,500
Additional lead investigations	0	$100,000
Increase nurse case management	1	$75,000
Increase community education	2	$120,000
WIC outreach and trasportation	1	$60,000

Total FY16 fuding Request	**$10**	**$2,157,500**	
FY17 Supplemental Request			
Continuation of FY16 Supplemental	8	$850,000	
Cost for epidemiologists	2	$220,000	
Cost to abate lead homes in Flint	4	$2,261,000	
Additional lead investigations	0	$130,000	
Increase nurse case management	1	$100,000	
Increase community education	2	$180,000	
WIC outreach and transportation	1	$90,000	
Total FY17 Funding Request	**18**	**$3,831,000**	
Total FTE	**27.5**		
GRAND TOTAL			**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the Genesee Coalition could undertake. 5 grants at $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI.

Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.

Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) *investigations.*

Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.

Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and will address broader areas beyond the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted.

Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include funding for lead abatement. This is done via contract with ETC Consulting. (No FTEs)

Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Continue the contractual health educators at GCHD to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.

One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,182 residents have been tested for lead blood levels as a result of this incident with 43 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated $53,000,000 over a period of 1 year to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).
N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** *for additional information in support of this request**.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:
Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

Not Required for Emergency Declaration Request

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to the dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. Flint falls into the category of city that has been called a "legacy city" (See *Rebuilding America's Legacy Cities*, edited by Alan Mallach in 2012 and published by American Assembly, Columbia University), caught in the problems of transitioning from its historic mid-20th Century manufacturing base into new roles for 21st Century health and success. It has been caught in a long-term trap of an aging infrastructure combined with dwindling municipal revenues. And although there are opportunities available by which the city might successfully make that transition, its current problems must first be overcome. (Mallach xi, 180-183) In order to offset mismatches between a central legacy city and the disproportionate wealth of the surrounding areas it serves, various planners and urban policy experts (e.g. Norman Krumholz, Myron Oldfield, John Rusk) have found that various forms of revenue sharing may be justified, greater integrating the central districts with the overall metropolitan area whose health is mutually intertwined, or finding ways to fund the health of essential central sections and infrastructure within existing political and organizational structures, networks, and capacities. Cities are legally "creatures of the state" and thus subject to the effects of state policy. Where past policies had resulted in an accumulation of fiscal

problems for central cities, new policies have the potential to help solve these same problems in the long-term. But first, the immediate threats to health for nearly 100,000 permanent city residents, plus tens of thousands of non-residents who make daily use of the city's resources, services, and amenities, must be corrected. The importance of the problems of aging city infrastructure has become clear, but the first step is to protect the health of the area's residents, as longer-term solutions continue to be developed with a keener awareness of the relationship between the health of each central city, and the quality of life for each broader metropolitan area and the state as a whole. A successful response to the current emergency will also help to inform the handling of similar challenges that might occur in other legacy cities, with this one crisis potentially providing the urgency and will to address related problems in other locations, lessening the potential for their infrastructure to produce a similar emergency-level situation.

The city's poverty rate is 2.67 times higher than the national poverty rate, and the city's median household income is less than half of that for the nation as a whole. Average unemployment rates within the city were nearly three times the national rates. A disproportionate number of the city's residents have disabilities (functional needs). Although the percentage of elderly residents is slightly below average, the opposite is true for the percentage of young children under age 5, and it is this age category that is most vulnerable to the effects of lead exposure. The percentage of children under 5 is higher in Flint than the respective percentages for Genesee County, the State of Michigan, and the United States as a whole. (Refer to the following table.)

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

NOTE: The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Benton Harbor, Pontiac, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Naturally, these references, deriving from a theoretical urban planning perspective, will need to be reviewed for their political feasibility.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits."

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this emergency:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with

Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.]
"I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively."

(Provide the disaster history of the State over the past 12 months... List areas that have sustained damage from this event and other disasters in the previous 12 months, and include any other pertinent factors that would have a bearing upon the State's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.)

(If Individual Assistance is being requested, provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations [children under 5]. Include a comparison of the percentage of the state and local government averages and national averages. Indicate source of data cited.) NOTE: This data is provided in Attachment 1.

(If Public Assistance is being requested, provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include a discussion of significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita. Discuss the level of insurance coverage.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs.""

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf."

Sincerely,

Rick Snyder
Governor

Attachment 1: Demographic Profile of the Affected Counties and Selected Local Municipalities
Attachment 2: Significant State and Local Response and Recovery Actions
Attachment 3: Supporting Maps, Charts, and Photographs

Office of Management and Budget Form No. 1660-0009
Enclosure A: Estimated Requirements for Individual Assistance under the Stafford Act
Enclosure B: Estimated Requirements for Public Assistance under the Stafford Act
Enclosure C: Estimated Requirements for Other Federal Agency Programs
Enclosure D: (Not Applicable to this Request)

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,182 residents have been tested for lead blood levels as a result of this incident with 43 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated $53,000,000 to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

Not Required for Emergency Declaration Request

Cost Figures for Flint Water Response: Population and Community Health Administration (PHCSA)

Type	Priority	Intervention	Rationale	Cost
Education				
Secondary Prevetion				
		School nursing	To monitor, case manage, treat, promote wellness (socioemotional), school nutrition, etc...	$500,000
		Special Education	20 percent of children with BLLs greater than or equal to 25 @ age two receive special education for an average of 9 years.	$2,500,000
		Pre-Post school programming	To provide structured, safe supervised programming	$9,000,000
Nutrition				
Secondary Prevention				
		Expand WIC eligibility requirements	To increase availability of healthy nutrition for impacted children	$1,380,000
		Promote breastfeeding education and support *services*	To protect children from lead exposure, promote cognitive development	$85,000
Tertiary Prevention		Educate and promote lead-exposure diet	To limit absorption and promote excretion of lead in exposed children	$110,000
Medical Health				
		Immediate Treatment and treatment of lead-associated ADHD	Immediate treatment of childr	$18,280,849
Secondary Prevention		Promote caregiver capacity. Increase capacity of maternal infant suppport services	To support parents and programs to improve parenting skills and early identification of developmental delays	$250,000 $325,000 $120,000
		Education for primary care providers regarding toxic stress	To indentify developmental delays early	$100,000
		Increase pediatric healthcare access to a patient centered medical home	To continuously drive patients to their primary care provider	$100,000

Tertiary Prevention	Creation of the Flint Children's Health and Development Fund	To support short and long-term health, medical care, and developmental needs of Flint children exposed to lead	$100,000,000
	Behavorial Health Services	To provide necessary mental/behavioral health services to exposed population	$7,000,000
		To determine extent of injury and long-term neurodevelopmental, medical, socioeconomic impact. To allow for identification of exposed children and ongoing surveillance	
Assessment	Identification and tracking of exposed children/cohort		$100,000
Subtotal			**$139,155,849**

Budget Estimates
FY16 Supplemental Request

Appropriation	**FTEs**	**Amount**
Cost for epidemiologists	2	$115,000
Cost to abate lead in homes in Flint	3.5	$1,687,500
Additional lead investigations	0	$100,000
Increase nurse case management	1	$75,000
Increase community education	2	$120,000
WIC outreach and trasportation	1	$60,000

Total FY16 fuding Request	**$10**	**$2,157,500**	
FY17 Supplemental Request			
Continuation of FY16 Supplemental	8	$850,000	
Cost for epidemiologists	2	$220,000	
Cost to abate lead homes in Flint	4	$2,261,000	
Additional lead investigations	0	$130,000	
Increase nurse case management	1	$100,000	
Increase community education	2	$180,000	
WIC outreach and transportation	1	$90,000	
Total FY17 Funding Request	**18**	**$3,831,000**	
Total FTE	**27.5**		
GRAND TOTAL			**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the Genesee Coalition could undertake. 5 grants at $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI.

Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.

Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.

Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and will address broader areas beyond the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted.

Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include funding for lead abatement. This is done via contract with ETC Consulting. (No FTEs)

Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Continue the contractual health educators at GCHD to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.

One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 12, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/12/2016
  - 22 families contacted
  - 14 EBL investigations completed.
  - 14 Water sampling completed.
  - 7 EBL Reports Received.
    - 6 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - 6 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - **# offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)**
  - # CM started: 25 (0-5 year olds) **and 3 (6-17 year olds)**
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) **and 3 (6-17 year olds)**
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: **30 (0-5 year olds)** and 1 (6-17 year olds)
- Weekly Flint Case Management call:
  - Discussed challenges regarding EBL investigations. GCHD reports that families are resistant to allowing EBL investigation for many reasons. Discussed providing participation incentives, potential of using texting to communicate with families, on-site EBL person, etc.

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Blood testing data through 12/8/2016 pulled from the warehouse and summarized for inclusion in bi-weekly blood count report.**
- Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

As of January 12, 2016				
	Remaining From Prior Month	Received	Distributed	Remaining
Water Filters	3,585	7000	1549	9,036
Water Pitchers	485	0	181	304
Replacement Cartridges - Brita	7,525	10400	1815	16,110
Replacement Cartridges - PUR	5,632	0	293	5,339
Replacement Cartridges - Zero	370	0	192	178

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Tuesday (8:00 am) briefing with DLARA and MDEQ.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC No updates.

Healthcare/Providers No updates

DEQ Information - Linda Dykema as Liaison

- **DLARA plumbers are replacing fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.**

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 15, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Regional Administrator Andrew Velasquez
FEMA Region V
City, State, Zip Code

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § [Major Disaster citation (206.36), Emergency citation (206.35)], I request that you declare an emergency for the ***State of Michigan*** as a result of ***the elevated blood lead levels of citizens, especially children, within the City of Flint discovered in October, 2015.***

[The following information is required for ALL requests. Provide additional information that is not contained in the form. If requested information is included in the form, it is not necessary to repeat in the cover letter.]

As of the most recent update of January 8, 2016, 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age cohort to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank for people needing assistance. The American Red Cross has established a Disaster Recovery Operation and also are providing warehousing management, volunteers for canvassing and water distribution, and are also working to establish a Volunteer Reception Center. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint, including its residents, businesses and worker population, as well as pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines as well as

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this disaster:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

The EMHSD maintains

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. However, we will likely not have a clear picture until the end of the week. Even once this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With comprehensive water testing plan that the DEQ is

implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and USDA's Rural Development's programs, we have been working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system.

Department of Health and Human Services – Human Services (MDHHS-HS)

MDHHS has been working steadily to provide assistance to the local community through its many different programs.

Healthy foods. MSU-Extension has been giving out recipes but residents must be able to purchase it. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden but necessary.

In some homes the plumbing is very poor; as a result the faucet filter may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for family of 2 is $98 per month. For a family of 4 with leaks etc. you are looking at about $150 or more per month.

Additional ongoing testing will be required for those with the blood levels-treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "**Michigan – Genesee – Flint Demographic Summary**" shown below.

- Of those, there is a notable rise in children age 0-17 living in poverty:
  - 2012: 31.8%
  - 2006: 25.4%

- The median income for Flint residents between 2009 and 2013 was is markedly lower than the state's median income, also shown in the table **"Michigan – Genesee – Flint Demographic Summary"** shown below.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with No. 1 the best in the state). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5 % of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47%
  - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS. The table following shows the distribution among Flint's zip codes.

MDHHS Program Data

City of Flint		
Program	**Cases**	**Recipients**
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

MDHHS Program Recipients by Zip Code

ZIP Code	Adults	Children	Total

* Zip Codes with asterisk defined by USPS as "This is a UNIQUE ZIP Code™ used for a specific company or organization."

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels. Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels. The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The situation that occurred in the City of Flint would not be a covered loss. Therefore, it is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the

Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Talent and Economic Development (MDTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the City of Flint and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

This analysis was based on a study by the University of Michigan Risk Science Center and the Michigan Network for Children's Environmental Health. The study, linked below, cited studies that showed the direct correlation in loss of IQ with elevated lead levels. This loss of IQ was directly correlated to loss of lifetime income potential, as well as costs for treatment, costs for special education, and ADHD treatment for cohorts under 5 years old.

The excel chart uses the findings from this study and applies it to Flint's population of 0-5 year olds. We're not sure what number to use in the field labeled "estimated percent of population impacted", but it's saved at 6% of 0-5 year olds impacted. Depending on the lead levels, the lifetime earnings loss ranges from $33 Million to over $89 Million if 6% of 0-5 year olds were impacted. The % of population can be changed for each blood lead level to get the impact.

http://www.riskscience.umich.edu/wp-content/uploads/2013/12/Economic-Impact-of-Lead-in-Michigan-Web.pdf

Again, this analysis is based on the study linked above. If the findings and methodology of the study aren't acceptable, then the attached Excel calculations shouldn't be used. Also, we have not reached out to UM to see if any of their assumptions have changed since this was done in 2014 or if our correlations and

methodology are acceptable. With additional time, we would confirm our method with the UM team.

With input from the Department of Treasury, we assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water like restaurants will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses are also having to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems reasonable, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term there would be the cost of a new water system, which would have a significant cost. Direct health related costs would be on top of this estimate.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, trucks and drivers to assist with delivering supplies to PODs and assisting with neighborhood visits.

DTMB also facilitated the establishment of the JIC at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:
Truckloads of water - 32;
Brita faucet filters – 27,000
Brita Replacement filters – 1,600
PUR faucet filters – 12,500
PUR 3-pack replacement filters – 40,000

Disaster History

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act. While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term

Recovery in Southeast Michigan continues to struggle. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Black mold continues to be a problem in many households and unmet needs such as furnaces continue to be a problem. A Long Term Recovery committee has met regularly, but resources continue to be difficult to obtain, at best.

[The following information is required for requests for Individual Assistance.]

Provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations. Include a comparison of the percentage of the State, local, or Indian tribal government averages and national averages.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

[The following information is required for requests for Public Assistance.]

Provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include in your discussion significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita.

Discuss level of insurance coverage.

Insert concluding statement.

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the

City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps related to this emergency can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000. The need is estimated for 90 days for water distribution ($10,335,808) and 1 year for the balance for filters, filter cartridges, and water test kits.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

*Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request**.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:
Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.
State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide OR

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. *Incident Period:* *Beginning Date* _____ *End Date* _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ *Tidal Wave* ☐ *Tornado* ☐ Tropical Depression ☐ *Tropical Storm* ☐ *Tsunami* ☐ *Volcanic Eruption* ☐ *Winter Storm*

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water System (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Executive. Based on U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children under 6 are in a high-risk stage of growth for lead exposure. Approximately 2,642 residents have been tested for lead blood levels as a result of this incident with 50 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

Not Required for Emergency Declaration Request

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

VRC Operations
Hours: 9 a.m. to 7p.m.
Location: American Red Cross
1401 South Grand Traverse
Flint, Michigan 48503
Dial 2-1-1

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since April 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would prove to be challenging to historical central cities such as Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to a dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,413	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	445,589	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.3%	52.6%	43.4%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an official bankruptcy (declared in 2XXX) appeared to provide one of the clearest means to sort through the many debts and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. A disproportionate number of the city's residents are in poverty. A disproportionate number of the city's residents have disabilities (functional needs).

Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.7-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits.

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this disaster:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this

request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B, respectively.

Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs."

I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Rick Snyder
Governor

Attachments and Enclosures:

Attachment 1: Demographic Profile of the Affected Counties and Selected Local Municipalities
Attachment 2: Significant State and Local Response and Recovery Actions
Attachment 3: Supporting Maps, Charts, and Photographs

Office of Management and Budget Form No. 1660-0009
Enclosure A: Estimated Requirements for Individual Assistance under the Stafford Act
Enclosure B: Estimated Requirements for Public Assistance under the Stafford Act
Enclosure C: Estimated Requirements for Other Federal Agency Programs
Enclosure D: (Not Applicable to this Request)

ATTACHMENT 1 TO MAJOR DISASTER REQUEST

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	XX.X%	$XX,XXX	XX.X%	XX.X%	XX.X%	XX.X%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

ATTACHMENT 2 TO MAJOR DISASTER REQUEST

Significant State and Local Response and Recovery Actions

Search and Rescue. The rapid and severe flash flooding inundated numerous sections of interstate highways, major state highways, and local roadways in the metropolitan Detroit area in the hours immediately after the heavy rainfall on August 11, trapping hundreds of vehicles and motorists in the rising water. Many of these motorists sought refuge on the tops of their vehicles or on nearby high ground and had to be rescued by Michigan State Police officers, local law enforcement officers, and local fire department personnel. Michigan State Police resources were particularly valuable to the search and rescue efforts. State Police officers provided direct assistance to stranded motorists, checked the status of abandoned vehicles, and assisted local responders in blocking access to flooded roadways. In addition, divers with the Michigan State Police Underwater Recovery Unit checked more than one hundred submerged vehicles for occupants (fortunately, none were found), and the State Police Aviation Unit conducted aerial fly-overs of the impacted areas to search for additional stranded motorists and to take aerial photographic and video footage of the flood scenes. (Some of those photographs are included at Attachment 3 to provide visual documentation of the scope and magnitude of the flooding.)

Critical Facilities and Infrastructure Restoration. A number of critical facility and infrastructure emergency restoration measures were implemented in the affected counties and local communities during the response to the severe flooding. Particularly hard hit were the interstate highways and major state roadways in and around metropolitan Detroit, although roadways in all three counties were heavily impacted by the flooding. Many sections of the affected highways in and around metropolitan Detroit (including interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39) were inundated with flood water, trapping vehicles and motorists who could not make their way through the rapidly-deepening water. This forced the closure of these roadway sections – in some cases for several days – so that crews from the Michigan Department of Transportation, Michigan State Police, and county and local road and law enforcement agencies could oversee the removal of stranded (and generally inoperable) vehicles; assess the physical damage to and conduct safety checks of road, bridge, and related infrastructure; and initiate appropriate facility repair and restoration measures so that the closed sections of roadway could be safely reopened to the motoring public. (Refer to the road closure map found at Attachment 3.)

Repair and restoration measures included but were not limited to: conducting safety checks of and making temporary or permanent repairs to damaged structures; removing water, mud and debris from the roadway, bridges, and rights-of-way; stabilizing banks to prevent further debris flows and physical degradation; repairing signage and electronic signals, where required; repairing pumping equipment and associated facilities to ensure they are operational; and testing the repaired facilities to ensure they will allow for safe travel. In most cases, the dedicated work crews were able to reopen the damaged highway and roadway facilities within 36-48 hours. However, some of the damaged sections of roadway and bridge infrastructure will

require more extensive permanent repairs which will take several weeks to several months to complete once funding is available to finance the repairs.

Uninsured damage to other local public facilities and infrastructure was significant. For example, in the City of Warren in Macomb County, the Police Department and Fire Department incurred nearly $2.8 million in uninsured damage to their police and fire vehicles and associated equipment. This includes 10 fully-equipped Fire Department vehicles and six fully-equipped Police Department vehicles requiring replacement, and another seven fire vehicles and nine police vehicles requiring major repairs. The City of Sterling Heights, also in Macomb County, had nearly $620,000 in insured public utility damage, while in St. Clair Shores, uninsured damage to public buildings and associated equipment totaled $225,000. In the City of Royal Oak in Oakland County, uninsured damage to a local high school and middle school totaled $210,000. Uninsured damage to St. John Providence Hospital in the City of Southfield in Oakland County was $200,000. Uninsured damage to Oakwood Hospital in the City of Dearborn in Wayne County exceeded $1.8 million, while in the City of Highland Park, also in Wayne County, uninsured damage to public utilities, city hall, and the community recreation center totaled in excess of $450,000. In the City of Detroit in Wayne County, uninsured damage to public buildings and equipment was over $930,000, with the majority of that total coming from damage to Police Department facilities. These are just a few instructive examples from the nearly $16.8 million in public damage that occurred in Michigan. Although temporary repair and restoration measures have been put in place in most instances to bring the damaged facilities and infrastructure in the three counties to basic operational status, almost all will still require extensive permanent repairs and restoration to bring them back to their pre-flood condition. That will not occur in a timely or comprehensive manner without federal disaster relief assistance.

Emergency Sheltering and Mass Care. Although the rapid (and unanticipated), heavy rainfall did not allow for preventive evacuations of the public in impacted areas, emergency sheltering and mass care services were required in several instances. For example, on August 11, over 400 stranded motorists had to be temporarily sheltered for the evening in the City of Warren because roadway flooding prohibited further travel and resulted in many areas being inaccessible by vehicle. (Many of these individual's vehicles were deeply submerged in flood water and would not have been able to travel anyway because of the damage to their vehicle.) Along M-10 in Wayne County, approximately 50 motorists were stranded for an extended period from the evening of August 11 through August 13 due to the deep flood water in the walled-in, lower sections of the highway. During this time, the American Red Cross provided these stranded individuals with food, water, and comfort kits until the roadway could be de-watered and reopened for travel. For six days after the flooding occurred, a small number of displaced flood survivors were sheltered and cared for at an American Red Cross shelter in Garden City in Wayne County because their homes were inaccessible and/or incurred sufficient damage to render them unsafe for occupancy. Lastly, the American Red Cross also provided cots and comfort kits to nearly two-dozen displaced residents at two apartment complexes in the cities of Detroit (Wayne County) and Troy (Oakland County) so that the residents could use other (unaffected) vacant units within the respective complexes for shelter, rather than having to be moved elsewhere to a temporary shelter facility.

I must note that these emergency sheltering and mass care figures are somewhat misleading, as we received reports that many more flood survivors were temporarily displaced because of flood damage and/or inaccessibility but sought shelter with nearby family, friends, or in unaffected area hotels and motels. As it is next to impossible to track these "unofficial" evacuations with any accuracy, it is safe to say that the number of temporarily displaced flood survivors is much higher than reported through official channels.

The American Red Cross generally led the organized emergency sheltering and mass care effort, supported by the Michigan Department of Human Services, the Salvation Army, and other community-based relief organizations.

Flood Recovery for Individuals and Families. To assist affected flood survivors in recovering from this devastating disaster, the American Red Cross teamed with the Michigan Department of Human Services, Michigan 2-1-1, the Michigan Community Service Commission, and other community-based relief organizations to establish and operate "Multi-Agency Resource Centers" (MARCs) in 10 different locations over a six-day period in the latter-half of August. (A corresponding map found at Attachment 3 shows the initial locations of these MARCs.) The Multi-Agency Resource Centers, which were visited by several thousand flood survivors, provided a location and means to disseminate information regarding flood recovery and available flood recovery assistance. Through these centers, flood survivors could connect with or be referred to agencies and organizations that could assist them in their recovery – addressing everything from filing insurance claims, to replacing food and clothing, to making repairs to damaged homes. In addition, the Multi-Agency Resource Centers also provided a clearinghouse for the distribution of flood clean-up kits, personal comfort kits, and other recovery supplies to those requiring such items. To date, over 300 referrals for behavioral health assistance have been made through the centers and other involved agencies.

In addition to the Multi-Agency Resource Centers, flood survivors also have the opportunity to request flood recovery information and/or assistance via the Internet or Michigan 2-1-1 telephone system. These options were widely disseminated to the public and the media in various information releases. For the internet options, affected individuals could register directly with the Recovery Coordination Center (discussed in "Management of Emergency Volunteers" below) operated by Michigan Voluntary Organizations Active in Disasters, at www.bit.ly/floodcleanupsemi, or they could register via a specially-designated web page (www.michigan.gov/miflood) at the Michigan State Police Emergency Management and Homeland Security web site, which provides a link to the Recovery Coordination Center registration form. Either option results in a referral for recovery assistance to one of the Michigan Voluntary Organizations Active in Disasters member organizations providing assistance through the Recovery Coordination Center.

(I must note that, although the Multi-Agency Resource Centers, Michigan 2-1-1, and the aforementioned web sites have been tremendously successful to date in identifying and addressing both short- and longer-term recovery needs of the affected flood survivors in this disaster, it is clear that even these collective efforts are not going to be sufficient to identify and address all of the unmet needs of the thousands of flood survivors. This is particularly true with regard to home rebuilding and restoration efforts to ensure safe re-occupancy of damaged

structures. Because over 80-percent of the affected households in the three-county area did not have insurance in place to address the damage incurred in this flash flood, it is very likely that many will be forced to occupy their homes with potentially dangerous and/or unhealthy conditions present due to damaged electrical and mechanical systems and/or the presence of black mold or other contaminants on building materials not properly dried out and restored. Simply put, the long-term unmet needs of the flood survivors far outstrip the combined resources of the involved voluntary organizations, volunteers, and existing human service programs to remedy those needs. Clearly, federal disaster relief assistance is required to enable these flood survivors to fully recover from this devastating flood and allow them to make their dwellings safe and sanitary for re-occupancy.)

Without significant relief assistance from the federal government, these individuals will not have the resources necessary to fully repair and restore their damaged homes and mechanical systems, ensure their homes are free of mold and other health hazards, and replace damaged essential household items such as appliances, clothing, food, medications, and furniture and bedding. Without federal relief assistance, it is an almost certainty that many individuals will continue to struggle to recover and be forced to live in unhealthy conditions due to mold, contact with contaminated materials, and substandard (and likely unsafe) mechanical systems that they could not afford to have properly repaired by licensed professionals.

Management of Emergency Volunteers. To date, hundreds of emergency volunteers have been mobilized through the collective efforts of the American Red Cross, Michigan Voluntary Organizations Active in Disasters, Michigan Community Service Commission, Michigan Department of Human Services, local and state emergency management offices, and community-based organizations, to assist in the recovery from this flood disaster. In fact, volunteers have been and continue to be the lifeblood of the flood recovery effort. The aforementioned agencies and organizations have done a tremendous job in managing these volunteer resources and ensuring their timely and effective use. As I previously indicated, several Multi-Agency Resource Centers have been established and successfully operated in the affected counties to allow for the distribution of clean-up and personal comfort kits, and to facilitate the connection of those in need with the agencies and organizations that can provide recovery and relief information and/or assistance.

Central to the disaster volunteer management effort has been the establishment of a Recovery Coordination Center (RCC) to provide a means to coordinate the efforts of organizations that provide volunteer assistance to flood survivors needing help in repairing and restoring their home. The majority of the volunteers providing assistance are working under the framework of Michigan Voluntary Organizations Active in Disasters, and in coordination with state and local emergency management agencies, Michigan 2-1-1, the American Red Cross, the Michigan Department of Human Services, and other community-based organizations. The Recovery Coordination Center helps identify flood survivors requiring recovery assistance and determines the nature and scope of their recovery needs. The center provides ongoing case management for individual recovery and rebuilding/restoration efforts, ensuring that no one "falls through the cracks" and does not receive the assistance they need. Affected individuals are identified and referred to the Recovery Coordination Center by Michigan 2-1-1, local and state emergency management offices, Michigan Department of Human Services county offices,

the Michigan Community Service Commission, churches and other faith-based organizations, or by involved volunteers themselves. Once a flood victim is registered with the Recovery Coordination Center, their recovery needs are referred to the appropriate agency or volunteer organization for follow-up action. Through the center, voluntary organizations can also track their recovery efforts, thus ensuring an accurate accounting of the volunteer hours spent with each flood victim. Currently, over 4,000 homeowners have requested clean-up and restoration assistance through the Recovery Coordination Center. To date, over 250 homes have been completed using volunteers coordinated through the center.

However, as I indicated earlier, even with these outstanding volunteer efforts in place the collective capabilities of volunteers can only go so far in meeting the more difficult long-term recovery needs aimed at ensuring safe and sanitary conditions in flood-damaged homes. Because of the lack of adequate insurance (less than one in five households was adequately insured) to help pay for potentially-expensive repair and restoration activities required to make home structural elements and mechanical systems safe and functional, and to fully-remove the presence of black mold and other contaminants in flood-damaged building materials, it is essential that federal disaster relief assistance be provided. Absent this assistance, affected flood survivors will, in many cases, be forced to live in potentially-dangerous and/or unsanitary conditions because they do not have the financial resources necessary to fully restore their dwellings to pre-flood condition in a timely manner – or at all.

Debris Removal to Protect Public Health and Safety. Debris management was a critically important recovery issue in the days and weeks immediately following this flood disaster. Throughout the affected counties and communities, extensive and rapid debris operations were required to clear and remove flood-damaged building materials and personal property from curbsides and roadway rights-of-way in residential and commercial areas in order to protect public health and safety and enable the continuing use of adjacent roadways, sidewalks, and fire hydrants. The wet, heavy, contaminated flood debris from tens-of-thousands of flood-damaged homes and businesses, coupled with the hot and humid weather conditions that occurred in the days that immediately followed the flood disaster, set the stage for potentially-dangerous and unsanitary conditions in these densely-populated and heavily-developed urban areas. Because of the very real potential for a public health emergency, it was necessary for the affected local communities to muster all of the private and public debris clearance and removal resources they could to ensure rapid and environmentally-compliant removal and disposal of this debris.

In that regard, the affected local jurisdictions did an exemplary job in rapidly managing this difficult and potentially life-threatening recovery issue. With the assistance of various state agencies working out of the State Emergency Operations Center, the local jurisdictions were able to identify sufficient resources to address their debris removal and disposal needs in a rapid and environmentally-compliant manner. All of the affected local communities effectively worked with the Michigan Department of Environmental Quality to obtain required emergency waivers for temporary debris storage and transfer centers, and for emergency transportation of flood debris to approved landfill facilities. These debris removal efforts, however, came at a collective $7 million cost to the affected local jurisdictions in the three counties – a cost which

these jurisdictions are not in a position to bear without significant cuts to other essential programs and services.

Emergency Public Information. During the first hours and days after the flash flooding occurred, the affected local jurisdictions and several Michigan state agencies undertook a comprehensive emergency public information campaign to warn residents of the health and safety risks posed by the flooding and flood-related damage, and to provide updates on recovery issues and concerns. Of particular concern initially were the health and safety risks associated with structural damage, damaged electrical and mechanical systems, and contaminated flood debris. Later, the public information focus shifted to address longer-term recovery issues such as use of licensed and reputable contractors, price-gouging, scam avoidance, and home restoration best practices. This public information campaign continues today, in both English and appropriate non-English languages, and will so for the foreseeable future until all recovery-related issues and concerns have been effectively dealt with. All appropriate media sources have been utilized in this campaign, including television, radio, print media, and web and social media sites. Although there were two incident-related deaths in the early days after the flooding, since that time this campaign has been largely successful in minimizing flood-related injuries and health and safety problems.

The Michigan United Way 2-1-1 telephone referral system has been a tremendously successful means of disseminating important recovery-related information and making referrals to agencies and organizations that can provide recovery assistance. To date, Michigan 2-1-1 has fielded nearly 10,000 calls from individuals seeking flood recovery information and/or referrals. Michigan 2-1-1 has been instrumental in connecting individuals in need with the appropriate resources to enable them to recover from this flood disaster. Despite its success, Michigan 2-1-1 also had one potential downside, that is, the large number of "abandoned" calls from callers that chose to hang up rather than utilize the call-back option when lines were busy. Telephone logs show that over 3,100 calls were abandoned between mid-August and the first week of September. This is disturbing to me because there is no way to track with certainty whether or not these individuals actually did receive the information and/or assistance they were seeking when they initially called Michigan 2-1-1. My hope is that they did, but I suspect a portion of these callers simply gave up and did not further seek recovery information and/or assistance.

(I must note that my concerns in this regard are not necessarily limited to Michigan 2-1-1. Reports received from state and local staff that participated in the Preliminary Damage Assessment indicate that a potentially large number of affected individuals may not have sought assistance due to a number of reasons, including but not limited to: a general distrust of or frustration with government; language and/or cultural barriers; technology barriers, i.e., do not regularly monitor media reports, the internet, or social media; or a lack of understanding regarding available resources and the means for accessing those resources. If federal disaster relief assistance is granted based on this request, we may find many additional individuals that may seek to apply for federal assistance – over and above those estimates developed in the Preliminary Damage Assessment.)

State Response and Recovery Assistance Efforts. Michigan's state departments and agencies and nongovernmental partner organizations have provided whatever appropriate resources they had at their avail to assist the affected counties and local jurisdictions in responding to and recovering from this flood disaster. Although the following is by no means an all-inclusive accounting of all response and recovery efforts, it does provide brief synopses of some of the more noteworthy efforts:

The **Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD)** began to monitor the incident in the early evening of August 11, after reports of flash flooding were first received from the affected local emergency management officials and the National Weather Service. Immediate communications were established with the local emergency management officials to assess the nature, scope, and magnitude of the incident and to help coordinate the provision of state resources as needed. This monitoring continued through the evening hours of August 11. When reports from the affected local jurisdictions and the Michigan Department of Transportation indicated that metropolitan Detroit interstate highways and major roadways had suffered major flooding, the MSP/EMHSD notified key staff to report to the State Emergency Operations Center (SEOC). The SEOC was in partial activation status for several hours, and then went to full activation status at 10:00 AM on August 12. Numerous departments, agencies, and nongovernmental partners responded and reported to the SEOC for duty.

The MSP/EMHSD coordinated SEOC operations at full activation status for the next 14 days, operating 24 hours a day, 7 days a week, on 12-hour shifts. On August 25, the overnight shift was terminated and the operational hours were changed to 8:00 AM till 8:00 PM. The SEOC remained on that schedule for two days, until August 27, when the hours were changed to 8:00 AM till 5:00 PM to more closely align with the Preliminary Damage Assessment operations ongoing in the three-county impact area. On September 8, the SEOC went to a weekly operational period.

Throughout the SEOC activation, the MSP/EMHSD staffed command, operations, logistics, planning, public information, mapping and technical support positions to keep the SEOC functioning at full capability and to fully support the state department/agency and nongovernmental partner representatives present in the facility. During this period, the MSP/EMHSD coordinated all resource requests received from the affected local jurisdictions, ensuring that each request was appropriately addressed in a timely manner. The MSP/EMHSD also coordinated the collection, compilation, review, analysis, synthesis, and reporting of damage and impact assessment information received from the affected jurisdictions and state departments/agencies. The MSP/EMHSD also conducted several briefings daily for local officials, state departments/agencies and nongovernmental partners, and other interested parties, to keep all stakeholders apprised of ongoing or planned activities and areas of concern. Daily incident management plans were developed by SEOC command staff to focus SEOC activities on planned incident management objectives and to ensure that state resources were being appropriately utilized to address the most pressing issues during the operational period. In addition, the MSP/EMHSD developed numerous daily written situation status reports and public information releases to keep SEOC staff, state government executive and legislative

leadership, local officials, our emergency management partners, and the public informed of ongoing issues, concerns, activities, and opportunities for coordination and/or involvement.

From August 25 to September 9, the MSP/EMHSD worked closely with Federal Emergency Management Agency officials to coordinate and conduct Preliminary Damage Assessments for both Individual Assistance and Public Assistance in the three-county impact area. The MSP/EMHSD was instrumental in the set-up of and conduct of the Preliminary Damage Assessment, handling all administrative and logistical aspects of the operation from the SEOC and an on-site coordination center established at the Double Tree Inn in Dearborn. Lastly, using the assessment information and findings from the Preliminary Damage Assessment, the MSP/EMHSD provided considerable technical assistance to me and my staff in the drafting of this request letter and in compiling the supporting information found in the various Attachments and Enclosures.

In addition to the MSP/EMHSD contributions, the **Michigan State Police (MSP)** also deployed considerable resources during the flood response to assist local officials in controlling access to flooded areas, conducting underwater search and rescue in flooded areas, and assisting with security and traffic control as required. Early in the response, the MSP Aviation Unit also flew aerial reconnaissance and assessment missions over the affected areas to search for additional stranded motorists on flooded highways, to aid local and state officials in determining the scope and magnitude of the flooding, and to take aerial photographs and video footage of flooded areas for damage and impact assessment purposes. (Some of those photographs appear in this letter at Attachment 3.) The MSP Special Operations Division also assisted at the SEOC, and the Michigan Intelligence Operations Center (MIOC) continuously monitored the flooding conditions and sent out situational awareness bulletins on the weather and flooding to all stakeholder partners through the duration of the response and recovery.

The **Michigan Department of Agriculture and Rural Development (MDARD)** made available flood clean-up (to include sewage) guidance to affected food establishments in the three-county impact area. This guidance was provided in English, Spanish, Arabic, and Mandarin languages. In addition, the MDARD and the U.S. Food and Drug Administration (FDA) Detroit District Office coordinated with various food industry associations in Michigan to assess the impact of the flooding on the food and agriculture sector and to determine appropriate follow-up measures necessary to protect public health. (Providing the clean-up guidance to food establishments was one of the necessary measures.) During this outreach process, the MDARD focused on food warehouses and retail establishments while the FDA focused on food processors and other regulated firms (e.g., drug, biologics, medical devices, etc.) within the local jurisdictions most heavily impacted by the flooding. (Those jurisdictions included but were not limited to: Warren, St. Clair Shores, and Clinton Township in Macomb County; Madison Heights, Ferndale, and Royal Oak in Oakland County; and Dearborn, Dearborn Heights, and Detroit in Wayne County.) In addition, the MDARD also reached out to the affected health departments (county and City of Detroit) who license and inspect restaurants, and with major grocery store chains and trade associations. MDARD personnel also inspected a number of gasoline stations in the affected area to determine if any had issues with flood water in their gasoline storage

tanks. (One did, but the issue was satisfactorily resolved by the state inspectors.)

The **Michigan Department of Community Health (MDCH)** coordinated with affected local health departments regarding the provision of disaster behavioral health resources; monitored and coordinated with local hospitals and the Region 2 Health Care Coalition regarding flood-related damage and the resultant impacts on hospital operations; and worked closely with the SEOC Public Information Officer to disseminate appropriate and timely health-related information to flood survivors.

The **Michigan Department of Environmental Quality (MDEQ)** coordinated extensively with local officials involved in debris management operations to ensure compliance with federal and state environmental laws and regulations; issued timely emergency approvals of sites designated for use as temporary debris storage and transfer sites; issued other emergency authorizations and waivers where appropriate; provided technical assistance to local officials and private debris management firms regarding issues pertaining to the collection, storage, transport, and disposal of flood-related debris; assisted in the identification of supplemental debris management resources for local officials in need of such resources; and monitored flood-related impacts on local drinking water treatment plants and operations in the affected area.

The **Michigan Department of Human Services (MDHS)** coordinated with involved voluntary relief organizations, community-based organizations, MDHS County Offices and the Michigan Community Service Commission, Michigan 2-1-1, and other human service providers to identify, assess, and attempt to meet the recovery needs of flood survivors. The MDHS undertook a number of activities during the response and recovery phases of this disaster to meet this broad mission, including but not limited to: coordinating with the American Red Cross, Michigan Voluntary Organizations Active in Disasters, and other voluntary relief organizations to establish and operate two temporary emergency shelters, 10 Multi-Agency Resource Centers, and a Recovery Coordination Center; coordinating the distribution of thousands of clean-up and personal comfort kits; coordinating with the SEOC Public Information Officer and other public information officials regarding the dissemination of appropriate and timely recovery information using all available means (e.g., Michigan 2-1-1, web and social media sites, television, radio, etc.); registering eligible flood survivors for the limited MDHS emergency relief assistance available; coordinating the receipt and use of donated goods for the recovery effort; resolving debris management issues for volunteers providing clean-up and/or repair assistance through the Recovery Coordination Center; assisting with volunteer recruitment through the Michigan Community Service Commission and other means; procuring needed supplies for volunteer repair/clean-up teams; and addressing recovery-related issues for various functional needs populations affected by the flooding.

The **Michigan Department of Licensing and Regulatory Affairs (MDLARA)** monitored incident-related energy disruptions and energy supply issues related to the storms and flooding; monitored the operations of regulated health care facilities affected by the flooding; provided (through the Michigan Occupational Safety and Health Administration – MIOSHA) worker safety information to emergency responders and workers, as appropriate; and provided (through the

Bureau of Construction Codes) information to citizens in the City of Highland Park and other communities on mandated building, mechanical, electrical and plumbing inspections.

The **Michigan Department of Technology, Management and Budget (MDTMB)** monitored the impacts of the flooding on state owned and operated facilities and state government operations in the three-county area; assisted in obtaining needed resources for emergency operations and/or flood recovery through standing vendor contracts and/or the state's emergency procurement process; identified and procured office space and coordinated information technology installation for needed emergency facilities; and assisted in transporting recovery supplies to Multi-Agency Resource Centers and other distribution facilities.

The **Michigan Department of Transportation (MDOT)**, assisted by local public works and law enforcement personnel and the Michigan State Police, managed the closure of several sections of interstate and state highways in and around metropolitan Detroit that were inundated by flood water. This included several sections interstate highways I-75, I-94, I-96, and I-696, and Michigan highways M-10 and M-39. The MDOT also monitored and reported on closures of local roads and bridges by local officials; reported on the scope and magnitude of road and bridge damage in the affected counties; coordinated with the Federal Highway Administration (FHWA) regarding implementation of its Emergency Relief Program; and participated in the Public Assistance Preliminary Damage Assessment for road and bridge damage.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 5, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- **EBL report through 1/5/2016**
  - ***20 families contacted***
  - **13 EBL investigations completed.**
  - **11 Water sampling completed.**
  - **6 EBL Reports Received.**
    - **4 homes with lead dust hazards**
    - **3 homes with lead in soil hazards**
    - **6 homes with lead-based paint hazards**
    - **2 homes with lead detected in tap water**
  - 6 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- HHS staff will accompany contractors on investigations to confirm compliance with protocols. Scheduled for 1/6/16.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- **CM report through 12/31/15:**
  - **# of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)**
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - **# CM started: 25 (0-5 year olds) and 2 (6-17 year olds)**
  - **# of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)**
  - **# billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)**
  - # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)
- **Families that have moved to other counties**
  - **Tuscola – contact made, local PH nurse advised the parent to get a follow-up venous test to confirm the elevated capillary test from October; around December 16, PCP at Hurley did a capillary instead of venous despite parent's request for a venous test. CM home visit scheduled for this week (parent was living with a relative, just moved into her own home this week).**
  - **Macomb – contact made, had not gone out yet as of 12/16; we are waiting for an update.**
  - **Oakland – waiting for a call back to give us updates.**

- **Livingston – contact made, parent accepted information over the phone, declined the home visit.**
- **Sanilac – waiting for a call back to give us updates.**

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **MDHHS IRB approved Dr. Hanna-Attisha's research project.**
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 12/31/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,415	3,585
Water Pitchers	720	235	485
Replacement Cartridges - Brita	9,000	1,475	7,525
Replacement Cartridges – PUR*	5,706	4	5,632
Replacement Cartridges - Zero	375	5	370

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly (Tues. 8:00 am) coordination call with DEQ/LARA/HHS.**
- **GCHD (Jim Henry) is working with Flint residential child care facility to further evaluate lead levels in tap water. All current residents are > 6 years of age and have had venous blood tests: the highest was 2.3 mg/dL, most were <0.5 mg/dL.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- **Provided final/updated versions of the final documents to Angela Minicuci for posting on the MDEQ website (MB)**
  - **Phosphate Fact Sheet**
  - **How to Clean your Aerator Fact Sheet**
  - **Hey Flint, It's Safe to Wash poster (update)**
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Pending: Filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)
- Pending: Lead and Nutrition fact sheet and Flint Parent Letter revisions.

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- **Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.**
- Reviewing copper drinking water action level.

WIC

- No updates.

Healthcare/Providers

- Medical Services Administration: Letter L 15-73, dated December 30, 2015, Blood Lead Guidelines to Address the City of Flint Residents' Potential Exposure to Lead, was sent to Practitioners, Clinics, Laboratories and Maternal Infant Health Program (MIHP) Providers in the City of Flint.

DEQ Information - Linda Dykema as Liaison

- **The DEQ laboratory will notify HHS (Linda Dykema) of water sampling results > 100 ppb to allow for immediate public health actions to interdict exposure to high lead levels in Flint drinking water. Notification will only be provided for results from the free water testing offered by the city, not the public schools where taps have been taken out of use.**
- **DEQ has completed water sampling at 10 Flint Public School facilities. 3 reports are completed and posted. 10 private schools and/or day care centers are on the waiting list. DEQ filmed sampling and will post the completed video on their web page as a demonstration of the intensity and completeness of the plumbing evaluation and water sampling efforts.**
- The DEQ reported lead water levels of 213 and 2,516 ppb in a residential Flint child care facility. DEQ contacted the facility on 12/30/15 and instructed them not to use those taps for drinking water consumption.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 11, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; *Deaths- 0*

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - **22 families contacted**
  - 14 EBL investigations completed.
  - 14 Water sampling completed.
  - 7 EBL Reports Received.
    - 6 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - **6 investigations scheduled.**
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- Families that have moved to other counties
  - GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)

- # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.**
- **Blood testing data through 12/8/2016 pulled from the warehouse: report pending.**
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- No updates.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- *Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.*
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 6, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - 20 families contacted
  - 13 EBL investigations completed.
  - 11 Water sampling completed.
  - 6 EBL Reports Received.
    - 4 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 6 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
  - 6 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- HHS staff will accompany contractors on investigations to confirm compliance with protocols. Scheduled for 1/6/16.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- Families that have moved to other counties
  - **GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.**
  - **GCHD have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.**
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- MDHHS IRB approved Dr. Hanna-Attisha's research project.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	*Distributed*	*Remaining*
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- GCHD (Jim Henry) is working with Flint residential child care facility to further evaluate lead levels in tap water. All current residents are > 6 years of age and have had venous blood tests: the highest was 2.3 mg/dL, most were <0.5 mg/dL.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- **The State Emergency Operations Center (SEOC) opened a Joint Information Center (JIC). Angela Minicuci is the primary HHS contact to the JIC. All public information documents related to the Flint water response must be routed for approval through the JIC.**
- Provided final/updated versions of the final documents to Angela Minicuci for posting on the MDEQ website (MB)
    - Phosphate Fact Sheet
    - How to Clean your Aerator Fact Sheet
    - Hey Flint, It's Safe to Wash poster (update)
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Pending: Filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)
- Pending: Lead and Nutrition fact sheet and Flint Parent Letter revisions.

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- **Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model**
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.
- Reviewing copper drinking water action level.

WIC

- No updates.

Healthcare/Providers

- Medical Services Administration: Letter L 15-73, dated December 30, 2015, Blood Lead Guidelines to Address the City of Flint Residents' Potential Exposure to Lead, was sent to Practitioners, Clinics, Laboratories and Maternal Infant Health Program (MIHP) Providers in the City of Flint.

DEQ Information - Linda Dykema as Liaison

- The DEQ laboratory will notify HHS (Linda Dykema) of water sampling results > 100 ppb to allow for immediate public health actions to interdict exposure to high lead levels in Flint drinking water. Notification will only be provided for results from the free water testing offered by the city, not the public schools where taps have been taken out of use.
- DEQ has completed water sampling at 10 Flint Public School facilities. 3 reports are completed and posted. 10 private schools and/or day care centers are on the waiting list. DEQ filmed sampling and will post the completed video on their web page as a demonstration of the intensity and completeness of the plumbing evaluation and water sampling efforts.
- The DEQ reported lead water levels of 213 and 2,516 ppb in a residential Flint child care facility. DEQ contacted the facility on 12/30/15 and instructed them not to use those taps for drinking water consumption.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 8, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****

PROCLAMATION

DECLARATION OF ~~DISASTER~~EMERGENCY

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state *presented by a disaster or emergency or threat thereof, and may issue executive* orders, proclamations, and directives having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of disaster if the Governor finds that a disaster has occurred or that the threat of a disaster exists; and

WHEREAS, ~~over the course of 2014~~on April 25th 2014 the City of Flint Michigan switched to the Flint River as a water source ~~and 2015, ,~~the deleterious effects of corrosive water struck the ~~City of Flint, Michigan's~~city's water infrastructure, causing significant leaeching of lead into the water~~, causing~~ which caused extensive damage to the water system and negative health impacts to the citizens; and

Formatted: Superscript

WHEREAS, *the area affected includes* the *entire* City of Flint, within the Ceounty of Genesee; and

WHEREAS, the damaged water infrastructure and leaechingunleashing of toxic lead into the city's water caused widespread ~~and severe~~ damage to public and private water infrastructure, elevated blood lead levels in humans and potentially pets, especially in the population of children and pregnant women, and causing an immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to switching back to Detroit Water and Sewerage on October 16th, declaring local states of emergency and a public health

emergency, activating the disaster response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the State of Michigan, pursuant to the Constitution of the State of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of disaster exists in the aforementioned county and municipality; and

FURTHER, the Emergency Management and Homeland Security Division of the Department of State Police shall coordinate and maximize all state efforts, and may call upon all state departments to utilize resources at their avail to assist in the disaster area pursuant to the Michigan Emergency Management Plan; and

FURTHER, termination of this disaster will occur at such time as the threats to public health, safety, and property caused by the disaster no longer exist and appropriate programs have been implemented to recover from the effects of this disaster, but in no case longer than February 3, 2016, unless extended as provided by Act No. 390.

Given under my hand and the
Great Seal of the State of Michigan this
6th day of January in the Year of Our
Lord, Two Thousand and Sixteen.

RICHARD D. SNYDER
GOVERNOR

BY THE GOVERNOR:

SECRETARY OF STATE

PROCLAMATION

DECLARATION OF DISASTER

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state presented by a disaster or emergency or threat thereof, and may issue executive orders, proclamations, and directives having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of disaster if the Governor finds that a disaster has occurred or that the threat of a disaster exists; and

WHEREAS, over the course of 2014 and 2015, the deleterious effects of corrosive water struck the City of Flint, Michigan's water infrastructure, causing significant leeching of lead into the water, causing extensive damage and negative health impacts; and

WHEREAS, the area affected include the entire City of Flint, within the county of Genesee; and

WHEREAS, the damaged water infrastructure and unleashing of toxic lead into the city's water caused widespread and severe damage to public and private water infrastructure, elevated blood lead levels in humans and potentially pets, especially in the population of children and pregnant women, and causing an immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to declaring local states of emergency and a public health emergency, activating the disaster response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the State of Michigan, pursuant to the Constitution of the State of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of disaster exists in the aforementioned county and municipality; and

Subject: Declaration Request

Please review. I will stop by to discuss.

Following are our needs to be directed to FEMA in our request for a Presidential request for emergency declaration.

Water

- While we are currently keeping ahead, the long term outlook is far from certain in terms of what demand will be given the level of governmental distrust. We have transitioned from donated water to purchasing water, but are required to have a balanced budget by law. Over the long haul, the cost of water combined with costs of filters, filter cartridges, and water test kits is not known and will likely end up as a large cost in the end. Each truckload costs $5500.

Filters

- Until issues with the Flint water distribution system are fully addressed, we must continue to provide filters and replacement cartridges to the public. Filters average $25; cartridges average $20. This will be a large cost.

Water Test Kits

- Our short term goal is to test every household on the water distribution system. This demand will decline, but not stop. This will be a long term continuing cost. The cost of each test is $26.

Personnel

- While activity will eventually decline, it is not possible to gauge when this will occur. We cannot sustain long term operations without assistance. We should consider EMAC to address this need. I estimate this will cost $75,000 for 10 personnel for one month of operation. Personnel will assist with SEOC operations and with logistics of securing additional resources to defray costs through donations.
- There is a fundamental distrust of government in the city of Flint, especially where state government is involved. A major hurdle will be reestablishing public trust to a point where there is confidence in water quality. The USEPA and USHHS will need to engage both short and long term to convince residents tap water is safe to consume.

If a Presidential disaster declaration is requested, the following information must be submitted.

- The city of Flint has submitted an estimate for the entire water distribution system ($780 Million)
- We need to develop a plan for long term health assessment and treatment. I have requested a preliminary cost assessment from MDHHS.

Subject: RE: water

That's a fantastic idea - I should've thought of that, too! ;)

The first name that comes to mind is Ken Skalitzky. This should be a familiar name to you, but I'm not sure how closely worked with him. Ginna knows him well. He's a long-time former FEMA VAL from our busy states in Region 4 (Atlanta), and now the Director of Volunteer Florida - the state's lead for Volunteer Coordination. As an added bonus, between jobs he led the All Hands mission in Detroit for many months early on, and he's from Michigan so he knows the state well.
ken@volunteerflorida.org
- cell

If you want to keep it in-region and build relationships, Dennis Walter from MN HSEM would be your best bet. He's been a state "VAL" for a long time and is particularly good with state/VOAD coordination and information sharing.
Dennis.walter@state.mn.us
- cell

Michelle Hanneken in IL would be a great choice but she's busy here with flooding.

Some of the other go-to State VALs that I'm familiar with around the country have recently retired, are busy with activity in their states, or training over the next few weeks. If you are uncomfortable with either of the choices above for any reason, or they're not available, let me know and I'll reach out to our VAL cadre for suggestions.

Hi Tom,

Thanks for the info below - it's really helpful. A few additional thoughts come to mind. It may be possible for the Adventists to come in and take over warehouse management, tracking and inventory - this is their area of expertise. It would free up some of the Red Cross volunteers to help with distribution, and meet the needs you have at the state level.

I will be on the NVOAD Disaster Health Committee call and will put some feelers out to these partners. If you have a minute to peruse, attached is a draft of the resources available through these partner agencies. As always, they may be flexible and responsive to unique situations like Flint as well.

What I would suggest as your best option to bring visibility, coordination and resources into the area would be to talk to Ken about setting up a joint State/MI VOAD call which we can blast out to the State and National VOAD network. The fact that you have specific "asks" at the state level, and situational awareness that you can share is super helpful to the partners. Fully ground-truthed or not, any information is better than none, and you guys are in the best position to describe the situation and needs.

Let me know what you think. Jeannie & I would be happy to get the word out and invite partners on a call.

Thanks for this, Tom.

Katie is going to reach out to the Disaster Health Committee for NVOAD to see what's possible. As for long-term needs, I think you're right to think of All Hands, Mennonites, etc. Is Ken looped into all of this?

More soon!

Subject: RE: water

Tomorrow morning would be almost impossible. It's our planning day, and I'm the planning chief rather than the VAL, which we don't technically have at this point (me and Richard and Zach amongst our other duties).

I could probably make either Zach or Amanda Bresler available for a call. They've been working mostly on the resources and tracking, but we're getting very little good data from the field.

There are a few areas where I can see needs: the most pressing being acquisition and distribution of water. We have five fire stations and some secondary distribution points, plus city hall and the water department itself.

We also have limited people with any sort of logistical experience to help track inventory and report out when trigger points to order more water has been reached. There's currently one main distribution warehouse, and they are also short staffed, but that's where the Red Cross logistics team will report.

The care dogs might deploy, and there will be a lot of long term case management for health care and lead poisoning, but I don't know if the medical side of things would be practical at all for any voluntary organizations other than those that are long term parts of the community.

Also, there are faucet replacement programs and eventually replacing pipes in the homes, that will be interesting, but it might end up being something some of the groups like All Hands, Southern Baptists or Mennonites might be able to help with?

Hey Tom,

Let us do a little research. What kind of needs short and long-term are there that voluntary agencies might help with.

Any chance we could grab you for a phone call tomorrow morning? We want to get a better idea of what's going on out there so we can try to find you some help.

well, Michigan's at it again. Have you gotten any requests from Ginna, Richard, or Ken?
We're struggling with water supply. Red Cross is going to bring in a warehouse management team. They are also setting up a VRC. I think we're beginning to get water rolling in on a more continual basis, but I'm curious what might be out there for water, distribution, canvassing??

Also, do any VOAD members to MEDICAL case management?

Attachments: Disaster Health Committee Resource Guide Nov2015_FINAL.DOCX

Hi Tom,

Thanks for the info below - it's really helpful. A few additional thoughts come to mind. It may be possible for the Adventists to come in and take over warehouse management, tracking and inventory - this is their area of expertise. It would free up some of the Red Cross volunteers to help with distribution, and meet the needs you have at the state level.

I will be on the NVOAD Disaster Health Committee call and will put some feelers out to these partners. If you have a minute to peruse, attached is a draft of the resources available through these partner agencies. As always, they may be flexible and responsive to unique situations like Flint as well.

What I would suggest as your best option to bring visibility, coordination and resources into the area would be to talk to Ken about setting up a joint State/MI VOAD call which we can blast out to the State and National VOAD network. The fact that you have specific "asks" at the state level, and situational awareness that you can share is super helpful to the partners. Fully ground-truthed or not, any information is better than none, and you guys are in the best position to describe the situation and needs.

Let me know what you think. Jeannie & I would be happy to get the word out and invite partners on a call.

Thanks for this, Tom.

Katie is going to reach out to the Disaster Health Committee for NVOAD to see what's possible. As for long-term needs, I think you're right to think of All Hands, Mennonites, etc. Is Ken looped into all of this?

More soon!

Tom,

Thank you for the introduction to Casey. I hope you are well.

Casey,

It is a pleasure to meet you. We are indeed in need of volunteers to staff current and future projects. In fact, we are in need of 26 new volunteers for tomorrow's evening shift distributing at the five designated fire station sites to accommodate the increase of demand.

Our point of contact for volunteer interest is Victoria Fryer. Victoria will be able to answer your volunteer engagement questions.

Thank you for your interest. I hope to meet you soon.

Kind regards,

Justin Bays

Subject: ArcGIS Online Collector App

Hello Sir,

During the meetings we had on Friday with the local GIS staff we determined that ArcGIS Online is an ideal mechanism to share and exchange GIS data related to this incident. As such, we have begun configuring apps and data to be put into the City of Flint's ArcGIS Online web page (http://flint.maps.arcgis.com/home).

This is a cloud based service with many powerful features that all participating GIS specialists can manage through our desktop GIS software. The core functions of ArcGIS Online are:

- The ArcGIS Online website (seen above): Used to build and share apps
- ESRI Maps for Office: Directly links excel data to ArcGIS online to allow users to keep spreadsheets and publish them for sharing The ArcGIS
- Explorer App: Same as website for all major mobile devices
- The ArcGIS Collector App: Specialized app for field data collection
- The ArcGIS Operations Dashboard: Customizable interface to pull metrics from any data being entered into ArcGIS online

Tomorrow we will begin using the Collector App to survey the public and will be getting real time metrics through the site from the field. They are currently utilizing Flint's cache of mobile devices (30 Android Tablets), but to reiterate, any mobile device could be used in the future. We have already configured an operational dashboard for tracking which will be displayed in the SEOC. We can make a link to this site available to anyone else who needs it.

Right now all of the data is secured to the logins and cannot be viewed by the public. That said, it is very easy to setup apps in this tool and any and all the data within can be shared with the citizens of Flint with limited effort.

I imagine there will be some issues that arise during tomorrows usage of these tools, but I think we need to remain diligent about collecting clean digital data and avoid paper forms if at all possible.

As a last note, we have also submitted a request to ESRI (vendor for ArcGIS Online) for professional support. They often offer services for free during emergencies. I'll let you know what other tools they think they can bring to the table as they present them.

Tom,

Thank you for checking with me. We have three schools who are on Flint water. They are Powers Catholic High School (grades 9 - 12), St. John Vianney (Pre-school - 8th grade) and St. Pius X (Pre-school - 8th grade). At this time, we have secured enough bottled water for the time being.

In terms of a St. Vincent dePaul contact person, I do not have that information. However, I can certainly find out or provide the names of other service organizations that would be willing to help. Please let me know if you would like that information.

Of course our Genesee County Catholic Schools would be honored to assist in any work you may need assistance with.

Sean provided you with me work phone number. I am usually in buildings, so please feel free to contact me on my cell phone.

Sincerely,

Kasey V. Cronin
Executive Director,
Genesee County Catholic Schools

Good afternoon Sean,

I'm Father Mattson's soon to be former business manager at Res. But I'm currently with the Michigan State Police Emergency Management. Since Governor Snyder's proclamation of a State of Emergency on Tuesday, we're coordinating response and recovery activities. I wanted to check in with you and see if you've been getting all the support/communication you need from the Department of Education or otherwise on the needs the schools in Flint may have relative to emergency water and testing.

Please let me know if you need anything.

Sincerely,

Tom Weber
State Planning Unit Manager

Subject: NWS Webinar - Update
Attachments: 20160111_Winter_Weather_January_11_through_12_2016.pdf

Status from the 1:00 pm webinar with NWS from GR – Weather for next 24 – 36 hours (January 11th and 12th):

Conditions with this system will be very different from the last front that went through late last week. This storm will bring:

- VERY HAZARDOUS TRAVEL beginning Monday late afternoon/evening and continuing through the day on Tuesday.
- Monday evening and both Tuesday commutes are expected to be heavily impacted with rapidly changing road conditions and visibility.
- Light and fluffy snow, blowing snow and times of white out conditions are likely.
- Very cold air continues – time to frostbite of exposed skin is less than 30 minutes.
- North/South roads are expected to have the worst conditions due to blowing snow across treated roadways.
- Winds expected to be 15 to 25 mph with gust of around 30 mph.
- Worst of the conditions expected between 8 pm Monday through 4 pm on Tuesday.
- Many cancellations and closures are expected.
- Greatest snowfall amounts expected along the Lake Michigan shoreline where they could see in excess of 1 foot of snow.
- East of Battle Creek will see less snowfall with the Lansing and Flint areas looking at 2 to 4 inches; possibly more localized.
- Snow near the lakeshore could continue into Wednesday.

Our favorite meteorologist Jim finished up by emphasizing "Incredibly Hazardous Travel" is the biggest concern.

Slide deck is attached and likely will be uploaded into MI CIMS by NWS.

Next week, January 18 to 22:
Section Updates:
- 3 hours of Annual leave Tuesday, January 19, starting 2pm (Sobocinski)

Key Activities:
- Work to follow-up on Flint emergency declaration: draft declaration request draft text (Sobocinski, Baker)
- Evaluate, purge, sort, pack accumulated office materials, in prep for move (Sobocinski)
- Thursday am Allegan County RiskMap kickoff conference call (Sobocinski)
- As time allows, work on MI-CEMKR revised PowerPoint presentation (Sobocinski)
- As time allows, coordinate with Monroe County jurisdictions while working on plan revisions. (Sobocinski)
- Process letters from FEMA and local programs, as received. (Sobocinski)
- As time allows, expand presentation on climate change, for official review (Sobocinski)

External Meetings: (no items)

Subject: Rough Draft of GIS Update for Past Operational Period
Attachments: 20160108 Operational Period Synopsis for GIS.docx

Hey Tom,

Attached is a draft update from GIS indicating accomplishments from the previous operational period and planned action items for the upcoming operational period.

It includes notes from the visit.

There are a lot of key items that need to be discussed from the action items as they may require additional resources to bring to fruition.

The key note for us is making sure the work we do sets up the locals for long term success by synching it with existing local GIS resources.

I typed this up very quickly, so please let me know if you have any comments or questions. I tried to keep it brief for command, so let me know if you want more detail in any specific area.

> > >
> > > **EMHSD GIS Accomplishments:**

Accomplished Today (January 8):

- Produced Water Point of Distribution Map (POD).
- Produced Filter Point of Distribution Map (POD).
- Met with Genesee County Emergency Manager to discuss POD locations, and hours of operation. He will also be sending us data on new facilities serving as POD's with hours of operations.
- Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database. The GIS Leader visited Flint and will prepare a memo this evening explaining some of the difficulties discovered and some ideas for work arounds or solutions.
- Attempted to get data on the zip codes. It will be more effective to use parcel info to cross reference with zip codes.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines.
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):

- Finalize updated list on water filter distributions map.
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Volunteer and Donations Management:

- SEOC staff, Local EOC, and local organizations had a call with General Motors about possible donations.
- MCSC has been working on this event for a while through United Way and 211. They will begin providing situation reports and updates through MDHHS.

Please let me know if there's anything else you need. I will be in at 8am.

Captain,

Here is a summary of today's activities – in addition to the notes sent to you by Jackie Hampton/Operations Section Chief earlier:

Command and General Staff Accomplishments:

- Recovery Branch is working to develop an enhanced method for outreach to all individuals.
- DHHS is working to develop a method for distribution of water.
- Mr. Katarsky conducted briefing with local EOC and Chris DeVriendt.
- Mr. Weber conducted briefing with state agencies (daily updates).
- Held first legislative call today.
- *JIC continued to develop messaging and has implemented a co-located JIC in the City of Flint.*
- Deployed 3 EMHSD/SEOC liaisons to assist the local EOC.
- MCSC representative deployed to assist in the local EOC as well.
- Worked on developing incident objectives for the next operational period.
- FEMA Liaison Officers are on site at the SEOC and are assisting and providing technical expertise as needed.

EMHSD GIS Accomplishments:

Accomplished Today (January 8):

- Produced Water Point of Distribution Map (POD).
- Produced Filter Point of Distribution Map (POD).
- Met with Genesee County Emergency Manager to discuss POD locations, and hours of operation. He will also be sending us data on new facilities serving as POD's with hours of operations.
- Attempted to geocode list of properties that have received a water filtration system. Geocoding encountered a problem due to original database format. We continue to clean up the database. The GIS Leader visited Flint and will prepare a memo this evening explaining some of the difficulties discovered and some ideas for work arounds or solutions.
- Attempted to get data on the zip codes. It will be more effective to use parcel info to cross reference with zip codes.
- U of M contacted us to set up a meeting on how best to proceed with digitizing water lines.
- Received account from City of Flint for their ArcGIS online.

Tasks for Tomorrow (January 9):

- *Finalize updated list on water filter distributions map.*
- Update Water and Filter POD's with updated information from Genesee County Emergency Manager.
- Establish time to meet with U of M.
- Finalize water filter distributions map.
- Finalize plan for data distribution methods.

Subject: Oralya Return to Work

The following message is from Oralya, who will return to work on Monday. Please act in accordance with her request.

> Thank you. For your extreme generosity, and your kindness and sensitivity to my family during this time. I'll be returning to work on Monday January 11. So many of you have offered your help; though I don't know what you could do for me beyond what you've already done. Help is still a thing that is hard for me to ask for. I'm working on it. You've had my back during this time, and it means a lot to me. Coming back to work will be difficult. It is the milestone that marks the beginning of a new and broken life. I will need your help once again. To save us all from the discomfort of the babbling mess I become sometimes, I'd like you to know that it is very difficult for me to talk about what happened to my son. So many people want me to repeat the story. They want to know if I am "okay." I'm not okay, and will never be again. When they ask, all of the memories flood back in, and I turn to water. Some of these people may ask you what you know, or how I am. You may hear them say they want to talk to me, they want to help. If that happens, it would help if you could sort of steer them off into another direction rather than let them come up and question me at length. Many people now seem to look at me differently, as if I am shattered (which I am), and with great sympathy in their eyes. Those looks of extreme sympathy and tenderness, tell me I "need help," or that something continues to be terribly wrong – it makes it hard to move past the moment, and has the same watery effect. I know I sound like a big baby, and I am one. It would help me greatly if you would do your best just to be you. Tell me your terrible jokes, amaze me with your sarcasm, be the outstanding and complex people I know you to be. Encourage others to be themselves too. I am still me, working my way back to reclaiming more of myself as I walk through this. I would really appreciate your patience and your help with this for just a little longer. All of these people mean well; please know that – but like the quote on my son's wall says, "Stand up and walk. Keep moving forward. You've got two good legs, so get up and use them. You're strong enough to make your own path." I need to start doing that. I need to start walking toward a future in which I am at least functional. So please help me to steer clear of people who offer too much tenderness and concern, or those who want the story. Help me to steer back toward myself, as we try to keep the focus on Flint, climate change, Midwestern flooding, and how I can get my raise. I am still OG, just OG 2.1 in a world full of 10's – but I'll get there. I'll get somewhere anyway. Thank you all, for helping me to "Stand up."

Subject: Re: MCSC Support

Richard,

Great to hear from you.

I was asked early on to sit in on some of the community meetings. But without a declared disaster, we could not deploy any of the AmeriCorps assets. But with the declaration, we are able to offer some resources.

There will be an announcement today (Friday) that Flint United Way will be receiving a NCCC AmeriCorps team. (the information is embargoed until CNCS makes the announcement) I will forward you the Press Release and so you are aware. Jessi has forwarded it to Ron to keep him informed as well.

The NCCC team is to arrive Feb. 2 and will be here through April. United Way will be taking care of getting them their housing and provide their overall support and management. I have a call in the morning with Wendy Spencer, the CEO of the Corporation for National and Community Service and Harvey Hollins, from the Governor's Office to discuss the announcement of the team and determine if there are other resources to consider.

I am wondering who is overseeing the operations in Flint and what needs have been identified that volunteers could assist with meeting? We can make some resources available from AmeriCorps - but it is best to know what the needs are and then determine what options to use.

Once you have a clear understanding of the needs, we can determine if any of the following additional resources could be of assistance:

1. American Red Cross AmeriCorps members can be redeployed. There are currently 34 in the state, we are able to ask 17 at a time to be redeployed to Flint. They could be of help this month - if you identify there is a need.

2. American Red Cross Case Management. We have given an AmeriCorps grant to Red Cross in Detroit and they have had a tough time getting it set up because they do not have the match. This could be an opportunity for us to serve both Flint and Detroit. We could have 10 members in each community trained to work with residents and help them get the resources they need. For Flint - provide information, filters, blood level checks, other identified resources. For Detroit - provide the housing support services they need to recover from the flood. I would need to find about $100,00 in match money - but with the current concerns in Flint, there may be options to do this. The good news is Red Cross will manage the members - we just need to determine if there is a need. Chad could assist with helping to get this set up. If we stand this up - they would be full time members serving for a full year. This would be a more consistent option that could provide longer term benefits. This grant could be renewed up to three years.

3. Operation AmeriCorps - Flint received this new AC program and there may be an option to have some of the members assist if an identified need develops. They are serving in the schools and so we could think of a unique way to have them provide information and assistance to families in the school.

4. CNCS state office is determining what RSVP and Senior Corps members could do to assist with the effort.

5. Chad Veesar from MCSC is available to assist with managing the volunteer component and provide ideas regarding how AC members could be used in this situation. As you know, he has plenty of direct experience in Detroit that could be an asset.

If you could give us an indication of what you are seeing the needs are for volunteers, that would be helpful. It will give us a heads up as to how we can best offer our support. I do understand if you are still at the assessment stage.

Let me know if you would like to have a call to discuss options available and what roles everyone will take.

Subject: MCSC Support

Gentlemen, Ginna has asked me to reach out to you. In light of the recent declaration in Flint, I want to make sure you are aware that I am here to support any state/national service and volunteer efforts. I do have my experience from the Detroit flooding to bring to bear. I know Ginna has been involved with aspects of this thus far, and we are working to support the United Way of Genesee County and the City of Flint in any of their volunteer work, should they need it.

Some of what has occurred could be part of our discussion in next week's meeting (roles and options, what I can bring to the table, and what you would need to be accomplished). If you need to contact me by phone, my cell is: 248-250-0972.

Thank you,

Chad Veeser

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
4. Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.
5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. Allowable: public awareness through HDF grants

. The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

. We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

. MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I am receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Good afternoon, Pam.
I do not have anything additional to report on behalf of MTED. However, since we do not have access to the SIMs database, I cannot view tasks or assignments. We have been attending the 9:30a SEOC update calls.

Please advise if further information is required.

Recovery Branch:

Paul and Linda sat down and put together two things for me: one is a list of IDEAS of ways in which they and other voluntary organizations might be able to provide assistance going forward. *These are ideas, so any that seem needful* would need additional discussion/researching. The other is a list of local agencies in Genesee County that have been contributing so far. There is going to be a meeting next week of voluntary organizations for coordinating activities. The Genesee EOC is aware of this meeting.

Subject: damage assessment

Henrik,

Here are some items to consider for the Damage Assessment. I'm also copying Brianna and Joel. Brianna for her role as Recovery Branch Leader/Director and Joel as our very own damage assessment SME:

The form in MICIMS is geared really toward physical damages. This is not going to be adequate for this emergency as the impacts are so broad. We recommend not using the DA forms in MI CIMS.
A more informative way to look at this will be "impact assessment" as the impacts themselves are extensive and often not easily quantifiable.
As you said, you felt that the county has a good handle on infrastructure impacts. Here are some ideas on other impacts:

Look at EACH federal ESF which could be impacted and identify ways in which the county (Flint's water also serves three townships I understand) is impacted in each of those ESFs. Even such things as "lack of awareness" under external affairs, etc.

Pull in all the SMEs you need to conduct the impact survey: county health, county equalization; WIC; human services, education, water department; community and economic development, etc. You need all the local SMEs contributing.

Identify the life, health and safety impacts.
How many elevated blood lead level (EBL) cases are reported?
What is the at risk population in the affected area?
How many have been tested; how many have EBLs out of the at risk populations?
How many people are served by WIC or other human services programs in the impacted area?
How many water hookups are there by type? Residential, restaurants, industrial, businesses, hospitals (how many beds), schools (how many students?), non-profits, childcare/preschools, etc.
How many filters have been distributed? And how many households do not yet have them (as far as we know)?
Coordinate with GIS; they have been working on many of these questions and may be able to provide answers and/or contacts.

Measure magnitude/impact/footprint, not dollars (unless dollars are easily and readily identifiable).

Again, the MI CIMS board is not really set up for this, so create your own reports/spreadsheets. The Recovery Branch and Joel can help with suggestions if needed.

Do your best to discover unmet needs that may exist. They would fall in many categories: how many elderly or functional needs need filters/installation?

I know this is sort of a laundry list, but hopefully it helps. Joel, any thoughts/changes?

Again, get the SMEs involved, especially county health and human services. They'll have assessments of impacts.

Let me know if there's anything else we can help with at the moment.

V/R,
Tom

State launches information center for Flint following emergency declaration
MLive
By: Amanda Emery
1.6.16

FLINT, MI -- The state has launched its Joint Information Center to coordinate public information from the State of Emergency Operations Center.

The emergency operations center was activated after Governor Rick Snyder declared a state of emergency for Genesee County on Tuesday, Jan. 5.

The information center is set up to help with health and safety issues caused by lead in Flint's drinking water, according to a news release from the state of Michigan.

The emergency declaration makes available all state resources in cooperation with local response and recovery operations.

The Joint Information Center will serve as the state's central communications hub for the state of emergency, according to the release. It is staffed by public information officers from several state agencies. The hours of operations will be 9 a.m. until 5 p.m. Monday thru Friday, until further notice.

The center is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing, according to the release. State officials are working to move the center to Flint to better partner and coordinate with local agencies.

Public information and updates that include resources for residents, how to obtain free water filters, and lead testing will be made available at www.michigan.gov/FlintWater.

Toys for Tots campaign helps 551 children
Hillsdale Daily News
1.6.16

HILLSDALE — Due to the generosity of Hillsdale County residents, the annual Hillsdale County Toys for Tots campaign was once again a success.

Collection boxes were placed in 24 area businesses, and many organizations and individuals held toy drives to collect new, unwrapped toys for the campaign. Members of the community donated 2,434 toys which were distributed to 210 area families to assist in providing 551 children with gifts for Christmas.

Four families were surprised by troopers from the Michigan State Police, who delivered toys to their homes in Osseo, Hillsdale and Allen on Dec. 22. The Toys for Tots program also assisted the Salvation Army and Domestic Harmony with toys for their Christmas projects.

A press release from the Michigan State Police said, "A heartfelt thank you to each person who placed a collection box in their place of work or business, donated a toy, assisted in the toy drives, or volunteered with set up or distribution of the collected toys to families."

The Michigan State Police have coordinated the annual campaign in Hillsdale County for over 15 years with the assistance of the Jonesville Fire Department and volunteers from the Hillsdale Assembly of God Church.

Kalamazoo man arrested for soliciting a child online
FOX 17
BY: Bob Brenzing
1.7.16

ATTLE CREEK, Mich. – A Kalamazoo man was arrested this week for soliciting a child for immoral purposes.

David Weirick, 56, was charged in 10th District Court in Battle Creek according to the Michigan State Police Computer Crimes Unit. He was also charged with using a computer to commit child sexually abusive activity.

Weirick faces up to ten years in prison if convicted.

Investigators say that Weirick was arrested Tuesday when he allegedly showed up in Battle Creek for a pre-arranged sexual encounter with an undercover detective.

The MSP Computer Crimes Unit investigated the case with the Michigan Internet Crimes Against Children (ICAC) task force and the MSP Fifth District Fugitive Team.

Changes to car insurance under new Michigan law
Upper Michigans Source
By: Rachel Droze
1.6.16

MARQUETTE — Technology has changed the way we communicate, it's changed the way we do business and now it's changing the way we show law enforcement our proof of auto insurance.

If you get pulled over, you can just pull up your proof of insurance on your phone or tablet.

"This is another way that they can have this information, and that it can be easily accessed and it's our world, just our mobile world where we can get our the information easier," said Trooper Stacey Rasanen of the Michigan State Police, Negaunee Post.

The legislation was signed into law by Governor Rick Snyder back in October, and went into effect Tuesday.

Snyder said it's an attempt to modernize the government.

Several insurance agencies have already been offering mobile services.

"We have an app called Pocket Agent which is available to State Farm customers, and within that app for several years, we've had the ability to display, save, print your proof of insurance direct yourself," said State Farm Agent Rod Lizak.

This app does require data coverage to use though, which isn't available in many places around the U.P.

Law enforcement officers suggest saving images of your proof of insurance in places in your phone that don't require cell coverage to access them just in case you get pulled over somewhere that you don't have service.

"It's always good to either have a paper copy or again take a screen shot of that and save it into your gallery or save an email that you might have been sent so that you can show us that immediately on the roadway," said Trp. Rasanen.

Police will not be able to look at anything else on your phone, just the copy of insurance.

Drivers will have to email a copy of the proof of insurance so that the officer can verify it.

Gentlemen, Ginna has asked me to reach out to you. In light of the recent declaration in Flint, I want to make sure you are aware that I am here to support any state/national service and volunteer efforts. I do have my experience from the Detroit flooding to bring to bear. I know Ginna has been involved with aspects of this thus far, and we are working to support the United Way of Genesee County and the City of Flint in any of their volunteer work, should they need it.

Some of what has occurred could be part of our discussion in next week's meeting (roles and options, what I can bring to the table, and what you would need to be accomplished). If you need to contact me by phone, my cell is: 248-250-0972.

Thank you,

Subject: Daily Update Flint Water 2015-01-06
Attachments: ICS 201 Summary 2016-01-06.docx; 2015-10-01 City of Flint Water Contamination-Shortage SitRep 01 2016-01-06.pdf

Captain,

A summary of today's SEOC activities is provided here, and today's SitRep and the final draft of Objectives and Tactics are attached.

Command and General Staff Accomplishments:

- Set goals for SEOC activation and identified response/recovery emphasis
- Developed operating policy, procedures, and guidelines
- Held briefing for State Agency Emergency Management Coordinators, which included presentations from DEQ and DHHS subject matter experts
- Developed Incident objectives, strategy and tactics
- Identified SEOC and state agency staff positions
- Assigned work tasks for SEOC operation period from 0800 January 6, 2016 – 1700 January 8, 2016
- Reviewed planned actions, prepared final draft Incident Action Plan.

SEOC:

The State Emergency Operations Center will provide:

- Situational awareness
- Common operating picture/objectives
- Coordination with city/county
- Potential coordination with federal agencies
- Incident prioritization
- Coordination of life/health safety measures
- Provide resources
- Public Information Control

Agencies represented in the SEOC will need to:

- Determine what federal agencies are already involved
- Establish the ICS Planning Cycle/"Planning P"
- Identify potential water supplies
- Identify existing lead pipe replacement programs (DEQ)
- Determine where affected homes are located, filters were installed, areas that need filters, etc. (EMHSD GIS)
- Determine how filter distribution is handled, and if it can be handled more efficiently (EMHSD GIS)
- Determine which mechanisms are in place for nutrition supplementation

MDHHS – Elevated Blood Lead Levels

- Dr. Elizabeth Wells gave an in depth summary of lead poisoning and what has occurred in terms of health monitoring throughout the Flint crisis.

MDEQ – Water Testing Protocols

- Mr. George Krisztian of MDEQ gave an in depth summary of the testing protocols and summary results that as they have developed throughout the emerging crisis.

EMHSD GIS Accomplishments:

- Hosted a conference call to begin coordination with Flint City and Genesee County GIS departments and the SEOC
- Established a daily call in to synchronize GIS efforts in support of the Flint water crisis at 8:30 A.M.
- Began consolidating local data from local GIS practitioners into a consolidated database, to include:
    - Water Pipeline Locations
    - Filter Distribution Locations
    - November 25, 2015 Water Monitoring Results (Partial, some data remains to be digitized)
    - Affected School Locations
    - Predictive analysis of blood lead levels for affected area
    - Updated Parcels
    - Demographics
    - Block Groups
- Produced a map for the filter distribution locations
- Began contacting specialists who developed historic maps depicting the Flint Water Crisis to get data

V/R,
Tom

Subject: MTED
Importance: High

Good afternoon, Pam.
Per our conversation, I was in attendance at the SEOC from 11:03a to 3:45p. With the recent transition of these responsibilities at MTED, I have not been trained on/logged in to the SIMs system to date. Therefore, this message contains the report from Michigan Department of Talent and Economic Development (MTED), due by 4:30p:

MSHDA

1. Allowable: Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint.
2. Allowable: Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
3. Allowable: Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
4. Allowable: Pay for the replacing the city's municipal water line infrastructure associated with water lines *being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.*
5. Allowable: Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
6. Allowable: Purchase of water for low income households (50% AMI).
7. Allowable: Purchase of water filters for any low income households (50% AMI).
8. Allowable: public awareness through HDF grants

- The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).

- We are exploring CDBG grant funds or other assistance from HUD.

MSF/MEDC

- MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Please let me know if there is additional information required. I *am* receiving the SEOC emails/voicemails.
As a side note, Melanie Brown has been temporarily reassigned to DEQ during the Flint Water Crisis. Jeremy Hendges will be acting as PIO for TED (cc'd on this message).

Thank you for your assistance, Pam.

Attachments: Mike Sobocinski notes from SEOC briefing Jan 6.docx

My draft notes from this morning's 9am SEOC briefing are attached for consideration, correction, consolidation, and discussion.
Hard to catch everything, but between everyone involved we should be able to piece together and sort through a lot, and hopefully avoid any major errors.

PS: Please forward to whoever else is in the SEOC Planning section today (or the upcoming 2pm meeting). If appropriate, I can make printouts of this to provide/discuss at the meeting.

Subject: Coding for City of Flint Water Contamination incident

Good Afternoon:

For any **overtime hours** spent working in the SEOC with the City of Flint Water Contamination/Shortage event, please use the following coding:

Index 28900 with PCA 28670

Any **non-payroll** costs (travel, SEOC meals during activation, etc.) should be coded to:

Index 28900 with PCA 28671.

These codes are not yet active in DCDS but will be by the end of the week. Please let me know if you have any questions.

Thanks,
Penny

Subject: correction in draft

Importance: High

I wanted to mention that the April 2014 date I had placed into the draft text for Flint was just a guess (highlighted in yellow to be double-checked).
I later found a document from their water system which stated that it was actually May 2014 when the transition took place from the Detroit system to the use of Flint River water.

FYI –

Attached is some draft material I've put together so far. Only look at the front pages – this still contains long sections "inherited" from the sample document (2014) you had sent to me. The text in yellow is worth reviewing, for potential changes. The text in white might be pretty good, as it. The text in green is inherited from the 2014 flood disaster – merely a placeholder until it can be replaced with similar text for this current event.

I will continue to expand this with new/revised information tomorrow.

Sounds good.
I'm "pretty good" at putting together census-based descriptions. Have been doing it for at least 20 years...
Since Genesee County has declared an emergency now, do you know if the focus is still specifically and exclusively on the city of Flint? (Were there any adjacent areas that also shared the Flint water system, such as Flint Township?) That would be the first question I'd need answered.

Thanks,
Mike

Glad you asked! While the Governor has not yet made the decision, it is virtually certain we'll be going to the feds with some sort of request for assistance, even if it's not through FEMA. So I think it would be well for us to get started on the demographic component, and it makes as much sense to use our past formats for declaration request letters as anything. Here's a copy of the one used for the SE MI flooding in '14. We can meet on this tomorrow if you'd like. I figured you two could work on this together.

Nothing major this morning at the Monday meeting. The following points came up:

- Keep in mind your contributions to points within the Strategic Plan and report out on them when possible.
- The Flint County Commission met this morning and declared emergency. A request for the Governor to declare emergency was also made.
- The move is on track. Labels were passed out to everyone today. Boxes were also delivered.
- The Terrorism Tabletop was moved to January 22.
- Cap/we will be heavily involved in the response to assist Flint.

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

Bullet Points on Long Term Distribution Course of Action
Direct Delivery and PODs Approach

Scope

- Direct delivery of filters, cartridges, and pitchers to residences.
- DTMB will go through an RFP process to secure contractor for direct deliveries.
- Utilize PODs primarily for water distribution and recycling.
    - 1 POD per Ward = 9 total PODs
    - Fixed Location: Parking lot next to bus route and/or transportation route based on FEMA IS26 compliant checklist
    - Box truck with just in time commodities
    - Staffing would be provided all or in part by workforce development grants
    - 9 per POD for a total of 81 personnel
- Rapid Response Teams for Access and Functional Needs (AFN)
    - 1 Rapid Response Team per Ward = 9 total Rapid Response Teams
    - 1 Rapid Response Team = 1 Box Truck and 2 personnel
    - Staffing would be provided all or in part by workforce development grants
    - Approximately 3,000 AFN in affected area
- Designated officials will coordinate pickup for franchise customers.

Strengths

- Tracking and protection of personally identifiable information is the contractor's responsibility.
- Places tracking and accounting aspects in the hands of the contractor.
- Provides a convenient and citizen/survivor centric solution.
- This COA may be supplemented by faith and community based distribution centers at their discretion (account for undocumented workers).
- Allows a phased approach transition to community pods for water distribution.
- Scalable PODs operations based on the overall demand for water.
- Follows FEMA approved guidelines for operation of a POD.
- PODs are Ward based, giving local government more visibility of the operation.

Weaknesses

- Increases the cost of the response, at least initially.
- Burn rates and other data will not be readily available.
- May require an MOU for the PODs locations.
- Increased possibility for retail fraud.
- Initial setup time will be more extensive.

Other COA Weaknesses

- Faith based courses of action
    - Require excessive number of volunteers to sustain operations
    - Unmanageable number of distribution points
    - *Religious sensitivities*

Draft Flint Water Operations Plan
January 23, 2016

The emergency response to the Flint water crisis is an "all-in" mission and will involve several operations: Initial Distribution; a Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to the agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Time-bound).

Initial Distribution

- Canvassing teams included the sheriff, MSP, American Red Cross, National Guard, and volunteers.
- Stops were made at every residence. When residents were home, they were offered water, filters, filter cartridges, and test kits.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) were established and operated at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; these were initially ARC staffed and then by the National Guard.
- The 2-1-1 system was used to address all questions and serve as the primary Point of Contact (POC) for all special needs requests (hot shots).
- The Initial Distribution was completed the morning of January 21.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. On the weekend, this increased by an additional 30 Red Cross teams.
- Daily missions were to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Every household was identified as having been reached with resources, or with information left at the door with instructions for having resources delivered.
- Canvassing was based on geographic areas to assure they were covered where risks of lead contamination and vulnerable populations were known to be higher.
- Areas with lower percentages of positive contacts in the Initial Distribution received additional support for re-canvasing.
- The PODS staffed by the National Guard continued at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focused on distribution of water, filters, cartridges, and test kits.
- 2-1-1 addressed all questions and served as POC for all special needs requests (hot shots).
- The Surge was completed January 24; remaining hot shots will continue to be served by ARC or other volunteer teams (National Guard and MSP can also be recalled if additional resources are needed.

Volunteer Expansion

The Flint Community Water Crisis Response Meetings will provide critical guidance this plan. The input received and the plan are a cooperative "whole community" effort that will provide the opportunity for all involved parties to provide input to the process, including the residents, local charities and non-governmental organizations, the city, the county, and the state. An initial working group comprised of the Food Bank, Catholic Charities, American Red Cross, 2-1-1, United Way, and local and state emergency management staff will develop and implement these initial strategies for long-term distribution of filters and filter cartridges by the target date. As operations stabilize within this Volunteer Expansion, additional working groups will be formed to address specific missions.

- Goal – Transition to full coverage and streamlined processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to volunteer and community based distribution of water, filters, and cartridges.

- Work with the federal HHS Unified Coordination Group and the Flint Water Interagency Coordinating Committee to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the benefits of all available programs to insure that we have leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Independent surveys indicate that residents and customers trust water test results.

**Dates are to be negotiated and confirmed by all parties involved.

Media Advisory

January 28, 2016

PHOTO/VIDEO OPPORTUNITY TODAY

Community Coalition kicks off water bottle recycling program

Who: A coalition of public-private partners including the State of Michigan, City of Flint, Genesee County, Schupan Recycling, Republic Services, Young's Environmental Cleanup, Keep Genesee County Beautiful and UM-Flint

Speakers include:

- Matt Flechter, Recycling Market Development Specialist, State of Michigan
- Heather Griffin, Waste Services Coordinator, City of Flint
- Shane Kelley, Planner, Genesee County Metropolitan Planning Commission

What: Will host a media event to announce Flint's coordinated recycling program in place for empty water bottles and used water filter cartridges

When: Thursday, January 28, 2016
11:30 a.m.

Where: Fire Station #1
310 E. 5th St., Flint

- The press conference will take place behind the fire station near the water distribution station

Details: Public and private partners will detail the collaborative short- and long-term recycling efforts for water bottles and filter cartridges.

NEWS RELEASE

FOR IMMEDIATE RELEASE
January 27, 2016
Release #: 20

Efforts Continue to Provide Safe Water Resources in Flint

1,020 Homes Visited Today by Water Response Teams

Flint, Mich. – Water response teams comprised of 109 city, county and state personnel, American Red Cross and volunteers continued door-to-door delivery efforts today visiting 1,020 homes. These teams are canvassing the city providing free bottled water, filters, water replacement cartridges and water testing kits to Flint homes not yet identified as having a water filter.

As part of the distribution process, residents seeking water filters and replacement cartridges are asked to share their address. This data is being collected and mapped in real-time to assist with long-term recovery and help water response teams know where to focus their door-to-door efforts. It is important to note that no resident will be denied resources if an address is not provided, and a photo identification is not required.

Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 196,456 cases of water
- 95,417 water filters
- 30,255 water testing kits

In addition to water response teams, water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a recycling site)
3402 Western Rd.

MORE

Pastor Ellison, Harris, and Overton,

Below is a list of churches that have volunteered to be Church Distribution Hubs. I had direct contact with the pastors and their point of contacts. I have also conducted site assessments at their facilities.

It was conveyed to them that this initial plan was a collaborative effort, and may change with input from all parties involved.

It was discussed, and agreed that the HUB churches would network with the surrounding churches, and set up their own agreed upon distribution schedule. It was requested that the HUB church provide a list of churches that are obtaining their water from the HUB church. This list can be sent via email to Lt. Roach at Roachb@michigan.gov.

Hopefully this plan will further assist and augment our initiative of getting water to our residents more efficiently.

Request for Water

At this time the Church HUB point of contact is Lt. Roach 517-819-0841. The Church HUB will call and provide the quantity of water, and schedule the delivery time. This should be scheduled at least 24 hours in advance.

Deliveries

The deliveries will be conducted by a Mi DTMB driver, and truck. They have a pallet jack and the capability of moving pallets from their truck to a staging area. If the water needs to be transported to an upper or lower level, there needs to be people to assist off-loading.

Church Distributions

The Church Distribution HUB would be responsible to network with the surrounding churches, and set up a distribution schedule, along with amounts of water needed.

Pre-decisional not for further distribution

EM-3375-MI – FEMA VAL SitRep Input

Wednesday 1/27

- Met with Executive Director of Michigan Community Service Commission to discuss current volunteer & donations management efforts and discuss ideas for transition to voluntary agency distribution
- Provided update of current activities to National VOAD Member Services Manager and added Flint, MI to the agenda for a report-out on Thursday's National VOAD Bi-weekly Operations Call
- Participated in MI VOAD Call at 5pm. Partners discussed opportunities to engage more volunteers in various agency activities, and suggested preliminary workgroups for ongoing collaboration to include: Distribution, Health, Mental Health, Communication, Education, Command & Control. Areas of focus are subject to change based on input from partners.
- MI Department of Civil Rights provided list of partners they have read about who have contributed to relief efforts, or who have considerable inroads to segments of the community. VAL provided this list to ARC Community Partner liaison and Good360 to conduct outreach.
- Solidified partner call with NVOAD Donations Management Committee for Friday, 1/29 at 1pm

Tuesday 1/26

- Provided Good360 with list of nonprofits working in/supporting Flint for inclusion on their public page for corporate donor support. Good360 is currently working with Walmart to assist in the immediate and long-term product needs of the community partners. They will focus on working with community-based nonprofits to create product needs lists, and then work with corporate partners like Walmart, CVS and others to fulfill those needs. This morning Walmart sent out a press release directing the public to the Good360 page www.good360.org/flint.
- MI VOAD Call rescheduled for tomorrow 1/27/16
- Connected member of National VOAD Board of Directors with state logistics lead to discuss corporate donation offer of 27 truckloads of water
- Spoke with lead of NVOAD Donations Management Committee regarding National VOAD partner support for ongoing operations; working to set up conference call with state for Friday 1/29 to discuss draft transition plan to voluntary agency distribution
- Held conference call with LEOC, State VAL, State Human Svs, FEMA Ops to discuss LEOC outreach to local faith-based organizations and preliminary discussions/plans to-date
- Participated in call with State logistics, FEMA Ops and Target to discuss potential donation of water and/or warehouse space
- Held conference call with Stat VAL and Red Cross Community Partnerships liaison to discuss agenda for Thursday's Community Partners Water Crisis Response Meeting; Good360 will discuss their website and answer any questions from nonprofit partners

Monday 1/25

- Worked with GIS to map 2-1-1 call data from Jan 9-14; will update when additional reports from 2-1-1 are received
- Met with state VAL to finalize discussion points for tomorrow's Community Partner Water Crisis Response Meeting
- Offered state volunteer lead assistance to identify solutions for surging capacity of 2-1-1; 2-1-1 was overwhelmed with call volume today and reached out to the state for assistance
- Offered state assistance with identifying solutions for management of donations of water
- Briefed HQ VAL Phil Shaw who will report to the HHS SOC at 0700 tomorrow on current volunteer/donations activities
- Connected ASPCA with MI Department of Agriculture

Tuesday 1/19

- Pushed state's press release on Volunteer & Donations to region, FEMA HQ VAL Group and NVOAD's social networking page on Yammer
- Developed list of potential questions from partners that FEMA/State may receive at Community Partner Water Crisis Response Meeting this Thursday, discussed with Ops Chief and State VAL to ensure we have necessary information to provide partners
- Connected NAACP with MI VOAD
- MI VOAD Conference Call 3-4pm
- Provided MI VOAD with FEMA PIN for future calls due to technical issues on this afternoon's call

Monday 1/18

- Outreach to CNCS regarding United Way direct request for AmeriCorps NCCC team – one team of 9 will be assigned to United Way 2/2 – 4/23 (not under mission assignment)
- Contacted MI VOAD Chair, Executive Director of 2-1-1, ARC leadership in MI to obtain situational awareness and inform partners of presence on the ground
- Pushed messaging for upcoming MI VOAD Call and call for volunteers to assist with canvassing to regional distribution lists, FEMA HQ VAL Group, and National VOAD's social networking page on Yammer (VOADNet)
    - HQ VAL Group pushed out to NASEDOVOC (National Association of State Emergency Donations and Volunteer Coordinators)
- Coordinated w/ State Human Services desk at SEOC to ensure 2-1-1 requests from daily reports were being filled

Sunday 1/17

- Held initial meetings with State VAL, Human Services Lead, and ARC at SEOC to determine current priorities and support needed
- Connected with MI Community Service Commission regarding volunteer & donations management
- Supported COA development

Pre-decisional not for further distribution

- Held conference call with Stat VAL and Red Cross Community Partnerships liaison to discuss agenda for Thursday's Community Partners Water Crisis Response Meeting; Good360 will discuss their website and answer any questions from nonprofit partners

Monday 1/25

- Held conf call with 2-1-1 Executive Director in coordination with State VAL and State Human Svs Lead to discuss implementation of new water resource delivery form, surge capacity during high volume call times, and action items from daily reports
- Solidified dates for VAL transition. Regional VAL Jeannie Moran to arrive Wed, 1/27. I will demob 1/1.
- Provided GIS with 2-1-1 data to update map for week of 1/15 – 1/22

Sunday 1/24

- Distributed GIS map and spreadsheet of all Places of Worship in Flint to state and ARC Community Partner liaison for planning and outreach purposes
- Contacted Team Rubicon (TR) Incident Commander to discuss current operation. 6 person TR team arrived yesterday; supporting Hot Shot mission; anticipated duration of operation is 15 days.

- Pushed state's press release on Volunteer & Donations to region, FEMA HQ VAL Group and NVOAD's social networking page on Yammer
- Developed list of potential questions from partners that FEMA/State may receive at Community Partner Water Crisis Response Meeting this Thursday, discussed with Ops Chief and State VAL to ensure we have necessary information to provide partners

Sunday 1/17

- Held initial meetings with State VAL, Human Services Lead, and ARC at SEOC to determine current priorities and support needed
- Connected with MI Community Service Commission regarding volunteer & donations management
- Supported COA development

This is the daily 2-1-1 summary on the Flint Water Response for Friday, January 22, 2016

GENERAL INFORMATION:

- Based on State of Michigan references to "Call 211" in print and online media sources, many callers to the service think 2-1-1 is a state agency. This leads some to ask questions about potential bias in the information 2-1-1 is providing about the Flint water situation. The public understanding of 2-1-1 as an independent and impartial service is essential to maintaining our position as a trusted source of information with both the community at-large and state partners. **Michigan 2-1-1 would like to set up a call or meeting with the appropriate state representatives and some key stakeholders to standardize how the state publicizes the 2-1-1 service.**

- Central Michigan 2-1-1 has created a Drop Box folder for 2-1-1 agents taking Flint Water calls. It holds a four page master document that ensures updates and new information are immediately available to all 2-1-1 staff. It includes sections on Background Information (including President Obama's Emergency Declaration), Rumor Control, Health & Water Quality/Safety Concerns, the Taxonomy Terms 2-1-1 is using to provide referrals and track needs, a general Q&A section, and links to Printed Materials and online resources such www.helpforflint.com along with various flyers and statements on the response from State of Michigan.
    - If you have information or materials to include on the master document, please email them to jennifer.pollak@lifewayscmh.org, melissa.ladd-patnode@lifewayscmh.org, and tpage@uwmich.org.

CORRECTIONS AND CLARIFICATIONS

None today

CALL VOLUME:

Call volume continues to be higher than average, but is dropping from the Wednesday peak. Average wait time was down significantly to under 15 minutes during peak volume

- There was a brief period today when the queue for Flint water calls reached 20 callers. Central Michigan 2-1-1 contacted other regional 2-1-1 partners for assistance and was able to reduce the queue and wait time for Flint caller back down to approximately two minutes.

SPECIAL NEEDS/REQUESTS

- The lifting of the requirement to provide identification is making it easier for undocumented residents and residents without ID to access water resources. 2-1-1 working to verify whether the Hispanic Center will continue to provide access assistance for the residents.

- 2-1-1 continues to receive several calls a day from churches, nursing homes and business owners asking about filters for their establishments. They are being referred to the Chamber of Commerce to share the impact on their organizations.

RUMOR CONTROL

- No new rumors to report.

UNRESOLVED

- ☐ **From 1/15/16:** 2-1-1 is trying to identify a resource *to pick up* test kits from homebound/senior *residents who cannot drop off test kits at designated sites.*

EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

EXECUTIVE ORDER
No. 2016 – 1

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River; and

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16, 2016, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and

communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following seventeen (17) members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Three (3) additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three (3) representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor; and
- Three (3) subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the

Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 11th day of January, in the year of our Lord, Two Thousand Sixteen

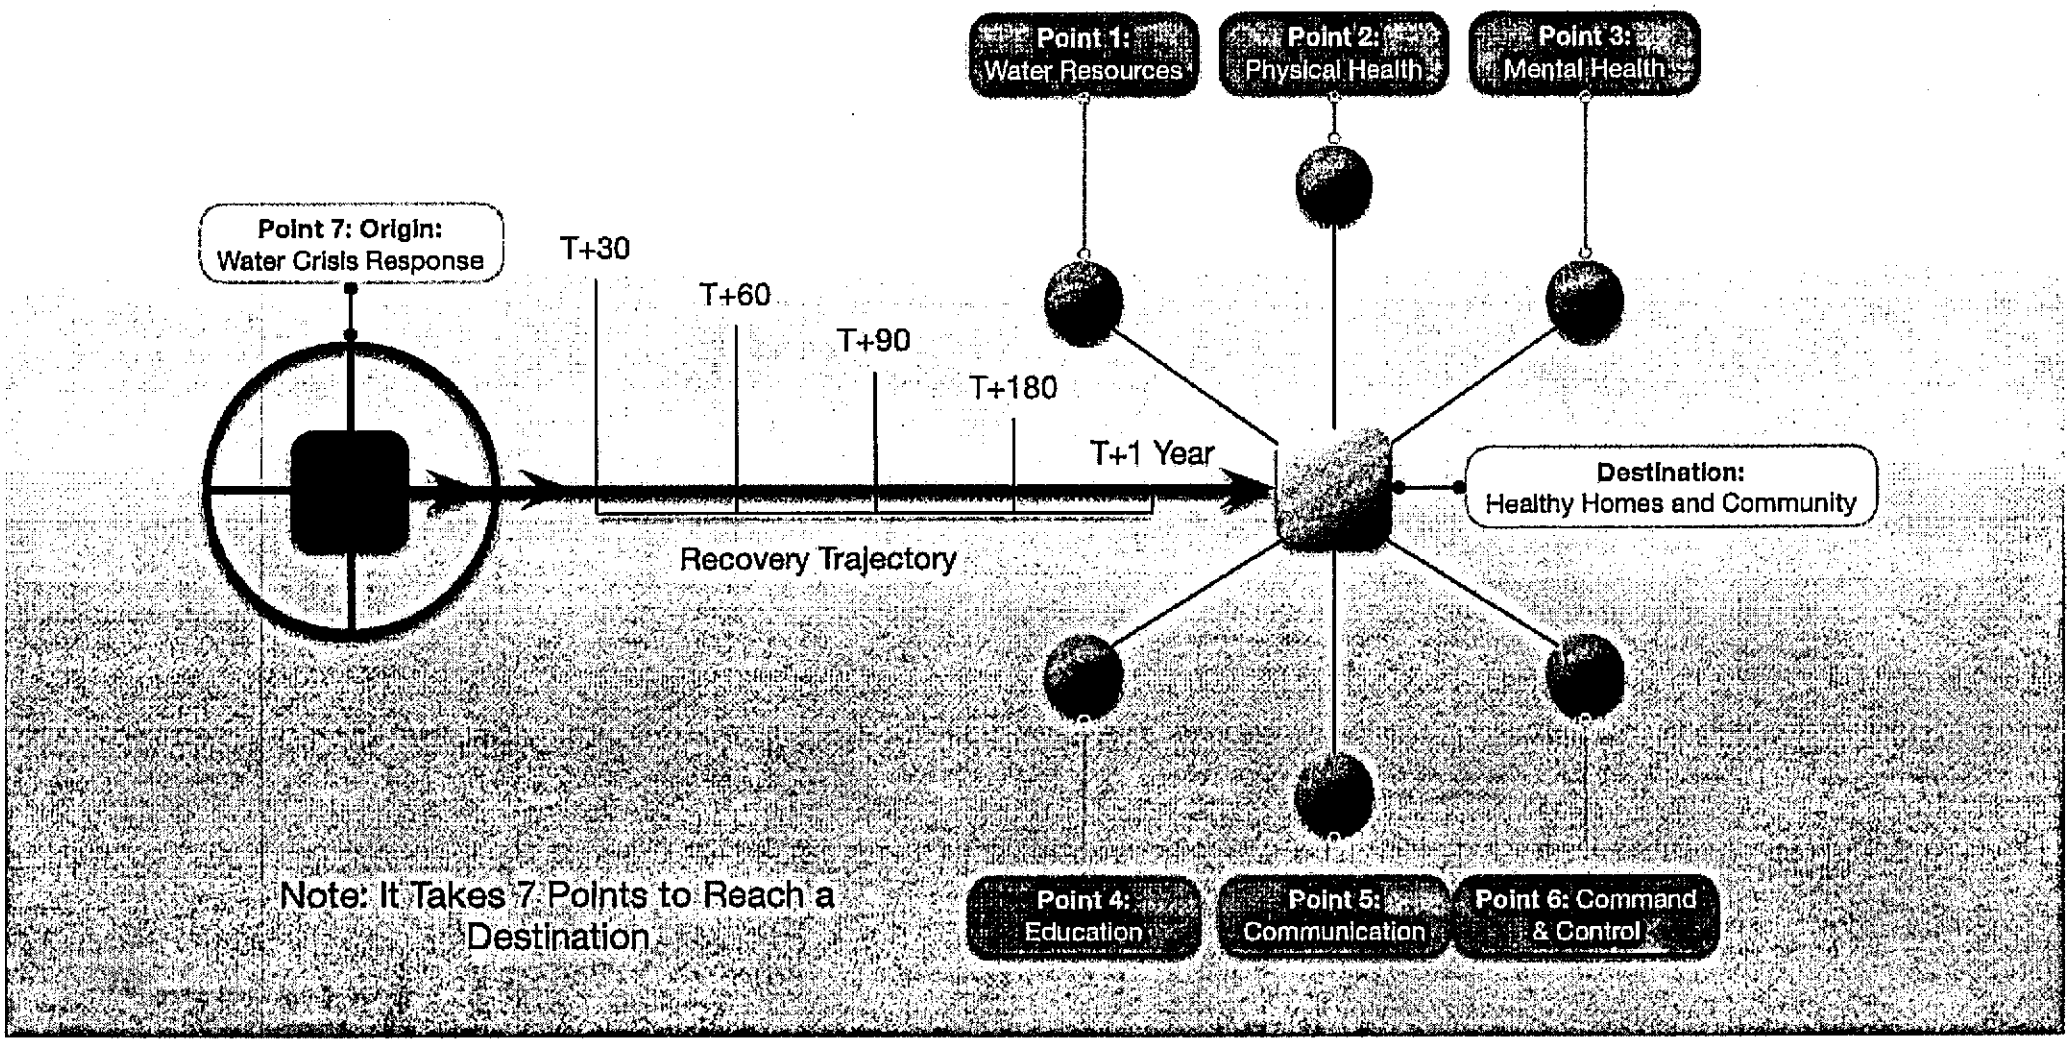
FLINT MI WATER CRISIS

RECOVERY MODEL

RECOVERY – RESILIENCE – RETURN TO HEALTHY HOMES AND A HEALTHY COMMUNITY

DESTINATION RECOVERY



RECOVERY DESTINATION DEFINITION

HEATHY HOME?

- FILTERED WATER
  - FILTERS CHANGED AT KNOWN INTERVALS BASED ON CURRENT LEAD LEVELS
- SAFE AND REGULAR SUPPLY OF DRINKING WATER
- SAFE AND REGULAR SUPPLY OF WATER FOR:
  - COOKING
  - HYGIENE
  - LAUNDRY
- PERSONAL EDUCATION
- INDIVIDUAL AND FAMILY PHYSICAL HEALTH RECOVERY
- INDIVIDUAL AND FAMILY MENTAL HEALTH RECOVERY

HEALTHY COMMUNITY?

- SAFE WATER
- REPAIRED INFRASTRUCTURE
- EDUCATED COMMUNITY
- SELF-SUSTAINING HOUSEHOLDS
- COMMUNITY TRUST AND POSITIVE PERCEPTIONS
- SAFE ENVIRONMENT

POINTS OF RECOVERY

- **R** - WATER RESOURCES
  - MACRO DISTRIBUTION TO MICRO DISTRIBUTION
- **P** - PHYSICAL HEALTH
  - *MITIGATING AND REVERSING THE PHYSICAL HEALTH IMPLICATIONS OF PROLONGED LEAD EXPOSURE*
  - NUTRITION
- **M** - MENTAL HEALTH
  - MITIGATING AND REVERSING THE PSYCHOLOGICAL IMPACT OF WATER CRISIS
  - REESTABLISHING TRUST
- **E** - EDUCATION
  - INDIVIDUALS AND FAMILIES UNDERSTAND HOW TO RECOVER
  - INDIVIDUALS AND FAMILIES UNDERSTAND THE RECOVERY PROCESS
  - INDIVIDUALS AND FAMILIES UNDERSTAND HOW TO PROTECT THEMSELVES
- **C** - COMMUNICATION
  - RAPID AND TRUSTED COMMUNICATION NETWORKS
  - RELIABLE MESSAGING
- **CC** - RECOVERY COMMAND AND CONTROL
  - PROVIDING RESOURCES
  - RECOVERY PLAN EXECUTION AND MONITORING
  - DATA COLLECTION AND METRICS

Draft Flint Water Operations Plan
January 23, 2016

The State of Michigan's emergency response to the Flint water crisis will involve several operations: Initial Distribution; a distribution Surge, Volunteer Expansion (to increase the utilization of the volunteer force to distribute commodities over the longer term), Ongoing Resourcing, and Long Term Recovery.

Dates given in this draft plan are all subject to agreement of all parties.

Metrics are intended to be SMART: (Specific, Measurable, Achievable, Realistic, and Timely).

Initial Distribution - Complete

- Canvassing teams were initiated by the sheriff and fleshed out by MSP, American Red Cross, National Guard, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by National Guard.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Initial Distribution complete the morning of January 21 based on feedback from local EOC.

Surge – Complete January 24

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. Daily missions were intended to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Goal – Reach every residence with water, filters, filter cartridges, and test kits.
  - Metric 1 – Every household will be identified as having either been reached and resources distributed or information left at the door as to how to have resources delivered.
- Canvassing was based on geographic areas to provide manageable areas for each team and to assure that areas where risks of lead contamination and vulnerable populations are known to be more likely receive more coverage. Also, areas with lower percentages of positive contacts the Initial Distribution received additional support for re-canvasing.
- Points of Distribution (PODS) staffed by National Guard continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- Messaging focuses on distribution of water, filters, cartridges, and test kits noting Fire Station PODS
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
  - Metric - _ reduction
- Surge completion is planned for COB January 24; remaining hot shots will be addressed by ARC or other volunteer teams.

Volunteer Expansion

- The Flint Community Water Crisis Response Meetings provide one important aspect to this plan and the input received and
- The plan is a cooperative "whole community" effort that provides opportunities for all involved parties to provide input to the process, including the residents, city, county, state and non governmental organizations.
-
- Goal – Move from manual distribution mechanism to less labor intensive processes.
  - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.

- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (Suggested alternate: February 12).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- Logistical requirements of super PODs
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
    - Metric - _ reduction
- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by the target date.
- Transition/Soft Openings/Logistical requirements for Super PODs
- Volunteer Expansion complete by COB January 31 (or February 12).

Ongoing Resourcing

- Goal – Implement a short term filtration system off the Flint water system to support a long-term, workable process to sustain provision of potable water to residents.
    - Metric – X households and franchise customers have access to safe, clean drinking water from the Flint water system augmented by adequately filtered water at each faucet within the home.
    - Metric – Assume (or supporting statistic) 5 faucets per home.
    - Metric – Avg family size/avg consumption including cooking, hygiene plus consumption
    - Metric – Filter cartridges last x days/gallons
    - Metric – military ops, Peace Corps, US Aid/office of foreign disaster, Samaritans Purse for water consumption
    - Metric – X day supply of filters based on burn rate statistics.
- Identify warehouse space adequate for commodities for the planning period (initial assumption 1 year)
- Water distribution by the city or by faith-based or other volunteer groups.
- develop messaging for implementation of this phase and transition to next phase.
- Heavy messaging to promote the use of filtration.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (Suggested alternate: February 12).
- Strategy – Create a calendar of activities/distribution including the when and where of how the activities and missions will required, including decision points.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.
    - Is it supportable by FEMA's 90 day mission?
    - What are implications of over supply?

Long Term Recovery

- Goal –water distribution operations are normalized.
    - Metric 1 – Households are served by the Flint water system.
    - Metric 2 – Households do not require filtration at the faucet.
    - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Work with the federal HHS Unified Command Group and the Governor's Flint Water Recovery Task Force to maximize opportunities for Flint water system customer to participate in the ongoing repair and improvements to the water system and maximize the impacts of all available programs to insure that we've leveraged all state, local, federal, and non-governmental resources.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.

- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
  - Metric 1 – Third-party surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

Draft Flint Water Operations Plan

January 22, 2016

The State of Michigan's emergency response to the Flint water crisis will involve several phases: Initial Mass Distribution; a distribution Surge, Volunteer Expansion (an increase in the utilization of the volunteer force to distribute commodities over the longer term, Ongoing Resourcing, and Long Term Recovery.

Initial Distribution – Add completion date?

- Canvassing teams were initiated by the sheriff and fleshed out by MSP, American Red Cross, National Guard, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing was based on geographic areas to make the distribution as efficient as possible.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by National Guard.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Initial Distribution complete the morning of January 21 based on feedback from local EOC.

Surge

- A resource surge, including 38 National Guard and American Red Cross canvassing teams began January 21. Daily missions were intended to reach as many households as possible who may not have been reached in the initial distribution. The surge included water, filters, filter cartridges and test kits.
- Goal – Reach every residence with water, filters, filter cartridges, and test kits.
    - Metric 1 – Every household will be identified as having either been reached and resources distributed or information left at the door as to how to have resources delivered.
- Canvassing was based on geographic areas to provide manageable areas for each team and to assure that areas where risks of lead contamination or vulnerable populations were known to be more likely were adequately covered. Also, where distribution in the Initial Distribution phase needed additional support were identified and re-canvassed.
- Points of Distribution (PODS) staffed by National Guard continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- 2-1-1 is addressing all questions and serving as Point of Contact for all special needs requests (hot shots).
- Surge completion is planned for COB January 24; remaining hot shots will be addressed by ARC or other volunteer teams.

Volunteer Expansion

- Goal – Move from manual distribution mechanism to less labor intensive processes.
    - Metric – One year of availability and supply of water and other commodities to every household and franchise customer.
- Develop messaging for the transition to a more volunteer/community based distribution of water, filters, cartridges, and test kits noting Fire Station PODS to be relocated to locally operated PODs by January 31 (*Suggested alternate: February 12*).
- Identify new water only PODs operated by local non-governmental agencies, faith-based organizations or other volunteer groups.
- With a working group of SEOC staff and local agencies, develop and implement best methodology for long-term distribution of filters and filter cartridges by *the target date.*
- Volunteer Expansion complete by COB January 31 (*or February 12*).

Draft Flint Water Operations Plan
January 22, 2016

Ongoing Resourcing

- Goal – Implement long-term, workable processes to sustain provision of potable water to residents.
    - Metric – Every household and franchise customer has access to adequately filtered water ~~at each faucet~~ within the home.
- Develop messaging for implementation of this phase and transition to next phase.
- Water distribution by the city or by faith-based or other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, Bridge style cards, or other measureable program.

Long Term Recovery

- Goal –water distribution operations are normalized.
    - Metric 1 – Households are served by the Flint water system.
    - Metric 2 – Households do not require filtration at the faucet.
    - Metric 3 – All water tests meet or exceed all established water quality metrics and regulations.
- Ongoing public messaging and education are offered free to the public by a variety of public message outlets, media, extension courses and community workshops and seminars.
- All recommended solutions are implemented. Analyses are complete, and public trust in Flint water is re-established.
    - Metric 1 – Surveys indicate that __% of residents and customers agree that the water tastes fresh and they trust test results.

**Dates are to be negotiated and confirmed by all parties involved.

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement
Manual

V1_January 13, 2016

Community Volunteer Resource Center Overview

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Community Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

Definitions of Volunteers

An event-based volunteer (formerly spontaneous or community volunteers) are those people who volunteer for a specific event or disaster and who have no previous affiliation with the Red Cross.

The CVRC (supported by all partner agencies) will handle the scheduling of volunteers for all efforts requested. There are four types of volunteers that will be scheduled:

1. Event-Based Volunteers for the American Red Cross – Volunteers that are registering to support American Red Cross Efforts
2. Event-Based Volunteers for Partner Agencies – Volunteers that are registering to support Partner Agencies

Roles of the Community Volunteer Reception Center

State Community VCR Liaison – The Michigan Community Service Coalition (MCSC) will work in this role to clarify and streamline volunteer project requests from the state and local Emergency Operations Centers (SEOC and EOC respectively) and connect those requests to the point of contact (POC) at the Community Volunteer Reception Center (VRC). This position would serve to facilitate communication between the EOC structures and the VRC and affiliated partners.

Community VCR Lead – Oversees the Community Reception Center operation. Ensures the efficiency of operation within the Community VRC. Brief and assign tasks to staff and volunteers of the center. Monitor the operation and make changes as necessary. Regular Communication with the Community Volunteer Reception Center Workforce Coordinator and State Community VCR Liaison.

Community VRC Workforce Coordinator – Serves as the Point of Contact for Partner Agencies and Stakeholders. Review all Volunteer Workforce Request Forms for accuracy, clarity, and completion. Follow up with Volunteer Workforce Request Forms with partners as needed. Submit approved volunteer workforce request forms to the Community VRC. Communicate to Partner Agencies and Stakeholders.

Reception Volunteer - The receptionist is responsible for being the first point of contact into the VRC and therefore sets the tone of the experience during the registration process. The receptionist is responsible for two primary things, initial direction and setting expectation.

Registration Volunteer - The Registration Station allows prospective EVBs register with the American Red Cross or for the Flint Water Crisis.

Interview Volunteer - The interviews allow for more information about the prospective EVB to be gathered, while assessing whether or not this prospective EVB would be interested in learning more about the volunteer opportunities available in the area.

Placement Volunteer – Ensures completion of registration packet, Place the new Event Based Volunteer for shifts when they are available. Will have their availability collected and possibly scheduled if available and matches..

Training Volunteer - The trainer will be responsible for having a brief orientation and training with the EVBs before they are sent into the field.

Data Entry Volunteer – Enters request for Volunteers and Volunteer Registration Forms into the computer. Maintains daily placement log and schedule.

Staff Wellness Volunteer – Reviews pre-health questionnaire to ensure EVB can complete the task. Must be a registered nurse.

Marketing/Communication Plan

The Community Partners and Stakeholders will create a plan together how to reach out through volunteers through the Internet and media. Information included is the current need for volunteers, with the knowledge, skills, and abilities needed, the Community VRC Location, Hours of operation, information on the VRC Process (such as background checks).

Facility Set-Up

The Community VRC facility should be setup with the following designated areas:

- Management
  - Space for the lead
- General information
  - Table or wall space for general disaster information, opportunities, and information on participating information
- Registration
  - Space with tables, chairs, and computers for potential volunteers to complete applications.
- Interview
  - Space for interviewing prospective volunteers prior to placement
- Training
  - Two or more spaces for orientation and other disaster training
- Placement
  - Space for workers to track open positions and place volunteers into those position

- Canteen
    - Space for snacks and staff breaks
- Staff Wellness (SW)
    - Space with privacy for volunteers to meet with SW

Ensure that there is signage up for each station as well as at the entrance and parking.

Receiving Requests

The VRC will receive request the following way:

1. All partner agencies are to complete the Volunteer Workforce Request Form when there is an established need for the use of volunteers.
2. All Volunteer Workforce Requestors must understand the following items:
    a. The requestor of the volunteers must assume responsibility for the volunteer's safety and actions, as well as take responsibility for management and direction while on worksite
    b. 48 hour advance notification is required for all volunteer requests and reasonable expectations
3. All Volunteer Workforce Requests must include the following information:
    a. Date of Request
    b. Requestor's name and contact information
    c. Job Description
    d. Supervisor on site
    e. Location of site
    f. Date and time (broken into shifts as needed) Volunteers are Needed
    g. Number of volunteers
    h. Qualifications
    i. Is there transportation for the Volunteers? Where should they meet?
    j. Will lunch and/or snack be provided?
    k. Any additional notes
4. Once the form is completed and approved by the partner agency it is then submitted MCSC Liaison or CVRC Workforce Coordinator
5. The MCSC Liaison or Workforce Coordinator reviews the request to ensure that it is a reasonable request for volunteers
6. After approved, the MCSC Liaison will send the request to the VRC Lead.
7. The VRC Lead will review the request.
    a. If there are no questions, the VRC POC will send to the Supervisor of the VRC.
    b. If there are no questions, the VRC POC will contact the MCSC Liaison.
        i. The MCSC Liaison will answer any questions to the VRC POC.
        ii. If needed, the MCSC Liaison will go to the Partners/Stakeholders
8. Add the request to the list of opportunities available for Event-Based Volunteers.
9. The VRC will fill the staff request with Event-Based Volunteers to the best of their ability.
10. The MSCS Liaison and Workforce Coordinator will submit to the Partners/Stakeholders so that they are aware of the status of request.

Intake of Volunteers

The VRC will volunteers as follows:

1. Event-Based Volunteers for the American Red Cross
    a. They will check in with the Registration table
    b. Complete the paperwork
        i. Media Consent
        ii. Pre Member Health Registration
    c. EBV will apply online through a portal set up by the American Red Cross
        i. They will complete an online profile
        ii. Read and sign code of conduct and CIIPA
        iii. Initiate a background check
    d. Once the application is complete, a training volunteer will complete an in-person interview
    e. The placement volunteer will ensure completion of the Pre-Assignment Health Questionnaire, ensure completion of Background Check, placement of volunteers, and availability of volunteers.
    f. The training volunteer will ensure training and orientation of volunteer.
    g. The staff-wellness volunteer will review form (must be a Registered Nurse).
2. Event-Based Volunteers for Partner Agencies
    a. They will check in the Registration Table for the American Red Cross
    b. EBV will complete paperwork
        i. Application
        ii. CIIPA
        iii. Business Code
        iv. Media Consent
        v. Pre Member Health Registration
    c. Once the application is complete, a training volunteer will complete an in-person interview
    d. The placement volunteer will ensure completion of the Pre-Assignment Health Questionnaire, ensure completion of Background Check, placement of volunteers, and availability of volunteers.
    e. The training volunteer will ensure training and orientation of volunteer.
    f. The staff-wellness volunteer will review form (must be a Registered Nurse).

VRC Station Process

I. Reception Station
   a. The receptionist is responsible for being the first point of contact into the VRC and therefore sets the tone of the experience during the registration process. The receptionist is responsible for two primary things:
      i. Initial direction
         1. If registering with the American Red Cross, give the prospective event based volunteer (EBV) both the Health and Media Consent form.
         2. If choosing to go unregistered with the American Red Cross, give packet of forms.
            a. Once they are done with the packet, they then go to the interview station
      ii. Setting expectations
         1. There may be situations where when a prospective event based volunteer may not be able to volunteer immediately. In such cases, communicate with the EBV that they will complete an availability sheet and be contacted when an opportunity is available to volunteer.

II. Registration Station
   a. The Registration Station allows prospective EVBs to begin their Volunteer Connection account and makes them an official Red Cross volunteer.
   b. For efficiency, this role is to be staffed by a Volunteer Services AmeriCorps Member. This individual is responsible for two things:
      i. Resetting the computers to the Entry Point homepage, allowing for easy access when signing up.
      ii. Answering any questions about Volunteer Connection for the prospective EVB.

III. Interview Station
   a. The interviews allow for more information about the prospective EVB to be gathered, while assessing whether or not this prospective EVB would be interested in learning more about the volunteer opportunities at the Red Cross and getting involved in other areas.

IV. Placement Station
   a. The Placement Station is the most important station in the VRC because this is where the new Event Based Volunteer will have their availability collected and possibly scheduled.
   b. The Placement Station will serve under these functions:
      i. If volunteering with the ARC; Check the profile to ensure all steps have been completed in Volunteer Connection

ii. If not volunteering with ARC, run ICHAT background.
iii. When the EVB comes to the station, take the Health and Media Consent form as well as the interview and paperclip them together
    1. If the Health Consent has a yes checked, send to the Staff wellness.
        a. If they can volunteer for an opportunity available, they would proceed to the Placement Table.
iv. Go over the job opportunities that are available
v. Go over the DRO Assignment Sheet
vi. Complete the excel Assignment Sheet to log the schedules and shifts. This will be essential in calling volunteers back when assignments do open
vii. Add to the placement list
viii. At the end of the day, pull the excel sheet and see if there are any previous shifts that could be filled

V. Training Station
    a. The trainer will be responsible for having a brief orientation, training, and safety overview with the EVBs before they are sent into the field.

Call Back Process

If a volunteer is available for other opportunities complete the following process:

I. Call back the volunteer and schedule them.
    a. If scheduling, place on schedule and indicate that you called them back.
    b. Update any further availability that they might have.
    c. If leaving a message, please indicate what the need is and a number to call back
II. There is also the option to send an email to all volunteers with shifts as needed asking to email back if they can fill a schedule.

Volunteer Request Process Flow

Step 1:
The volunteer request form is filled out by the EOC/SEOC point of contact and emailed to the Workforce Coordinator.

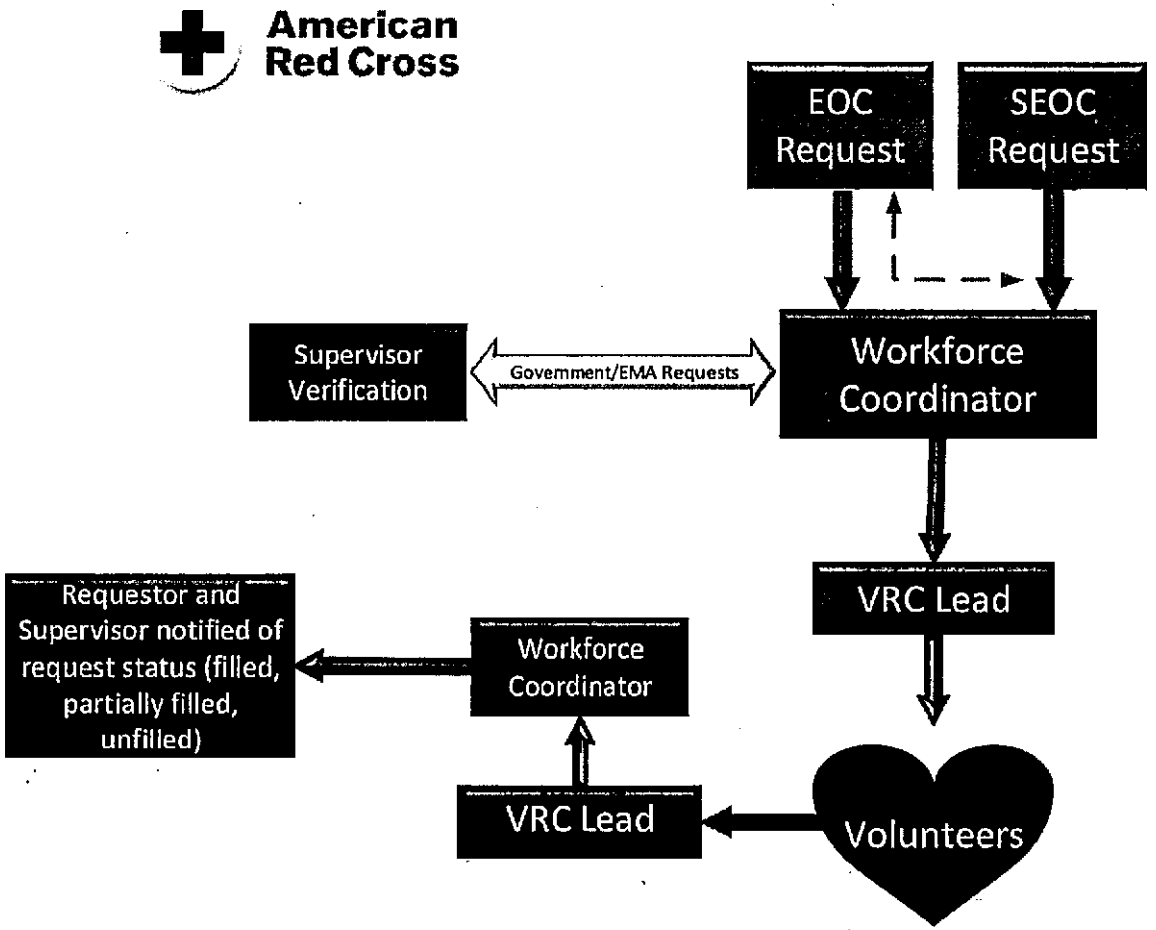
Step 2:
The Workforce Coordinator contacts the Job Assignment Supervisor listed, on the request form, to verify the information.

Step 3:
The request is then forwarded to the Volunteer Reception Center Lead.

Step 4:
The VRC Lead sends the filled request back to the Workforce Coordinator.

Step 5:
The Workforce Coordinator then notifies the Requestor and the Job Assignment Supervisor of the request status.

Step 6:
The Job Assignment Supervisor assumes responsibility for communicating any changes to the work assignment.



Voluntary Agency Coordination

- Ensure transparent communication between all levels of government and voluntary, faith-based and community organizations (Local, State & National)
- Provide technical assistance to support State and Local plans for volunteer & donations management
- Provide technical assistance to develop State and Local plans for long-term distribution of commodities and individual & household support through voluntary agency partners

FEMA

Voluntary Agency Coordination

- Voluntary Agencies are supporting:
  - Warehouse management
  - Volunteer Reception Center
  - Water Response Teams
  - Water test kit assembly
  - Volunteer feeding
  - Collection of in-kind and monetary donations
  - Public information & referral services

FEMA

Voluntary Agency Coordination

- Key Voluntary Agency Partners To-date:
  - Michigan Voluntary Organizations Active in Disaster (MI VOAD)
  - American Red Cross
  - United Way of Genesee County
  - Food Bank of Eastern Michigan
  - Michigan 2-1-1
  - Catholic Charities of Shiawassee and Genesee Counties
  - Local faith-based partners

Community Partners Water Response Meeting Minutes
1/21/2016

- Safe place to discuss, won't leave the room
- It will take whole community to serve long term and short term crisis
- Goal is to look to the future, cut off potential problems, or solve problems that don't even exist yet
- Today will frame future meetings

Chris DeVriendt

- Progress is being made
- By close of today, canvas of entire city complete
- Tomorrow, round two begins
- Adjusting strategies, identifying houses that didn't get reached, provide replacement filters
- 200 national guard on the ground filling various roles, looking to take on other roles
- Current NG deployment is 6 days as orders stand right now
    - NG looking at warehouses, door to door campaign
- Supplement with new programs
    - Team Rubicon, Sat and Sun, helping with vulnerable populations
    - MSP provides map that identifies vulnerable populations
    - If you know of other segments that are not getting service, let Chris know
- Currently no target, immediate relief
- Who is point of contact when someone is identified as vulnerable?
    - 211, sheriff
- Pipefitters union doing installs
- Lists are constantly being refined
- Question: is map of vulnerable pop based on self-identification?
    - Data comes from MSP
    - Individuals can call in directly identifying themselves, as are church groups
    - Not going to say no, everyone gets the same service
- Question: what's the long-term distribution plan?
    - Neighborhood Engagement Hub has been helping people currently

Tom Weber

- Planning on attending meetings weekly
- Mapping of vulnerable populations is coordinated through several agencies
    - MDHSS provides data
    - Office of Services to Aging provides data
    - People coming in through 211
- Here to support you
- Opportunity to coordinate with state activities
- Identify what we are doing individually and as a group
- When there is information to share with the state or needs that need to be met by state, Tom is the voice/go between for the state
- Many activities
    - Human services, DEQ, department of agriculture, department of education

FEMA Representatives

- Thank you for work being done
- Overview of emergency declaration, authorities provided, what FEMA support looks like
    - Jan 16 president signed emergency declaration
    - Authorities outlined
    - Authority is limited to commodity support
        - Water, filters, cartridges
    - Working closely with state to identify needs
    - Based on declaration, can continue for 90 days
    - In these meetings, plan to develop long term strategies for community needs
- HHS Led Group
    - Long term/infrastructure planning
    - Handouts: fact sheet on emergency declaration and HHS
    - Goal to make plan to distribute commodities in the longer term
    - Press release talks about US HHS
    - Dr. Laurie is designated official, coming in with federal agencies, setting up distinct operation
    - Emergency declaration focuses on commodity needs and possibilities, day to day needs of people

    - Housed in state emergency operating center (EOC), JIC (joint info center), local EOC, warehouse, points of distribution
    - Second team coming in to help HHS set up operations, support planning of federal partners
    - No involvement in canvasing/boots on the ground—local, county, and state resources covering this
    - Providing technical assistance
- Critical to future planning
- Have contact list for collaboration, resources, access to larger volunteer agencies and faith-based organizations

Lauren

- Disaster response expert, operations and logistics
- Supporting state with planning execution and logistics
- Disaster cycle
    - How different organizations come together around this
    - Details about current operation
    - Prepare, immediate response, long term recovery
    - Currently in immediate response phase
    - All disasters are local (community organizations and local government are the critical point for the disaster operations)
    - All other agencies come not to take over, but to support local organizations meeting needs
    - Mission is to put a filter in every home of impacted area
    - Four primary methods
        - Points of distribution (people coming to fire stations)
        - Water response teams (door to door delivery)
        - "Hotshot" (if someone calls or is homebound, targeted door knocking)
        - Partner distribution/local organization distribution (giving supplies to a local organization to do the distribution themselves)
    - Methods can be inconvenient for those being served, impacts day to day life
    - Need to shift to a method that integrates into regular day to day routines of residents, create convenient models for distribution
    - Every household is offered:

        - Door hanger with info
        - Bottled water
        - Filter
        - Filter replacement
        - Test kits
    - Sometimes we run out, but goal is to supply complete package
    - Geographically, entire city is covered
    - Not going to stop until it can be guaranteed that a filter has been offered to every home
    - Some homes currently have no filters/we don't have data to prove every home has a filter
    - Door to door will continue
    - Leverages every place they interact with everyday, so that distribution is not an extra burden
    - Impact area is everyone on the water system
        - Those affected outside of Flint city limits are being served as well
    - Question: are filters all one brand?
        - Currently three types:
            - Brita faucet filter
            - Pur faucet filter
            - Zero Water pitcher
        - Brita **pitchers** do not work
        - All stations, assuming that warehouses are full, have everything
        - Vendors only have certain capacity, FEMA is working on ensuring we have an adequate and consistent supply of variety
        - If we max out vendor's capability, we will look into alternative sources, seeking redundancy/more vendors
    - Defense Production Act
        - These filters will be sourced to support this effort
        - Overseas shipments are being re-routed to support this effort
    - Test kits
        - Special bottles, need to be received, tested, and verified to use
    - Governor's website is adding a link for vendors to submit information for review
    - Try not to direct people to EOC (they are inundated)

Plan for tomorrow through Sunday night (does **not** mean things end on Monday)

- Continue with current distribution model (four methods)
- Go back again to make resources available until we can say with assurance that we have offered filters to every house
- How is house defined?
    - Defined as household, regardless of structure (including apartments, etc.)
    - Red Cross, state trooper, sheriff, national guard, air force, EBVs, are all acting as water response teams
    - Regardless of team, all are offering the same stuff in the same way, tracking data in the same way
    - What about people who won't open door to government agency?
        - Red Cross & volunteer teams will address these areas, once information is available about what these locations are
        - Increase partner distribution (e.g. churches, schools, other normal touch points for individuals)
        - Need to work through logistical details
        - Health centers as a good potential distribution site
        - Need for this group's local knowledge to guide insights about refining methods/distribution points, to change to a better model to meet needs in a way that doesn't require door to door
        - Cautious about driving everyone to a new location
        - Messaging important
    - Other places where filters are available
        - Health department, WIC clinics, Dialysis, MTA, Comcast, and others providing smaller, targeted distributions
    - Who maintains list of distribution sites?
        - Anyone who wants to be a distribution center or donate supplies or volunteers—send to Chris
        - Three contact names & numbers:
    - Currently other sites possible for distributing water, since we are reaching the limits of current capacities
    - Ample supply of water from state—direct people who want to donate water to Flint Children fund, which at this point will be more helpful

- Unless people are sending by the truckload, try to redirect individual donations to online monetary donations
- Food Bank needs solutions for
  - How long are we using water?
  - How are we recycling water bottles? (recycling will be in effect very soon, there will be educational outreach)
  - No trust about filters, lots of misinformation about filters
- Flint school parents don't trust bathing in the water as well
  - To say anything with certainty about safety at this point impossible
  - Need more data from testing
  - 2800 samples already in Lansing
- Health department stance is that bathing is safe
  - This kind of lead not absorbed through skin
  - Concern for small children who might ingest bathwater
  - This is the messaging on the door hangers being distributed
- If someone is buying a filter on their own, they need to make sure it is rated properly—standard filter in a store may not work
- Disabled & seniors may not be able to carry supplies or leave homes
  - MTA provide transportation assistance?
  - Where is the best source for data about these vulnerable individuals?
  - For elderly: VAAA
  - Disability: Mike Zelley
- Map (handed out)
  - Squares indicate target area
  - Entire geographic area has been covered
  - Dots indicate water response teams that started Tuesday confirm a filter transaction, also indicate identified vulnerable populations (data from VAAA, Disability Network, and others)
  - Planning on doing comparison of the data sources we have
  - Contact visiting physicians, home caretakers, private entities for data?

- Community Volunteer Reception Center
  - Working exceptionally well
  - 211 directs EBVs to Red Cross building
  - VRC is managed by Red Cross Americorps and United Way staff

- Average time to be registered and assigned a job is 25 minutes maximum
- Thanks to gracious partnership with MTA, longest anyone has had to wait to be transported to job site is 10 minutes
- 4 MTA drivers in Red Cross lobby to transport volunteers out to job sites
- Cards are distributed to EBVs with number for pick up and drop off
- Thanks to MTA, volunteers can work at their own pace—excellent!
- Hours of operation of VRC change depending on need, depending on staffing requests coming from state and local EOC and community agencies
- VRC hours are currently 9-7 today and tomorrow, weekend hours TBD
- See handout: volunteer workforce request form
  - After it's ensured that form is accurate, it is given to VRC lead to be filled by incoming volunteers
  - Send form to single point of contact
- Increased media coverage has led to many prospective volunteers coming in
  - Facilitate more job opportunities for these incoming volunteers for the future
- Workflow of VRC provided in diagram
- So far we have been able to fulfill all the requests that have come in

Response Topics

- Spiritual/Emotional/Mental Health
  - Who is providing this right now?
  - Who needs to be involved?
- Helen
  - Parents in emotional distress about long term effects on children
  - 211 has no plan in place for dealing with these issues
  - For people in extreme distress, 211 uses their standard response, no specific response
  - 211 only as strong as the information that can be provided to them about community needs and resources
  - Part of responsibility of these meetings is to identify individuals/organizations that can respond to these issues

- Current provider network for mental health includes Catholic Charities, Family counseling, Genesee Health System
  - These providers are not necessarily prepared to deal with this specific question en masse
  - At this point probably not prepared to respond in an intentional way for the water crisis
  - Disaster teams communicate with largest players?
  - Catholic Charities discussing how to address specific issues/seeking resources
  - Chris: SAMSA has dedicated a hotline for people to call
  - At health department, recognize huge need for trauma care for children and adults
  - Current facilities do not have the long term capacity for the amount of trauma
  - Federal teams working with GHS to support these efforts
  - Well defined, narrow scope of federal funding currently—mental health is being addressed through alternate channels
  - Every agency at federal, state, and local level working on this issue, even if some things cannot be achieved solely within the parameters of the presidential declaration
  - Importance of carrying a consistent message
    - Balance between acknowledging the tragedy of the disaster and recognizing that a learning/cognitive disability is not a death sentence
    - Need for consistent, positive messaging
      - Funneled through JIC
    - Some players ignorant or not reporting correct facts
    - Leadership needs to step up to address misinformation, sensationalism, and quell fears
    - Leaders can come to EOC to see official press releases
    - Hard to prioritize PSAs currently with so much going on
    - JIC
      - Newsroom/media room where press releases are produced
      - Information from a variety professional sources
      - Produced in prose suitable for the public to digest
      - Emphasis on consistency

    - Agencies can turn to JIC to distribute information to larger audience
    - Information changes fast

Other Topics/Questions

- What to do with weekend donations of water?
    - Being directed to Red Cross
    - Red Cross accepting donations 7 days a week
    - Trying to make sure public doesn't think Red Cross is a distribution point
    - Seeking more neutral locations that can potentially serve as donation and/or distribution points
        - Where it can be moved easily, sit for a period of time
        - Diplomat a potential site?
        - Other businesses with space?
        - Current biggest space is the warehouse
            - Warehouse needs to process larger donations
- Where did flintwaterinfo.com come from?
    - Inaccurate information
    - Being addressed by United Way
- Average wait times for 211 calls?
    - 400-500 calls a day
    - Grand Rapids, Flint, and Detroit call centers on backup
    - State of the state address/national attention led to 800 calls a day going from a 2 minute wait to a 20 minute wait
    - With every public mass communication, number of calls spike
    - Communication is critical for management of that system
    - Regimented process for 211
    - Every single call is responded to
    - Customer service key
    - State looking into building out this system, building capacity to alleviate buildup
    - Health department working on a plan to bring in temporary staff just to man phone calls, but currently don't have ability to field so many calls and questions

    - All nonprofits actively engaged are having to build capacity enhancement
    - Be patient with people who are frustrated, understand that organization's current teams are under a lot of stress
- Who else should be at these meetings?
    - McLaren physicians group want to participate
    - Diana Kelly invited
    - VAAA invited
    - Family Service Agency (serve elderly) should be invited
        - Contact point
    - Michigan VOAD
    - If you think of other groups who should be at these meetings, invite them!

Next Steps

- In contact with state and national groups to address mental health issues
- Think big
    - Hope to secure enough supply of commodities on the ground to cover at least a year under presidential declaration
    - What is best ongoing, sustainable way to get commodities out to people long term?
        - Direct mail from vendors?
        - Vouchers?
    - Want to have least amount of impact/intrusion on people's everyday routines
    - FEMA wants to know thoughts and ideas from group at this meeting, since you know the community
    - Commodities only include water, filters, cartridges, test kits
    - Emergency declaration would have to be appealed by governor's office
        - Appeal for more FEMA aid currently being reviewed
- Future meetings: weekly on Thursdays 3 pm – 5 pm

1. Situation:

There are 45,000 active water meters in the impacted area
As of 2130 on 01.13.16 17, 276 households have received water filters
MAP

2. Mission Statement:

Ensure all households within the impacted area have the required resources

3. Execution
   a. Commander's Intent
      i. Distribute filters and additional resources to all impacted households within 5 days. The priority of effort is the Fixed Points of Distribution (PODs).
   b. Concept of Operations
      i. Distribution of resources will be conducted using 4 methods: Fixed PODs, Mobile Distribution Teams, Rapid Response Distributions, and Local Partner Distributions.
      ii. Tasks
         i. Fixed PODs
            1. Red Cross will staff all sites through ~~XXX~~1/14
            2. Red Cross will conduct transition brief with Michigan National Guard on ~~XXX~~1/15
            3. Michigan National Guard will assume staffing responsibility as of ~~XXX~~1/15
         ii. Mobile Distribution is being conducted via Water ~~Resource~~ Response Teams
            1. Recovery Branch Support will determine Water ~~Resource~~ Response Team composition, standards, resource requirements, and priority areas for distribution
            2. Michigan State Police will provide command and control (assemble, coordinate, monitor) of Water ~~Resource~~ Response Teams
         iii. Rapid Response Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. Local EOC Operations Logistics will execute Rapid Response Distributions
         iv. Local Partner Distributions
            1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
            2. XXX will execute partner requests for distribution support
   c. Coordinating Instructions
      i. Fixed PODs are located at 5 fire stations.
         i. POD Locations

Water Resource Site Fire Station 1	310 East Fifth, Flint, MI 48502	0900-2100
Water Resource Site Fire Station 3	1525 Martin Luther King Ave. Flint, MI 48503	0900-2100
Water Resource Site Fire Station 5	3402 Western Rd, Flint, MI	0900-2100
Water Resource Site Fire Station 6	716 West Pierson Rd, Flint, MI	0900-2100

	48505	
Water Resource Site Fire Station 8	202 East Atherton, Flint, MI 48507	0900-2100

2. POD Product Composition
    1. **NEED FROM SHAWN**

ii. Mobile Distribution is being conducted via Water ~~Resource~~ Response Teams
    1. **Assembly area**
    2. **Mission Ready Packets**

iii. Rapid Response Distributions
    1. **NEED PROCESS FROM MICHELLE**

iv. Local Partner Distributions
    1. **NEED PROCESS FROM MICHELLE**

d. Concept of Support
    i. Resourcing support for all distribution methods will be provided via a consolidated logistics pipeline. Replenishment will be conducted automatically and on demand. Reception, Staging, and Onward Integration (RSOI) of material resources will be managed via a warehouse system and RSOI of personnel resources will be managed via a Volunteer Reception Center and XXX (State Employees)
    ii. Tasks
        1. SEOC Logistics Section Chief is accountable for resourcing support for all distribution methods and maintaining end to end visibility of all resources requests
        2. SEOC Logistics Order Unit~~Support~~ Staff is accountable for maintaining the Pipeline Report to ensure accurate resource tracking
        3. Red Cross Warehouse Managers will provide warehouse management and are accountable to the SEOC Logistics Section Chief
        ~~3.~~4. SEOC Planning Resources Unit is responsible for tracking resources that are deployed.
        4. Red Cross will manage the Volunteer Reception Center in coordination w/ local EOC
        5. Local EOC Logistics will provide logistics support to the Rapid Response Distributions

    iii. Warehouse System
        1. Currently operating 3 locations with intent to consolidate to single, central location

Name	Location	Hours of Operation	POC
GCARD	2727 Lippincott, Flint , MI		Shawn
Clio	4315 North Clio Road, Flint, MI	Somehow mark this as the final warehouse were	John Foust

		everything will go???	
Court	3086 East Court Street		John Foust

iv. Volunteer Reception Center
   1. 1 location managed by American Red Cross
   2. The volunteer intake process takes 20-30 minutes.

Name	Location	Hours of Operation	POC
American Red Cross	1401 S Grand Traverse Flint, Mi 48503	0900-1900	

v. Resource Request and Tracking Process
   1. Pipeline Report
~~2. https://goo.gl/G31kyJhttps://docs.google.com/spreadsheets/d/1wXVQvQ2IJ6N_ORpo8bvtBIEQJrDxkyoPg_EjZRtNepg/edit?usp=sharing~~
   2. All resource requests and offers of support (people, product, facilities, vehicles, etc) will be entered into MI CIMS as a resource request to the SEOC Logistic Section Chief.
   3. The SEOC Logistic Section Chief will task it out to the State or Volunteer Agency that can fill that request or procure as necessary
   4. All resource requests and offers of support will be tracked and monitored via the Pipeline report (Google docs collaboration document)
   5. Warehouse inventories will be sent to the SEOC Logistic Section Chief daily at 1800 and incorporated into the Pipeline report
   6. Volunteer Workforce Request for Volunteer Reception Center
      1. REQUIRED INFORMATION:
         i. Who is the Point Of Contact?
         ii. Who is the supervisor?
         iii. Where do volunteers report?
         iv. What Dates are volunteers needed?
         v. What times are volunteers needed?
         vi. How many volunteers are needed?
         vii. Who is providing transportation for the volunteers?
         viii. Who is providing meals, snacks and beverages?
         ix. Are there any qualifications needed?
         x. IMPORTANT NOTE:
            - Brief job description is required
            - The requestor of the volunteers must understand they assume responsibility for the volunteer's safety and the volunteer's actions.
            - The requestor of the volunteers are responsible for managing and providing direction.
            - 48 hour advance notification required for request.
            - Reasonable expectations of the volunteer workforce

2. POD inventory will be provided to local EOC or SEOC Planning resource unit (this needs to be determined) hourly ← Formatted

3. POD distribution report provided to local EOC or SEOC Planning resource unit (this needs to be determined) at 1200 and 1800. (This is a list of equipment that has been taken off the trucks and put in the PODs).
4. Fixed PODs, SEOC Planning resource unit needs to know total staff from each agency for tracking at 1000 each day.
5. Mobile Distribution is being conducted via Water Response Teams, SEOC Planning resource unit needs to know total staff from each agency for tracking at 1000 each day.
6. Mobile Distribution is being conducted via Water Response Teams, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
7. Rapid Response Distributions, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
8. Local Partner Distributions, SEOC Planning resource unit needs to know amounts that have been distributed for tracking at 1800 each day.
9.

Formatted

Distribution Reporting

Job Description – VRC Director

Your job is to oversee the operation of the Volunteer Reception Center. You will:

- Clearly designate one entrance and one exit
- Set up the room for efficient flow of volunteers and information
- Ensure efficiency of operation
- Brief and assign tasks to staff and volunteers of the center
- Monitor the operation and make appropriate changes when necessary
- Maintain all records of safety and job training provided to volunteers, and hours worked in the VRC by employees and volunteers
- You should meet and thank all volunteers who help in the VRC and instruct them to sign in and out on the Volunteer Sign-in / Sign-out Record daily.

Preferred Qualifications:

- An undergraduate or graduate degree in nonprofit management or a similar field, or experience in marketing
- Excellent communication skills
- Patience
- Exceptional people skills
- Windows-based computer knowledge and experience
- Good organizational and delegating skills and/or experience
- Project management skills. He or she will be organized and detail-oriented
- Competence in written and oral communication, including group presentation experience
- Customer service experience
- One year of experience as volunteer coordinator and/or demonstrated leadership capability as a volunteer

Job Description – Greeters

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Ideally, you will be working with a partner, orienting volunteers inside and outside the volunteer entrance. **Your job is to greet people with a friendly and firm demeanor, determine the purpose of their visit and direct them accordingly.**

- **If they are there to volunteer, thank them, give them a "Volunteer Instructions" sheet and ask them to fill out a registration form. When the form is completed, direct them to the next available interviewer at Station #2.**
- If they are media personnel, direct them to the Public Information Officer.
- If they are disaster survivors, refer them to the appropriate organization.
- If they have food, clothing, etc., to donate, refer them to the appropriate agency, unless it is food for the volunteer reception center staff. (For safety reasons, most Emergency Management departments do no accept unsolicited donations of food for their staff – Something to consider!)

If there is a long wait, some volunteers may not understand the reason and may become impatient. **Please thank everyone for volunteering, briefly explain the process** and ask everyone to be patient or to come back later.

Items needed:

- ID badge
- Sign (Station #1 Registration)
- Table or clipboards and chairs for volunteers to use for filling out their forms
- Supply of "Volunteer Instructions" handouts
- Supply of Disaster Volunteer Registration Forms
- Pens
- Flag or hat to summon runners

Job Description – Interviewers

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Your job is to do a quick interview of the prospective volunteer and determine his or her appropriateness and ability for the tasks needed. If possible, refer him to a job at an agency appropriate to his abilities and interests. (In some circumstances, this referral will be done by the Agency Coordination staff.) Volunteer requests will be posted on a board in front of you (behind the volunteers being interviewed) and will be erased as they are filled. If the center has a computer system, you might also receive a printed list of the current needs.

When a new volunteer approaches, ask for his/her registration form. With the volunteer, verify its completeness and accuracy, and use it as a guide from which to inquire more about the volunteer's skills. At the conclusion of the interview, have him/her take their registration form to the Data Coordination station, along with a Volunteer Referral Form. You should initial the Volunteer Referral Form to indicate the Interview Process was completed. When the volunteer accepts an assignment, complete a Referral form filling in all information requested, give it to the volunteer and instruct him to report to Data Coordination (Station #3).

Before signaling the Greeter that you are ready for another interview, take a minute to jot down in the "Notes" section anything about the volunteer you feel is important, that the volunteer did not include on his registration form (a special skill, an obvious physical limitation, etc.) If your center decides to use the blind field labeled "Office Use Only* **(see page two)**," check the appropriate box. Place his registration form in the bin or file.

Key points to remember are:

- **Disaster registration differs from a "normal" volunteer intake – there is less time to try to fit each volunteer into an ideal assignment.**
- **Refer the volunteer on the spot** if possible – it may be impossible to contact him later. If the volunteer has special training or unusual skills that you think might be needed soon, ask him to wait in the sitting area and to check the volunteer request board for new requests for their specialized skills.
- Be sure to watch for volunteers who would work well in the Volunteer Reception Center.
- It is likely that some volunteers will exhibit the stress of the disaster – an extra measure of patience and understanding is needed.
- You may be called upon to train volunteers to assist with the interviewing.

Job Description – Interviewers (cont'd)

The VRC Director should determine appropriate use of the "Office Use Only" field, with input from the local ESF-15 lead agency. It is intended to provide a customizable "blind" field in which special information can be noted about volunteers. If, for future referral of that volunteer, it would be helpful to know his general level of ability to work independently, boxes 1-5 could be coded:* ***1.* *Learns quickly, able to supervise the activities of others;* ***2.*** *Would work well independently, good decision making skills;* ***3.*** *Needs some supervision and assistance with decision making;* ***4.*** *Needs close or constant supervision; and* ***5.*** *Has a mental, physical or emotional limitation to consider in making a referral.*

Items needed:

- An ID badge for each interviewer
- Two tables and eight chairs (see VRC floor plan)
- Sign (Station #2 Interviews)
- Supply of Referral forms
- Pens
- Flag or hat to summon runners
- Bin or file for maintaining Volunteer Registration Forms

Job Description – Data/Agency Coordinator

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Your job is to match the Referral forms to the Requests and to close out the Requests when they have been filled or are no longer needed. If interviewers are overwhelmed, you may need to complete the referral process with volunteers – identifying the appropriate volunteer task for them. You may have to call an agency contact to clarify the agency's Request. When you speak with an agency contact, record the information on the Request form in the section called "Follow-up Contacts with Requesting Agency."

When a volunteer brings you his Referral form, enter his name and the date of the referral on the Request form to which he was referred. Place your initials on his Referral form. If you have time, call the agency contact to let him know who or how many volunteers have been referred. Confirm with the agency contact whether you should continue referring volunteers or close out the request. **When a request has been filled, raise your flag or put on the hat to call a runner and ask him to remove that request from the board.**

If a volunteer who has been interviewed but not referred approaches your station, thank them for coming and ask them to please wait in the sitting area in the center of the room.

Enter the date and reason the request was closed (completed, no longer needed, etc.) at the bottom of the Request form. If your Requests for Volunteers have been entered into a database, be sure to enter the date and reason the Request was closed as soon as possible. **Place open Requests in one file and closed Requests in the other,** in either numerical order or **alphabetically by agency.**

Items needed:

- An ID Badge for each staff member
- Sign (Station #3 Data Coordination)
- Two tables and four chairs
- Phone
- Two sets of files – one for open Requests and one for closed out Requests
- Pens
- Computer, if available, networked to the computers at the Phone Bank station
- Flag or hat to summon runners

BLIND CODES – If Data Coordinator is making referrals, the Interviewers will use the following codes to convey their impression of the volunteers' suitability for tasks.

The VRC Director should determine appropriate use of the "Office Use Only" field, with input from the local ESF-15 lead agency. It is intended to provide a customizable "blind" field in which special information can be noted about volunteers. If, for future referral of that volunteer, it would be helpful to know his general level of ability to work independently, boxes 1-5 could be coded:* ***1.* *Learns quickly, able to supervise the activities of others;* ***2.*** *Would work well independently, good decision making skills;* ***3.*** *Needs some supervision and assistance with decision making;* ***4.*** *Needs close or constant supervision; and* ***5.*** *Has a mental, physical or emotional limitation to consider in making a referral.*

Job Description – Phone Bank Staff

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

You will be handling two types of **calls**, those **from agencies requesting volunteers** and those from people wanting to volunteer. **The information you record about each call must be complete and in sufficient detail to facilitate matching volunteers to the needs.**

When you receive a call from an agency, fill out a Request for Volunteers form while you are speaking with the agency caller. If there is a computer available for entering the needs into a database, Data Entry staff should enter the need as soon as possible.

Next, call a runner by raising the flag at your station. Ask the Runner to post the volunteer request on the dry erase board in view of the Interviewers (Station #2) and then to give the Request for Volunteers form to the Data Coordinator (Station #3).

When people call to volunteer, thank them and give them the following registration options:

- If they choose to register on line or by fax, they will be e-mailed or called to discuss possible assignments and given further instructions. If the caller represents a group that wishes to volunteer together, ask them to be patient while you determine where they can be of most help. It might take one day or several to match them with a need, especially if they are coming from out of town. Post the caller's inquiry on the board behind the Phone Bank.

  When a match (a mission) is found for that volunteer, e-mail or call them back and schedule a time for them to come to the VRC to sign their on-line registration form, pick up their referral form and ID bracelet(s), and attend a safety briefing. Make sure that the volunteer's on-line registration form is waiting with the Interviewers (Station #2) on their arrival date.

- If they choose to register in person at the VRC, they will be given instructions when they arrive.

Items needed:

- An ID Badge for each staff member
- Sign (Phone Bank)
- Supply of Request for Volunteers forms
- Push pins or masking tape
- Two tables and four chairs
- Phones
- Pens
- Flag

Job Description – Data Entry

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Your job is to enter the information from the volunteer Registration and Request for Volunteers forms **into the database** so that the county has an accurate record of who participated in the recovery effort, what kinds of work they performed and when. The computer will assign a number to each Registration and Request, which must also be hand-written on the paper forms.

After the initial influx of volunteers has subsided, you may have time to begin entering the referrals recorded on the Request forms and to close out the completed Requests. As needed by VRC staff, print updated lists of the unfilled Requests and ask a Runner to distribute copies to Phone Bank staff, Data Coordination, Interviewers and, if requested, the VRC Director.

Even if you are familiar with the software being used by the VRC, please ask for a brief orientation before beginning your first shift. Accuracy is more important than speed. The information you enter will be used to determine the amount of money the county will receive from the Federal Government as a result of the disaster.

If you have difficulty using the computer, please ask for help immediately. Do not attempt to fix the problem yourself.

Items needed:

- An ID Badge
- One table and two chairs
- Printer
- Pens
- Flag
- One or more computers (multiple computers should be networked to provide all users access to information on the status of volunteer requests and the availability of volunteers.)

Job Description – Volunteer ID Staff

(**Red** text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Ask if the volunteer for his/her Referral form. If they have not been referred, thank them for coming and ask them to please wait in the sitting area in the center of the room.

Clearly write on the white portion of an ID wristband the name of the volunteer, dates he/she will be working, and the name of the agency to which the volunteer was referred, as shown on their Referral form. Place the ID wristband securely on the volunteer's wrist.

Explain to the volunteers that the ID will be "good" only for the date(s) written on the band. Authorities will not permit them to enter any of the disaster impacted areas on any other day, without a current ID wristband. If volunteers plan to work more than one day, you may write the beginning and ending dates of their service. Thank them for coming and direct them to Station #5 Safety Training.

If you need assistance, please raise your flag or put on the hat to summon a Runner.

Items needed:

- An ID Badge
- Two tables and four chairs
- Sign (Station #4 Volunteer I.D. Tags)
- Supply of volunteer ID wristbands
- ID bracelet tool, if required
- Markers
- Scissors
- Flag or hat to summon runners

Job Description – Safety Trainers

(**Red** text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Your job is to brief all new volunteers on what to expect at their job sites, how to be safe while volunteering and how to take good care of themselves after their experience. When a small group has gathered, thank the volunteers for offering to help. Pass around a clipboard with an attendance sheet and check to be sure that all participants have signed it.

Read the entire Safety Training sheet slowly, emphasizing the importance of following supervisors' instructions at the worksite. Encourage everyone to attend a debriefing, if available, at the end of their shift. Ask if there are any questions. If a question arises to which you do not know the answer, put on the hat to summon a runner. Ask the runner to summon the VRC Director or other VRC staff to answer the question.

Some volunteers will be required to take additional training for their particular work. Direct those volunteers to where that training is provided. When your briefing is concluded, explain where the volunteers should meet the transportation to their worksites, if transportation is provided.

If you're conducting an exercise and have time to play a second round, please ask participants to play the role of at least one other volunteer with different skills. Direct them to the Registration Area to fill out another Registration form, giving only their new names and new skills.

File the attendance sheet for each class in the folder and turn them in to the VRC Director daily. If the content of your safety briefing changes (new material is added or safety instructions change), staple a copy of the new safety training script to the attendance sheet of the first class in which the new script was used. **Maintenance of these records is important to help protect the Coordinating Agency and local disaster officials from liability, should a volunteer be injured on the job.**

Items needed:

- An ID Badge
- Sign (Station #5 Safety Training)
- 10 or more chairs, preferably in a semi-circle so participants can see one another
- Clipboard with attendance sheets
- Pen
- Stapler
- Flag or hat to summon runners
- List of additional training required by specific worksites, training locations and instructors
- A supply of Safety Training handouts

Job Description – Runners

(Red text is used to highlight the functions that trainees can realistically perform during VRC training or exercises. All other functions are critical to the smooth operation of a "real life" VRC.)

Your job is to carry information from one station to another within the VRC. When a station needs you to pick up forms, restock their supplies or escort a volunteer from one place to another, **they will signal you by raising a flag or putting on a hat at their station.**

Please watch carefully for this signal and respond promptly, in order to keep the information and volunteers moving smoothly through the registration and referral process.

When you are asked to post a new Volunteer Request on the board, be sure to use only the markers provided and write neatly and large enough so that the interviewers can see the requests clearly. After posting the request on the board, give the Request form to the Data Coordinator (Station #3).

Items needed:

- An ID Badge
- Dry erase marker or water soluble marker (depending on the type of board available)
- Dry eraser or damp sponges

Community Partners Meeting Minutes
1/14/16

- Agenda
  - Goal is to capture in one room what people are doing currently, plan for the future, problem solve, and make sure all the agencies working right now are coordinated in being stewards of the donor dollar, of volunteer's time, and of our own efforts
- Introductions
  - Tony Lasher, ED, Flint ARC
  - Justin Bays, subject matter expert, community partnerships, long term recovery
  - Mike Mitchell, ED Red Cross Grand Rapids, standing in for Tony for a few days in Flint
  - Linda Dintenfass, assistant director for external relations on this DO, also emergency preparedness specialist for UM-Flint, UM-Flint has been involved in a myriad of ways for a fair amount of time
  - Mike Lane, director of env, health, and safety at UM-Flint
  - Jenna Holmes,
  - Janet Hunter, NCSC
  - Kara Ross, VP, Food Bank
  - Chris DeVriendt, GCEMHSD
  - Matt Purcell, ED, GCCARD
  - Bill Goodwell, Salvation Army
  - Jenny McArdle, United Way
  - Sean Kammer, City of Flint
  - Tony Sitko, Flint Community Schools
  - Tamara Brickey, GCHD
  - Vicky Shultz, Catholic Charities
  - Sheryl Thompson, deputy director for Michigan health services Lansing, NDHHS-L
  - Eileen Tomasi, RN, Flint Community Schools
  - Rachel Wenelick, UWGC
  - Jamie Lee Venable, UWGC
  - Joe King, NEH
  - Victoria Fryer, Red Cross VRC Contact (victoria.fryer@redcross.org)
  - Linda Cieciek, Red Cross VRC Contact (linda.cieciek@redcross.org)

- EOC Information (Chris DeVriendt)
  - Unique situation, never happened before in US to this scope and breadth
  - Started as crisis, turned into declared emergency at state level
  - Public Act 368, ran through local health dept, as public health emergency
  - Declared emergency from city, Public Act 390
  - Elevated to county level, then elevated to state level
  - Every governmental agency involved is an employee of the governor
  - Getting direction from both Lansing and local level
  - Engaging with all partners
  - SEOC = state equivalent, nerve center, planning chief
  - EOC directing daily operations to get tasks done
  - This is not going to be a short emergency
  - Recent developments—legionnaire's disease

- Perception is reality: people don't trust filter, require more bottled water
- Groups work independently, but also need to coordinate to make sure everyone has water
- Door knocking has been a huge success
- Goal: knock on every single door in Flint in a week; as volunteers come in, this goal becomes more attainable
- Need experienced volunteers, for safety reasons—doubling numbers may be problematic
- Trucks go out on regular runs to distribution centers
- Quell public fears—we have water
- We are depleting national stockpile of filters
- Brita—if you buy a filter, they donate one to Flint
- Pipe fitters go into households for installation, can call 211 for help with installation
- If you have resources, email Chris
- Job descriptions will start being posted, increasing opportunities
- Eventually going to drive all filters to one brand/one model
- Looking to add two warehouses for one central repository, full of water and materials to distribute, including water tests
- New water emergency official logo for badges
- Concept of naming/labelling—"Flint Water Crisis"
    - Relief? Response? Recovery?
    - Official names of teams knocking on doors "Water Resource Team"
    - Public health community—distance from "recovery," "victims"

VRC (Volunteer Resource Center) Information

- State and EOC asked Red Cross to help set up VRC
- Assisted by United Way, Michigan Community Service Commission
- Physically set up for last 4 days
- Opened Wed 9 am to 7 pm
- Controlled soft opening
- Need to manage event based volunteers expectations, and partner agencies and stakeholders with jobs to fill
- If we make large announcement to public, we may get a huge influx of volunteers, without jobs to match volunteers with yet
- When event based volunteer comes, we may have a job for them right now, but at this point, it's more likely that we won't, but we will still capture information and follow up
- See process map and volunteer workforce request form (handouts)
- Direct forms to Chad
- People manage expectations of VRC and the VWRF are filled out correctly
- Protection of our volunteers is our number one priority, and second goal, make sure they are out in the field helping our efforts
- Important for coordination, to streamline process
- EOC and SEOC gives jobs to be filled by volunteers
- Requests go from Chad to VRC
- VRC will make sure we have a volunteer to match skills to task
- See overview, first revision (handout)
- Volunteer points of contact: Victoria Fryer and Linda Cieciek

- Age requirement to be determined
- Right now 211 fielding all calls, instructed to come to Red Cross building to become volunteer, one informational access point

Partner Activities

- Three key things to know:
  - Needs
  - Current
  - Future

Catholic Charities

- Currenlty distributing water through community closet
- Not a lot of water to hand out
- Designated drop off location
- Would like to be able to distribute water at all 3 soup kitchens, not just community closet
- Want to spread reach
- Looking for more water donations
- For the future, hope to have filters and cartridges
- Food banks can store up to 8 semis, Catholic Charities have some space

Water Distribution

- Current Sites
  - Catholic Charities
  - Individual churches—any ideas to combine effort
  - Christ enrichment center
  - Salvation Army
  - Foss Avenue
  - Beecher
  - Christian love faith center
  - St. Luke's Catholic Church
  - Fire Stations 1, 5, 6, 8, 2
  - UAW
  - Chrysler
  - Next week: Berston fieldhouse, Brennan Center, Hasselbring
  - Flint schools (donations distributed to schools, daycares), not distributing to community at large right now
  - Enterprise car rental—sporadic drives and giveaways, started national campaign
  - Art Van, metro Detroit, Lansing, Flint, collecting water, coming to Catholic charities on a weekly basis
  - Flint City Hall distributing filters
- Water Sources
  - Largest source is FEMA
  - Donations (public, charitable)

Filters

- Distribution Sites
  - City of Flint
  - GCCARD
  - Fire stations
  - City Hall
  - DHSS Offices
  - Churches
  - Canvas
  - Housing Comm
  - Concerned Pastors Group
  - Open to **clients only, not public**: health dept and associated programs (WIC clinic, primary care clinic, AIDS Wellness, Planned Parenthood, DaVita Dialysis, FMC Dialysis, Grand Blanc Community Schools)
  - Brita started in-kind donation (looking at a month, same process for other filters into warehouse)
  - State authorizes purchases from Home Depot, etc
  - Brands:
    - Pur (Faucet)
    - Brita (Faucet)
    - Zero Water Pitcher
  - Filters have LED indicator for replacement, pitchers have indicator stick
  - Problems: hot water degrades filters
  - Filters need replacement based on amount of water running through, not based on time
  - Trying to push everything to Brita (short-medium term)
  - In the short medium term, work on messaging
  - Multi-year problem (Chris projection: 19 years)
  - Filters, education, support needed for lifetime
    - Identifying sources for this long-term support
  - GCCARD can handle volume of filters currently
  - Supply of water will require space
  - Years needed to restore trust, to replace infrastructure/piping
  - Minimal control on filters, little to no controls on the distribution of water
  - State goal: every church a distribution site
  - Mott set up refillable, filtered water stations
  - DEQ looking into filter replacements in schools/colleges
  - Operational security measure
    - Broken up pallets of water—make sure to inspect water
  - Smaller donations harder to manage
  - Food banks can store up to 8 semis, Catholic Charities have some space

Water Testing Kits

- Distribution Sites
  - City Hall
  - Fire Stations
  - City water plant
- Drop Off Sites for Testing Kits
  - City Hall

Public Information

- How to set up systems for community members to be updated?
- Education, getting answers out
- Are we all using the same/consistent information
- Sources of info
  - Joint Information Center (also to update 211, but include Jamie-Lee Venable to keep in loop)
  - Genesee County Health Department, website has many resources, fact sheets, press releases, etc.
  - Volunteers
  - Identify point of contact for organizations
  - Nutrition, water usage
    - Health department: common questions on handwashing, bathing, filters
    - Communications person for health department: Shana (?)
- Biggest source of public information is the volunteers themselves, vetted by JIC

Vulnerable Populations

- International students, non-English speaking
- Undocumented (Catholic Charities, Hispanic Tech Center, Our Lady of Guadalupe Church)
- Homebound, non-mobile
- Chinese community, limited communication (work with UM-Flint international students?)
- Translations of public health information
  - Translation services (contracted out upon request)
  - Some print materials in English, Spanish, Arabic
  - Request to state to get more fact sheets in different languages (get Mandarin added to list?)
- Locations with higher volumes of people—basic faucet filters run out very quickly
  - UM-Flint has a supply partner with good rate for larger filters (Michael Lang)
  - NSF 42 53, certified for lead filtering
  - Food bank has list of larger capacity filters
  - Locations with high water use in the city—get list?
  - Smaller businesses, access to bigger filters
- Mentally ill—no plan, hard to capture data

    - Able to leave homes? Comfortable in public?
    - Help of Genesee Health System to better identify this group
    - Rehab center need for filters
    - Clients feel stigma in community, so afraid to go to distribution sites, not willing to open doors to police and service men
- All vulnerable groups need continuous attention follow up in the months to come
- VOAD (disaster volunteers) in communication with Red Cross
    - One main function is to go to the homebound
    - Need to find gaps in delivery, then info communicated to larger volunteer organizations
- Restaurants
    - Health department working with state to create guidelines for restaurants
    - Not every area of Flint is unsafe
    - In general, restaurants safer than household residents, but still problematic
    - Hot water is more problematic
    - Fast food restaurants especially need attention
    - Reach out to Michigan dept of agriculture?
    - Priority to get households safe, then to work on restaurants
    - Help bring confidence back to the community with restaurants reporting they have tested their water
    - Party stores, gas stations, fountain drinks—more concerning, harder to regulate

Volunteer Needs

- Shifting from state troopers to volunteers
- Troopers, sheriffs, state employees going door to door through Friday
    - Community members added to these teams
    - Record info from door to door on ipads
    - Keep evaluating, create teams to do this through VRC
- UM-Flint wants specific info about volunteer opportunities (placements, shifts) to send out to students and campus clubs
    - Start at VRC
    - See Victoria Fryer (VRC Contact) for large groups
- Food will be provided
- Current activities being staffed at VRC:
    - Fire stations
    - Need 10 additional individuals per shift
    - Shifts: 9 am to 4 pm, 4 pm to 9:30 pm
    - 15 additional people needed for Friday
    - 40 additional people needed Saturday for canvasing
    - 40 additional people needed for Sunday
    - VRC hours of operation: 9 am to 7 pm
        - Intake process approximately 30 minutes

- Another job opportunity is data entry
    - Recorded addresses collected at distribution centers into computer
- 20 volunteers needed to warehouse starting Friday
- Family members, faith based organization, clubs—spread the word, ease into public announcement at the larger level
    - Come register, even if no immediate placement—need later down the road
- United Way will contact approx. 200 corporate volunteerism sources

1. Situation:

There are 45,000 active water meters in the impacted area
As of 2130 on 01.13.16 17, 276 households have received water filters
MAP

2. Mission Statement:

Ensure all households within the impacted area have the required resources

3. Execution
    a. Commander's Intent
        i. Distribute filters and additional resources to all impacted households within 5 days. The priority of effort is the Fixed Points of Distribution (PODs).
    b. Concept of Operations
        i. Distribution of resources will be conducted using 4 methods: Fixed PODs, Mobile Distribution Teams, Rapid Response Distributions, and Local Partner Distributions.
        ii. Tasks
            i. Fixed PODs
                1. Red Cross will staff all sites through **XXX**
                2. Red Cross will conduct transition brief with Michigan National Guard on **XXX**
                3. Michigan National Guard will assume staffing responsibility as of **XXX**
            ii. Mobile Distribution is being conducted via Water Resource Teams
                1. Recovery Branch Support will determine Water Resource Team composition, standards, resource requirements, and priority areas for distribution
                2. Michigan State Police will provide command and control (assemble, coordinate, monitor) of Water Resource Teams
            iii. Rapid Response Distributions
                1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
                2. Local EOC Operations Logistics will execute Rapid Response Distributions
            iv. Local Partner Distributions
                1. Local EOC Operations Section Chief/District Coordinator will approve partner requests for distribution support
                2. **XXX** will execute partner requests for distribution support
    c. Coordinating Instructions
        i. Fixed PODs are located at 5 fire stations.
            i. POD Locations

Water Resource Site Fire Station 1	310 East Fifth, Flint, MI 48502	0900-2100
Water Resource Site Fire Station 3		
Water Resource Site Fire Station 5		
Water Resource Site Fire Station 6		
Water Resource Site Fire Station 8		

2. POD Product Composition
    1. **NEED FROM SHAWN**

ii. Mobile Distribution is being conducted via Water Resource Teams
1. **Assembly area**
2. **Mission Ready Packets**

iii. Rapid Response Distributions
1. **NEED PROCESS FROM MICHELLE**

iv. Local Partner Distributions
1. **NEED PROCESS FROM MICHELLE**

d. Concept of Support

i. Resourcing support for all distribution methods will be provided via a consolidated logistics pipeline. Replenishment will be conducted automatically and on demand. Reception, Staging, and Onward Integration (RSOI) of material resources will be managed via a warehouse system and RSOI of personnel resources will be managed via a Volunteer Reception Center and XXX (State Employees)

ii. Tasks
1. SEOC Logistics Section Chief is accountable for resourcing support for all distribution methods and maintaining end to end visibility of all resources
2. SEOC Logistics Support Staff is accountable for maintaining the Pipeline Report to ensure accurate resource tracking
3. Red Cross Warehouse Managers will provide warehouse management and are accountable to the SEOC Logistics Section Chief
4. Red Cross will manage the Volunteer Reception Center
5. Local EOC Logistics will provide logistics support to the Rapid Response Distributions

iii. Warehouse System
1. Currently operating 3 locations with intent to consolidate to single, central location

Name	Location	Hours of Operation	POC
GCARD	2727 Lippincott, Flint , MI		Shawn
Clio	4315 North Clio Road, Flint, MI		John Foust
Court	3086 East Court Street		John Foust

iv. Volunteer Reception Center
1. 1 location managed by American Red Cross
2. The volunteer intake process takes 20-30 minutes.

Name	Location	Hours of Operation	POC
American Red Cross	1401 S Grand Traverse Flint, Mi 48503	0900-1900	

v. Resource Request and Tracking Process

1. Pipeline Report
   https://docs.google.com/spreadsheets/d/1wXVQvQ2lJ6N_ORpo8bvtBIEQJrDxkyoPg-EjZRtNepg/edit?usp=sharing
2. *All resource requests and offers of support (people, product, facilities, vehicles,* etc) will be entered into MI CIMS as a resource request to the SEOC Logistic Section Chief.
3. The SEOC Logistic Section Chief. will task it out to the State or Volunteer Agency that can fill that request or procure as necessary
4. All resource requests and offers of support will be tracked and monitored via the Pipeline report (Google docs collaboration document)
5. Warehouse inventories will be sent to the SEOC Logistic Section Chief. daily at 1800 and incorporated into the Pipeline report
6. Volunteer Workforce Request for Volunteer Reception Center
   1. REQUIRED INFORMATION:
      i. Who is the Point Of Contact?
      ii. Who is the supervisor?
      iii. Where do volunteers report?
      iv. What Dates are volunteers needed?
      v. What times are volunteers needed?
      vi. How many volunteers are needed?
      vii. Who is providing transportation for the volunteers?
      viii. Who is providing meals, snacks and beverages?
      ix. Are there any qualifications needed?
      x. IMPORTANT NOTE:
         - Brief job description is required
         - The requestor of the volunteers must understand they assume responsibility for the volunteer's safety and the volunteer's actions.
         - The requestor of the volunteers are responsible for managing and providing direction.
         - 48 hour advance notification required for request.
         - Reasonable expectations of the volunteer workforce

Distribution Reporting

D-R-A-F-T

Flint Water Operations Plan

Phase 1 – Initial distribution

- Canvassing teams initiated by sheriff; fleshed out by MSP, ARC, NG, and volunteers.
- Goal – Touch every residence with water, filters, filter cartridges, and test kits to demonstrate we have attempted to supply all residences with potable water.
- Canvassing based on geographic areas.
- Points of Distribution (PODS) established at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits; initially ARC staffed, then replaced by NG.
- 2-1-1 used to address all questions and serve as POC for all special needs requests (hot shots).
- Phase 1 complete the morning of January 21 based on feedback from local EOC.

Phase 2 – Saturation

- A second round of canvassing teams begins January 21 using NG and ARC personnel augmented by volunteers as judged appropriate.
- Goal – Re-touch every residence with water, filters, filter cartridges, and test kits to demonstrate we made every effort to supply all residences with potable water
- Canvassing based on geographic areas.
- Points of Distribution (PODS) staffed by NG continue at 5 Flint fire stations to distribute water, filters, filter cartridges, and test kits.
- 2-1-1 addressing all questions and serve as POC for all special needs requests (hot shots).
- Phase 2 completion planned for COB January 24; any remainder to be addressed by ARC teams.

Phase 3 – Transition

- Goal – Move from manual distribution mechanism to less labor intensive processes.
- Develop messaging for implementation of this phase and transition to next phase (phase out of distribution of water, filters, cartridges, and test kits noting PODS to cease operation on January 31).
- Identify new water only distribution sites operated by faith-based or other volunteer groups.
- Determine and implement best methodology for long-term distribution of filters and filter cartridges.
- Phase 3 complete with close of PODS COB January 31.

Phase 4 – Long Term Support

- Goal – Establish long-term, workable processes to sustain provision of potable water to residents.
- *Develop messaging for implementation of this phase and transition to next phase.*
- Water distribution by the city or faith-based/other volunteer groups.
- Establish long-term filter distribution process using USPS, vouchers, or other measureable program.

Phase 5 – Normal Operations

- Goal – Resume normal operations.
- Develop messaging for implementation of this phase and transition to next phase.
- Analysis complete, solutions implemented and public trust in Flint water reestablished.

1/21/2016 7:10 PM

NSF International was founded in 1944 from the University of Michigan's School of Public Health as the National Sanitation Foundation (NSF) to standardize sanitation and food safety requirements.

The NSF Water Division certifies products that come into contact with drinking water, such as plumbing components, water treatment chemicals and drinking water filters, as well as pool and spa equipment. NSF led the development of American National Standards for all materials and products that treat or come in contact with drinking water to help protect public health and the environment and minimize adverse health effects. In 1990, the U.S. EPA replaced its own drinking water product advisory program with these NSF standards. NSF is accredited by the American National Standards Institute (ANSI) to develop American National Standards.

ANSI accredits standards that are developed by representatives of other standards organizations, government agencies, consumer groups, companies, and others. These standards ensure that the characteristics and performance of products are consistent, that people use the same definitions and terms, and that products are tested the same way. ANSI also accredits organizations that carry out product or personnel certification in accordance with requirements defined in international standards.

To help address concerns about the safety and performance of products sold worldwide and marketed for treating household water supplies, NSF International developed several American National Standards covering a wide array of water treatment systems, including drinking water filters.

To earn NSF certification, water treatment systems must undergo extensive testing to confirm that they meet the strict requirements of American National Standards. In addition to verifying that the system is structurally sound, NSF verifies that:

- The contaminant reduction claims shown on the label are true.
- The system does not add anything harmful to the water.
- The product labeling, advertising and literature are not misleading.

NSF certification for performance means they have tested a water treatment product using specific procedures and have confirmed that it can effectively reduce the contaminants claimed on the product label. They also require all products to be re-tested periodically and re-certified each year, which ensures that products continue to meet all stated requirements over time.

NSF International has confirmed that the three water filters being distributed by officials in Flint, Michigan are currently certified by NSF International for lead reduction.

Specifically, Brita Faucet Filtration System, model number SAFF-100 (in white, black or chrome), the PUR Faucet Mount, model number FM-3700B, and the ZeroWater® 23-Cup Dispenser, model number ZD-018, are certified for lead reduction in accordance with NSF/ANSI 53 – Drinking Water Treatment Unit Standard for Health Effects.

Individuals wishing to verify that a specific filter is NSF certified can do so via the NSF website. Here are the links to verify each certification: Brita Faucet Filter System SAFF-100, PUR Faucet Water Filter System and the ZeroWater® 23-Cup Dispenser.

The State of Michigan procured the above listed filters due to the NSF/ANSI 53 certifications and the availability and sustainment of future orders by vendors on state contract.

Flint Water Response Team Plan for Saturday & Sunday, 01.23-24.16_V2.0_FINAL

Changes are highlighted in red

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
OGCS	Office of Genesee County Sheriff
HH	Household
LEOC	Local Emergency Operations Center
NG	National Guard

Key Leaders

WRT OIC	Lt. Amy Dehner	586-615-1359
ARC OIC	Robert Gaskill-Clemons	419-905-1122

Plan

Agency	Team Types	Mission
MSP/OGCS/NG	15 Teams	3000 HH
ARC	40 Type V	7000 HH

MSP/OGCS/NG

Resource Status

Team Type & Quantity	Type: N/A Quantity: 18				
Resource	**Minimum**	**Minimum Confirmed**	**Notes**	**Date**	**Time**
Team Leader	15	15		1/22/16	1525
16ft -20ft box truck	15	15		1/22/16	1525
Truck Driver	0	0	Sourced from NG	1/22/16	1525
Team Member	180	180		1/22/16	1525
Team Transport Vehicle for 6-9 Team Members	15	15	12 from DOC & 3 from	1/22/16	1525

			Warehouse		
Team Transport Driver	15	15	12 DOC & 3 from NG	1/22/16	1525
Patrol Car	15	15		1/22/16	1525
iPads	30	30		1/22/16	1525
Hand Warmers	300	300		1/22/16	1525
Vests	0	0		1/22/16	1525
Distribution Kit	3000	3000		1/22/16	1525

ARC

Team Type & Quantity	**Type:** Type V **Quantity:** 40 (10 ERV & 30 Box)				
Resource	**Required**	**Minimum Confirmed**	**Notes**	**Date**	**Time**
Team Leader	40	40		1/22/16	1525
ARC ERV	10	10		1/22/16	1525
ARC ERV Driver	10	10		1/22/16	1525
16ft box truck	30	30		1/22/16	1525
Truck Driver	30	30	Sourced from ARC	1/22/16	1525
Team Member	150-300	150-300	Islamic Relief & Others	1/22/16	1525
Team Transport Vehicle for 2-4 Team Members	30	30	10 from warehouse & 20 from ARC	1/22/16	1525
Team Transport Vehicle Driver	30	30	Sourced from ARC	1/22/16	1525
Patrol Car	0	0		1/22/16	1525
iPads	40	10		1/22/16	1525
Hand Warmers	60	382		1/22/16	1525
Distribution Kit	7000	7000		1/22/16	1525

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building	0830-1600

	1101 Beach St, Flint	
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in
3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
5. Provide training to new team members
6. Issue vest and badge to team members
7. Execute morning distribution assignment
8. Lunch served between 1230-1330
9. WRT OIC and Team Leaders midday brief
10. Execute afternoon distribution assignment
11. Conduct post-deployment debrief with team leaders and members
12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	0 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

Local Hazard Mitigation Planning Status

Statewide Mitigation Planning

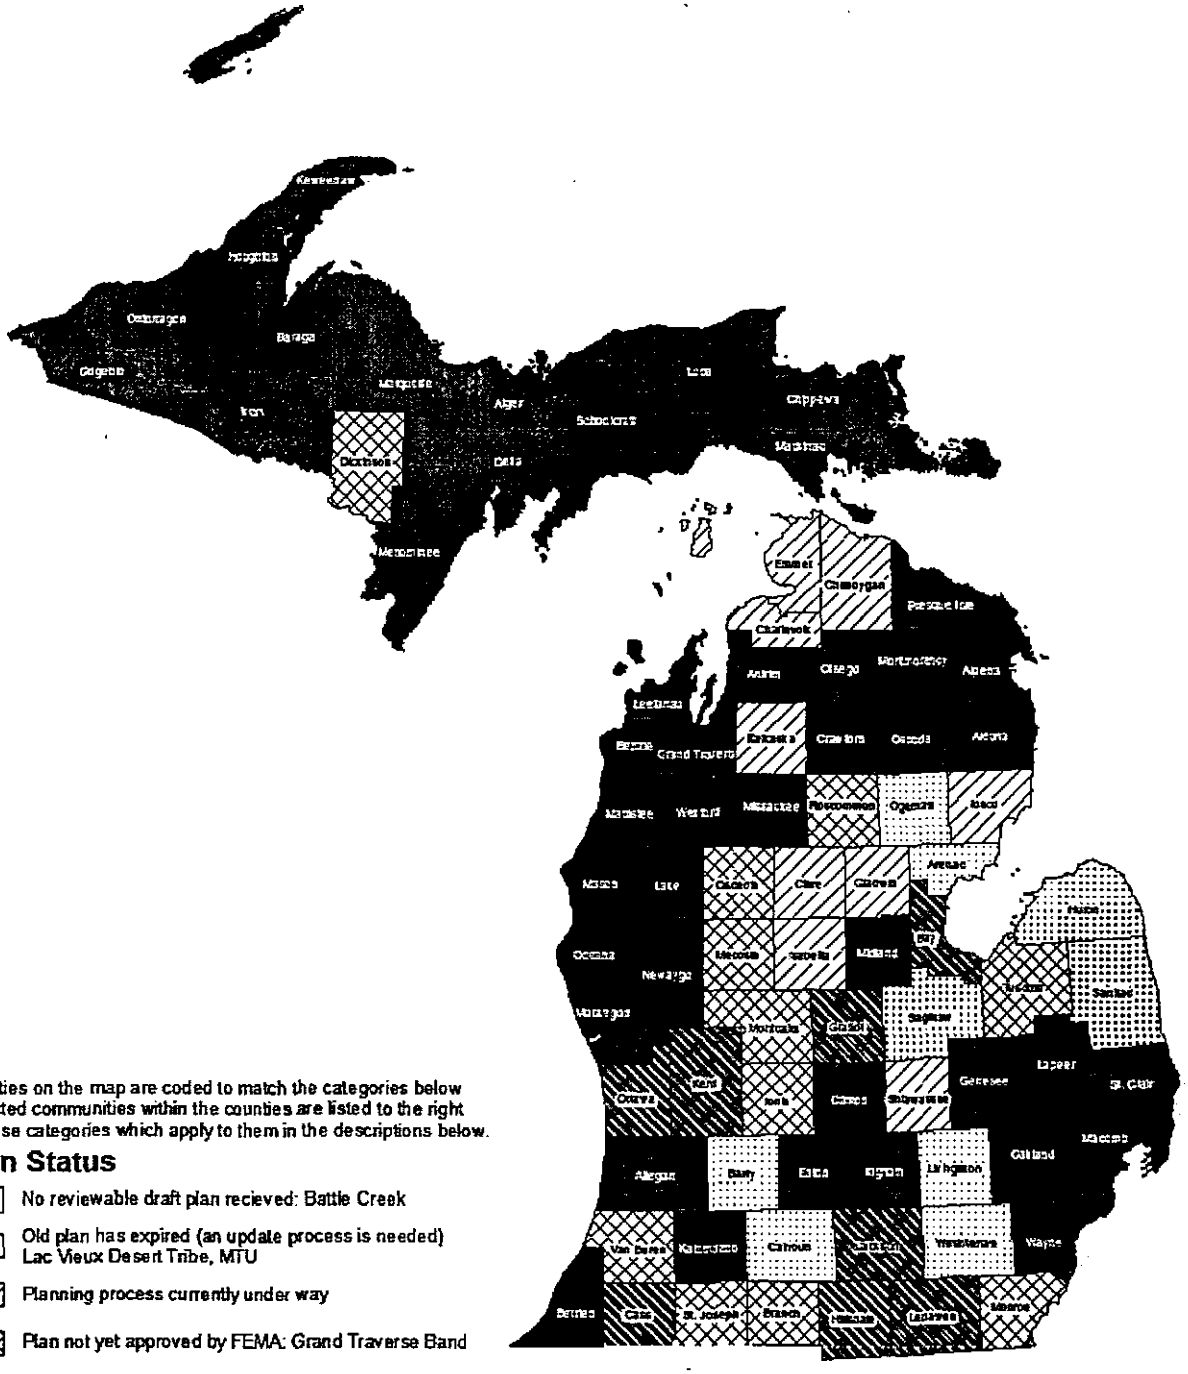
Michigan currently has 63 local and/or tribal plans currently approved by FEMA under the standards of the federal Disaster Mitigation Act of 2000 (DMA). (Parenthetical county names are listed only to provide location information.) Communities whose plans have passed their expiration / update deadline are still listed below, but have a line through their names (~~like this, for example~~). Communities with plans that will expire within six months (by June 30, 2016) are underlined in the list below.

DMA 2000 FEMA-Approved Local / Tribal Plans in Michigan as of December 31, 2015

- Alcona County (will expire 10/27/2019)
- Alger County (will expire 8/31/2020)
- Allegan County (will expire 3/12/2020)
- Alpena County (will expire 10/27/2019)
- Ann Arbor, City of (will expire 9/17/2017)
- Antrim County (will expire 11/18/2020)
- ~~Arenac County~~ 2015 PDMP planning grant application
- Baraga County (will expire 9/9/2018)
- ~~Barry County~~ no known planning activity
- Bay County (will expire 3/23/2016)
- Benzie County (will expire 4/1/2020)
- Berrien County (will expire 5/2/2018)
- Bloomfield Township (Oakland Co.) (expir. 10/3/2016) appl
- ~~Calhoun County~~ PDMP 2014 grant exp. 9-30-2016
- Cass County (will expire 1/5/2017)
- ~~Charlevoix County~~ PDMP 2012 grant exp. 7-31-2016
- ~~Cheboygan County~~ PDMP 2012 grant exp. 7-31-2016
- Chippewa County (will expire 11/25/2019)
- ~~Clare County~~ PDMP 2012 grant exp. 9-30-2016
- Clinton County (will expire 7/6/2020)
- Crawford County (will expire 11/18/2019)
- Delta County (will expire 8/10/2020)
- Delta Township (Eaton County) (will expire 8/10/2020)
- Detroit, City of (Wayne County) (will expire 4/7/2020)
- ~~Dickinson County~~ EMHSD direct assistance
- Eastern Michigan University (will expire 3/15/2018)
- Eaton County (will expire 8/10/2020)
- ~~Emmet County~~ PDMP 2012 grant exp. 7-31-2016
- Estral Beach, Village of (Monroe County) (expir. 6/9/2020)
- Genesee County (will expire 1/26/2020)
- ~~Gladwin County~~ PDMP 2012 grant exp. 9-30-2016
- Gogebic County (will expire 10/23/2018)
- Grand Traverse County (will expire 7/15/2020)
- ~~Grand Traverse Reservation~~ no known planning activity
- Gratiot County (will expire 1/19/2017)
- Hillsdale County (will expire 9/26/2017)
- Houghton County (will expire 10/8/2018)
- ~~Huron County~~ no known planning activity
- Ingham County (will expire 8/10/2020)
- ~~Iosco County~~ PDMP 2012 grant exp. 9-30-2016
- Iron County (will expire 11/4/2018)
- ~~Isabella County~~ PDMP 2012 grant exp. 9-30-2016
- Jackson County (will expire 12/27/2016)
- Kalamazoo County (will expire 1/15/2018)
- ~~Kalkaska County~~ PDMP 2012 grant exp. 7-31-2016
- Kent County (will expire 6/11/2017)
- Keweenaw County (will expire 10/16/2018)
- Lake County (will expire 7/6/2020)
- Lansing, City of (will expire 10/18/2018)
- Lapeer County (will expire 5/21/2020)
- Leelanau County (will expire 8/19/2020)
- Lenawee County (will expire 6/20/2017)
- ~~Livingston County~~ no known planning activity
- Luce County (will expire 11/25/2019)
- Mackinac County (will expire 11/25/2019)
- Macomb County (will expire 5/21/2020)
- Manistee County (will expire 7/6/2020)
- Marquette County (will expire 8/31/2020)
- Mason County (will expire 8/19/2020)
- Menominee County (will expire 8/10/2020)
- ~~Michigan Technological University~~ no known activity
- Midland County (will expire 1/21/2019)
- Missaukee County (will expire 7/24/2020)
- Montmorency County (will expire 1/9/2020)
- Muskegon County (will expire 10/9/2020)
- Newaygo County (will expire 8/3/2020)
- Oakland County (will expire 1/23/2018) HMGP applic.
- Oceana County (will expire 4/15/2020)
- ~~Ogemaw County~~ PDMP 2014 grant exp. 9-30-2016
- Ontonagon County (will expire 9/17/2018)
- Oscoda County (will expire 8/14/2019)
- Otsego County (will expire 8/14/2019)
- Ottawa County (will expire 5/22/2017)
- Pokagon Band of Potawatomi (will expire 7/23/2017)
- Presque Isle County (will expire 11/18/2019)
- ~~Roscommon County~~ PDMP 2012 grant exp. 9-30-2016
- ~~Saginaw County~~ PDMP 2014 grant exp. 9-30-2016
- St. Clair County (will expire 7/15/2020)
- ~~Sanilac County~~ 2015 HMGP planning grant application
- Schoolcraft County (will expire 8/10/2020)
- ~~Shiawassee County~~ PDMP 2012 grant exp. 9-30-2016
- ~~Tuscola County~~ PDMP 2013 grant exp. 1-9-2017
- University of Michigan-Flint (will expire 12/18/2017)
- ~~Van Buren County~~ ASTI consultants (unknown funding)
- ~~Washtenaw County~~ no known planning activity
- Wayne County (will expire 7/16/2019)
- Wexford County (will expire 8/31/2020)

Background on the map that follows: Because there is a five-year planning cycle that requires communities to review and update their approved plans in order to remain eligible to apply for or directly benefit from federal hazard mitigation grant funds, it is important to track those communities and alert / encourage them to begin this required update process. Therefore, the following categories have been used on the map on the following page. Those counties that have been smoothly shaded in various colors have a completed plan. Those counties without smooth shading (marked only with crosshatching, lines, dots, or otherwise devoid of color) are not currently eligible to receive or directly benefit from federal hazard mitigation grants. A display of dots identifies communities whose plans have expired and therefore are ineligible for mitigation grants until their plan is updated. Shading with white stripes identifies a community that currently is covered by an approved and adopted plan but is scheduled to have that plan expire or be updated sometime within the next two years. Lighter shading denotes areas that still have to officially adopt their updated local hazard mitigation plans (also identified in the list above).

Local Hazard Mitigation Plan Status
12/31/2015



Counties on the map are coded to match the categories below
Selected communities within the counties are listed to the right of those categories which apply to them in the descriptions below.

Plan Status

- No reviewable draft plan recieved: Battle Creek
- Old plan has expired (an update process is needed)
  Lac Vieux Desert Tribe, MTU
- Planning process currently under way
- Plan not yet approved by FEMA: Grand Traverse Band
- Plan meets requirements but NEEDS LOCAL ADOPTION
- Plan approved & adopted: Participants are grant-eligible:
  Delta Twp, Detroit, EMU, Estral Beach, Lansing
- Plan is due for update within the next 2 years: Ann Arbor, Bloomfield Twp, Pokagon Band, U of M Flint

Community Partners Water Response Meeting Minutes
1/21/2016

- Safe place to discuss, won't leave the room
- It will take whole community to serve long term and short term crisis
- Goal is to look to the future, cut off potential problems, or solve problems that don't even exist yet
- Today will frame future meetings

Chris DeVriendt

- Progress is being made
- By close of today, canvas of entire city complete
- Tomorrow, round two begins
- Adjusting strategies, identifying houses that didn't get reached, provide replacement filters
- 200 national guard on the ground filling various roles, looking to take on other roles
- Current NG deployment is 6 days as orders stand right now
    - NG looking at warehouses, door to door campaign
- Supplement with new programs
    - Team Rubicon, Sat and Sun, helping with vulnerable populations
    - MSP provides map that identifies vulnerable populations
    - If you know of other segments that are not getting service, let Chris know
- Currently no target, immediate relief
- Who is point of contact when someone is identified as vulnerable?
    - 211, sheriff
- Pipefitters union doing installs
- Lists are constantly being refined
- Question: is map of vulnerable pop based on self-identification?
    - Data comes from MSP
    - Individuals can call in directly identifying themselves, as are church groups
    - Not going to say no, everyone gets the same service
- Question: what's the long-term distribution plan?
    - Neighborhood Engagement Hub has been helping people currently

Tom Weber

- Planning on attending meetings weekly
- Mapping of vulnerable populations is coordinated through several agencies
    - MDHSS provides data
    - Office of Services to Aging provides data
    - People coming in through 211
- Here to support you
- Opportunity to coordinate with state activities
- Identify what we are doing individually and as a group
- When there is information to share with the state or needs that need to be met by state, Tom is the voice/go between for the state
- Many activities
    - Human services, DEQ, department of agriculture, department of education

FEMA Representatives

- Thank you for work being done
- Overview of emergency declaration, authorities provided, what FEMA support looks like
    - Jan 16 president signed emergency declaration
    - Authorities outlined
    - Authority is limited to commodity support
        - Water, filters, cartridges
    - Working closely with state to identify needs
    - Based on declaration, can continue for 90 days
    - In these meetings, plan to develop long term strategies for community needs
- HHS Led Group
    - Long term/infrastructure planning
    - Handouts: fact sheet on emergency declaration and HHS
    - Goal to make plan to distribute commodities in the longer term
    - Press release talks about US HHS
    - Dr. Laurie is designated official, coming in with federal agencies, setting up distinct operation
    - Emergency declaration focuses on commodity needs and possibilities, day to day needs of people

    - Housed in state emergency operating center (EOC), JIC (joint info center), local EOC, warehouse, points of distribution
    - Second team coming in to help HHS set up operations, support planning of federal partners
    - No involvement in canvasing/boots on the ground—local, county, and state resources covering this
    - Providing technical assistance
- Critical to future planning
- Have contact list for collaboration, resources, access to larger volunteer agencies and faith-based organizations

Lauren

- Disaster response expert, operations and logistics
- Supporting state with planning execution and logistics
- Disaster cycle
    - How different organizations come together around this
    - Details about current operation
    - Prepare, immediate response, long term recovery
    - Currently in immediate response phase
    - All disasters are local (community organizations and local government are the critical point for the disaster operations)
    - All other agencies come not to take over, but to support local organizations meeting needs
    - Mission is to put a filter in every home of impacted area
    - Four primary methods
        - Points of distribution (people coming to fire stations)
        - Water response teams (door to door delivery)
        - "Hotshot" (if someone calls or is homebound, targeted door knocking)
        - Partner distribution/local organization distribution (giving supplies to a local organization to do the distribution themselves)
    - Methods can be inconvenient for those being served, impacts day to day life
    - Need to shift to a method that integrates into regular day to day routines of residents, create convenient models for distribution
    - Every household is offered:

        - Door hanger with info
        - Bottled water
        - Filter
        - Filter replacement
        - Test kits
    - Sometimes we run out, but goal is to supply complete package
    - Geographically, entire city is covered
    - Not going to stop until it can be guaranteed that a filter has been offered to every home
    - Some homes currently have no filters/we don't have data to prove every home has a filter
    - Door to door will continue
    - Leverages every place they interact with everyday, so that distribution is not an extra burden
    - Impact area is everyone on the water system
        - Those affected outside of Flint city limits are being served as well
    - Question: are filters all one brand?
        - Currently three types:
            - Brita faucet filter
            - Pur faucet filter
            - Zero Water pitcher
        - Brita **pitchers** do not work
        - All stations, assuming that warehouses are full, have everything
        - Vendors only have certain capacity, FEMA is working on ensuring we have an adequate and consistent supply of variety
        - If we max out vendor's capability, we will look into alternative sources, seeking redundancy/more vendors
    - Defense Production Act
        - These filters will be sourced to support this effort
        - Overseas shipments are being re-routed to support this effort
    - Test kits
        - Special bottles, need to be received, tested, and verified to use
    - Governor's website is adding a link for vendors to submit information for review
    - Try not to direct people to EOC (they are inundated)

Plan for tomorrow through Sunday night (does **not** mean things end on Monday)

- Continue with current distribution model (four methods)
- Go back again to make resources available until we can say with assurance that we have offered filters to every house
- How is house defined?
    - Defined as household, regardless of structure (including apartments, etc.)
    - Red Cross, state trooper, sheriff, national guard, air force, EBVs, are all acting as water response teams
    - Regardless of team, all are offering the same stuff in the same way, tracking data in the same way
    - What about people who won't open door to government agency?
        - Red Cross & volunteer teams will address these areas, once information is available about what these locations are
        - Increase partner distribution (e.g. churches, schools, other normal touch points for individuals)
        - Need to work through logistical details
        - Health centers as a good potential distribution site
        - Need for this group's local knowledge to guide insights about refining methods/distribution points, to change to a better model to meet needs in a way that doesn't require door to door
        - Cautious about driving everyone to a new location
        - Messaging important
    - Other places where filters are available
        - Health department, WIC clinics, Dialysis, MTA, Comcast, and others providing smaller, targeted distributions
    - Who maintains list of distribution sites?
        - Anyone who wants to be a distribution center or donate supplies or volunteers—send to Chris
        - Three contact names & numbers:
    - Currently other sites possible for distributing water, since we are reaching the limits of current capacities
    - Ample supply of water from state—direct people who want to donate water to Flint Children fund, which at this point will be more helpful

- Unless people are sending by the truckload, try to redirect individual donations to online monetary donations
- Food Bank needs solutions for
  - How long are we using water?
  - How are we recycling water bottles? (recycling will be in effect very soon, there will be educational outreach)
  - No trust about filters, lots of misinformation about filters
- Flint school parents don't trust bathing in the water as well
  - To say anything with certainty about safety at this point impossible
  - Need more data from testing
  - 2800 samples already in Lansing
- Health department stance is that bathing is safe
  - This kind of lead not absorbed through skin
  - Concern for small children who might ingest bathwater
  - This is the messaging on the door hangers being distributed
- If someone is buying a filter on their own, they need to make sure it is rated properly—standard filter in a store may not work
- Disabled & seniors may not be able to carry supplies or leave homes
  - MTA provide transportation assistance?
  - Where is the best source for data about these vulnerable individuals?
  - For elderly: VAAA
  - Disability: Mike Zelley
- Map (handed out)
  - Squares indicate target area
  - Entire geographic area has been covered
  - Dots indicate water response teams that started Tuesday confirm a filter transaction, also indicate identified vulnerable populations (data from VAAA, Disability Network, and others)
  - Planning on doing comparison of the data sources we have
  - Contact visiting physicians, home caretakers, private entities for data?

- Community Volunteer Reception Center
  - Working exceptionally well
  - 211 directs EBVs to Red Cross building
  - VRC is managed by Red Cross Americorps and United Way staff

- Average time to be registered and assigned a job is 25 minutes maximum
- Thanks to gracious partnership with MTA, longest anyone has had to wait to be transported to job site is 10 minutes
- 4 MTA drivers in Red Cross lobby to transport volunteers out to job sites
- Cards are distributed to EBVs with number for pick up and drop off
- Thanks to MTA, volunteers can work at their own pace—excellent!
- Hours of operation of VRC change depending on need, depending on staffing requests coming from state and local EOC and community agencies
- VRC hours are currently 9-7 today and tomorrow, weekend hours TBD
- See handout: volunteer workforce request form
  - After it's ensured that form is accurate, it is given to VRC lead to be filled by incoming volunteers
  - Send form to single point of contact
- Increased media coverage has led to many prospective volunteers coming in
  - Facilitate more job opportunities for these incoming volunteers for the future
- Workflow of VRC provided in diagram
- So far we have been able to fulfill all the requests that have come in

Response Topics

- Spiritual/Emotional/Mental Health
  - Who is providing this right now?
  - Who needs to be involved?
- Helen
  - Parents in emotional distress about long term effects on children
  - 211 has no plan in place for dealing with these issues
  - For people in extreme distress, 211 uses their standard response, no specific response
  - 211 only as strong as the information that can be provided to them about community needs and resources
  - Part of responsibility of these meetings is to identify individuals/organizations that can respond to these issues

- Current provider network for mental health includes Catholic Charities, Family counseling, Genesee Health System
    - These providers are not necessarily prepared to deal with this specific question en masse
    - At this point probably not prepared to respond in an intentional way for the water crisis
    - Disaster teams communicate with largest players?
    - Catholic Charities discussing how to address specific issues/seeking resources
    - Chris: SAMSA has dedicated a hotline for people to call
    - At health department, recognize huge need for trauma care for children and adults
    - Current facilities do not have the long term capacity for the amount of trauma
    - Federal teams working with GHS to support these efforts
    - Well defined, narrow scope of federal funding currently—mental health is being addressed through alternate channels
    - Every agency at federal, state, and local level working on this issue, even if some things cannot be achieved solely within the parameters of the presidential declaration
    - Importance of carrying a consistent message
        - Balance between acknowledging the tragedy of the disaster and recognizing that a learning/cognitive disability is not a death sentence
        - Need for consistent, positive messaging
            - Funneled through JIC
        - Some players ignorant or not reporting correct facts
        - Leadership needs to step up to address misinformation, sensationalism, and quell fears
        - Leaders can come to EOC to see official press releases
        - Hard to prioritize PSAs currently with so much going on
        - JIC
            - Newsroom/media room where press releases are produced
            - Information from a variety professional sources
            - Produced in prose suitable for the public to digest
            - Emphasis on consistency

- Agencies can turn to JIC to distribute information to larger audience
- Information changes fast

Other Topics/Questions

- What to do with weekend donations of water?
  - Being directed to Red Cross
  - Red Cross accepting donations 7 days a week
  - Trying to make sure public doesn't think Red Cross is a distribution point
  - Seeking more neutral locations that can potentially serve as donation and/or distribution points
    - Where it can be moved easily, sit for a period of time
    - Diplomat a potential site?
    - Other businesses with space?
    - Current biggest space is the warehouse
      - Warehouse needs to process larger donations
- Where did flintwaterinfo.com come from?
  - Inaccurate information
  - Being addressed by United Way
- Average wait times for 211 calls?
  - 400-500 calls a day
  - Grand Rapids, Flint, and Detroit call centers on backup
  - State of the state address/national attention led to 800 calls a day going from a 2 minute wait to a 20 minute wait
  - With every public mass communication, number of calls spike
  - Communication is critical for management of that system
  - Regimented process for 211
  - Every single call is responded to
  - Customer service key
  - State looking into building out this system, building capacity to alleviate buildup
  - Health department working on a plan to bring in temporary staff just to man phone calls, but currently don't have ability to field so many calls and questions

    - All nonprofits actively engaged are having to build capacity enhancement
    - Be patient with people who are frustrated, understand that organization's current teams are under a lot of stress
- Who else should be at these meetings?
    - McLaren physicians group want to participate
    - Diana Kelly invited
    - VAAA invited
    - Family Service Agency (serve elderly) should be invited
        - Contact point
    - Michigan VOAD
    - If you think of other groups who should be at these meetings, invite them!

Next Steps

- In contact with state and national groups to address mental health issues
- Think big
    - Hope to secure enough supply of commodities on the ground to cover at least a year under presidential declaration
    - What is best ongoing, sustainable way to get commodities out to people long term?
        - Direct mail from vendors?
        - Vouchers?
    - Want to have least amount of impact/intrusion on people's everyday routines
    - FEMA wants to know thoughts and ideas from group at this meeting, since you know the community
    - Commodities only include water, filters, cartridges, test kits
    - Emergency declaration would have to be appealed by governor's office
        - Appeal for more FEMA aid currently being reviewed
- Future meetings: weekly on Thursdays 3 pm – 5 pm

Donations Management Plan

This plan was designed to support donations management of the Flint Recovery Effort and assist with the coordination of material and financial donations.

I. Needs Assessment of individuals

To ensure the donations are meeting the needs of Flint residents, a communication system to track the needs and make adjustments of requested donations is outlined below.

A. Identifying and Meeting Individual Needs

- 211 will provide a report to identify trends from the information they have collected – demographics of who requested assistance and what services they requested
- 211 will be listed as the number for people to call, to allow all information regarding requests for assistance or offers to help to go to one location. The system will assist people with understanding how to volunteer/donate or receive assistance for the Flint water issues.
- To manage the increase of calls and manage caller volume, 211 will partner with other communities 211 operators
- Information is being collected that identifies people who need assistance with installations and other face to face contact.
- Information will be tracked to identify needs and determine if additional donations need to be requested. 211 will provide regular updates.

II. Material and In-Kind Donations

When donation arrangements have been made, Wendy and Pam will be sent and email alert by Janet.

A. Donation List

- Materials: Water – individual bottles, gallon jugs, and larger.
- In-Kind: Labor to install filters, trucks to deliver materials
  Donors should be directed to Janet Hunter HunterJ8@michigan.gov
  Internal Phone to provide to donors not for publication: cell 989-763-9421

B. Publicize Items to Donate

- The donation list will be sent to partners to post with their networks and post on state, county, and city sites and social media
- Donation items and drop off locations will be listed in a press release.
- Press releases will inform public of donation opportunities
- Government organizations and community partners will be asked to post on their web-sites and social media
- 211 will have all information to share with those who contact them
- Additional information requests for donating can be directed to the Michigan Community Service Commission, Janet Hunter HunterJ8@michigan.gov

B. Warehouse Location – Drop off Location for Large Donations of Water

- A warehouse location to store surplus of donations is located at: 4315 Clio Rd, Flint, MI
  Refer interested donors that have more than one semi truck of water to Janet Hunter HunterJ8@michigan.gov (Internal Phone, not for publication: cell 989-763-9421)

C. Public Drop off locations of Water

- Donations will be tracked at the sites.
- Inventory and burn rates will be tracked to identify need for donations.
- Small Water Donations: – cases and pallets 100 cases or less deliver to:
  Monday - Friday 9:00 am - 4:00 pm Catholic Charities Center for Hope 517 E. Fifth Ave
  Saturday -Sunday 9:00 am – 4:00 pm Red Cross 1401 Grand Traverse
- Large Water Donations – 100 cases or more, one Semi Truck
  Monday - Friday 8:00 am - 4:30 pm Food Bank of Eastern Michigan 2300 Lapeer Rd
  810-239-4441 If Food Bank receives donations offers of more than one semi truck or if they are full, they will refer donor to Janet Hunter to make arrangements to donate to the warehouse.

III. Cash Donations www.flintkids.org

A. Financial Donations

- United Way, Community Foundation of Greater Flint, Hurley Children's Hospital and the Greater Flint Health Coalition have come together to create a fund that will address both the short-term and long-term needs of Flint residents. The Community Foundation is managing all financial donations and no administrative fee is assessed Direct Donation requests to www.flintkids.org or
  phone 810-232-8121 (United Way) 810 -767-8279 (Community Foundation of Greater Flint)

FLINT CHILD HEALTH & DEVELOPMENT FUND WILL PROVIDE SUPPORT TO FLINT CHILDREN EXPOSED TO LEAD

FLINT, MI – A group of concerned community members have created a charitable fund so that people nationwide can contribute to support both short and long term needs of Flint's children exposed to lead. The Fund, established at the Community Foundation of Greater Flint, is a supplemental resource to the ongoing pursuit of additional state and federal funding.

"If there was ever a time to invest in our children, it is now," said Dr. Mona Hanna-Attisha, Hurley Medical Center physician. "Our Flint children deserve every opportunity to be healthy and successful. The creation of this Fund will further ensure that our children are afforded the resources and interventions to overcome this population-wide exposure to lead."

The Flint Child Health & Development Fund will support the delivery of critical public health, medical, and community-based services and interventions that address and mitigate the short and long term impacts experienced by Flint, Michigan children exposed to lead as the result of the 2014-2016 Flint Water Crisis. The Flint Child Health & Development Fund will be used to aid children with interventions that support positive health outcomes for Flint children, including:

- Immediate response
- Optimal child health & development
- Early childhood education
- Continuous access to a pediatric medical home
- Access to infant and child behavioral health services
- Nutrition education
- Healthy food access
- Safe & healthy home environments
- Integrated social services
- Research

Grants from the Fund will be advised by a committee of community members with representation from residents, Hurley Children's Hospital, Mott Children's Health Center, Greater Flint Health Coalition, United Way of Genesee County, and the Community Foundation of Greater Flint.

"The Fund, and its Advisory Committee structure, ensures that donations will be used in the most effective way to help Flint children," said James Gaskin, Chief Executive Officer of United Way of Genesee County. "We extend our deep appreciation to all the donors who have responded generously to this emergency."

The Community Foundation is extremely grateful to the United Way of Genesee County and their CEO, Jamie Gaskin, for the dedication of staff, time and resources in the day to day coordination of the immediate response to this ongoing crisis, said Kathi Horton, President, Community Foundation of Greater Flint. "Together, the Community Foundation and United Way will be working with the fund advisory committee to ensure that the needs of Flint's children are addressed."

Give online to the Flint Child Health & Development Fund at www.flintkids.com.

Flint Water Response Team Plan for Saturday & Sunday, 01.23-24.16_V2.0_FINAL

Changes are highlighted in red

Key

WRT	Water Response Team
OIC	Officer In Charge
ARC	American Red Cross
OGCS	Office of Genesee County Sheriff
HH	Household
LEOC	Local Emergency Operations Center
NG	National Guard

Key Leaders

WRT OIC	Lt. Amy Dehner	
ARC OIC	Robert Gaskill-Clemons	

Plan

Agency	Team Types	Mission
MSP/OGCS/NG	15 Teams	3000 HH
ARC	40 Type V	7000 HH

MSP/OGCS/NG

Resource Status

Team Type & Quantity	Type: N/A Quantity: 18				
Resource	**Minimum**	**Minimum Confirmed**	**Notes**	**Date**	**Time**
Team Leader	15	15		1/22/16	1525
16ft -20ft box truck	15	15		1/22/16	1525
Truck Driver	0	0	Sourced from NG	1/22/16	1525
Team Member	180	180		1/22/16	1525
Team Transport Vehicle for 6-9 Team Members	15	15	12 from DOC & 3 from	1/22/16	1525

			Warehouse		
Team Transport Driver	15	15	12 DOC & 3 from NG	1/22/16	1525

Truck Driver	30	30	Sourced from ARC	1/22/16	1525
Team Member	150-300	150-300	Islamic Relief & Others	1/22/16	1525
Team Transport Vehicle for 2-4 Team Members	30	30	10 from warehouse & 20 from ARC	1/22/16	1525
Team Transport Vehicle Driver	30	30	Sourced from ARC	1/22/16	1525
Patrol Car	0	0		1/22/16	1525
iPads	40	10		1/22/16	1525
Hand Warmers	60	382		1/22/16	1525
Distribution Kit	7000	7000		1/22/16	1525

Execution:

Key Locations

Team	**Assembly Area**	**Hours of Operation**
OGCS/MSP	LEOC Genesee County Administration Building	0830-1600

	1101 Beach St, Flint	
ARC	ARC 1401 S Grand Traverse St, Flint	0730-1600
Warehouse	4315 North Clio Road, Flint	0700-1900

Critical Task: Assemble, coordinate, and monitor WRTs

OGCS/MSP Process:

1. Assign team leaders, team members, and routes to teams
2. Team Member check in
3. Conduct pre-deployment briefing to include team mission assignments, concept of operations, deployment locations, replenishment process, reporting process, and safety briefings (refer to OGCS_MSP WRT Volunteer Assembly Information V2.0_011816 for detailed information on volunteer processing at LEOC)
5. Provide training to new team members
6. Issue vest and badge to team members
7. Execute morning distribution assignment
8. Lunch served between 1230-1330
9. WRT OIC and Team Leaders midday brief
10. Execute afternoon distribution assignment
11. Conduct post-deployment debrief with team leaders and members
12. Collect vest and badge from team members

Sample Script for Team Members:

We're here to make sure you have all the resources you need. We have bottled water, a faucet and replacement filter, and a water test kit. Your water sample will assist in monitoring the lead and copper in the water system. Make sure to submit the water sample. The instructions are included here with the bottle, but make sure to submit within 14 days. If you need assistance or have other questions, you can call 211.

Execution Support:

Product Replenishment Process:

Team	Replenishment Trigger	Replenishment Location	Process
GCSO/MSP	0 Distribution Kits Remaining	Distribution Route: exact location determined by Team Leader	1. Contact warehouse to request replenishment truck 2. Coordinate replenishment location with warehouse 3. Exchange replenishment truck with empty truck
ARC	0 Distribution Kits Remaining	Clio Warehouse	Replenish ERV at warehouse

Warehouse

Tactics:

1. Load a minimum of 2 trucks in preparation for replenishment requests with product loads corresponding to Team Typing Matrix

Lunch

OGCS/MSP WRTs lunches will be provided by the ARC and coordinated by LEOC Logistics.

Reporting:

Tactics:

1. All WRTs will utilize iPads as the primary reporting method and the WRT Distribution Tracking Tool as a secondary method if iPads fail.

On call: Chad V., Bob K., Lawrence M., Mary L., Ken S., Tom D.,

Open: 2:04pm

- Update of activity
  - VOADs
  - Bob: SBDR no teams this week. Assessed a couple more. World Renew is sending 10-15 (18-20th of February), and we have close to 50 the first full week of March (7th), and 140 second week (14th), and 110-120 the third week (21st). Gearing up from Spring Break. Bob is out of town the next 5 weeks. Will still call in and do emails. LDS and supplies – Chad to direct to Bob (email). Year-end totals: est. value of total volunteer labor is $750,000 (35,000 hours, 430 volunteers, 468 mud-outs, 15 rebuilds, w/ 35-40 more). This will get us in to Hamtramck and Pershing neighborhood
  - Lawrence: 30 volunteers again this week – both short and long-term (in 7 basements today). Really good team response. Still would LOVE to find money for materials. **Will run out of money before basements.** Crisis never ended in Detroit. 23 open cases for repairs (waiting on shipments of floor tile), but these should be done soon. A couple open muck-outs
    - Bob: for floor tile removal, are you dealing w/ asbestos (7", 9", 11"). Started to remove, but then stopped. Taking up and disposal are both huge issues. Now, this year, were told we could seal in clear bags (current advice was that there is no risk taking up, just grinding and creating dust?). Reuben: not dealing with it. We subcontract it out (decided not to handle it). Use Go-Green and Becky has another contact
    - Lawrence: in Crisis CleanUp, we have contact almost 100% of the folks on the east-side. *We could not be doing this without Salvation Army support and LDS materials!* Reuben seconds this! Also, city debris pickup
  - Mary: Case Management will not meet again until February 13th
  - Tom D.: Unfortunately, we had 2 groups drop out. Moved to SC (not Detroit). Will correct that info. First group will come in the first full week of March. Working with Reuben, so we need to transition to Becky directly. Reuben to coordinate w/ Tom
  - Reuben: AHV is closing project this month (January 31st). Can see high levels of unmet needs, and attention has been too low (vs. what it deserves). So very proud of all the efforts of everyone here. Have 12 volunteers in field today. A couple mucks/guts and rebuilds to finish. Will provide final report. 12,000 hours w/ nearly 400 volunteers. New funding means we can come back (irons in the fire for a later date)
  - DCM – no report (see Mary comment on next meeting)

- Update from Volunteer Committee lead
  - Very, very busy in Flint. Still available to support (just call and/or email). Thank you AHV! Reuben: thank you Chad and celebrate our work and collaboration we've had here in Detroit!

- Next meeting: Chad to update

Adjourn: 2:31pm

Operational Concept

Single Family Residence

- Canvassing by National Guard teams supported by MSP and local sheriff
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)
- Currently, do not believe attribute changes are needed to form fields for collection. Major concern is individual filter burn rates for replacement. Potentially add an item for total number of residents in a home.

Multi-unit residence

- Canvassing by volunteer agencies
- Locations provided by City of Flint (Building & Safety Department) who can assist in coordination with local complex owners and assist in coordinating the collection of water for testing
- Maps to be provided by GIS to each team (daily) to ~~identify the area they are to canvass to avoid gaps and/or overlaps~~indicate where multi-unit housing is and the status of team activities from the prior day (percent complete)
- Each team will have one person tasked with data collection ~~using the iPad~~per complex and a results will be aggregated by address and sent to SEOC planning to update facility statuses using ESRI for Office to update dashboards and metrics ~~and application developed by GIS~~
- Specialized training provided to team members (different approach than single family residence canvassing)
- Contact made with each property owner or their designated agent (property manager) to identify the number of units occupied
- Each occupied unit at the address will be canvassed and water samples gathered for occupied and non-occupied units in coordination with landlord and maintenance staff.
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

All other targeted locations (Schools, churches, day care centers, restaurants, hospitals etc.)

- Canvassing by volunteer agencies in coordination with state agency overseeing specific facility type
- Locations provided by City of Flint (Building & Safety Department)
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- ~~Each team will have one person tasked with data collection using the iPad and application developed by GIS~~facility type will be tracked by the state agency who oversees that facility (i.e. ~ MDARD maintains master list for food and water facilities and updates status, MDCH maintains master list of hospitals, etc) Results will be tracked by state agency using ESRI for office to update dashboards and metrics.
- Specialized training provided to team members (different approach than single family residence canvassing)
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

Comment [PGCS1]: Consideration for this process if day of the week and time. If a big push is not on the weekend we will still run into the same issue with individuals who work.

Comment [PGCS2]: I thinking tracking should still be done by teams. The state agencies should be identifying the POC for each specialized facility.

Other considerations

- Who will be the lead for this canvassing effort?
- What is the target date for completion for each of the target groups (single family residence, multi-unit residence, and all other targeted locations)?
- What additional data fields will be added to the iPad application and who is responsible for developing the data and coordinating with GIS for inclusion in the application?
- What (if anything) is needed to address functional needs populations within each of the identified target groups/
- How do we effectively and accurately merge the data form the PODs with the data from the canvassing teams?

- What additional data fields will be added to the iPad application and who is responsible for developing the data and coordinating with GIS for inclusion in the application?
- What (if anything) is needed to address functional needs populations within each of the identified target groups/

Comment [WK(1]: Might be helpful to sit down and look at the map overlays that have the special circumstances included such as EMpower data for medically dependent individuals and the information that LARA has for licensed facilities.

Comment [WK(2]: Will you be scripting responses? For example What if they do not have the filter installed? What if they do not want to say how many people live there?

Comment [WK(3]: Will you be going to hospitals? I thought LARA was handling licensed facilities.

- How do we effectively and accurately merge the data form the PODs with the data from the canvassing teams?

Community Partners Meeting Minutes
1/14/16

- Agenda
  - Goal is to capture in one room what people are doing currently, plan for the future, problem solve, and make sure all the agencies working right now are coordinated in being stewards of the donor dollar, of volunteer's time, and of our own efforts
- Introductions
  - Tony Lasher, ED, Flint ARC
  - Justin Bays, subject matter expert, community partnerships, long term recovery
  - Mike Mitchell, ED Red Cross Grand Rapids, standing in for Tony for a few days in Flint
  - Linda Dintenfass, assistant director for external relations on this DO, also emergency preparedness specialist for UM-Flint, UM-Flint has been involved in a myriad of ways for a fair amount of time
  - Mike Lane, director of env, health, and safety at UM-Flint
  - Jenna Holmes,
  - Janet Hunter, NCSC
  - Kara Ross, VP, Food Bank
  - Chris DeVriendt, GCEMHSD
  - Matt Purcell, ED, GCCARD
  - Bill Goodwell, Salvation Army
  - Jenny McArdle, United Way
  - Sean Kammer, City of Flint
  - Tony Sitko, Flint Community Schools
  - Tamara Brickey, GCHD
  - Vicky Shultz, Catholic Charities
  - Sheryl Thompson, deputy director for Michigan health services Lansing, NDHHS-L
  - Eileen Tomasi, RN, Flint Community Schools
  - Rachel Wenelick, UWGC
  - Jamie Lee Venable, UWGC
  - Joe King, NEH
  - Victoria Fryer, Red Cross VRC Contact (victoria.fryer@redcross.org)
  - Linda Cieciek, Red Cross VRC Contact (linda.cieciek@redcross.org)

- EOC Information (Chris DeVriendt)
  - Unique situation, never happened before in US to this scope and breadth
  - Started as crisis, turned into declared emergency at state level
  - Public Act 368, ran through local health dept, as public health emergency
  - Declared emergency from city, Public Act 390
  - Elevated to county level, then elevated to state level
  - Every governmental agency involved is an employee of the governor
  - Getting direction from both Lansing and local level
  - Engaging with all partners
  - SEOC = state equivalent, nerve center, planning chief
  - EOC directing daily operations to get tasks done
  - This is not going to be a short emergency
  - Recent developments—legionnaire's disease

- Perception is reality: people don't trust filter, require more bottled water
- Groups work independently, but also need to coordinate to make sure everyone has water
- Door knocking has been a huge success
- Goal: knock on every single door in Flint in a week; as volunteers come in, this goal becomes more attainable
- Need experienced volunteers, for safety reasons—doubling numbers may be problematic
- Trucks go out on regular runs to distribution centers
- Quell public fears—we have water
- We are depleting national stockpile of filters
- Brita—if you buy a filter, they donate one to Flint
- Pipe fitters go into households for installation, can call 211 for help with installation
- If you have resources, email Chris
- Job descriptions will start being posted, increasing opportunities
- Eventually going to drive all filters to one brand/one model
- Looking to add two warehouses for one central repository, full of water and materials to distribute, including water tests
- New water emergency official logo for badges
- Concept of naming/labelling—"Flint Water Crisis"
    - Relief? Response? Recovery?
    - Official names of teams knocking on doors "Water Resource Team"
    - Public health community—distance from "recovery," "victims"

VRC (Volunteer Resource Center) Information

- State and EOC asked Red Cross to help set up VRC
- Assisted by United Way, Michigan Community Service Commission
- Physically set up for last 4 days
- Opened Wed 9 am to 7 pm
- Controlled soft opening
- Need to manage event based volunteers expectations, and partner agencies and stakeholders with jobs to fill
- If we make large announcement to public, we may get a huge influx of volunteers, without jobs to match volunteers with yet
- When event based volunteer comes, we may have a job for them right now, but at this point, it's more likely that we won't, but we will still capture information and follow up
- See process map and volunteer workforce request form (handouts)
- Direct forms to Chad
- People manage expectations of VRC and the VWRF are filled out correctly
- Protection of our volunteers is our number one priority, and second goal, make sure they are out in the field helping our efforts
- Important for coordination, to streamline process
- EOC and SEOC gives jobs to be filled by volunteers
- Requests go from Chad to VRC
- VRC will make sure we have a volunteer to match skills to task
- See overview, first revision (handout)
- Volunteer points of contact: Victoria Fryer and Linda Cieciek

- Age requirement to be determined
- Right now 211 fielding all calls, instructed to come to Red Cross building to become volunteer, one informational access point

Partner Activities

- Three key things to know:
  - Needs
  - Current
  - Future

Catholic Charities

- Currenlty distributing water through community closet
- Not a lot of water to hand out
- Designated drop off location
- Would like to be able to distribute water at all 3 soup kitchens, not just community closet
- Want to spread reach
- Looking for more water donations
- For the future, hope to have filters and cartridges
- Food banks can store up to 8 semis, Catholic Charities have some space

Water Distribution

- Current Sites
  - Catholic Charities
  - Individual churches—any ideas to combine effort
  - Christ enrichment center
  - Salvation Army
  - Foss Avenue
  - Beecher
  - Christian love faith center
  - St. Luke's Catholic Church
  - Fire Stations 1, 5, 6, 8, 2
  - UAW
  - Chrysler
  - Next week: Berston fieldhouse, Brennan Center, Hasselbring
  - Flint schools (donations distributed to schools, daycares), not distributing to community at large right now
  - Enterprise car rental—sporadic drives and giveaways, started national campaign
  - Art Van, metro Detroit, Lansing, Flint, collecting water, coming to Catholic charities on a weekly basis
  - Flint City Hall distributing filters
- Water Sources
  - Largest source is FEMA
  - Donations (public, charitable)

Filters

- Distribution Sites
    - City of Flint
    - GCCARD
    - Fire stations
    - City Hall
    - DHSS Offices
    - Churches
    - Canvas
    - Housing Comm
    - Concerned Pastors Group
    - Open to **clients only, not public**: health dept and associated programs (WIC clinic, primary care clinic, AIDS Wellness, Planned Parenthood, DaVita Dialysis, FMC Dialysis, Grand Blanc Community Schools)
    - Brita started in-kind donation (looking at a month, same process for other filters into warehouse)
    - State authorizes purchases from Home Depot, etc
    - Brands:
        - Pur (Faucet)
        - Brita (Faucet)
        - Zero Water Pitcher
    - Filters have LED indicator for replacement, pitchers have indicator stick
    - Problems: hot water degrades filters
    - Filters need replacement based on amount of water running through, not based on time
    - Trying to push everything to Brita (short-medium term)
    - In the short medium term, work on messaging
    - Multi-year problem (Chris projection: 19 years)
    - Filters, education, support needed for lifetime
        - Identifying sources for this long-term support
    - GCCARD can handle volume of filters currently
    - Supply of water will require space
    - Years needed to restore trust, to replace infrastructure/piping
    - Minimal control on filters, little to no controls on the distribution of water
    - State goal: every church a distribution site
    - Mott set up refillable, filtered water stations
    - DEQ looking into filter replacements in schools/colleges
    - Operational security measure
        - Broken up pallets of water—make sure to inspect water
    - Smaller donations harder to manage
    - Food banks can store up to 8 semis, Catholic Charities have some space

Water Testing Kits

- Distribution Sites
    - City Hall
    - Fire Stations
    - City water plant
- Drop Off Sites for Testing Kits
    - City Hall

Public Information

- How to set up systems for community members to be updated?
- Education, getting answers out
- Are we all using the same/consistent information
- Sources of info
    - Joint Information Center (also to update 211, but include Jamie-Lee Venable to keep in loop)
    - Genesee County Health Department, website has many resources, fact sheets, press releases, etc.
    - Volunteers
    - Identify point of contact for organizations
    - Nutrition, water usage
        - Health department: common questions on handwashing, bathing, filters
        - Communications person for health department: Shana (?)
- Biggest source of public information is the volunteers themselves, vetted by JIC

Vulnerable Populations

- International students, non-English speaking
- Undocumented (Catholic Charities, Hispanic Tech Center, Our Lady of Guadalupe Church)
- Homebound, non-mobile
- Chinese community, limited communication (work with UM-Flint international students?)
- Translations of public health information
    - Translation services (contracted out upon request)
    - Some print materials in English, Spanish, Arabic
    - Request to state to get more fact sheets in different languages (get Mandarin added to list?)
- Locations with higher volumes of people—basic faucet filters run out very quickly
    - UM-Flint has a supply partner with good rate for larger filters (Michael Lang)
    - NSF 42 53, certified for lead filtering
    - Food bank has list of larger capacity filters
    - Locations with high water use in the city—get list?
    - Smaller businesses, access to bigger filters
- Mentally ill—no plan, hard to capture data

    - Able to leave homes? Comfortable in public?
    - Help of Genesee Health System to better identify this group
    - Rehab center need for filters
    - Clients feel stigma in community, so afraid to go to distribution sites, not willing to open doors to police and service men
- All vulnerable groups need continuous attention follow up in the months to come
- VOAD (disaster volunteers) in communication with Red Cross
    - One main function is to go to the homebound
    - Need to find gaps in delivery, then info communicated to larger volunteer organizations
- Restaurants
    - Health department working with state to create guidelines for restaurants
    - Not every area of Flint is unsafe
    - In general, restaurants safer than household residents, but still problematic
    - Hot water is more problematic
    - Fast food restaurants especially need attention
    - Reach out to Michigan dept of agriculture?
    - Priority to get households safe, then to work on restaurants
    - Help bring confidence back to the community with restaurants reporting they have tested their water
    - Party stores, gas stations, fountain drinks—more concerning, harder to regulate

Volunteer Needs

- Shifting from state troopers to volunteers
- Troopers, sheriffs, state employees going door to door through Friday
    - Community members added to these teams
    - Record info from door to door on ipads
    - Keep evaluating, create teams to do this through VRC
- UM-Flint wants specific info about volunteer opportunities (placements, shifts) to send out to students and campus clubs
    - Start at VRC
    - See Victoria Fryer (VRC Contact) for large groups
- Food will be provided
- Current activities being staffed at VRC:
    - Fire stations
    - Need 10 additional individuals per shift
    - Shifts: 9 am to 4 pm, 4 pm to 9:30 pm
    - 15 additional people needed for Friday
    - 40 additional people needed Saturday for canvasing
    - 40 additional people needed for Sunday
    - VRC hours of operation: 9 am to 7 pm
        - Intake process approximately 30 minutes

- Another job opportunity is data entry
    - Recorded addresses collected at distribution centers into computer
- 20 volunteers needed to warehouse starting Friday
- Family members, faith based organization, clubs—spread the word, ease into public announcement at the larger level
    - Come register, even if no immediate placement—need later down the road
- United Way will contact approx. 200 corporate volunteerism sources

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 20, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/20/2016
  - 23 families contacted
  - 17 EBL investigations completed.
  - 17 Water sampling completed.
  - 8 Homes where water filters were observed
  - **10 EBL Reports Received.**
    - **10 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - **9 homes with lead-based paint hazards**
    - **6 homes with lead detected in tap water**
      - 1 home with lead water levels greater than 15 ppb
  - 4 investigations scheduled.
  - **6 applications received for the Lead Safe Homes Program, 1 family enrolled.**
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- Developed metrics related to elevated blood lead testing among children < 6 years of age in Flint who are enrolled in Medicaid.
- Held conference call with CDC to discuss development of tools related to identification of and recommendations for facilities at greater risk for transmission of opportunistic pathogens.
- Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.
- Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.

Filter & Water Distribution Sheryl Thompson

- **Filters distributed January 1-20, 2016**

Brita Filters	**1,706**
Zero Water Pitchers	**204**
PUR Filters	**92**
Replacement Cartridges - Brita	**2,157**
Replacement Cartridges - PUR	**382**
Replacement Cartridges - Zero	**247**

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Hosted site visit from ATSDR/NCEH staff.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers will replace fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

Community Partners Meeting Minutes
1/14/16

- Agenda
  - Goal is to capture in one room what people are doing currently, plan for the future, problem solve, and make sure all the agencies working right now are coordinated in being stewards of the donor dollar, of volunteer's time, and of our own efforts
- Introductions
  - Tony Lasher, ED, Flint ARC
  - Justin Bays, subject matter expert, community partnerships, long term recovery
  - Mike Mitchell, ED Red Cross Grand Rapids, standing in for Tony for a few days in Flint
  - Linda Dintenfass, assistant director for external relations on this DO, also emergency preparedness specialist for UM-Flint, UM-Flint has been involved in a myriad of ways for a fair amount of time
  - Mike Lane, director of env, health, and safety at UM-Flint
  - Jenna Holmes,
  - Janet Hunter, NCSC
  - Kara Ross, VP, Food Bank
  - Chris DeVriendt, GCEMHSD
  - Matt Purcell, ED, GCCARD
  - Bill Goodwell, Salvation Army
  - Jenny McArdle, United Way
  - Sean Kammer, City of Flint
  - Tony Sitko, Flint Community Schools
  - Tamara Brickey, GCHD
  - Vicky Shultz, Catholic Charities
  - Sheryl Thompson, deputy director for Michigan health services Lansing, NDHHS-L
  - Eileen Tomasi, RN, Flint Community Schools
  - Rachel Wenelick, UWGC
  - Jamie Lee Venable, UWGC
  - Joe King, NEH
  - Victoria Fryer, Red Cross VRC Contact (victoria.fryer@redcross.org)
  - Linda Cieciek, Red Cross VRC Contact (linda.cieciek@redcross.org)

- EOC Information (Chris DeVriendt)
  - Unique situation, never happened before in US to this scope and breadth
  - Started as crisis, turned into declared emergency at state level
  - Public Act 368, ran through local health dept, as public health emergency
  - Declared emergency from city, Public Act 390
  - Elevated to county level, then elevated to state level
  - Every governmental agency involved is an employee of the governor
  - Getting direction from both Lansing and local level
  - Engaging with all partners
  - SEOC = state equivalent, nerve center, planning chief
  - EOC directing daily operations to get tasks done
  - This is not going to be a short emergency
  - Recent developments—legionnaire's disease

- Perception is reality: people don't trust filter, require more bottled water
- Groups work independently, but also need to coordinate to make sure everyone has water
- Door knocking has been a huge success
- Goal: knock on every single door in Flint in a week; as volunteers come in, this goal becomes more attainable
- Need experienced volunteers, for safety reasons—doubling numbers may be problematic
- Trucks go out on regular runs to distribution centers
- Quell public fears—we have water
- We are depleting national stockpile of filters
- Brita—if you buy a filter, they donate one to Flint
- Pipe fitters go into households for installation, can call 211 for help with installation
- If you have resources, email Chris
- Job descriptions will start being posted, increasing opportunities
- Eventually going to drive all filters to one brand/one model
- Looking to add two warehouses for one central repository, full of water and materials to distribute, including water tests
- New water emergency official logo for badges
- Concept of naming/labelling—"Flint Water Crisis"
  - Relief? Response? Recovery?
  - Official names of teams knocking on doors "Water Resource Team"
  - Public health community—distance from "recovery," "victims"

VRC (Volunteer Resource Center) Information

- State and EOC asked Red Cross to help set up VRC
- Assisted by United Way, Michigan Community Service Commission
- Physically set up for last 4 days
- Opened Wed 9 am to 7 pm
- Controlled soft opening
- Need to manage event based volunteers expectations, and partner agencies and stakeholders with jobs to fill
- If we make large announcement to public, we may get a huge influx of volunteers, without jobs to match volunteers with yet
- When event based volunteer comes, we may have a job for them right now, but at this point, it's more likely that we won't, but we will still capture information and follow up
- See process map and volunteer workforce request form (handouts)
- Direct forms to Chad
- People manage expectations of VRC and the VWRF are filled out correctly
- Protection of our volunteers is our number one priority, and second goal, make sure they are out in the field helping our efforts
- Important for coordination, to streamline process
- EOC and SEOC gives jobs to be filled by volunteers
- Requests go from Chad to VRC
- VRC will make sure we have a volunteer to match skills to task
- See overview, first revision (handout)
- Volunteer points of contact: Victoria Fryer and Linda Cieciek

- Age requirement to be determined
- Right now 211 fielding all calls, instructed to come to Red Cross building to become volunteer, one informational access point

Partner Activities

- Three key things to know:
  - Needs
  - Current
  - Future

Catholic Charities

- Currenlty distributing water through community closet
- Not a lot of water to hand out
- Designated drop off location
- Would like to be able to distribute water at all 3 soup kitchens, not just community closet
- Want to spread reach
- Looking for more water donations
- For the future, hope to have filters and cartridges
- Food banks can store up to 8 semis, Catholic Charities have some space

Water Distribution

- Current Sites
  - Catholic Charities
  - Individual churches—any ideas to combine effort
  - Christ enrichment center
  - Salvation Army
  - Foss Avenue
  - Beecher
  - Christian love faith center
  - St. Luke's Catholic Church
  - Fire Stations 1, 5, 6, 8, 2
  - UAW
  - Chrysler
  - Next week: Berston fieldhouse, Brennan Center, Hasselbring
  - Flint schools (donations distributed to schools, daycares), not distributing to community at large right now
  - Enterprise car rental—sporadic drives and giveaways, started national campaign
  - Art Van, metro Detroit, Lansing, Flint, collecting water, coming to Catholic charities on a weekly basis
  - Flint City Hall distributing filters
- Water Sources
  - Largest source is FEMA
  - Donations (public, charitable)

Filters

- Distribution Sites
  - City of Flint
  - GCCARD
  - Fire stations
  - City Hall
  - DHSS Offices
  - Churches
  - Canvas
  - Housing Comm
  - Concerned Pastors Group
  - Open to **clients only, not public**: health dept and associated programs (WIC clinic, primary care clinic, AIDS Wellness, Planned Parenthood, DaVita Dialysis, FMC Dialysis, Grand Blanc Community Schools)
  - Brita started in-kind donation (looking at a month, same process for other filters into warehouse)
  - State authorizes purchases from Home Depot, etc
  - Brands:
    - Pur (Faucet)
    - Brita (Faucet)
    - Zero Water Pitcher
  - Filters have LED indicator for replacement, pitchers have indicator stick
  - Problems: hot water degrades filters
  - Filters need replacement based on amount of water running through, not based on time
  - Trying to push everything to Brita (short-medium term)
  - In the short medium term, work on messaging
  - Multi-year problem (Chris projection: 19 years)
  - Filters, education, support needed for lifetime
    - Identifying sources for this long-term support
  - GCCARD can handle volume of filters currently
  - Supply of water will require space
  - Years needed to restore trust, to replace infrastructure/piping
  - Minimal control on filters, little to no controls on the distribution of water
  - State goal: every church a distribution site
  - Mott set up refillable, filtered water stations
  - DEQ looking into filter replacements in schools/colleges
  - Operational security measure
    - Broken up pallets of water—make sure to inspect water
  - Smaller donations harder to manage
  - Food banks can store up to 8 semis, Catholic Charities have some space

Water Testing Kits

- Distribution Sites
    - City Hall
    - Fire Stations
    - City water plant
- Drop Off Sites for Testing Kits
    - City Hall

Public Information

- How to set up systems for community members to be updated?
- Education, getting answers out
- Are we all using the same/consistent information
- Sources of info
    - Joint Information Center (also to update 211, but include Jamie-Lee Venable to keep in loop)
    - Genesee County Health Department, website has many resources, fact sheets, press releases, etc.
    - Volunteers
    - Identify point of contact for organizations
    - Nutrition, water usage
        - Health department: common questions on handwashing, bathing, filters
        - Communications person for health department: Shana (?)
- Biggest source of public information is the volunteers themselves, vetted by JIC

Vulnerable Populations

- International students, non-English speaking
- Undocumented (Catholic Charities, Hispanic Tech Center, Our Lady of Guadalupe Church)
- Homebound, non-mobile
- Chinese community, limited communication (work with UM-Flint international students?)
- Translations of public health information
    - Translation services (contracted out upon request)
    - Some print materials in English, Spanish, Arabic
    - Request to state to get more fact sheets in different languages (get Mandarin added to list?)
- Locations with higher volumes of people—basic faucet filters run out very quickly
    - UM-Flint has a supply partner with good rate for larger filters (Michael Lang)
    - NSF 42 53, certified for lead filtering
    - Food bank has list of larger capacity filters
    - Locations with high water use in the city—get list?
    - Smaller businesses, access to bigger filters
- Mentally ill—no plan, hard to capture data

    - Able to leave homes? Comfortable in public?
    - Help of Genesee Health System to better identify this group
    - Rehab center need for filters
    - Clients feel stigma in community, so afraid to go to distribution sites, not willing to open doors to police and service men
- All vulnerable groups need continuous attention follow up in the months to come
- VOAD (disaster volunteers) in communication with Red Cross
    - One main function is to go to the homebound
    - Need to find gaps in delivery, then info communicated to larger volunteer organizations
- Restaurants
    - Health department working with state to create guidelines for restaurants
    - Not every area of Flint is unsafe
    - In general, restaurants safer than household residents, but still problematic
    - Hot water is more problematic
    - Fast food restaurants especially need attention
    - Reach out to Michigan dept of agriculture?
    - Priority to get households safe, then to work on restaurants
    - Help bring confidence back to the community with restaurants reporting they have tested their water
    - Party stores, gas stations, fountain drinks—more concerning, harder to regulate

Volunteer Needs

- Shifting from state troopers to volunteers
- Troopers, sheriffs, state employees going door to door through Friday
    - Community members added to these teams
    - Record info from door to door on ipads
    - Keep evaluating, create teams to do this through VRC
- UM-Flint wants specific info about volunteer opportunities (placements, shifts) to send out to students and campus clubs
    - Start at VRC
    - See Victoria Fryer (VRC Contact) for large groups
- Food will be provided
- Current activities being staffed at VRC:
    - Fire stations
    - Need 10 additional individuals per shift
    - Shifts: 9 am to 4 pm, 4 pm to 9:30 pm
    - 15 additional people needed for Friday
    - 40 additional people needed Saturday for canvasing
    - 40 additional people needed for Sunday
    - VRC hours of operation: 9 am to 7 pm
        - Intake process approximately 30 minutes

- Another job opportunity is data entry
    - Recorded addresses collected at distribution centers into computer
- 20 volunteers needed to warehouse starting Friday
- Family members, faith based organization, clubs—spread the word, ease into public announcement at the larger level
    - Come register, even if no immediate placement—need later down the road
- United Way will contact approx. 200 corporate volunteerism sources

Requirements for Licensed Food Establishments Using City of Flint Water

January 13, 2016

Attention: This applies to licensed restaurants, grocery stores, convenience stores, food processors and food warehouses.

- The best way to determine if water contains lead is to have it tested. Safe results can be posted to inform consumers.
- To schedule a free collection and analysis of your food establishment's water for lead, call 1-800-292-3939 and state you're a "Flint food establishment requesting a water test." Be prepared to provide a time when your water system can be sampled where water won't have been used for at least 6 hours. Sampling appointments as early as 5 a.m. are available.
- Restaurants with general questions should contact Genesee County Health Department at: 810-257-3612.
- Grocery or Food Processing establishments with general questions should contact MDARD at: 1-800-292-3939.

Unless the water has been tested and found to not have a lead concern, do the following:

- Flush water lines for 5 minutes each day before using or serving water and after 6 hours of no water use. Then flush other equipment such as pop machines for at least 1-2 minutes.
- Install an NSF Standard 53 certified filter on the faucet where drinking/cooking water is obtained from. Approved filter information for faucet or in-line filters can be found at: http://nsf.com/newsroom/statement-regarding-flint-water-system-lead-issue-and-to-certification-nsf. Filters must be changed based upon the manufacturer's recommendations.
- Use cold water and store it for immediate consumption.
- Always use cold water for drinking, cooking and cleaning/rinsing food.
- Hot water must be used for dishwashing.

Other equipment that may use city water:

- Ice machines – Install a water filter on the supply line or use bagged ice in drinking water.
- Pop machines – Flush for 1 minute daily or use bottled beverages.
- Coffee machines or Tea Urns – Flush for 1-2 minutes daily or use filtered water. These products may be very low risk as young children under 6 are not likely to consume these.
- Slush machines – Use filtered water.
- Spray misters – Flush for 1-2 minutes daily or use filtered water.

A licensed plumber can check your plumbing and service lines for lead soldering or lead service lines.

MDHHS Michigan Department of Health & Human Services

DEQ

Michigan Department of Agriculture & Rural Development

Operational Concept

Single Family Residence

- Canvassing by National Guard teams
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

Multi-unit residence

- Canvassing by volunteer agencies
- Locations provided by City of Flint (Building & Safety Department)
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- Specialized training provided to team members (different approach than single family residence canvassing)
- Contact made with each property owner or their designated agent (property manager) to identify the number of units occupied
- Each occupied unit at the address will be canvassed
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

All other targeted locations (Schools, churches, day care centers, restaurants, hospitals etc.)

- Canvassing by volunteer agencies
- Locations provided by City of Flint (Building & Safety Department)
- Maps to be provided by GIS to each team (daily) to identify the area they are to canvass to avoid gaps and/or overlaps
- Each team will have one person tasked with data collection using the iPad and application developed by GIS
- Specialized training provided to team members (different approach than single family residence canvassing)
- A "script" will be provided for consistency of canvassing (e.g. Do you have a filter kit? What type of filter do you have? Has the filter been installed? Do you have replacement cartridges for your filter kit? How many cartridges do you have? How many people reside at this address? etc.)

Other considerations

- Who will be the lead for this canvassing effort?
- What is the target date for completion for each of the target groups (single family residence, multi-unit residence, and all other targeted locations)?
- What additional data fields will be added to the iPad application and who is responsible for developing the data and coordinating with GIS for inclusion in the application?
- What (if anything) is needed to address functional needs populations within each of the identified target groups/
- How do we effectively and accurately merge the data form the PODs with the data from the canvassing teams?

NSF International was founded in 1944 from the University of Michigan's School of Public Health as the National Sanitation Foundation (NSF) to standardize sanitation and food safety requirements.

The NSF Water Division certifies products that come into contact with drinking water, such as plumbing components, water treatment chemicals and drinking water filters, as well as pool and spa equipment. NSF led the development of American National Standards for all materials and products that treat or come in contact with drinking water to help protect public health and the environment and minimize adverse health effects. In 1990, the U.S. EPA replaced its own drinking water product advisory program with these NSF standards. NSF is accredited by the American National Standards Institute (ANSI) to develop American National Standards.

ANSI accredits standards that are developed by representatives of other standards organizations, government agencies, consumer groups, companies, and others. These standards ensure that the characteristics and performance of products are consistent, that people use the same definitions and terms, and that products are tested the same way. ANSI also accredits organizations that carry out product or personnel certification in accordance with requirements defined in international standards.

To help address concerns about the safety and performance of products sold worldwide and marketed for treating household water supplies, NSF International developed several American National Standards covering a wide array of water treatment systems, including drinking water filters.

To earn NSF certification, water treatment systems must undergo extensive testing to confirm that they meet the strict requirements of American National Standards. In addition to verifying that the system is structurally sound, NSF verifies that:

- The contaminant reduction claims shown on the label are true.
- The system does not add anything harmful to the water.
- The product labeling, advertising and literature are not misleading.

NSF certification for performance means they have tested a water treatment product using specific procedures and have confirmed that it can effectively reduce the contaminants claimed on the product label. They also require all products to be re-tested periodically and re-certified each year, which ensures that products continue to meet all stated requirements over time.

NSF International has confirmed that the three water filters being distributed by officials in Flint, Michigan are currently certified by NSF International for lead reduction.

Specifically, Brita Faucet Filtration System, model number SAFF-100 (in white, black or chrome), the PUR Faucet Mount, model number FM-3700B, and the ZeroWater® 23-Cup Dispenser, model number ZD-018, are certified for lead reduction in accordance with NSF/ANSI 53 – Drinking Water Treatment Unit Standard for Health Effects.

Individuals wishing to verify that a specific filter is NSF certified can do so via the NSF website. Here are the links to verify each certification: Brita Faucet Filter System SAFF-100, PUR Faucet Water Filter System and the ZeroWater® 23-Cup Dispenser.

The State of Michigan procured the above listed filters due to the NSF/ANSI 53 certifications and the availability and sustainment of future orders by vendors on state contract.

Potential questions from partners at Community Partnership Meeting:

- What does the FEMA Emergency Dec mean? What assistance will FEMA be providing? What is FEMA's role and how will this impact current operations?
- Will any trainings be available to partners through FEMA?
- Will the state be appealing the denial of a FEMA Major Disaster Declaration?
- What is the current plan for acquisition and distribution of commodities?
- How long will distribution of supplies last? How long will door-to-door canvassing operations last?
- What is the long term plan for acquisition and distribution of commodities?
- How long will direct state support be available? (door-to-door canvassing teams, national guard support, POD staffing, etc)
    - What will state support look like after response is complete?
- How will communication flow between govt and non-gov't orgs after response phase, especially as it relates to coordinated, government-led public messaging?
- What is the expectation of voluntary agencies for short and long term operations? What will the next phase look like?
- What is the future of the warehouse re: management & staffing, funding, equipment, trash removal, safety & security, etc?
- What is the long term plan/solution for water in Flint? What is the end goal? How will we get there?
- What health resources will be available for the long term? Will there be any federal health resources available?
- Will any of the voluntary agency activity or volunteer labor be eligible under FEMA donated resources policy for the state match?
- Is there a filter for shower heads? If so, will they be supplied to affected residents?
- Any range of health questions - EPA, CDC, Legionnaire's Disease, ongoing testing for children
- Are there any financial resources for water bill relief? (People at risk for having water shut off due to raised bills and residents not paying.)

Community Partners Meeting Minutes
1/14/16

- Agenda
  - Goal is to capture in one room what people are doing currently, plan for the future, problem solve, and make sure all the agencies working right now are coordinated in being stewards of the donor dollar, of volunteer's time, and of our own efforts
- Introductions
  - Tony Lasher, ED, Flint ARC
  - Justin Bays, subject matter expert, community partnerships, long term recovery
  - Mike Mitchell, ED Red Cross Grand Rapids, standing in for Tony for a few days in Flint
  - Linda Dintenfass, assistant director for external relations on this DO, also emergency preparedness specialist for UM-Flint, UM-Flint has been involved in a myriad of ways for a fair amount of time
  - Mike Lane, director of env, health, and safety at UM-Flint
  - Jenna Holmes,
  - Janet Hunter, NCSC
  - Kara Ross, VP, Food Bank
  - Chris DeVriendt, GCEMHSD
  - Matt Purcell, ED, GCCARD
  - Bill Goodwell, Salvation Army
  - Jenny McArdle, United Way
  - Sean Kammer, City of Flint
  - Tony Sitko, Flint Community Schools
  - Tamara Brickey, GCHD
  - Vicky Shultz, Catholic Charities
  - Sheryl Thompson, deputy director for Michigan health services Lansing, NDHHS-L
  - Eileen Tomasi, RN, Flint Community Schools
  - Rachel Wenelick, UWGC
  - Jamie Lee Venable, UWGC
  - Joe King, NEH
  - Victoria Fryer, Red Cross VRC Contact (victoria.fryer@redcross.org)
  - Linda Cieciek, Red Cross VRC Contact (linda.cieciek@redcross.org)

- EOC Information (Chris DeVriendt)
  - Unique situation, never happened before in US to this scope and breadth
  - Started as crisis, turned into declared emergency at state level
  - Public Act 368, ran through local health dept, as public health emergency
  - Declared emergency from city, Public Act 390
  - Elevated to county level, then elevated to state level
  - Every governmental agency involved is an employee of the governor
  - Getting direction from both Lansing and local level
  - Engaging with all partners
  - SEOC = state equivalent, nerve center, planning chief
  - EOC directing daily operations to get tasks done
  - This is not going to be a short emergency
  - Recent developments—legionnaire's disease

- Perception is reality: people don't trust filter, require more bottled water
- Groups work independently, but also need to coordinate to make sure everyone has water
- Door knocking has been a huge success
- Goal: knock on every single door in Flint in a week; as volunteers come in, this goal becomes more attainable
- Need experienced volunteers, for safety reasons—doubling numbers may be problematic
- Trucks go out on regular runs to distribution centers
- Quell public fears—we have water
- We are depleting national stockpile of filters
- Brita—if you buy a filter, they donate one to Flint
- Pipe fitters go into households for installation, can call 211 for help with installation
- If you have resources, email Chris
- Job descriptions will start being posted, increasing opportunities
- Eventually going to drive all filters to one brand/one model
- Looking to add two warehouses for one central repository, full of water and materials to distribute, including water tests
- New water emergency official logo for badges
- Concept of naming/labelling—"Flint Water Crisis"
    - Relief? Response? Recovery?
    - Official names of teams knocking on doors "Water Resource Team"
    - Public health community—distance from "recovery," "victims"

VRC (Volunteer Resource Center) Information

- State and EOC asked Red Cross to help set up VRC
- Assisted by United Way, Michigan Community Service Commission
- Physically set up for last 4 days
- Opened Wed 9 am to 7 pm
- Controlled soft opening
- Need to manage event based volunteers expectations, and partner agencies and stakeholders with jobs to fill
- If we make large announcement to public, we may get a huge influx of volunteers, without jobs to match volunteers with yet
- When event based volunteer comes, we may have a job for them right now, but at this point, it's more likely that we won't, but we will still capture information and follow up
- See process map and volunteer workforce request form (handouts)
- Direct forms to Chad
- People manage expectations of VRC and the VWRF are filled out correctly
- Protection of our volunteers is our number one priority, and second goal, make sure they are out in the field helping our efforts
- Important for coordination, to streamline process
- EOC and SEOC gives jobs to be filled by volunteers
- Requests go from Chad to VRC
- VRC will make sure we have a volunteer to match skills to task
- See overview, first revision (handout)
- Volunteer points of contact: Victoria Fryer and Linda Cieciek

- Age requirement to be determined
- Right now 211 fielding all calls, instructed to come to Red Cross building to become volunteer, one informational access point

Partner Activities

- Three key things to know:
  - Needs
  - Current
  - Future

Catholic Charities

- Currenlty distributing water through community closet
- Not a lot of water to hand out
- Designated drop off location
- Would like to be able to distribute water at all 3 soup kitchens, not just community closet
- Want to spread reach
- Looking for more water donations
- For the future, hope to have filters and cartridges
- Food banks can store up to 8 semis, Catholic Charities have some space

Water Distribution

- Current Sites
  - Catholic Charities
  - Individual churches—any ideas to combine effort
  - Christ enrichment center
  - Salvation Army
  - Foss Avenue
  - Beecher
  - Christian love faith center
  - St. Luke's Catholic Church
  - Fire Stations 1, 5, 6, 8, 2
  - UAW
  - Chrysler
  - Next week: Berston fieldhouse, Brennan Center, Hasselbring
  - Flint schools (donations distributed to schools, daycares), not distributing to community at large right now
  - Enterprise car rental—sporadic drives and giveaways, started national campaign
  - Art Van, metro Detroit, Lansing, Flint, collecting water, coming to Catholic charities on a weekly basis
  - Flint City Hall distributing filters
- Water Sources
  - Largest source is FEMA
  - Donations (public, charitable)

Filters

- Distribution Sites
  - City of Flint
  - GCCARD
  - Fire stations
  - City Hall
  - DHSS Offices
  - Churches
  - Canvas
  - Housing Comm
  - Concerned Pastors Group
  - Open to **clients only, not public**: health dept and associated programs (WIC clinic, primary care clinic, AIDS Wellness, Planned Parenthood, DaVita Dialysis, FMC Dialysis, Grand Blanc Community Schools)
  - Brita started in-kind donation (looking at a month, same process for other filters into warehouse)
  - State authorizes purchases from Home Depot, etc
  - Brands:
    - Pur (Faucet)
    - Brita (Faucet)
    - Zero Water Pitcher
  - Filters have LED indicator for replacement, pitchers have indicator stick
  - Problems: hot water degrades filters
  - Filters need replacement based on amount of water running through, not based on time
  - Trying to push everything to Brita (short-medium term)
  - In the short medium term, work on messaging
  - Multi-year problem (Chris projection: 19 years)
  - Filters, education, support needed for lifetime
    - Identifying sources for this long-term support
  - GCCARD can handle volume of filters currently
  - Supply of water will require space
  - Years needed to restore trust, to replace infrastructure/piping
  - Minimal control on filters, little to no controls on the distribution of water
  - State goal: every church a distribution site
  - Mott set up refillable, filtered water stations
  - DEQ looking into filter replacements in schools/colleges
  - Operational security measure
    - Broken up pallets of water—make sure to inspect water
  - Smaller donations harder to manage
  - Food banks can store up to 8 semis, Catholic Charities have some space

Water Testing Kits

- Distribution Sites
    - City Hall
    - Fire Stations
    - City water plant
- Drop Off Sites for Testing Kits
    - City Hall

Public Information

- How to set up systems for community members to be updated?
- Education, getting answers out
- Are we all using the same/consistent information
- Sources of info
    - Joint Information Center (also to update 211, but include Jamie-Lee Venable to keep in loop)
    - Genesee County Health Department, website has many resources, fact sheets, press releases, etc.
    - Volunteers
    - Identify point of contact for organizations
    - Nutrition, water usage
        - Health department: common questions on handwashing, bathing, filters
        - Communications person for health department: Shana (?)
- Biggest source of public information is the volunteers themselves, vetted by JIC

Vulnerable Populations

- International students, non-English speaking
- Undocumented (Catholic Charities, Hispanic Tech Center, Our Lady of Guadalupe Church)
- Homebound, non-mobile
- Chinese community, limited communication (work with UM-Flint international students?)
- Translations of public health information
    - Translation services (contracted out upon request)
    - Some print materials in English, Spanish, Arabic
    - Request to state to get more fact sheets in different languages (get Mandarin added to list?)
- Locations with higher volumes of people—basic faucet filters run out very quickly
    - UM-Flint has a supply partner with good rate for larger filters (Michael Lang)
    - NSF 42 53, certified for lead filtering
    - Food bank has list of larger capacity filters
    - Locations with high water use in the city—get list?
    - Smaller businesses, access to bigger filters
- Mentally ill—no plan, hard to capture data

- Able to leave homes? Comfortable in public?
- Help of Genesee Health System to better identify this group
- Rehab center need for filters
- Clients feel stigma in community, so afraid to go to distribution sites, not willing to open doors to police and service men

- All vulnerable groups need continuous attention follow up in the months to come
- VOAD (disaster volunteers) in communication with Red Cross
  - One main function is to go to the homebound
  - Need to find gaps in delivery, then info communicated to larger volunteer organizations
- Restaurants
  - Health department working with state to create guidelines for restaurants
  - Not every area of Flint is unsafe
  - In general, restaurants safer than household residents, but still problematic
  - Hot water is more problematic
  - Fast food restaurants especially need attention
  - Reach out to Michigan dept of agriculture?
  - Priority to get households safe, then to work on restaurants
  - Help bring confidence back to the community with restaurants reporting they have tested their water
  - Party stores, gas stations, fountain drinks—more concerning, harder to regulate

Volunteer Needs

- Shifting from state troopers to volunteers
- Troopers, sheriffs, state employees going door to door through Friday
  - Community members added to these teams
  - Record info from door to door on ipads
  - Keep evaluating, create teams to do this through VRC
- UM-Flint wants specific info about volunteer opportunities (placements, shifts) to send out to students and campus clubs
  - Start at VRC
  - See Victoria Fryer (VRC Contact) for large groups
- Food will be provided
- Current activities being staffed at VRC:
  - Fire stations
  - Need 10 additional individuals per shift
  - Shifts: 9 am to 4 pm, 4 pm to 9:30 pm
  - 15 additional people needed for Friday
  - 40 additional people needed Saturday for canvasing
  - 40 additional people needed for Sunday
  - VRC hours of operation: 9 am to 7 pm
    - Intake process approximately 30 minutes

- Another job opportunity is data entry
    - Recorded addresses collected at distribution centers into computer
- 20 volunteers needed to warehouse starting Friday
- Family members, faith based organization, clubs—spread the word, ease into public announcement at the larger level
    - Come register, even if no immediate placement—need later down the road
- United Way will contact approx. 200 corporate volunteerism sources

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

I am submitting this letter of appeal in response to FEMA Administrator W. Craig Fugate's letter to me dated January 16, 2016. In that letter, he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint. I respectfully submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, to request a reconsideration of that decision.

Respectfully, I appeal the determination that the event "does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122~~, as implemented at 44 C.F.R. § § 206.2(17), the incident was not caused by a natural catastrophe, nor was it caused by fire, flood, or explosion~~." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster ~~expands and fits within the categories of both storm and~~is analogous ot the flood category, given that qualities within the water, over a long term, flooded and damaged the city's infrastructure in ways that were not immediately or easily detectable. Likewise, this disaster is a natural catastrophe in the sense that the contamination arose from the natural decay of Flint's aging infrastructure. These impacts will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. ~~I feel a more~~A narrow reading of this definition, restricting the hazards to which we can provide relief, does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels~~, if our primary mechanism for relief is read in a way that limits the hazards to which we can provide relief~~.

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

~~While I greatly appreciate the emergency declaration and the assistance it provides for the city of Flint, I am disappointed that no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies.~~

Comment [M1]: We are getting other assistance with non-Stafford Act resources. We have a POC that was appointed and he coordinating with other federal agencies. CDC is also en route so I think this should be deleted.

As additional support of this appeal, I offer the following information:

State and Local Government Capabilities

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions for much of the public water system damages can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million. The State is in the process of approving a second appropriation ...

Formatted: Highlight

NOTE: What do we know about the new appropriation/what can we include?

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government. Unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated there will be significant unmet needs as identified in the following areas of impacts. The only other possible option would be a special Congressional appropriation~~, which is unlikely~~.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community to recover with such a large percentage of its citizens living in poverty requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with, and few available resources to address the significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

My thoughts on EPA...

During the BP Oil Spill, the US Environment al Protection Agency (EPA) engaged to perform numerous actions. The following is taken from the EPA website:

- To date, no chemicals have exceeded human health benchmarks. However, people should heed warnings from their local health officials regarding oil-impacted beaches and water. As an added safety precaution, if people see or smell oil in the water or beach area, they should avoid the oil-impacted area.

- EPA's water sampling process includes the collection of the sample, laboratory analyses and data verification (which ensures high quality data). These steps take about 7 to 10 days to complete before the data can be posted on EPA's website. As such, the data EPA posts is not representative of current conditions but rather is a snapshot in time for a given location. We continue to take water samples and will post data as soon as it becomes available.

- EPA contaminant data are compared to technical benchmarks to determine the potential effects of contaminants on human health and aquatic life. Sample results are also being compared to EPA water quality criteria guidelines and State water quality standards, when available.

- In areas where contaminant levels exceed benchmarks, it is important to remember that historical contamination may exist in some sampling locations and may not be related to the BP spill.

- EPA, in partnership with states, oversees the National Coastal Condition Assessment (NCCA). NCCA reports describe the ecological and environmental conditions in U.S. coastal waters. When possible, EPA is comparing data collected during the BP spill response to the NCCA data.

OSHA offered the following:

- To determine whether or not workers were exposed to dangerous levels of toxic chemicals, OSHA conducted its own independent air monitoring, both on shore and on the cleanup vessels, and reviewed data from BP, the Environmental Protection Agency (EPA) and the National Oceanic and Atmospheric Administration (NOAA). No air sampling by OSHA detected any hazardous chemical at levels of concern. See more information on OSHA's sampling strategy, detailed findings, and evaluations. Read our frequently asked questions on health hazards and protections, including information on respirators and other personal protective equipment.

As indicated by the above, the federal government was highly engaged in event response, which was critical to restoring public confidence to avoid further economic damage due to perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in use of tap water.

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I hereby respectively submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision. While this unique disaster did not result from natural catastrophe, fire, flood or explosion, it poses imminent and long-term threat to the citizens of Flint. Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I am hoping you will choose to provide assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety." As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline. While I am greatly appreciative of the emergency declaration and the assistance it provides for the city of Flint, I am disappointed no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies. My appeal through Stafford Act measures follows, but I respectfully request assistance beyond providing "water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days."

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I hereby respectively submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision. While this unique disaster did not result from natural catastrophe, fire, flood or explosion, it poses imminent and long-term threat to the citizens of Flint. I believe the severity of this disaster warrants all categories of the Individual and Public Assistance Programs in order to facilitate suitable recovery. In support of this appeal, I offer the following information:

State and Local Government Capabilities

While I agree with Mr. Brown's assessment that considerable local and state resources were brought to bear in response to this situation, I strongly disagree with the assertion that "effective response does not appear to exceed the combined capabilities of the State and local governments." In fact, nothing could be farther from the truth. State agencies and local governments were able to provide short-term solutions to many problems related to this flooding. However, permanent solutions to much of the public facility damage and environmental degradation can only come about if significant federal assistance is made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by the U.S. Army Corps of Engineers (USACE) and Natural Resources Conservation Service (NRCS), those efforts are simply not sufficient to meet the long-term recovery needs of this situation.

Limited Federal Assistance Has Not Addressed All Needs

The NRCS has identified eight "urgent and compelling" stream bank stabilization sites, totaling $733,000 in project costs, that it intends to address with Emergency Watershed Program (EWP) funding. The NRCS share of these eight projects would total $550,000, and the local governments would be expected to contribute the remaining $183,000. However, this assistance is only intended to provide a temporary "band-aid" for the affected sites until permanent restorative work can be completed. Unfortunately, the NRCS does not have provisions for that type of assistance under its emergency relief authorities and funding mechanisms. As a result, the affected counties are left without a ready funding source for the permanent restorative work unless the Public Assistance Grant Program (PAGP) is activated under a federal declaration.

The amount of permanent restorative work that needs to be done in the Dead River Watershed greatly exceeds available local, state and federal financial resources, absent a Presidential Major Disaster Declaration. The Central Lake Superior Watershed Partnership estimates the total flood-related damages in the Dead River Watershed to be $28.3 million. Of that total, $4.5 million is for temporary stream bank stabilization measures, $19 million is for soil restoration (1.9+ million cubic yards), $800,000 is for

sediment removal measures to be implemented over a five-year period, and $4 million is for habitat restoration projects. (It should be noted that the $19 million soil restoration estimate does not include over 1 million cubic yards of soil lost in the Silver Lake dike and Tourist Park dam. If that is included, the total soil restoration cost approaches $30 million. Also, the $4.5 million in stream bank stabilization measures are for stabilizing the stream banks in their current condition and not restoring them to their original, pre-flood condition.) As you can see, the considerable environmental needs brought about by this flooding greatly exceed the collective funding resources of local, state and federal government unless a Presidential Major Disaster Declaration is granted and the PAGP is activated. The only other possible option might be a special Congressional appropriation, which is highly unlikely given the current difficult status of the federal budget.

The dredging assistance provided thus far by the USACE has been instrumental in restoring the basic navigability of the Dead River and the Marquette Harbor, but it has not removed all impediments to navigation nor permanently restored the areas ravaged by the Dead River floodwater. Again, additional federal assistance is required to restore the Dead River and Lake Superior waters to their pre-flood conditions, thereby providing an acceptable level of safety for commercial navigation interests and boating public alike.

To help address a portion of the road and bridge damage in the four affected counties, the Michigan Department of Transportation (MDOT) will be submitting a formal request for $2.5 million in Federal Highway Administration (FHWA) funding assistance under the FHWA Emergency Relief Program. However, that assistance – if granted – will only address those damaged facilities that are part of the Federal-Aid System (FAS). The FAS damage amounted to approximately 50 percent of the identified $4.8 million in public road and bridge damage, leaving the remaining 50 percent of road and bridge damage (approximately $2.3 million) with no ready means of permanent repair, restoration and replacement. In addition, another $2.1 million in other public damages (under PAGP Categories A, B, D, E, F and G) have been left unfunded by the denial of our declaration request. The State of Michigan and the affected local governments do not have the available funding to address these unmet public damage needs and bring the affected facilities back to full operational status. As I indicated in my declaration request letter, the State and these same four counties are still dealing with another major flood disaster that occurred in this same area only a year earlier (1413-DR-MI) and we simply don't have the financial resources to address this additional, unexpected public facility damage.

Damage to Dams Not Completely Addressed

The Preliminary Damage Assessment (PDA) conducted for this disaster identified only $145,306 in damage to dams and other water control facilities, even though the flooding completely destroyed two publicly-owned and operated dams. I believe this damage figure is far too low and apparently does not include the complete cost of rebuilding the two dams (the Tourist Park Dam in Marquette and the Loughs Lake Dam in Baraga County) to their pre-flood condition. The Marquette Board of Light and Power estimates that the cost of restoring the earthen fill to the Tourist Park Dam alone will approach $1.1 million – far in excess of the $145,306 in total damage identified under PAGP Category D in the PDA. These dams together provide valuable water control and recreation functions for the local communities and the region; therefore, it is imperative that they be rebuilt as quickly as possible.

Unfortunately, the State and the affected local communities do not have the funding at this time to undertake such a project, and as you know, funding under the National Dam Safety Program cannot be used for this purpose because physical improvements and construction activities are not eligible grant activities. The USACE and NRCS have not identified or offered ready sources of funding for the reconstruction of these two dams. I believe FEMA's PAGP provides the best source of funding for rebuilding and restoring these valuable and needed public facilities, and that program can only be activated through the declaration of a Major Disaster by the President.

Lingering Public Health, Safety, and Environmental Threats

Although strides have been made in addressing the many public safety threats and the environmental degradation brought about by this severe flooding, there are considerable lingering issues yet to be addressed. For example, local governments have done an excellent job in identifying and cordoning off unstable stream banks and other unsafe areas. However, as I indicated earlier, permanent

solutions for those dangerous sites will not come about in a timely manner unless significant federal funding resources are made available to restore, repair and permanently stabilize the areas.

Similarly, while the Dead River is open for recreational use and warning signs have been posted at boat launch sites warning boaters and swimmers to be alert for dangerous conditions, those temporary preventive measures are hardly a final, permanent solution to the problem of subsurface flood debris, sedimentation, siltation, bacteria and chemical pollution brought about by the flooding. Again, permanent solutions are needed to eliminate these significant threats to public health and safety and the environment.

The environmental damage to the Dead River Watershed may also adversely affect future flood control activities because the river has changed its course and characteristics in many areas upstream of and in and around the city of Marquette. Unless the failed water control structures and stream banks are replaced / restored to their pre-flood condition, it will be difficult to predict exactly how well the Watershed will handle future flooding events. It is entirely possible that previously flood-free areas and structures will now be flood prone due to the new Watershed characteristics, and the generation of hydro power may be affected as well. These are all distinct possibilities unless the Watershed is restored to its pre-flood condition. In its pre-flood condition, the Watershed performed in a predictable manner and the flood control and power generation characteristics and capabilities were well documented. In its current post-flood condition, the Watershed has unknown characteristics and capabilities that may adversely affect the citizens of the city of Marquette and Marquette County in the years to come. I do not want to take a "wait and see" attitude in this situation, and I am certain the affected local citizenry does not want to be part of such an experiment either. Prompt and prudent action is called for to help rebuild and restore the environmental and hydraulic / hydrologic characteristics of the Dead River Watershed.

Unfortunately, the State and the affected local governments are in no position to provide those solutions without a significant infusion of federal disaster relief assistance. I believe that the direct federal debris removal assistance I requested in my June 4, 2003 letter would have addressed the majority of the health and safety concerns related to debris, sedimentation, siltation and water quality. Activation of the PAGP would have provided the ready means to restore many of the damaged public facilities that provide critical water control, power generation and transportation functions.

Vulnerable Power Generation and Distribution Capabilities

This flood disaster exposed the relatively fragile nature of the Upper Peninsula's power generation and distribution network. Even as bad as the situation has been, it could have been much worse had one or both of the remaining dams on the Dead River failed and severely damaged or destroyed the Presque Isle Power Plant in Marquette. Fortunately, the power plant survived mostly intact from a physical standpoint, but it took a major hit from an operational standpoint. The plant has been off-line for several weeks, and even now only six of the nine generating units are back on-line. As you know, the power generation situation has been precarious at best since the flooding occurred and has caused millions of dollars in economic injury to the central and western Upper Peninsula and temporarily idled two major iron ore mines that produce 20 percent of the U. S. iron ore supply.

Although the region voluntarily adjusted its power consumption to cope with the reduction in electrical power availability and it generally succeeded in that regard, had this disaster occurred in colder weather the situation could have been much more serious. To prevent that type of situation from ever occurring again and to reduce the vulnerability of this plant and the regional distribution network to all types of natural and manmade threats (up to and including acts of sabotage and terrorism), I believe that prudent mitigation measures may be called for. If federal disaster relief assistance is made available, we may be able to provide funding (under the Hazard Mitigation Grant Program or PAGP) to the affected utilities in the region to undertake needed measures to mitigate the vulnerabilities of the power generation and distribution facilities to all types of physical threats. Without such assistance, those measures will not likely be taken due to lack of funding.

Economic Injury to the Region

The economic injury to the four affected counties and the region from this flood disaster is significant. Only now are many of the negative economic impacts coming to light. As I indicated in my June 4 declaration request letter, the estimated economic impact to Marquette County alone is in excess of $80 million. I have requested that the Small Business Administration (SBA) activate its Economic Injury Loan Program, under its own statutory authority, to provide much needed financial relief to the dozens of businesses negatively impacted by this flood disaster. That request is currently pending. Even if the request is approved, the assistance rendered will be in the form of low-interest loans which must be paid back. For many struggling businesses, another loan is often the last thing that they need. However, for many other businesses the loans will provide much needed working capital and a margin of safety that will allow them to continue to operate until their business picks up.

One form of economic injury that will not be addressed by the SBA Economic Injury Loan Program is the increased costs of electric power generation and distribution brought about by this flood disaster. The two private utilities primarily affected by the flooding – the Upper Peninsula Power Company (UPPCO) and Wisconsin Electric (WE Energies) – have incurred increased costs in excess of $10 million. In all likelihood, the bulk of those costs will be passed on to electrical customers – individuals, families, businesses and institutions – in the form of electric rate increases allowed by the Power Supply Cost Recovery mechanism administered by the Michigan Public Service Commission. That $10+ million is $10+ million that will not be spent in other segments of the local and regional economy – at restaurants, retail establishments and other businesses, at colleges / universities, at travel and tourism destinations, etc. – effectively taking the money out of widespread economic circulation.

The economic injury to public agencies in the affected area is significant as well and unfortunately is also not covered under the SBA Economic Injury Loan Program. Unless the PAGP is activated, the State and the affected local communities will not have a ready funding source for repairing, rebuilding and restoring the many critical public facilities damaged or destroyed in this disaster. As I indicated earlier, this disaster comes on the heels of another Major Disaster (1413-DR-MI) that occurred just a year earlier in these same four counties. The counties and local municipalities are still recovering from that event, and now they have yet another major flooding disaster to deal with and not much in the way of available resources to address the public facility damage and the many public health, safety, and environmental threats.

I sincerely believe that a Presidential Major Disaster Declaration is warranted in this situation due to the extraordinary circumstances involved in this flooding disaster – the catastrophic failure of two dams, the widespread and severe public facility damage and environmental degradation, the prolonged reduction in electric power generation capability, and the severe economic injury inflicted upon the affected communities and the region. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

I have designated First Lieutenant Ralph Hobrat of the Michigan State Police, Emergency Management Division as the State Coordinating Officer for this appeal request. He can be reached by telephone at (517) 333-5048 and by e-mail at hobratr@michigan.gov. F/Lt. Hobrat will work with the FEMA in conducting additional damage assessments as necessary and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

January 19, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

In response to W. Craig Fugate's letter to me dated January 16, 2016, in which he indicated that the State of Michigan had been denied a Major Disaster Declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act for contamination and damage to the public water system in the City of Flint, I submit this letter of appeal, in accordance with the provisions set forth in 44 CFR § 206.46, requesting a reconsideration of that decision. (I believe the letter should identify Mr. Fugate as the Administrator of FEMA, his official title. This opening paragraph is one long run-on sentence. I think it should be rewritten as two or more succinct sentences.)

Respectfully, I appeal the determination that the event "does not meet the legal definition of a "major disaster" under 42 U.S.C. § 5122, as implemented at 44 C.F.R. § § 206.2(17), the incident was not caused by a natural catastrophe, nor was it caused by fire, flood, or explosion." This unique disaster poses imminent and long-term threat to the citizens of Flint. Its severity warrants special consideration for all categories of the Individual and Public Assistance Programs, as well as the Hazard Mitigation program in order to facilitate recovery.

While the definition under 44 C.F.R. § § 206.2(17) provides examples of what might constitute a natural disaster, I submit that this disaster expands and fits both within the categories of a storm and flood given that it was qualities within the water that, over a long term, flooded and damaged the city's infrastructure in a way that was not immediately or easily detectable and will contribute to years and potentially decades of health problems and economic loss as well as necessary repairs to infrastructure that neither the city, county, or state have the capacity to conduct. I feel a A more narrow reading of this definition ~~I feel~~ does not adequately reflect the intentions of our "all-hazards" approach to emergency management at the federal and state levels, if our primary mechanism for relief is read in a way that limits the hazards to which we can provide relief. (Again, the first sentence is a long run-on sentence and should be rewritten.)

Given the gravity of the situation and ramifications for urban areas across the United States with pre-1987 constructed water distribution systems, I hope ~~that~~ you will determine that providing assistance beyond "appropriate assistance for required emergency measures...to save lives and to protect property and public health and safety" is warranted. As documented in my letter to you on January 14, 2016, the city of Flint has been devastated by job losses and associated economic decline.

While I greatly appreciate the emergency declaration and the assistance it provides for the city of Flint, I am disappointed that no other assistance is being offered or suggested, whether through Stafford Act measures or through programs of other federal agencies.

As additional support of this appeal, I offer the following information:

<u>State and Local Government Capabilities</u>

The City of Flint, County of Genesee, and State agencies have worked to provide short-term solutions to many problems related to this disaster. However, permanent solutions ~~to~~ for much of the ~~public facility damage~~ public water system damages can only come about with significant federal assistance made available under a Presidential Major Disaster Declaration. While we are grateful for the limited federal assistance provided thus far by FEMA, those efforts are stop-gap measures which do not meet the long-term recovery needs of this disaster for the City of Flint.

Emergency Protective Measures

As indicated in my declaration request, the State made an emergency appropriation to return Flint to Detroit water ~~and is preparing a second~~. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. The City of Flint also committed $2 million, and the Charles Mott Foundation committed $4 million. The State is in the process of approving a second appropriation ...

NOTE: What do we know about the new appropriation/what can we include?

The considerable needs brought about by this disaster greatly exceed the collective funding resources of local, state and federal government. Unless a Presidential Major Disaster Declaration is granted and the Public Assistance Grant Program (PAGP) is activated there will be significant unmet needs as identified in the following areas of impacts. The only other possible option would be a special Congressional appropriation, which is unlikely.

Long Term Public Health Threats

Although strides have been made in addressing public health threats brought about by this disaster, there are considerable lingering issues. The ability of a community to recover with such a large percentage of its citizens living in poverty ~~to recover~~ requires the ability of those citizens to acquire proper health care, case management, legal services, and assistance in repairing the plumbing infrastructure in their homes that may have be damaged. Permanent solutions for these individuals and households will not come about in a timely manner without significant federal resources to restore, repair and stabilize their lives.

Damage to Infrastructure

The affected local communities and the State do not have the funding capacity to undertake the repair of an entire public water system. FEMA's PAGP provides the best source of funding for rebuilding these critical public facilities, and that program can only be activated through the declaration of a Major Disaster by the President. Any other Federal programs of assistance would be welcome.

Mitigation

With federal disaster relief, Michigan could provide funding under the Hazard Mitigation Grant Program or PAGP to the affected utility to implement cutting edge measures to mitigate the vulnerabilities of the water system against all types of physical threats. Without such assistance, such measures will not be possible.

Economic Injury

As state Rep. Woodrow Stanley, D-Flint, said yesterday, "Flint is a city without a safety net. We had failing schools before we had a water crisis. We had high unemployment."

The economic injury to the affected communities from this disaster is significant. As I indicated in my declaration request letter, impacts including further decreases in property values, lost business activity, loss of employment and further loss in population will severely impact Flint and Genesee County.

As part of the disaster declaration request, I included assistance from the Small Business Administration (SBA) to provide financial relief to the scores of businesses impacted by this disaster. If such assistance were approved, the low-interest loans would provide much needed working capital to many businesses to allow them to continue to operate until their business picks up.

This disaster also comes on the heels of another Major Disaster (4195-DR-MI) that occurred in August of 2014. The state and those nearby counties and local municipalities are still recovering from that event and now they have another major disaster to deal with, and few available resources to address the ~~damages~~ significant impacts to the health of the citizens and damages to public facilities.

Direct Federal Assistance

The federal government is highly engaged in event responses, such as the BP Deepwater Horizon disaster. The federal government established a National Response Team of 16 federal departments and agencies, ranging from the EPA to the SBA to the Department of Labor. Such engagement was critical to restoring public confidence to avoid further economic damage from perceived contamination. In the BP case, fisheries, tourism, and other uses were afforded the benefit of technical expertise to minimize damage. In the case of Flint, residents are afraid to use water for washing because of their fear of further contamination and damage. The residents of the city of Flint need federal expertise to rebuild confidence in the use of tap water.

Conclusion

I sincerely believe that a Presidential Major Disaster Declaration is warranted due to the extraordinary circumstances involved in this disaster – the widespread and damage to public facilities, the potential long term damages to public health, and the substantial additional economic injury upon an already affected community. Therefore, I ask that you reconsider your decision in this matter and that you grant the State of Michigan the disaster relief assistance that it needs by declaring this event a Major Disaster under the Stafford Act.

Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division continues to be my designated State Coordinating Officer for this request. He will work with FEMA on program implementation and provide further information or justification on my behalf, as requested.

Sincerely,

Richard D. Snyder
Governor

Mike Sobocinski's notes on January 15, 2015 - 2nd daily SEOC briefing (4:00am):

MSP SEOC Planning Section (Amanda Bresler): Goes over upcoming battle rhythm items.

MSP SEOC Operations (Gabe Covey): Must ensure adequate supplies at the pods and the warehouse. Obtain volunteer numbers for tomorrow.

(Health and Environmental Branch: includes the next several agencies, including Red Cross)

MDHHS (Kathy Wald): Getting addresses for medically dependent persons. Following up on "the lab issue from this morning." Offer from SAMSA (?) to activate hot line. [A couple other items, too fast to capture in notes.]

MDARD (Brad Deacon): Training staff to be able to test samples, prepare and visit sites.

MDLARA (Alisha Gensler?): Helping DEQ with school water testing. [1st comments to fast to capture in notes]

MDEQ (Jen Wolf): Plan coordinator is establishing teams for the school water testing. By February 6, the whole program will be running, but by next weekend, (some initial more urgent parts of it will be implemented?) 2600 test kits left in the pods (?something about 2 days?). About 1100 test kits coming in today. Have ordered another 28,000, to arrive in the next couple of weeks. The total amounts to more than one test kit per Flint home since the declaration started. Labs are staying open on the weekend and the Monday holiday.

"Human Services Branch" (Rich Thelen): Processing filter and replacement cartridges – more than 30,000 each. Requested after-hours contact person [I didn't catch where or with whom].

MDOE (Kevin Walters): Working with Civil Rights for student and staff counts for all educational institutions, to deliver the EPA message.

MDHHS (don't know who?) A few I-Pad "hiccups" were clearing up well this afternoon. (Jeannette Doll, MDTMB: over 30,000 [of something] are available through Home Depot.)

MOSA? "Aging and Adult Services" (Steve Betterly): We've sent more than 80 additional addresses to GIS, from the local area agency on aging, for mapping. Working on the Recovery Resource Guide.

ARC (Paul Spata): Operating the Volunteer Reception Center, putting supplies in the field. Coffee was being provided for volunteers, the JIC, etc., and tomorrow this will expand to actually provide meals. 20 volunteers are assigned tomorrow (for kit assembly?) The warehouse and inventory management activity continues.

MSP Public Safety (Matt Bolger): Working on distribution mechanism with ARC. Want to pre-load trucks during the night. Over 50,000 homes visited [if I caught this information correctly]. Volunteer staffing numbers were provided for the coming 3-day weekend period.

MDOC (don't know who?): Adding two 24-foot trucks and drivers. Working to add 5 more for the next operational period.

MDMVA (don't know who?): 34 soldiers active—a couple in the Genesee County EOC and the JIC, and the remaining 32 distributed across the 5 pods.

MDTMB (Jeannette Doll): Received notification of more than 300 identification badges ready to be used this weekend. 30 additional I-Pads, which SEOC GIS will load software onto. A dumpster is headed to Clio Road. Notify that additional traffic will be going to the state lab over the weekend.

Local EOC EMHSD liaison ([garbled name over phone]): Working to re-establish local fire stations as [distribution/receiving points]. (Capt. Kelenske: The mayor said that samples will not be received there. We must have a consistent message on this topic.)

MSP SEOC Logistics Section (Wendy Galbreath): Two sites are still open, but are moving to consolidate to one at Clio Road warehouse. We want 4 out of the 20 vehicles to be pre-loaded tonight—only 4, so that water won't be frozen in the outdoor temperatures. Rain parkas are on their way to ARC and EOC locations.

MSP SEOC Planning Section (Amanda Bresler): [something] warehouse data, app numbers, [something else] numbers should therefore be available here to analyze.

SEOC Recovery Branch (MSP Brianna Briggs): Good progress today. Plan in place. Supply the pods first, then the teams. Pre-load vehicles with potentially everything needed throughout day, with a resupply then available if needed.

ARC (Lauren Twohig): We want to increase resource teams and daily volume, to increase the number of households reached.

PIO (Nicole Lisabeth): Capt. Kelenske gave a legislative briefing. We updated the talking points. We'd like to issue a news release containing specific numbers on personnel and resource distribution, but we still need to confirm some of these numbers before the press release can be made. The ARC news release will probably be delayed a couple of days. The MING could still get a news release out today. MDHHS has new blood level test results, to be placed online as soon as possible. An inquiry was received from Jackson, MI regional HHS regarding donated water plus a Wal Mart truck, but it is best to have a coordinated statewide response over separate individual agency activities. Media were at the Genesee County office building all day today, due to Governor and Mayor meetings. Still awaiting a city PIO at the JIC. Updating web site information on 2-1-1 and other topics. Confusion exists regarding FEMA, which is not actually a source of the water so far. The JIC is getting requests (media and legislative) for the presidential declaration request letter itself. The Governor did release yesterday's letter to Detroit newspapers. (Capt. Kelenske: concerned that information from such a release is not final, and therefore will require clarification.) We're requesting better coordination with Governor's office, etc.

Capt. Kelenske: SEOC operating hours are still 8am to 8pm until the situation stabilizes. Please arrange staffing for your agency. Leave contact information if not directly represented by a person at the SEOC. The JIC should be prepared for an upcoming legislative call with the Captain and FCO, when a response is received on the declaration request. We want to increase MING staff from 50 to over 65, but that will need to be approved first. A group [I don't know] is doing some sort of mobile testing in Flint. There was an SEOC briefing on stress and emotions, providing handouts with tips—take a minute to obtain and read those. The Lieutenant-Governor is here.

Lt. Gov. Brian Calley: Offering thanks and appreciation. The anxiety level in Flint is being reduced. As immediate needs are being met, longer-term aspects can be more focused on. Thanks for the high level of professionalism under trying and difficult circumstances.

MSP Amanda Bresler: Situation reports due at 6pm. Next briefing will be tomorrow at 9:30am.

Mike Sobocinski's notes on January 14, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning (Amanda Bresler): A 10:30am distribution process meeting has been added to the battle rhythm. Today is a "planning day" [this phrase was still not clearly explained but might refer to the development of a new IAP]. 12:30pm submission deadline for the ICS 204 form. Developing the IAP for the next operational period. (Numerous objectives were read aloud.)

MDEQ (George [redacted]): There's been a question of when the water is to be considered safe. A tentative SEOC answer (*not for public dissemination yet*) -- since the question is complex, it will result from a consensus decision of all major partners, including locals. Copper and lead rules: a new 6-month monitoring period has just begun in Flint, involving a June 30 deadline for 60 samples to be tested for Cu, Pb. This routine schedule is of course too long for our current circumstances. Since December 9, phosphate supplements had been added to discourage pipe corrosion, rebuild a protective layer. There's a meeting with the Flint mayor regarding various system access points beyond the Pb and Cu rule's minimum test requirements. Seeking resident volunteers for monthly water test, to start analyzing trends over time. (Capt. Kelenske: It's being asked during the door-to-door visits, and over 60 so far have agreed. This info will be sent to DEQ.)

MSP SEOC Operations Section (Gabe Covey): An additional 80,000 square feet of warehouse space has been secured.

National Weather Service (Jim Askew[redacted]): Temperatures go up to the freezing point today. A mixture of snow and drizzle with the potential for icy roads where roads have been left untreated. Tomorrow from about 11am until about 6pm we expect rain showers, with the high temperatures around 40 degrees F. Not too much rain, a little ponding potential. Then from Friday evening, a little snow, as Saturday temperatures would be back down in the teens again and also during next week. Just one brief warm-up over the next day.

(Health and Environmental Branch, next few agencies)

MDHHS (Jennifer [redacted]): Subject matter experts are in the CHECC working on yesterday's question regarding emergency vs. disaster eligibility of a particular program under the Stafford Act. Working on the stress effects of the event upon mental health. Developing educational materials and messaging. Developing short and long-term goals regarding the "food desert situation." [NOTE: Afterward I gave her my contact info to join discussion of definitions and alternatives, related transportation access ideas such as providing paid bus passes to improve food access]

MDARD (Brad Deacon): A revised handout was approved and is being mailed out to food service locations, and web posting. Inspections of these locations will begin.

MDLARA (Karen Towne): Something about a pilot project (involving, or in addition to,) insulation and retesting. There's a question involving licensed in-home child-care facilities (up to 6 kids) and asking them whether they want to be water testing sites. Will research whether the authority exists to require testing.

MDEQ (Jen Wolf): Ensuring the transport and storage of water test kits. Heard a report of non-residential (e.g. businesses) told that the kits were only for residential units, but this is not true and therefore must be corrected. Test kits, etc. are free to all, not just residential: "No one gets turned away for anything."

MDHHS (Richard Thelen): A database with more than 17,000 addresses was supplied to the GIS section. 2-1-1 inquiry regarding whether State Emergency Relief (SER) is available. Will need to develop messaging on this topic, to explain to everyone what it is and what is available.

Lauren ([Loren?]) of the American Red Cross?: A logistics pipeline plan [is/was/is being?] developed.

American Red Cross (Paul Spata): Volunteer Reception Center was opened but not yet publicized, because it's first day was to test its processes to ensure they will be up to speed. About 6 volunteers were processed yesterday. Today, it should be fully open. Ten emergency response vehicles were staged to support the response teams in the field.

Department of Education (Louie Burgess): Receiving calls from federal level regarding things like unlicensed child care centers (residential, for up to 4 kids at a time). Checking into information for those inquiries. A 17-level departmental director is now on the educational planning team. The department is seeking contact with the Flint school district for something... [very unclear]

MDHHS (Brian Wilson): Volunteers remain active in Flint.

State Office on Aging (Steve Betterley): Sent at least 500 additional names to GIS staff yesterday. The Valley Area Agency on Aging raised a question regarding GCCARD: something about it not being involved in something [I didn't discern the details in any coherent way], and Michelle Kuzera, MSP representative at the local EOC, will follow up with Kathy Bolz (spl) to resolve the issue. Getting information on Medicaid waiver clients. Teri Simmons (spl) will represent this office for the 4pm briefing.

MSP Public Safety (Inspector Bolger): MSP is at the local EOC. [Phone-in participants interrupted numerous times with information. I'm not totally sure who said what in the end.] Buses are being used to shuttle residents. 36 MSP volunteers available today for Flint activities. Adequate filters and water are on hand right now (at least 1000). Wrapping up with the southwest side of Flint today, and proceeding to the north and northeast sides starting tomorrow. Discussion about different teams having different sizes, creating confusion over estimates of how many total persons are on them...between 4 and 15 persons per team? (Captain Kelenske directs a standardized number on each team, with accurate summary info presented to him in writing. A 10:30am follow-up call was agreed to.) Obtained trailers were not all adequate for their required purpose, such as being open-top trailers—situation must be resolved.

MDMVA / MING ([illegible]): All went well yesterday with the posted at the fire stations. More than troops are being used today. 1pm media address occurring today. Tomorrow at 9am, ; will be assigned to each fire station.

MDTMB (Jeannette Doll): Getting water moved over to Clio. A water-order program is in process. U-Haul trucks are being ordered to fill the MSP resource transportation needs. Have upgraded now to a $30 million Home Depot contract. Replacement filters are important for long-term recovery.

Local EMHSD Liaison [MSP's Michelle Kuzera?]: Working on planning tasks and processes for the homebound.

MSP SEOC Logistics (Wendy Galbreath): Site visit took place yesterday (with Lauren) to check into new locations. Three locations are now moving toward one large location at Clio Road, which has its own experienced crew for loading and unloading trucks, plus a Red Cross warehouse manager. Daily logistics meetings now occur at 10:30am (brief) and at 7pm (longer). Court Street and GCCARD will have their resources moved to and consolidated at Clio. (MSP's Kriste Davis: Mission-ready packages MRPs. Working toward standardized teams of similar size, plan being pushed up to work on it today. Yesterday's final numbers turned out to be 492 occupied homes visited (total 653, implied to include vacant ones).) About 2 minutes per door – a good rate of field work.

PIO/JIC (Shannon ?): Reviewing fact sheets. Michigan Association of Broadcasters sending radio PSA today. Received a request for door-to-door team credentialing (with official ID). If this is to be used, info will be needed for official distribution. (Capt. Kelenske:
." Someone else: the problem may be when teams cover an entire block, with the not easily visible to every household.)

MSP Planning (Amanda Bresler): Improving the pod technology thanks to MSP James Tchorzynski's work there. Meeting with agencies to help with ICS 204 forms. 6pm situation reports are due. Next briefing will be at 4pm.

Capt. Kelenske: Senator Arenic([illegible]) was met with and shown the SEOC; appeared impressed.

Mike Sobocinski's notes on January 14, 2015 - 2nd daily SEOC briefing (4:00am):

[NOTE: The initial tactics was much too rapidly paced to take notes on, and its content should be available once the ICS 204 forms are all submitted.]

(Health and Environmental Branch: first several respondents, including Office on Aging)

DHHS (Jennifer ?): Working on nutrition plan and behavioral health work.

MDARD (Brad Deacon): Food guidance went out in today's mail. Now working to prioritize sites in the most at-risk zones (the redder zones on a map) for forthcoming inspections.

MDEQ (Jen Wolf): Only 80 samples are present at Flint, perhaps because the only two collection sites for them are at City Hall and the Water Treatment Plant, and the plant might not be on the bus transit routes. May need to make fire stations into collection points, but indications had been that they didn't want to be responsible. The governor wants 8 teams—staff is needed who have some scientific background. Many bottles are coming in (overseen by American Red Cross?) Lot testing is needed to verify bottle cleanliness after they've been received from the vendor.

MDLARA (Karen Towne): Supplies were received. Pilot project installation to occur Saturday, with testing on Sunday.

MDHHS (Brian Wilson): Volunteers in the field have been receiving a lot of positive feedback from the community. IPad operation was much better today—fewer delays.

American Red Cross (ARC) (Lauren ?): Standardization of water response teams [R?Can't be sure this completely represents her statement...It went by too quickly.]

ARC (Paul Spata): Continued to staff the 5 fire stations. Coordinating with MING regarding their staffing over the weekend.

State Office on Aging (Steve Betterley): Coordination of referrals problem was successfully solved by Michelle Kuzera. Still in the process of identifying senior addresses in Flint who may need assistance.

MSP Public Safety: [some 2330 number rattled off along with a bunch of other stuff. Possibly the number is a cumulative number of doors visited to date by field teams?? Way too much info presented in too fleeting a manner to capture any of it in written notes! ☹☹☹☹☹☹☹☹☹☹]

MDMVA/MING (unidentified speaker in SEOC): Hotel rooms confirmed for _____ who will be there. Each pod is to have a government phone (and?) Blackberries. List provided to planners. Providing liaison to local EOC and a PIO to the JIC.

MDTMB (Jeannette Doll?): Four U-Haul trucks were obtained. Working on resource requests all day.

Local EOC MSP Liaison (Lt. B.J. Roach): Working with churches to coordinate. (Capt. Kelenske: Is a person available to handle that duty and thus free her up for many other tasks?)

MSP Logistics (Wendy Galbreath): Many requests regarding volunteer donations. Penske offered 15 to 20 trucks, Dean transportation has drivers available. Confusion regarding whether to go to EOC or to GCCARD, but that's now cleared up. MSHDA's 24 Flint properties are to get filters installed. "Zero water" [?] news event—to offer match (re: donations) of filters.

MSP SEOC Planning (Amanda Bresler): Logistics resource plan and IAP work today—need info as soon as possible. Situation reports are due by 6pm.

MSP Recovery Team (Kriste Davis): Planning involving the teams and coordination (mostly covered by others).

JIC/PIO (Shannon [redacted]): The email for state employees has been drafted, and is being reviewed. Several media requests received for warehouse events but need to be delayed until the transition is done and the warehouse is operating smoothly (in about 2 days?). Found no major media errors today. Many questions are pending and the list of them is growing in number—need info from the SEOC to answer them—especially needed for rumor control, since the same questions are being asked by activists. Trouble getting in contact with local community PIOs and need help to contact them. (Capt. Kelenske: need documentation of unsuccessful contact efforts, and submission of an actual list of questions; a follow-up call will occur on this topic.)

Capt. Kelenske: Met with TAG ([redacted]) today—General Vadinez ([redacted]). There's an issue involving used empty water bottles—a recycling system needs to be provided (regardless of whether it actually receives widespread use) so there isn't an issue with empty bottles everywhere. West Virginia has an after-action report which probably has good ideas about handling this. The next briefing will be tomorrow at 9:30am.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Titles IV and V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121 *et seq.* (Stafford Act), I request that you declare a Major Disaster and an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint, which was demonstrated in October, 2015.

Impact and Trauma

The City of Flint switched its water source from the Detroit system to the Flint River in 2014. Thereafter, in 2015, through cooperative monitoring efforts by the City of Flint, State of Michigan, and the Environmental Protection Agency (EPA)—and the painstaking work of doctors at Hurley medical center—elevated blood lead levels (EBLLs) were discovered in the City of Flint. As a consequence, Genesee County issued a "Do Not Drink" advisory on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for blood lead levels. Of those tested, forty-three residents have exhibited elevated blood lead levels. Twenty three of the persons found to have elevated blood lead levels were children under the age of six, the most likely age group to experience a long-term impact from lead exposure. One child was hospitalized, treated, and released. No other hospitalizations and no deaths have been associated with this emergency.

The Michigan Department of Health and Human Services (MDHHS) has also observed a spike of Legionella in the Flint area, which occurred in roughly the same time frame. This too will be investigated for any potential link to the water system.

This emergency has had a severe economic and psychological impact on the community. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level. Thus, while the tap water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this emergency as they are often unable to access vital nutrition or water resources. Assistance with the Individuals and Households Program will be essential to recovery.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the Volunteer

Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) will be conducting a conference call to determine how it can more fully activate. Several of its member organizations have already activated. Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

Pursuant to Michigan's Public Act 390, the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2016, respectively. I then declared a State of Emergency on January 5, 2016, for the County of Genesee and City of Flint. This emergency assumes that there has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities.

While we do not currently know the extent of any permanent damage to the City of Flint's water supply infrastructure, it has estimated the cost of replacing its water supply infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization, which assumes a cost of $25 per linear foot to remove and replace private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and its residents recover. The State has already invested over $10 million in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

The jurisdictions that are the subject of this request have recognized their responsibility to make their community as disaster-resilient as possible. They currently have in place a FEMA-approved Hazard Mitigation Plan that is compliant with the Disaster Mitigation Act of 2000. The plan was adopted January 26, 2015. Under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included within Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has made a strong commitment to mitigate hazards and has met all applicable federal standards. On April 23, 2014, FEMA approved Michigan's Hazard Mitigation Plan as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information addresses the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households. The EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – Geographic Information System Unit (GIS)

On Friday, January 8, 2016, GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present need significant updating before an accurate picture can be created.

DPW estimates that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, GIS staff have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, older sections of the city tend to have sparse concentrations of lead, but the records for these areas are often incomplete.

In order to effectively determine the scope of the affected area, EMHSD is working with DPW and the University of Michigan–Flint to digitize many of DPW's old analog maps in order to extract the pipe status. Even when this process is complete, however, it will remain unclear whether the information will be accurate, given the age of the source data. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified to allow for manual inspections of the underground pipes to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The National Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services (MDHHS) – Health Division

The MDHHS is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. This emergency potentially could impact the capacity of the MDHHS to continue to undertake its public health work in other areas of the state.

The MDHHS continues to work closely with local partners to ensure that potentially impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). This includes working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The MDHHS updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October 2015, MDHHS initiated community outreach for distribution of educational materials to parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready-to-Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

While the extent of the impact is unknown, a worst-case-scenario impact of this emergency could result in significant future health costs to the impacted population, for direct medical needs, secondary and tertiary medical expenses, and secondary and tertiary prevention (education and nutrition).

Department of Health and Human Services – Human Services Division

The Human Services Division of the MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods: MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card (SNAP assistance) but still require additional healthy fruits and vegetables beyond what they can obtain through the SNAP program. Other residents who have had elevated blood lead levels may not have a Bridge Card, but purchasing fresh fruits and vegetables still can be a burden due to higher costs.

The plumbing in some homes is in poor condition. As a result, the faucet filters may not fit. The cost of paying for city water that the residents cannot drink is also significant. Some residents may have to make

a choice between buying food or to paying for water to flush toilets, bathe, and wash clothes. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of four, with leaks, etc., it could amount to more than $150 per month.

Additional ongoing testing will be required for those with EBLLs. Other potential long-term expenses may include treatment, tutoring, behavior specialists, and mental health services.

Flint is one of the most impoverished areas in Michigan. State and city poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially between 2006 (25.4%) and 2012 (31.8%).
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP) increased from 35.4% in 2006 to 47% in 2013.
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data," shows the numbers of recipients of benefit programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP) [SNAP]	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Talent and Economic Development (MTED)

The MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

The MTED's combined efforts are focused on short- and long-term assistance to the impacted communities through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, the MTED has assessed potential worst case impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at four potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total

- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant potential negative impact may be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters may leave the city). Residents and businesses may also have to continue to pay extra for bottled water, so the extra spending on water could take away from other spending. It would be relatively easy for residents to move some of their economic/spending activity outside the city, which could contribute to an economic downturn in Flint. Long-term, there may be the significant cost of a new water system over and above the health related costs, estimated by the MDHHS.

Department of Environmental Quality (MDEQ)

The MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal Safe Drinking Water Act. The City of Flint began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Officer confirmed Hurley Children's Hospital blood lead level data. On this same day, the Genesee County Health Department issued a "Do Not Drink" advisory to the customers of the Flint Water Treatment Plant. On October 15, 2015 the state legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the Detroit Water System (DWSD), and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services. On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karagnondi Water Authority is scheduled to be completed in mid to late 2016.

The MDEQ estimates its cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The MDEQ staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Agriculture and Rural Development (MDARD)

Part of the MDARD's coordinated outreach includes contact with businesses, particularly food-related businesses, to evaluate the safety of the water they use in their products. Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They have also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). All received a letter in October with guidance and will receive revised

guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers. We are planning additional outreach to them as part of our efforts. The MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two veterinary clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

The MDARD has been in close coordination with the MDEQ, The MDHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. The MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

The DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer. The potential losses experienced in Flint may not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the MDEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Licensing and Regulatory Affairs (LARA)

Beginning this week, state employees from LARA's Bureau of Construction Codes/Plumbing Division will conduct a pilot program at Freeman Elementary and will install new water faucets and plumbing associated with the nine faucet outlets that showed elevated lead exposure following MDEQ's initial testing. Twenty-two outlets did not show elevated lead exposure, but the nine faucets that did come back with initially high results involve brass components, indicating the problem involves the fixtures or plumbing immediately surrounding the fixture. Following the installation of the new faucets, DEQ will retest Freeman identically to the original test of the school. Following the results of this pilot program, the initiative could be broadened to other schools throughout Flint and will affect the State of Michigan's long term strategy for ensuring clean drinking water in the city.

Replacement of faucets and piping are to be certified with no lead.

- Sink faucets $200
- Water supply valves/pipe fittings $100
- Labor/installation $625

With 29,943 customers on this water line and a minimum of 2 faucets per customer, (one bathroom, one kitchen), we are estimating the cost for replacement at $55 million.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014. In response to these disasters, in addition to Stafford Act assistance from DR-4195, the State has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau have successfully addressed the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG), in cooperation with the Urban Studies Center at Wayne State University, estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the national rate. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially with lead which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5-year average, a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

In the October, 2015, to December, 2015, time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures require approximately $9.55 million to keep Flint on Detroit water until Karagnondi water is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate lead service lines on their properties.

The City's water system has been affected by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source appears to have decomposed and it is likely that some of the underlying lead pipes and lead solders began to leach into the water. Ultimately, this may have contributed to significant EBLL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest) only, so the percentage in this mapped section would be lower than in older parts of the city. The University of Michigan–Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is potentially of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies with resources and expertise that can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

SEMIFRG Executive Committee Minutes

January 14th, 2015

Attending or on call: Lyke T., Rev. Greg R., Angie S., Chad V., Bob B., Greg G.

Excused: Ginna H., Sandra C.

Executive Summary

- Bob – Support AHV. Work w/ Becky if church connection is an issue
- Bob – work to meet with Charlie Beckham and Jerry Norcia
- Ky and team – Stories to generate for media outlets. See notes (Lyke idea)
- Chad – confirm address w/ MNA (for correspondence)
- Chad – work with Rev. Roberts and Ginna to have the two meet (call)
- Greg – reach out to Faith Fowler

Welcome 1:10pm

I. **Old Business**

II. **Committee Report Outs**

- Communications (internal and external)

- Volunteer Management
  - Please see the attached notes from last week's meeting. **All Hands Volunteers needs help (funding short after January)!**

- Fund Development
  - Greg G. – update on status?
  - Lyke – have not heard much. GHHI is having funding difficulty. Neighborhood groups are also having issues w/ funding. Policy shift has contributed (new construction or major new rehab)
  - Rev. Roberts – Ginna and I were to talk about reach out program to clergy. *Haven't had the meeting yet. Chad to coordinate*
  - Bob – looked for money from DTE re: case management. Profile is too low. Wanted to know who we had that could make that difference? *Charlie Beckham could elevate the profile! Bob has reached out (no response, yet). Jerry Norcia would be another person to approach (and another person was mentioned).* Meetings coming. Construction group is sending an article out in the magazine, and are looking to add to newsletter
  - Greg G. – another LDS shipment of supplies offered. *Chad to determine if MNA address is correct*!

- Disaster Case Management

- Need update from Mary/Sam.

- Funders Forum/Unmet Needs
  - See detail below:

III. **New Business**

- Greg G. – Ginna had some ideas in partnership w/ Flint. But... situation has changed (for the worse) in terms of notice. Lyke – if Ginna is correct, we could get the funding rolling for the AmeriCorps program. Fundraising should go towards keeping teams here (AHV)!
- Greg G. – need to work w/ Becky and NW Detroit Flood Recovery Project. **Bob to reach out and help funding process!**
- Bob – reception has been very low; no political will present. Approach we're taking doesn't seem to be working.
- Greg G. – attention is very different in Flint (man-made and children, and heavy political component) = easy to gather interest.
- Lyke – maybe the way we're presenting this is not attractive. Not sure that the media attention is correct – list key media outlets (*Ky to pursue?*) and talk about individuals
- Greg G. – Work w/ Faith Fowler. Bob – concur. Work w/ Ky and Faith (and a neighborhood)
- Lyke – *3 part plan: family, community org., and the flood organization. First step is to work w/ Ky (agreement/adjustment) and AHV/MDS to ID families to for stories and then target specific media person to do this*
- Angie – DTE Test and Tune program pushed back.
- Bob – a DTE meeting I attended relayed that the program was ineffectual. They mentioned Bob and concentrating on one neighborhood...

IV. **Next Meeting** Chad to schedule (on behalf of Sandra)

Adjourn 1:53pm

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurley Mmedical Ccenter, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. Blood lead level testing is an important part of our efforts to identify people who have been harmed by drinking water that contained lead. However, we recognize that the full community of Flint must be the focus and the Michigan Department of Health and Human Services (MDHHS) is treating this as a population-wide exposure in its public health response. As of the most recent update 2,~~182~~642 Flint residents have been tested for lead levels and ~~43~~50 residents have exhibited elevated blood lead levels. Of those, ~~23~~28 ~~were~~ are children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the ~~Michigan Department of Health and Human Services~~MDHHS has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. ~~While unlikely to be related to the water system, this new problem adds to the negative psychological~~ impacts on mental health that have become extensive.

Comment [LG(1]: The statement "while unlikely to be related to the water system" CANNOT be included in this letter as we do not know what the data will indicate when the review is done within the week.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the ~~populace~~population. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the Department of Environmental Quality (-DEQ) is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-~~H~~ is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Ddirect medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical ~~Officer~~ Executive confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS–HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578

State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the ~~Department of Environmental Quality~~DEQ of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies whose resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

At meeting/on call: Tom L, Lawrence, Tom N, Annette, Reuben, Chad, Justin, Becky, Bob
Excused: Mary

Open: 3:02pm

- Introductions

- Update of activity
  - VOADs
    - MDS – 25-30 volunteers ready starting next Monday. Set on volunteers through April! Working a lot w/ Michelle in Osborn (using 211/Crisis CleanUp). Reached out to 5 new homes (1 home has 3 adults and 9 children!)... excited for help
      - Bob – any major electrical or plumbing? SBDR is not doing any new work in this capacity. Lawrence – electrical has no new work, plumbing has had some work done through contractors (MDS has picked up the tab on what is not covered)
      - Bob – are you still in Jefferson Chalmers? Lawrence – yes, we have a couple left, and working w/ Mary, but more Osborn focused
    - AHV – Phase 3 (rebuild): 31 rebuilt, and mucked/sanitized 67. 387 volunteers so far, and just shy of 12,000 hours of work! Busy January... at capacity for this month. 16 volunteers in the field today
    - SBDR – had a team of 8 from OK last week (Christmas to January 2nd). 2 homes rebuilt and 3rd was a veteran's home rebuild (so, 3 total). No volunteers until early March. 40-80 people signed up for all March... 20-25 homes in Warren left, only 6 need finishing. Assessed in Pershing (3 before Christmas, 2 others to do right now). A lot of Pershing will be muck/sanitation! Sending a half dozen people there to help wheelchair bound person. Did have 4 men with World Renew to review facility (working in partnership with them). Looking to do 1-2 day, in-state assistance. May have some people go out to Missouri...
    - NW Detroit Flood Recovery Project – busy doing DCM. 86 active cases! Waiting on many to do rebuilds. Have about 12 rebuilds in progress. AHV partnership is going well. Looking for funds for furnaces/water heaters (had success w/ funds there). Bob Bruttell has helped w/ a couple roofing projects
    - Presbytery – Tom Neal: a number of groups coming in (looking for places to work). Working w/ AHV recently. Can AHV handle? Becky/Reuben – have to hold off on anything past... AHV is funded through January. Hoping for end of May or August, but additional funding is needed by January end! Becky – "Plan B is in the works". Tom – need site managers. Justin – can Bob/SBDR also direct? Bob – we can house, direct, etc. Bob – had a high school group ask to help (couldn't handle), but can w/ a parent/guardian
    - Alafia – social media campaign happening for assistance (volunteers and materials). Looking to work w/ a local radio station. We should reach out in to the communities themselves. ID'ed foundations and big box stores to donate furnaces and water heaters (have contacts ID'ed and will be approaching). Justin – will follow-up with Annette and Becky to work on this

- DCM
  - Do not have the funding for appliance replacement (hence Alafia's involvement). Mary and Lawrence have found 8 homes with appliance needs. Take in to consideration pre-existing needs and flood related needs, and have DCMs on hand w/ extensive social work background to assist. State Emergency Relief Fund contact – looking to redefine what constitutes an emergency (time period issue). We still have ongoing issues. *Will send time/date for Wed/13th DCM meeting.* Working on a DTE free furnace inspection project. MI VOAD meeting was excellent, and there is higher involvement (Annette/Alafia, social media increase – send details to Gene Rivers, *GoFundMe account set up,* and asked to take issues to parent organizations.) Talked w/ April Wood re: small grants (NVOAD) that are coming up. *And we are also looking to approach big box stores at the national level (in-kind donations).* Need lists of needs

- Any issues, best-practices, or needs?
  - Tom – is there going to be a MLK Day of Service this year? Reuben – yes, we will be accommodating more volunteers. Recruited some extra people, just in case. Looking for 30/day. PR work to get the word out! Chad to support this

- Update from Volunteer Committee lead
  - Confirm a timeline w/ SEMIFRG and funding! Justin – Detroit is an exception from the normal process; some people nationally are involved to push the funding. $50,000 grant is also a possibility
  - Becky – communication to the Executive Committee? Justin – need a broader meeting. Bob is a good example of involvement from EC. Chad – communicate directly (send emails to Sandra). Need for the EC to contact the NW Detroit Flood Recovery Project and the other groups involved
  - Nechama also looking to be here April and again (depending on support) in the Spring/Summer

- Next meeting – Chad will send invite

Adjourn: 3:58pm

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 14, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 1/8/2016: 2,642;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 28
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 15
Severity Indicators: Hospitalized/Discharged - 1/1; Deaths - 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/12/2016
  - 23 families contacted
  - 16 EBL investigations completed.
  - 16 Water sampling completed.
  - 9 EBL Reports Received.
    - 8 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 7 homes with lead-based paint hazards
    - 4 homes with lead detected in tap water
      - 3 homes with lead water levels less than 5 ppb
      - 1 home with lead water levels greater than 15 ppb
  - 5 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- 1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Developed/updated Talking points to respond to Legionella questions.**
- **Completed Summary report describing second illness wave case investigations.**
- **Updated Analysis/Summary on first illness wave investigation with recently acquired patient information and illness-related mortality standard.**
- **Supplied Legionellosis cases to Vital Records for linkage to ascertain any unreported deaths.**
- The Governor's office held a press conference on Legionnaires disease in Genesee County.
- Blood lead level testing report through 1/8/2016 submitted to the JIC.
- Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.

Filter & Water Distribution Sheryl Thompson

Filter report through 1/13/2016

	Received	Distributed	Remaining
Water Filters	22,000	13,008	8,992
Water Pitchers	720	409	311
Replacement Cartridges - Brita	19,400	3,367	16,033
Replacement Cartridges - PUR	5,706	375	5,331
Replacement Cartridges - Zero	375	205	170

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly HHS internal briefing.**
- **Weekly coordination call with GCHD.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Began work on filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)

Toxicology - No Updates

WIC - No updates.

Healthcare/Providers - No updates

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers are replacing fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

Department of Environmental Quality (MDEQ)

MDEQ has been granted primary enforcement authority in Michigan by the EPA for regulatory oversight of all public water supplies, pursuant to the federal State Drinking Water Act. The City began using the Flint River for drinking water in May 2014.

On October 1, 2015 the State Chief Medical Officer confirmed Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announced the Governor's Flint action plan. On October 15, 2015 the Michigan State Legislature authorized $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

Mike Sobocinski's notes on January 15, 2015 - 1st daily SEOC briefing (9:30am):

MSP SEOC Planning Section (Amanda Bresler): Reads off the battle rhythm for the day. Yesterday's IAP was approved.

MSP SEOC Operations (Gabe Covey): The top priority today is tracking to ensure that adequate staff and resources are in the field. We are setting up the Water Resource Teams for the weekend. The Governor had asked for a declaration of both an emergency and disaster by the federal government yesterday. Working to improve coordination with JIC.

National Weather Service (Jim Askow [sp]): It will be about 40 degrees F all day today but afternoon rains will cause some slippery conditions. Temperatures drop tonight. It will be very cold Saturday through next week. Standing water will freeze in place tomorrow morning. Sunday's high temperature will be about 15 degrees F. Becoming breezy on later days, through next week, again resulting in circumstances in which exposed skin risks frostbite in 15 to 30 minutes outdoors.

Capt. Kelenske: We have intended to give credit to all who were involved, but some agencies were recently missed when trying to list them all.

(Health and Environmental Branch: next several respondents)

[ ] (Kathy Wald): The CHECC will be open Saturday, Sunday, and Monday, helping with the county phone banks on those days. Coordinating with GIS regarding those who are dependent upon medical equipment in their homes. Data is being obtained and provided to GIS. Genesee County Health Department requesting 10,000 copies of an EPA document, so MDTMB will arrange (Capt. Kelenske: or EPA itself can provide them).

MDARD (Brad Deacon): Prioritizing food facilities for follow-up next week. Coordinating with DEQ.

LARA ([ ]): 20% of the 244 health facilities [something. Too fast for notetaking]

MDEQ (Jen Wolf): Working on teams for the plan [for? and] testing water [at schools]. Logistics of 10,000 water bottles' assembly and distribution.

"Human Services Branch" [MDHHS] ([Rich Thelen])]: Filter and cartridge numbers were stated. Reordering is necessary today. Met with Finance, figuring out stuff with others. (Capt. Kelenske: Yesterday there was a budget meeting with SBO [ ].)

MI Dept. of Education (Kevin [Wolff]): Coordinating with private and parochial schools. [something else didn't catch it]

Dept. of Civil Rights (Mark Bishop): The EPA document is available online in multiple languages, has been handed out at schools. Would be good to coordinate with these other agencies and order more copies to meet everyone's needs.

[ ] (Brian [ ]): door-to-door [something. TOO FAST FOR NOTETAKING!]

State Office Services to the Aging (Steve Betterly): The Valley Area office (and Kathy Bolz) referral issue has been resolved by MSP Michelle Kuzera. 400 new addresses of "my choice waiver clients" [ ] were received and forwarded to GIS. Information on independent and assisted living facilities in Flint (non-regulated congregate settings) to overlay onto the existing heat map. Received question on

Legionnaire's Disease—any connection known? (Capt. Kelenske: no known connection. May need to put out a statement from DHHS or the Governor for PIO use.) Question on whether the heat map (by Dr. Mona Hanna-Attisha) is available to the public. (Capt. Kelenske: It is already available, open source.)

American Red Cross (Paul Spata): Many persons are asking about Legionnaire's Disease at the Flint fire stations. (Capt. Kelenske: Again, we will check this morning with the Governor on how to keep these topics disconnected. It's okay for fire stations to refer people to the web site, but there's a problem with providing handouts there and connecting the topics.) Five sites were staffed by ARC yesterday, but the MI National Guard takes over the staffing today. ARC is supporting the Water Response Teams today, and continuing to operate the Volunteer Reception Center. Supporting the distribution of materials, and providing warehouse operations management.

ARC (Lauren Twohig): Describes some sort of coordination. [too fast for notetaking]

MSP ([Over phone]): States various numbers of volunteer state employees. 10 teams are in the field, in wards 5 to 7 of the city. The ARC has an additional 5 teams, focusing on Ward 6. The I-Pad issue was partly the result of low temperatures, and partly related to software and operator handling of the software. Working with MDTMB on software to prevent I-Pad problems. (Capt. Kelenske: If there is a way to weatherproof them, let us know how to help.) Could use rain ponchos. (Capt. Kelenske: Will do.) Various sign-ups so far for working on Saturday (24), Sunday (39), and Monday (46). Working with Penske on truck donations.

MI Dept. of Corrections ([illegible]): Total of 14 vehicles including a handicap-accessible van.

MI National Guard (Lt.-Col. Randall): "O and O" [illegible] at local EOC. Have been transitioning into pods, which is going well. (Capt. Kelenske: TAG discussions—will provide info separately, soon. No tents are to be used.)

MDTMB (Jeannette Doll): Specialized items are available at the Mundy Township Home Depot, to use in the pilot (such as water bubblers). Volunteer identification badges should be available today. (Capt. Kelenske: We'll discuss re: "Volunteer" on badge design, since not all workers are volunteers.) Something was also said about fuel cards and employee "Survey Monkey" [unclear].

Attorney General (Peter Manning): Will be submitting some legal questions.

MSP SEOC Logistics Section (Wendy Galbreath): Working with Jeannette Doll (MDTMB) on the consolidated warehouse. Today is day 1 of the plan.

MSP SEOC Planning Section (Amanda Bresler): Situation reports due again by 6pm today.

MSP Recovery Branch (Brianna Briggs): Working on the weekend team logistics, and on identifying standardized information to be submitted daily (rather than repeatedly asked for).

PIO/JIC (Nicole Lisabeth): The Governor stopped by at a fire station, unannounced. Positive media regarding the federal declaration request that was made. No known media errors identified lately. A legislative briefing occurs today. There have been a couple requests for the presidential request letter (Capt. Kelenske: Not available publicly yet. Its release is to be discussed first for approval.) Today there are 3 news releases. Potential on Saturday for [Something]. Attorney General Schuette: sending out some info on his investigation. Today there is a Time Magazine interview with Dr. Eden Wells. Please notify the JIC of any agency messages that are being sent out. A Governor's statement is being made

today about returning additional powers to the Flint mayor. The Genesee County Health Department is on furlough right now, so people should dial 2-1-1 instead.

MSP Capt. Kelenske: At about 11am, 50,000 phone lines in Flint will receive a message from the Governor. This could cause a spike in calls to 2-1-1 as well as in the demand for supplies. Would like to get a briefing to the Mayor of Flint and to the Governor, summarizing agency actions. Please send bullet points to Gabe Covey (MSP Operations Chief) for him to assemble for this list of specific things being done. More items are better for the list, but each item should be short. SEOC hours will continue to be from 8a to 8p on Saturday, Sunday, and Monday. The #1 focus is on the pods, for distribution of water resources to Flint. If necessary, the field teams will support these pods if there is a need.

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the city of Flint (City) started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an emergency backup source to the system.

Over time, the DWSD source became financially strenuous to the City and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014 the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City commenced two 6-month lead and copper monitoring periods. A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90^{th} percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. On March 30, 2015 the MDEQ notified the City of the 6ppb results.

On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90^{th} percentile), and required the City to install corrosion control equipment and begin treatment.

On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside certain zip codes in the City. This same date the MDHHS reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the

DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Mike Sobocinski's notes on January 13, 2015 - 2nd daily SEOC briefing (4:00pm):

MSP SEOC (Brianna Briggs): leads the meeting: Agency situation reports are due by 6pm. "Tomorrow is a planning day." [No explanation for this statement was provided.] Agencies, be sure to update 204 forms tactics, especially pods, teams, warehouses, etc.

(Health and Environmental Branch, next few agencies) MDHHS Community Health (Kathy Wahl sp?): Working on nutritional plan with several other agencies. Lori (Laura?) Sempler (sp?) will be the lead on that plan. Disaster behavioral health coordination is occurring, with CHECC exploring options, checking with DTAC at SAMSA [references not explained], targeted to Stafford Act qualifications. (Capt. Kelenske: does it qualify under an emergency such as this? This needs to be verified.) Some wording changes were suggested for the fact sheet.

MDARD (Brad Deacon): Mailing out food establishment requirements—about 800 of them.

MDEQ (Jen Wolf): Conversation about bringing more health people into the (local?) EOC.

M???: Two of the 5 trucks loaded with water filters are at the GCCARD. 10,700 filters, [two other large numbers were given for other types of resource there, rattled off too quickly for my poor & tired writing hand to keep up with.]

American Red Cross (Paul Spata): Staffing fire station points of distribution. Further coordination with MI National Guard (MING) on staffing. Volunteer reception center was up today; numbers to be reported in the sit rep tonight. Fielding a request to feed field response teams.

MDHHS (Brian Wilson): Their volunteers are still in the field. Heard concerns about some IPads not functioning in the cold, then seemed to work better? Awaiting confirmation of replenished stock.

Offices of Services on Aging (Steve Betterly): Valley Area Agency on Aging has been fielding calls. Something fell apart regarding the schedule of water/filter deliveries—need to get in touch with local EOC on this. (Brian Wilson: probably fixed last night.) (Michelle Kuzera?: Local EOC confirms follow-up to occur [She disappears from phone suddenly, not to reappear.]).

Capt. Kelenske: Any more personnel needed by the Sheriff's department for deliveries?

Unknown replacement on phone from local EOC: Being handled okay by the locals so far.

Capt. Kelenske: Consider replacing sheriff staff with area health and social work specialists, to better match staff with their expertise and free up sheriff personnel for their normal duties. (Services on Aging (Steve?): off-duty teams are available to help with phone lines and resource distribution.)

MSP: Working with MDOT for shuttle vans, working with Public Affairs re: state agency volunteers for the weekend.

MI National Guard (Colonel Reynolds) full-time staff at each of the 5 "pods." Friday morning 9am will resume handing out water at the pods. MING needed 33 volunteers, and actually

obtained 48. (Capt. Kelenske: Any feedback on public reaction or questions re: MING soldier presence? A: not known.)

MDTMB (Jeannette Doll): A warehouse has been located at another site. Red Cross and MSP Wendy Galbreath are checking it out as a replacement for the other site that had problems (Court Street school district site). Stuff is to be moved from the old to new site. Based upon truck loads, will be maintaining 8 truck loads per day through Saturday, available on Sunday too, if needed. 117,000 filters coming in, and 139,000 faucet ([counts???]). Tablets are coming in tonight to the EOC for GIS staff to download an app, then going to Flint in the morning. Information cards sent to Flint. 15 trucks are waiting. (Capt. Kelenske: They must offload somewhere and not wait.) Only 1 loading dock at each facility. Court Street won't work—told that it was vacant and had 80,000 square feet, but it was full. (Someone on phone, [Jackie Hampton perhaps], later announces that the site will be available tonight, after all. Commissioner Curtis had prompted warehouse emptying which is allowing trucks to be moved there now. Equipment and staff available to unload, with warehouse reportedly able to be cleared out tonight. A Dort Highway location is being investigated for suitability.)

Local EOC ([unknown person]): Information entry and radio [channels] seem good. Only the issue of supplies waiting on the road ([presumably on trucks or in transport]) must be cleared up.

MSP SEOC Logistics (Penny Burger): Working on trailers and vehicles from Department of Corrections, for door-to-door campaign. Coordinating with MSP for Thursday and Friday volunteers. Financial analysis being finished up—to be reviewed first by Captain Kelenske before submission.

MSP SOEC Planning ([Zach Baker? Couldn't see across room.]): Progress on tracking inventory. Sit reps due at 6pm.

MSP SEOC Recovery Team (Kriste Davis): Some numbers may not be in yet—issue of paper substitute for frozen IPads. 394 homes were visited yesterday, plus 378 more today, possibly more, once additional reports are processed. Even if number appears lower today, there was a smaller number of vacant homes today, so the actual number of inhabited homes is higher today. Working with the Red Cross this weekend for teams. Monday is a holiday. (Capt. Kelenske: Any info on community reaction? A: No info yet.)

JIC/PIO (Shannon [Banner]): Media hotline saw a markedly increased number of calls, although it was not overloaded. Some media questions need answers to come from the SEOC. Good collaboration with 2-1-1, county, and state agency PIOs. Could use the local PIO today, though. From 11:30a to 12:30p there was a media briefing at fire station #3—very good media turnout, positive in tone. Waiting for the logo approval (from local and county) for the response team. (Capt. Kelenske: How is 2-1-1 doing—being monitored for success of call handling, good staffing levels, etc.? Nicole Lisabeth [JIC/PIO]: 2-1-1 is going well.

(Phone discussion regarding Legionnaire's disease report—[unclear who the participants were].)

Capt. Kelenske: DHHS will handle those Legionnaire's-related questions through separate, normal channels, not through the SEOC or local EOC but through other channels, as a separate matter.

SEOC Planning Brianna Briggs: The next briefing will be tomorrow at 9:30am.

MICHIGAN DEPARTMENT OF TALENT AND ECONOMIC DEVELOPMENT

TED Assistance Programs for Individuals and/or Government:

MEDC MSF

Community Development

a. **Program Name: Redevelopment Ready Communities**
b. Agency Responsible for program: MEDC
c. Point of Contact: Jennifer Rigterink
d. Type of Support (Individual or Government): Government
e. Eligibility Guidelines: Flint is in the program and is an eligible applicant.
f. Benefits Available: Technical Assistance dollars that could be used for training on planning/marketing/crisis management, etc.
g. Application Process: Request from community

a. **Program Name: Core Communities Fund**
b. Agency Responsible for program: MEDC
c. Point of Contact: Katharine Czarnecki
d. Type of Support (Individual or Government): Government
e. Eligibility Guidelines: Flint is an eligible applicant as a Core Community
f. Benefits Available: Up to $250,000 is available to be used for economic development activities, infrastructure is eligible.
g. Application Process: Form for community to complete, but should work directly with MEDC staff

---

Capital Access

a. **Program Name: Collateral Support Program**
b. Agency Responsible for program: MEDC
c. Point of Contact: Chris Cook
d. Type of Support: Individual
e. Eligibility Guidelines: A federally regulated bank or credit union willing to provide new debt to a qualified for profit operating company. Borrower must be primarily operating in one of the following industries: manufacturing, wholesale & trade, research & development, mining, film & digital media productions, HQ office operations, or businesses that are qualified high technology businesses. Support limited to the lesser of 49.9% of the loan amount or $5,000,000. Fees of 1-3% of MSF support amount at closing and annually thereafter.
f. Benefits Available: Provide access to capital to companies that would otherwise not be able to access that capital due to a lack of collateral.
g. Application Process: The lender provides its underwriting document, along with an application form and company background check form, to MEDC Capital Access for evaluation and due diligence.

a. **Program Name: Loan Participation Program**
b. Agency Responsible for program: MEDC
c. Point of Contact: Chris Cook
d. Type of Support: Individual
e. Eligibility Guidelines: A federally regulated bank or credit union or certified development financial institution willing to provide new debt to a qualified for profit operating company. Borrower must be primarily operating in one of the following industries: manufacturing, wholesale & trade, research & development, mining, film & digital

media productions, HQ office operations, or businesses that are qualified high technology businesses. Support limited to the lesser of 49.9% of the loan amount or $5,000,000. Fees of 1-3% of MSF support amount at closing and annually thereafter.

f. Benefits Available: Provide access to capital to companies that would otherwise not be able to access that capital due to a lack of cash flow in the near term.
g. Application Process: The lender provides its underwriting document, along with an application form and company background check form, to MEDC Capital Access for evaluation and due diligence.

a. **Program Name: Loan Guaranty Program**
b. Agency Responsible for program: MEDC
c. Point of Contact: Chris Cook
d. Type of Support: Individual
e. Eligibility Guidelines: A federally regulated bank or credit union or certified development financial institution willing to provide new debt to a qualified for profit operating company. Support limited to not more than of 80% of the loan amount. Fees of 1-3% of MSF support amount at closing and annually thereafter.
f. Benefits Available: Provide access to capital to companies that would otherwise not be able to access that capital due to increased risk as determined by the senior lender.
g. Application Process: The lender provides its underwriting document, along with an application form and company background check form, to MEDC Capital Access for evaluation and due diligence.

a. **Program Name: Private Activity Bond**
b. Agency Responsible for program: MEDC
c. Point of Contact: Chris Cook
d. Type of Support: Individual
e. Eligibility Guidelines: Borrower must be primarily involved in manufacturing, be a not-for-profit corporation, or be a solid or hazardous waste disposal facility. Maximum bond amount is $1 million free of any restrictions on capital expenditures or $10 million subject to the condition that the company's total capital expenditure in the locality over the three years before and three years after the date of the issuance does not exceed $20 million. There is no size limit for bonds issued to finance solid or hazardous waste disposal facilities. Fees apply based on the amount of the bond
f. Benefits Available: Provide firms with capital cost savings stemming from the difference between taxable and tax-exempt interest rates.
g. Application Process: Applicant prepares an application for the bond and submits it to MSF staff. MSF considers an inducement resolution at its public meeting recognizing the public purpose of the project. Applicant structures the financing and bond counsel begins to prepare documents. MSF considers adoption of authorizing resolution.

Business Development

a. **Program Name – Michigan Business Development Program**
b. Agency Responsible for program – MEDC
c. Point of Contact – Josh Hundt
d. Type of Support (Individual or Government) – Government
e. Eligibility Guidelines – job creation and private investment by expanding or relocating business
f. Benefits Available – cash grant
g. Application Process – submission of application to MEDC staff, Michigan Strategic Fund review and approval, execution of incentive agreement, milestones and disbursements, reporting and compliance.

Federal Grant Development

a. **United States Department of Agriculture – Rural Community Development Initiative Grants**
b. Agency Responsible for program – USDA
c. Point of Contact – Jennifer Tebedo

d. Type of Support (Individual or Government) – Government
e. Eligibility Guidelines – Rural areas outside the boundaries of a city of $50,000 or more and its immediately adjacent urbanized area to improve housing, community facilities, and community and economic development projects
f. Benefits Available – cash grant
g. Application Process – Applications are accepted on an annual basis through a Notice of Funding Availability (NOFA) in the Federal Register.

a. **United States Department of Agriculture – Rural Business Development Initiative Grants**
b. Agency Responsible for program – USDA
c. Point of Contact – Jennifer Tebedo
d. Type of Support (Individual or Government) – Government
e. Eligibility Guidelines – Rural areas outside the boundaries of a city of $50,000 or more and its immediately adjacent urbanized area to support community economic development.
f. Benefits Available – cash grant
g. Application Process – Applications are accepted through the USDA Rural Development's local or State Office once per year.

a. **United States Department of Commerce – Planning Program and Local Technical Assistance Program**
b. Agency Responsible for program – US EDA
c. Point of Contact – Jennifer Tebedo
d. Type of Support (Individual or Government) – Government
e. Eligibility Guidelines – assists eligible recipients in developing economic development plans and studies designed to build capacity and guide the economic prosperity and resiliency of an area or region. The Planning program helps support organizations, including District Organizations, Indian Tribes, and other eligible recipients, with Short Term and State Planning investments designed to guide the eventual creation and retention of high-quality jobs, particularly for the unemployed and underemployed in the Nation's most economically distressed regions.
f. Benefits Available – cash grant
g. Application Process – Applications are accepted on a continuous basis through the regional or State Office.

a. **United States Department of Commerce – Public Works and Economic Adjustment Assistance Programs**
b. Agency Responsible for program – US EDA
c. Point of Contact – Jennifer Tebedo
d. Type of Support (Individual or Government) – Government
e. Eligibility Guidelines – EDAP makes construction, non-construction, and revolving loan fund investments to support the implementation of regional economic development strategies designed to create jobs, leverage private capital, and encourage economic resilience.
f. Benefits Available – cash grant
g. Application Process – Applications are accepted on a continuous basis through the regional or State Office.

MSHDA

Program Names: Community Development Block Grant Program (CDBG) and HOME

Agency Responsible For Programs:

Non-Entitlement Areas – Statewide

CDBG: Michigan Strategic Fund/Collaborative Community Development
Contact Person: Katherine Czarnecki Phone Number: 517.241.4950

HOME: Michigan State Housing Development Authority
Contact Person: Michelle Wildman Phone Number: 517.373.4363

Entitled Areas receive a direct allocation from the U.S. Department of Housing and Urban Development (HUD). Flint falls under the category of an Entitled Area and in FY15, HUD directly awarded Flint $3,617,741 in CDBG and $666,059 in HOME.

Type of Support: CDBG and HOME Federal Assistance

CDBG Eligibility Guidelines:
There is a lot of flexibility overall within CDBG. Note: activities identified in the City of Flint's Consolidated Plan include: **"Community Development and Infrastructure** - The City has 540 miles of water distribution lines, 570 miles of sanitary lines, and 350 miles of storm rain water lines. Much of this infrastructure is over 100 years old and in need of reconstruction or replacement. Insufficient funds are the major obstacle to addressing this need. CDBG and municipal financing represent a fraction of what is needed to address the problem. Additional funds from state and federal sources are needed and are being sought. CDBG will help fill the gap of inadequate resources to maintain community facilities and increase services."

For additional details go to the attached hyperlink City of Flint Consolidated Plan Link.

Overall CDBG can be used for: Acquisition of Real Property; Disposition; Public Facilities and Improvements; Clearance; Public Services; Interim Assistance; Relocation; Loss of Rental Income; Privately-Owned Utilities; Rehabilitation; Construction of Housing; Code Enforcement; Special Economic Development Activities; Microenterprise Assistance; Special Activities by CBDOs; Homeownership Assistance; Planning and Capacity Building; Program Administration Costs and Miscellaneous Other Activities.

CDBG can be qualified based on Urgent Need: An activity designated to alleviate existing conditions and the grantee certifies that those conditions are a serious and immediate threat to the health or welfare of the community, they are of recent origin or recently became urgent, the grantee is unable to finance the activity on its own, and other sources of funds are not available.

CDBG can be qualified based L/M Income Area Benefit: Can be used for an activity the benefits of which are available to all the residents in a particular area that is primarily residential, and at least 51% of those residents (or fewer if the exception criteria apply) are L/M income persons. **See hyperlink page 37 for a list of eligible census tracts.

HOME Eligibility Guidelines:
The actual activities that have been identified in the Consolidated Plan (hyperlink Page 155) are homebuyer assistance and refinancing of existing debt on multi-family projects.

Overall HOME can be used for: home purchase or rehabilitation financing assistance to eligible homeowners and new homebuyers; build or rehabilitate housing for rent or ownership; or for other reasonable and necessary expenses related to the development of non-luxury housing, including site acquisition or improvement, demolition of dilapidated housing to make way for HOME-assisted development, and payment of relocation expenses. HOME funds can also sometimes be used for tenant-based rental assistance contracts.

HOME can be qualified based L/M Income Household Benefit: The incomes of households receiving HUD assistance must not exceed 80 percent of the area median. HOME income limits are published each year by HUD. For rental housing and rental assistance, at least 90 percent of benefiting families must have incomes that are no more than 60 percent of the HUD-adjusted median family income for the area. In rental projects with five or more assisted units, at least 20% of the units must be occupied by families with incomes that do not exceed 50% of the HUD-adjusted median.

Benefits Available/Application Process: Undetermined – contact with the City of Flint regarding current allocation balances for FY15 and prior years is recommended.

Program Name: Housing Choice Vouchers (HCV)

Agency Responsible: HUD, MSDHA

Point of Contact: Kelly Rose

Type of Support: Individual, Rental Assistance

Eligibility Guidelines: 80% of applicants must be below 30% AMI, 20% below 50% AMI. Applicants must pass criminal screening that they do not have any violent crime in the past 24 months or drug offenses in last 12 months.

Benefits Available: HCV program pays a portion of the participants rent and utilities. It does not have any home repair funding component.

Application Process: MSHDA has a Homeless preference—homeless service agencies across the state can enter homeless person's application on waiting list. Non-homeless individuals/families must apply when the County resident waiting list is open for applications. This happens periodically when waiting lists get low on applicants. When vouchers are available names are pulled off the waiting list and applicants are contacted to fill out an application so their eligibility can be determined. Once eligibility is determined, they are issued a voucher and search for a rental unit. The unit is then inspected for HUD's HQS standards (does not have a water quality component) and if the unit passes a contract with the landlord is done and the family moves into the unit.

Editorial Comments: This program is not able to directly help with the Flint water issue. We are formulating a plan in consultation with HUD as to notifying individuals of their ability to get free water filters, etc. as well as their options for moving if they would like to relocate. We are also considering inspecting all homes with children 6 and under for proper installation of water filters.

Program Name: Section 8 Project Based Rental Assistance (Subsidized and Public Housing)

Agency Responsible for Program: HUD, MSHDA

Point of Contact: Daphne Wells

Type of Support: Individual. It provides rental assistance to tenants who reside at a property that has a project based rental assistance Section 8 contract with HUD. MSHDA administers this subsidy as a HUD subcontractor and in some instances has provided financing to build/rehab some of these properties.

Eligibility guidelines: Housing is available to income eligible individuals at these specific properties. Eligible applicants must apply individually at each property in which they are interested in living at and each property has a tenant selection criteria that is adhered to for prospective applicants. Each individual property maintains its own waiting list for applicants wishing to reside there.

Benefits Available: This program wouldn't have any benefits available to the Flint Water issue in that the Section 8 housing is tied to a specific property and only offers rent assistance.

Application Process: Applicants can apply at each individual rental property.

Editorial Comments: The only thing that really fits this category (Subsidized and Public Housing) is the Section 8 program as it provides rental assistance to tenants. Nothing in the program can help as it relates to the water issue as the assistance is tied to the building itself. There isn't anything in the program that would help in this situation except using our contacts with agents and owners in Flint to provide them information as we have talked about.

Program Name: MSHDA Housing Development Fund

Agency Responsible for Program: MSHDA

Point of Contact: Brian Mills

Type of Support: Individual. It provides rental assistance to tenants who reside at a property that has a project based rental assistance Section 8 contract with HUD. MSHDA administers this subsidy as a HUD subcontractor and in some instances has provided financing to build/rehab some of these properties.

Eligibility guidelines: In order for a proposal to be eligible for MSHDA's Statewide Partnership Grant program, the proposed activities must fit within one of five categories (Demolition, Land Acquisition & Development, Neighborhood Service Centers, Capital Improvements, or Community Development).

Benefits Available: Grants are limited discretionary budget dollars generated from interest from MSHDA earning on loan proceeds. Grants under $250,000 do not require formal board approval.

Application Process: Application is attached

Editorial Comments: Pursuant to communications with Mel Brown a few months ago, we suggested a number of different potential ideas for grant use in Flint. Those are detailed below:

- Pay for the costs of water quality analysis of all MSHDA backed mortgages in Flint. Evidently FHA is now conditioning all appraisals in Flint on a water quality analysis – and depending on the results won't put the mortgage through without the addition of a water infiltration system of some kind. Cost estimates are around $3,000 per home which is apparently having a negative impact on an already difficult real estate market.
- Pay for the replacement of water lines owned by residents with MSHDA mortgages within the city that need to be replaced or lines to homes with MSHDA backed mortgages or incomes less than 50% AMI.
- Pay for a percentage of the reconnection fee to acquire water from Detroit up to an amount not to exceed the % of MSHDA financed homes or low income households in the city (50% AMI).
- Pay for the replacing the city's municipal water line infrastructure associated with water lines being replaced to homes in the city with MSHDA backed mortgages or those household at or below 50% AMI.
- Pay for a percentage of any new infrastructure costs associated with the build out of a new water supply system so long as the amount doesn't exceed the % of MSHDA financed homes or low-income households in the city (50% AMI).
- Purchase of water for low income households (50% AMI).
- Purchase of water filters for any low income households (50% AMI).

Program Name: Housing Counseling

Editorial Comment: We have one Counseling agency in Flint right now (Metro Community Development) and they are not involved with water/filter distribution nor are they a site for people to get these items. More information regarding program information can be obtained from Mary Townley at 517.373.6864

Program Name: Self-help Homeownership Opportunity Program (SHOP)

Editorial Comments: The SHOP program is not administered by MSHDA. Mary Townley has calls into HUD to find out who in the state offers this product. Above is a product eligibility information showing that it is administered through non-profits.

SHOP awards grant funds to eligible national and regional non-profit organizations and consortia to purchase home sites and develop or improve the infrastructure needed to set the stage for sweat equity and volunteer-based homeownership programs for low-income persons and families. SHOP funds must be used for eligible expenses to develop decent, safe and sanitary non-luxury housing for low-income persons and families who otherwise would not become homeowners. Homebuyers must be willing to contribute significant amounts of their own sweat equity toward the construction or rehabilitation of their homes.

SHOP is authorized by the Housing Opportunity Program Extension Act of 1996, Section 11, and is subject to other Federal crosscutting requirements. No separate program regulations exist. All program requirements are listed in the applicable SHOP Notice of Funding Availability (NOFA).

Eligible Applicants: National and regional nonprofit organizations or consortia with experience in using homebuyer and volunteer labor to build housing may apply for SHOP grants. Applicants must have completed at least 30 units of self-help homeownership housing within the last 24 months. Eligible homebuyers must apply to participate in the SHOP program through a current SHOP grantee or one of their affiliates.

Application: SHOP grant funds are made available through HUD's annual SHOP NOFA competition. The SHOP NOFA is published on HUD's e-grant portal. Once the NOFA is published, eligible applicants may apply through this e-grant portal.

Eligible Activities: SHOP grant funds can only be used for land acquisition, infrastructure improvements, and administrative costs. Total land acquisition and infrastructure improvement costs cannot exceed an average of $15,000 in SHOP assistance per unit. Administrative costs cannot exceed 20% of the SHOP grant amount. SHOP grantees must leverage other funds for the new construction or rehabilitation of their SHOP units.

Program Name: HOPE

Editorial Comments: At this time MSHDA is unaware of this program and do not administer functions related to it.

TIA/WDA

Program Name: Workforce Innovation and Opportunity Act (WIOA) Adult Program

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: Krista Johnson, Manager, WIOA Title I Section

Type of Support (Individual or Government): Government

Eligibility Guidelines: Adults Age 18 and Older, Priority is given to recipients of public assistance, other low income individuals, and individuals who are basic skills deficient.

Benefits Available:

Basic Career Services: Basic career services are available to all adults and may include: program information and basic assessment, general information, individual job development, advanced job club, advanced screened referrals, group activities, and job search.

Individualized Career Services: Individualized career services are designed for adults who have been unable to obtain employment through core services and have been determined to be in need of more individualized services. Individualized career services may include: comprehensive and specialized assessments, individual employment planning, counseling, short-term pre-vocational skills, case management, literacy activities, out-of-area job search, relocation assistance, internships and work experience.

Training Services: Training services, if made available, may include occupational skills training, On-the-Job training, workplace training with related instruction, registered apprenticeship, incumbent worker training, pre-apprenticeship training, skill upgrading and retraining, entrepreneurial training, transitional jobs, and adult education and literacy training provided in combination with another training service.

Application Process:

Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Program Name: Workforce Innovation and Opportunity Act (WIOA) Dislocated Worker Program

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: Krista Johnson, Manager, WIOA Title I Section

Type of Support (Individual or Government): Government

Eligibility Guidelines:

A dislocated worker is an individual who:

1. Has been terminated or laid off, or who has received a notice of termination or layoff; and
   - Is eligible for or has exhausted entitlement to unemployment compensation; or
   - Has been employed for a duration sufficient to demonstrate attachment to the workforce, but is not eligible for unemployment compensation; and
   - Is unlikely to return to a previous industry or occupation.
2. Has been terminated or laid off, or has received a notice of termination or layoff, from employment as a result of any permanent closure of, or any substantial layoff at, a plant, facility, or enterprise; or
   - Is employed at a facility at which the employer has made a general announcement that such facility will close within 180 days; or
   - Is employed at a facility at which the employer has made a general announcement that such facility will close.
3. Was self-employed but is unemployed as a result of general economic conditions.
4. Is a displaced homemaker.
5. Is the spouse of a member of the Armed Forces on active duty and who has experienced a loss of employment as a direct result of relocation to accommodate a permanent change in duty station of such member; or
   - Is the spouse of a member of the Armed Forces on active duty and whose family income is significantly reduced because of a deployment, a call or order to active duty pursuant to a provision of law, a permanent change of station, or the service connected death or disability of the member; and
   - Is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

Benefits Available:

Basic Career Services: Basic career services are available to all dislocated workers and may include: program information and basic assessment, general information, individual job development, advanced job club, advanced screened referrals, group activities, and job search.

Individualized Career Services: Individualized career services are designed for dislocated workers who have been unable to obtain employment through core services and have been determined to be in need of more individualized services. Individualized career services may include: comprehensive and specialized assessments, individual employment planning, counseling, short-term pre-vocational skills, case management, literacy activities, out-of-area job search, relocation assistance, internships and work experience.

Training Services: Training services, if made available, may include occupational skills training, On-the-Job training, workplace training with related instruction, registered apprenticeship, incumbent worker training, pre-apprenticeship training, skill upgrading and retraining, entrepreneurial training, transitional jobs, and adult education and literacy training provided in combination with another training service.

Application Process:

Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Program Name: Workforce Innovation and Opportunity Act (WIOA) National Dislocated Worker Grants (NDWGs) – previously called National Emergency Grants (NEGs) under the WIA

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: Krista Johnson, Manager, WIOA Title I Section

Type of Support (Individual or Government): Government

Eligibility Guidelines:

A dislocated worker is an individual who:

1. Has been terminated or laid off, or who has received a notice of termination or layoff; and
   - Is eligible for or has exhausted entitlement to unemployment compensation; or
   - Has been employed for a duration sufficient to demonstrate attachment to the workforce, but is not eligible for unemployment compensation; and
   - Is unlikely to return to a previous industry or occupation.
2. Has been terminated or laid off, or has received a notice of termination or layoff, from employment as a result of any permanent closure of, or any substantial layoff at, a plant, facility, or enterprise; or
   - Is employed at a facility at which the employer has made a general announcement that such facility will close within 180 days; or
   - Is employed at a facility at which the employer has made a general announcement that such facility will close.
3. Was self-employed but is unemployed as a result of general economic conditions.
4. Is a displaced homemaker.
5. Is the spouse of a member of the Armed Forces on active duty and who has experienced a loss of employment as a direct result of relocation to accommodate a permanent change in duty station of such member; or
   - Is the spouse of a member of the Armed Forces on active duty and whose family income is significantly reduced because of a deployment, a call or order to active duty pursuant to a provision of law, a permanent change of station, or the service connected death or disability of the member; and
   - Is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

Benefits Available:

Basic Career Services: Basic career services are available to all dislocated workers and may include: program information and basic assessment, general information, individual job development, advanced job club, advanced screened referrals, group activities, and job search.

Individualized Career Services: Individualized career services are designed for dislocated workers who have been unable to obtain employment through core services and have been determined to be in need of more individualized services. Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Disaster Relief Employment Specific NDWGs:

The Secretary of Labor is authorized to award NDWGs to provide assistance to the Governor of any state whose boundaries include a disaster area in order to provide disaster relief employment assistance in the disaster area.

"Emergency or disaster" means:

1. An emergency or a major disaster, as defined in paragraphs (1) and (2), respectively, of Section 102 of the Robert T. Stafford Disaster Relief Emergency Assistance Act; or
2. An emergency or disaster situation of national significance that could result in a potentially large loss of employment, as declared or otherwise recognized by the chief official of a Federal agency with authority for or jurisdiction over the Federal response to the emergency or disaster situation.

The term "disaster area" means an area that has suffered or in which has occurred an emergency or disaster.

If awarded, funds shall be used in coordination with the Administrator of the Federal Emergency Management Agency, as applicable, to provide disaster relief employment on projects that provide food, clothing, shelter, and other humanitarian assistance for emergency and disaster victims, and projects regarding demolition, cleaning, repair, renovation, and reconstruction of damaged and destroyed structures, facilities, and lands located within the disaster area and in offshore areas related to the emergency or disaster.

An individual may be eligible to be offered disaster relief employment if such individual is:

1. A dislocated worker;
2. A long-term unemployed individual;
3. Temporarily or permanently laid off as a consequence of the emergency or disaster; or
4. In the case of an individual who is self-employed, becomes unemployed or significantly underemployed as a result of the emergency or disaster.

No individual may be employed for more than 12 months for work related to recovery from a single emergency or disaster, unless an extension is granted by the Secretary of Labor. Extensions granted by the Secretary of Labor may not exceed an additional 12 months.

Program Name: Workforce Innovation and Opportunity Act (WIOA) Youth Program

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: Krista Johnson, Manager, WIOA Title I Section

Type of Support (Individual or Government): Government

Eligibility Guidelines:

Out-of-School Youth (OSY) are individuals who are:

- Not attending any school (as defined by State law);
- Not younger than age 16 or older than age 24; and
- One or more of the following:
    - A school dropout;
    - A youth who is within the age of compulsory school attendance, but has not attended school for at least the most recent complete school year calendar quarter;
    - A recipient of a secondary school diploma or its recognized equivalent who is a low-income individual and is:
        - Basic skills deficient; or
        - An English language learner.
    - An individual who is subject to the juvenile or adult justice system;
    - A homeless, runaway, or current/prior foster youth;
    - An individual who is pregnant or parenting;
    - A youth who is an individual with a disability; or
    - A low-income individual who requires additional assistance to enter or complete an educational program or to secure or hold employment.

In-School Youth (ISY) are individuals who are:

- Attending school (as defined by State law);

- Not younger than age 14 or older than age 21 (unless an individual with a disability who is attending school under State law);
- A low-income individual; and
- One or more of the following:
    - Basic skills deficient;
    - An English language learner;
    - An offender;
    - A homeless, runaway, or current/prior foster youth;
    - Pregnant or parenting;
    - A youth who is an individual with a disability; or
    - An individual who requires additional assistance to complete an educational program or to secure or hold employment.

Benefits Available:

Available services include tutoring; study skills training; alternative secondary school offerings; dropout recovery services; paid and unpaid work experiences, including summer employment opportunities; occupational skills training; education offered concurrently with workforce preparation; leadership development opportunities; supportive services; adult mentoring; follow-up services; comprehensive guidance and counseling; financial literacy education; entrepreneurial skills training; provision of labor market and employment information; and activities that help youth prepare for, and transition to, post-secondary education and training.

Application Process:

Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Program Name: Community Ventures

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: James Durian, Manager, Community Ventures

Type of Support (Individual or Government): Government

Eligibility Guidelines: Flint residents who are DHHS clients, PATH participants, ex-offenders, and persons with disabilities.

Benefits Available: Connection to employment and comprehensive 24 months of wraparound services after job placement. Community Ventures (CV) can assist Flint residents negatively impacted by contaminated drinking water by providing employment and wraparound services to those effected. CV can also help recruit and retain companies in Flint by partnering with companies and bringing companies together in coordinated community development efforts to help Flint residents. We have done this through promoting social enterprise partnerships like New Life Enterprises, through the formation of an Employer Resource Network (ERN), in Flint, and by partnering with United Way and local financial institutions in providing hard ship loans and financial literacy to Flint residents. CV could expand upon these efforts with a special focus on helping those most negatively impacted by the water crisis.

Application Process: Participants are referred from Mott Community College, Genesee-Shiawassee MWA (MWA), Mid-Michigan Goodwill, New Life Enterprises or DHHS.

Program Name: Job's for America's Graduates

Agency Responsible for Program: Workforce Development Agency (WDA)

Point of Contact: Krista Johnson, Manager, WIOA Title I Section

Type of Support (Individual or Government): Government

Eligibility Guidelines: Students from middle school to 21 years of age.

The JAG Flint program targeted at-risk students at two Flint-area high schools (Flint Northwestern and Flint Southwestern) to help them earn a high school diploma and prepare for college/careers following high school.

Benefits Available:

JAG-Flint's mission focuses on the following:

- Deliver a unique set of services to at-risk and disadvantaged youth in high school;
- Provided follow-up services which will result in the graduate's pursuing a postsecondary education; and
- Ensured the participants entered the workforce in a quality job leading to a career.

The primary objectives of The JAG Model program are:

- Keep program participants in school through graduation.
- Extend program services to participants for 12 months after graduation.
- Assist graduates or completers in pursuit of a postsecondary education and/or an entry-level job that leads to a career.
- Deliver services to non-graduates and non-completers during the 12-month follow-up period to attain a GED certificate or a high school diploma.

Application Process: Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Program Name: Partnership Accountability Training Hope (PATH)
Agency Responsible for Program: Workforce Development Agency (WDA)
Point of Contact: Brian Marcotte, Manager, Welfare Reform Section
Type of Support (Individual or Government): Government
Eligibility Guidelines: Individuals receiving Family Independence Program cash assistance (TANF)
Benefits Available: PATH is the work participation program required for families receiving cash assistance through the Family Independence Program administered by the Michigan Department of Health and Human Services. The Primary goals of PATH are two-fold. First, PATH will identify barriers and help participants connect to the resources they need to obtain employment. Second, the program helps Michigan reach the federally mandated 50% work participation requirement. Work participation is defined by the total number of participants fully engaged in job preparedness training, job search activities, and employment as a percentage of the states work eligible individuals receiving cash assistance.
The program is designed to assist eligible individuals in obtaining employment by offering job search assistance and work skills enhancement. The program offers vocational/occupational training, high school completion or GED attainment and a full range of supportive services that may be required to meet the job search and retention needs of the participants.
Application Process: Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

Program Name: Trade Adjustment Assistance (TAA) Program
Agency Responsible for Program: Workforce Development Agency (WDA)
Point of Contact: Tammy Flynn, Manager, TAA Section
Type of Support (Individual or Government): Government
Eligibility Guidelines: Individuals are eligible for the TAA program who have a qualifying separation from a company with a certified petition by the US Department of Labor (USDOL). A petition identifies a worker group at a specific firm or subdivision and covers all individuals in that group. Generally, if a worker is laid off, a petition must be submitted within one year of the layoff for that worker to be covered by the petition and the certification, if USDOL grants the petition. A group of workers may be eligible for TAA if their jobs are lost or threatened due to trade-related circumstances as determined by the USDOL investigation.
After the investigation, USDOL determines group eligibility to apply for TAA benefits and services. Workers in a certified group will be notified by their local Michigan Works! Agency, at which time they may apply for individual eligibility for benefits and services.
Benefits Available: Employment and case management services: Assessments, career guidance, pre-vocational services, labor market information, supportive services, information on financial aid, employment planning, and information on training.
Training: Up to 130 weeks of training including:
- Classroom training
- On-the-job training
- Customized training
- Registered Apprenticeships

Trade Readjustment Allowances (TRA): Up to 130 weeks of wage subsidies for workers enrolled in fulltime training within 26 weeks of their trade-related layoff or certification, whichever is later.
Re-employment Trade Adjustment Assistance: A wage subsidy for workers age 50 or over who are re-employed at annual wages of $50,000 or less.
Job Search Allowance: Reimbursement for job search costs outside the worker's local area.
Relocation Allowance: Reimbursement for relocation costs for a job outside the worker's local area.
Application Process: Individuals should contact their local Michigan Works! Agency to apply by calling 1-800-285-9675 to locate the nearest Michigan Works! One-Stop Center. Or they may visit www.michiganworks.org.

To learn more about how to file a petition, check on the status of a petition, or to obtain more information on benefits and services, please visit www.doleta.gov/tradeact or contact Tammy Flynn at flynnt@michigan.gov.

Program Name: GED To School
Agency Responsible for Program: Workforce Development Agency (WDA)
Point of Contact: Keenan Wade
Type of Support (Individual or Government): Government
Eligibility Guidelines: Must Pass Official Practice Test or Complete Adult Education GED Preparation Course.
Benefits Available: $150 per candidate to pay the cost of GED testing fees.
Application Process: Individuals should visit the GED To School website at http://michigan.gov/wda/0,5303,7-304-64362-298726--,00.html or call 517-373-1692 for additional information.

Program Name: Adult Education Program
Agency Responsible for Program: Workforce Development Agency (WDA)
Point of Contact: Cliff Akujobi, State Administrative Manager
Type of Support (Individual or Government): Government
Eligibility Guidelines: Adults Age 16 and Older
Benefits Available: Adult Education provides an opportunity for students to improve or achieve education levels equivalent to those of high school graduates each year. Instruction is tailored to meet the individual needs of adult students. Standardized tests identify existing skill levels, appropriate instruction, and academic gains due to instruction. Adult Education consists of five components:

- High School Completion: Instruction designed to fulfill the requirements for a high school diploma.
- GED Test Preparation: Instruction in language arts, math, social studies, science, and writing, to enable successful completion of a GED test.
- Adult Literacy: Instruction in reading, English, language arts, math, and civics for adults without a high school diploma. The most basic literacy courses teach adults to read.
- English as a Second Language: Instruction in reading, speaking, writing, and understanding the English language.
- Labor Employment Related/Employer Workforce Readiness: Instruction in job- or employment-related mathematics, reading, and communication skills. Instruction may be "applied," which means that the academic material is directly related to specific job requirements.

Application Process:
Individuals should contact the Office of Adult Education at 517-373-8800 or visit the Adult Education website at http://www.michigan.gov/wda/0,5303,7-304-64362---,00.html

Historically, the Flint Water Treatment Plant utilized the Flint River as the source for providing drinking water to its customers. In 1967, the ~~plant~~ city of Flint (City) ~~changed its source to the~~started to purchase treated water from the Detroit Water and Sewerage Department (DWSD). The DWSD water source is Lake Huron. The Flint River supply infrastructure to the water treatment plant was continuously maintained as an ~~reserve~~ (emergency backup) source to the system.

Over time, the DWSD source became financially strenuous to the ~~City of Flint~~ (City) and in January 2006 discussions ensued regarding utilizing the proposed Karegnondi Water Authority, which was not yet constructed, as an alternative primary~~the preliminary~~ long-term water supply for Genesee County and the Flint Water Treatment Plant customers. In 2009, the Lake Huron water supply study for the Karegnondi Water Authority was conducted and an Executive Summary and Preliminary Engineering Report were generated. Due to the financial strains the City was experiencing, they resolved to end their contract with DWSD and temporarily convert the water supply back to the Flint River as the source for the Flint Water Treatment Plant prior to the completion of the Karegnondi Water Authority. In April 2014~~, after evaluation and testing of the treatment system with the Flint River source,~~ the Michigan Department of Environmental Quality (MDEQ) issued the Flint Water Treatment Plant construction permits for full time operation enhancements. In May 2014, the conversion of the source was implemented and the Flint Water Treatment Plant began distributing water to its customers.

To ensure compliance with the federal Lead and Copper Rule requirements for corrosion control, The City ~~of Flint~~ commenced ~~The MDEQ mandated~~ two 6-month lead and copper monitoring periods, ~~beginning at the time of the implementation, the first of which required a report from the city~~ A first 6-month monitoring period ended on December 31, 2014, and the City's report was due to the MDEQ on January 10, 2015. The results from this report indicated the lead level (90th percentile) was 6 ppb, just over the 5 ppb level deemed as having optimized corrosion control. ~~Normal or elevated levels?~~ On March 30, 2015 the MDEQ notified the City of ~~the~~the 6ppb results. ~~lead and copper monitoring results. In April of 2015 corrosion control treatment plans are proposed by the City and examined by MDEQ in collaboration with the US Environmental Protection Agency (USEPA).~~

~~October~~ In May 2015, ~~an investigation of a residential lead service line is conducted by the USEPA. Results indicated elevated water lead levels where caused by the lead leaching into the water from the service line.~~ The second 6-month lead and copper monitoring period ended ~~June 30, 2015. The City report provided indicated..... On July 14, 2015 the MDEQ issued the City a construction permit for corrosion control measures.~~

~~On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (DMHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.~~ On June 30, 2015, second 6-month lead and copper monitoring period ended. After consultation with the EPA on July 21, the MDEQ notified the City ~~of Flint~~ of the results on August 17, 2015. At that time the MDEQ, reported that their analysis indicated a lead level of 11 ppb (90th percentile), and required the City to install corrosion control equipment and begin treatment.

Formatted: Font: (Default) Arial

On July 28, 2015 the MDEQ received information from Michigan Department of Health and Human Services (MDHHS) indicating blood lead levels in City of Flint residents were consistent with past years seasonal variations.

Formatted: Font: (Default) Arial, Not Italic

Formatted: Font: (Default) Arial

~~On August 17, 2015 MDEQ required the City to install corrosion control treatment.~~ On September 24, 2015 Hurley Children's Hospital revealed data indicating elevated blood lead levels in children who reside certain zip codes in the City ~~of Flint~~. This same date the MD~~D~~MHHS ~~affirms~~ reaffirms that their data is more comprehensive than that of Hurley Children's Hospital and remained consistent with past year seasonal variations. On September 25, the City ~~of Flint~~ announced a lead advisory regarding the drinking water to its citizens.

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to ~~assist~~ help fund the City's ~~to for the~~ return to purchasing treated water from the DWSD, and to fund ~~staff to conduct~~comprehensive lead evaluations ~~investigations~~ at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD ~~due to the effects on the distribution system caused by the different characteristics of the Flint River water as compared to the Lake Huron source water~~. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose.

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600
- PUR faucet filters – 12,500
- PUR 3-pack replacement filters – 40,000

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

Enclosures

OMB No. 1660-0009/FEMA Form 010-0-13

Mike Sobocinski's notes on January 13, 2015 SEOC briefing (9:30am):

MSP SEOC Planning chief (Amanda Bresler): leads the meeting: Agency situation reports are due by 6pm. A new IAP is available. Agencies need to update their "204 forms" throughout the day.

National Weather Service (Jim Askill[illegible]): Still cautioning about the potential for frostbite in 30 minutes or less (for exposed skin outdoors). Tomorrow's temperatures are expected to rise to about the freezing point (32 degrees F). Possible light rain on Friday could cause icy roads. The weekend will be a little colder, with occasional snow.

MDHHS ([illegible]): CHECC is working on a nutritional plan with other agencies. The plan could address education, short-range and long-range goals, and the mitigation of lead vulnerabilities, perhaps working with a farmer's market. Reference to Flint as a "food desert" and to perhaps open a decent grocery store there. A potential lead impact document has been submitted to planning. Currently considering mental health impacts and resources. Following up with local health departments to determine their staff and support needs.

MDARD (Brad Deacon): A document was approved: Requirements for Licensed Food Establishments using City of Flint Water.

MDLARA ([illegible]): Coordinating with MDEQ. MIOSHA scientists are to help with residential water testing.

MDEQ (Jen Wolf): Extra staff are in Flint today to help with kits. A field observer is helping to organize and plan for the transport of kits to the lab. Helping with the request for a presidential declaration.

Human Services (DHHS?) (Rich [illegible]): Reports "zero filtration products" at the fire stations as "Good job!" [Unclear to me exactly what and why he is reporting as good.] Regarding trucks, information is needed about the quantities on them, being distributed.

American Red Cross (Paul Spata): Five fire stations are staffed for resource distribution. [something] management team for GCCARD (Genesee County Community Action Resource Department). Began [Just the start of ARC involvement, does he mean?] assembling water testing kits. Volunteer reception center is active today. "Lauren" [who?] was brought in for logistics planning in the SEOC.

MDHHS (Brian Wilson): Staff volunteers are on site to help with distribution.

[also MDHHS?] (Steve Federly): Valley Aging is "extracting" data on seniors for use by GIS.

Michigan State Police ([illegible]): Teams are out now, matched with sheriff personnel. were set up on : is the primary and is the secondary channel.

Michigan Department of Corrections (Brent Travelbee): Teams are in the area, assisting. A 50' truck was delivered to the food bank. Local shuttle bus will start tomorrow in the area, able to take about 20 persons at a time to obtain resources.

Michigan National Guard (Chad Randall): Some soldiers are to help at distribution points. Just one per location. MING leaders meeting with Flint mayor today.

MDTMB (Jeannette Doll): There is [some sort of unclear] issue with the Court Street warehouse...something which sounded like it involved its seller having a $2 million liability on it. Might need a food-grade warehouse [not sure whether I heard this phrase correctly]. Working on resource requests and replacement cartridges and water.

MSP SEOC Logistics (Penny Burger): Every agency remember to update past assignments and resource requests in MI CIMS. There's been a request for a budget projection of total costs for this year, which would be hard to do more than just guess at right now.

Recovery Team (Brianna Briggs): "Water Resource Teams" are in the field—that is their official name and is to be used. Could place and maintain an extra 15 teams in the field (Friday). Working with Red Cross to assemble real-time data from "pods" at the fire stations.

PIO/JIC (Nicole Lisabeth): Set up [something, could not make it out]. Good media reports at 11pm last night. Monitoring media and clarifying the role of the MI National Guard, who are at resource sites, not going door to door. Red Cross is dealing with distracting media personnel at water distribution sites. Flint's bus system is now including water resource sites on its routes. Arabic-language information card is proceeding ahead, and logo/branding of water resource teams is being worked on. There was some sort of Legionnaire's Disease report in the media today, according to MDHHS.

MSP SEOC Planning section (Amada Bresler): Resource list to integrate with fire stations and local EOC info. The next briefing is at 4pm today.

DCDS Hours Entry by Coding Block

(Last revised 1/28/14)

To change your default entry to Hours by Coding Block Entry:

1. Log into DCDS.
2. Select Options.
3. Check Hours by CB (Coding Block) Entry to change your default.

To enter **work** Hours by Coding Block (regular, overtime, comp time earned, etc.):

1. Open your time sheet as you normally do.
2. You should see an Hours Entry by Coding Block section above the time entry section. *The blue line is the active line.*
3. Click your cursor in the AY box and enter the last 2 digits of the appropriation (fiscal) year.
4. Tab to Index and enter your Index number.
5. Tab to PCA and enter the PCA associated with work you did for the number of hours worked that you worked on it.
6. Move down to the time entry section and select the appropriate Hours Type.
7. Tab to the appropriate day and enter the number of hours associated with the PCA you entered above.
8. Enter daily comments for each Hours Type.
9. Select Save.
10. At the end of the pay period, select Submit.

To enter hours for holidays, comp time used, annual leave, sick leave, school & community leave, bank leave time used, administrative leave, initial leave, jury duty, Plan A:

1. Check the "std" (standard coding) box under the Hours Entry by Coding Block section.
2. Move down to the time entry section and select the appropriate Hours Type.
3. Tab to the appropriate day and enter the number of hours.
4. Enter the required information for school & community leave. Required information includes all of the following: 1) name of the school or community activity sponsor; 2) name of the event; description of the volunteer services performed; and 4) the time period that the employee performed the volunteer services.
5. Select Save.

6. At the end of the pay period, select Submit.

To view your time sheet:

1. Select Reports.
2. Select Employee Data Collection.
3. Selection Option B - Detail Time (or Option A - Coding Block Detail Time).
4. Enter Department 55.
5. Enter Agency 01.
6. Enter TKU 044. (EMHSD)
7. Select the PP (pay period) End Date.
8. Select OK.

Flint Water FY 2016 Supplemental Budget Request

1. $1 MHlion for Filters

The $1 million for filters will b used to purchase filters for households in Flint that do not qualify for assistance under any of the DHHS assistance programs. Fliters for those residents will be paid for out of funding already in place in DHHS' budget. Each filter is $20 and they were ordered in bulk through Home Depot. Filters are being distributed through local public health departments, with documentation flied for each filter handed out.

2 $6 Million for switch from Flint River to DWSD

The City of Flint estimates it will cost the City an additional $1.3 million per mpnth to use DWSD instead of the FIJnt River. The State and the City agreed to split the cost through June 2016, when the new Karegnondl Water Authority will be completed and Flint will switch to that water source. ($1.3 million for 9 months)

3 $1.35 Million for resources to do community Lead Exposure Testing DEQ,

DHHS and LARA are assembling a team to go into schools, childcare facilities, and other high lead exposure health risk locations to test and follow up on lead exposure.

4 $1 Million for evaluating sample results at the State Lab

The new testing protocols for schools will require each faucet in the school to be tested and evaluated at the State lab. In addition, lead exposure testing in homes will re mlt in tens of thousands more samples that will be need to processed. Each sample costs $26 to process.

Total Ask: $9.35 Million, $7.15 GF

Department of Environmental Quality
Drinking Water Program Budget Request
December 22, 2015

Appropriation	FTEs		Amount
One-Time (2016 Supplemental)			
City of Flint Emergency Water Services		$	3,900,000
• Support half of the cost for Flint to stay on the Great Lakes Water Authority water system for six additional months (July 1, 2016 - December 31, 2016) untilthe Karegnondi Water Authority pipeline is completed.			
• This request assumes the other 50% of the costs to stay on the existing system will be supported by funding from local partners.			
• There may be additional costs for Flint to connect to the Karegnondi Water Authority water system. This request assumes those costs will be a local cost and not funded by the state.			
Total One-Time Funding		$	3,900,000
Ongoing			
Drinking Water and Environmental Health			
Staff			
Corrosion Control Specialists	3	$	450,000
Sampling Staff	2	$	300,000
Lab Staff	3	$	450,000
Service Line Verification Staff	2	$	300,000
Total Staff	10	$	1,500,000
Local Health Department Contracts and Testing Fees		$	1,000,000
Lab Equipment		$	300,000
Travel		$	100,000
Other Supplies and Services		$	100,000

October 1,2015

Publfc Health Emergency Declaration for People Using the Flint City Water Supply with the Flint River as the source

The County is issuing an Emergency Advisory recommending that people not drink the water coming from the City of Flint us1ng the Flint River as the water source unless:

It has been tested to assure Itdoes not containelevated levels of lead.

It is being filtered through a National Sanitation Foundation (NSF) approved filter certified to remove lead that meets ANSI standard 53.

Findings reported in the Detroit Free Press September 30, 2015indicate that Governor Snyder has publically acknowledged that Flint's water supply "appears" to have problems. Snyder has conceded that "it appears that (water) lead levels could be higher or have increased," and thilt there are "probably things that weren't fully understood when the switch was made." This Is in direct contrast to previous reports from the State that downplayed the severity of the situation and conflicted with local data released by researchers at Hurley Medical Center.

Young children are most vulnerable to leads effects, because prior to age six, their brain and central nervous system are still forming and easily susceptible to damage. For an adult to suffer significant health effects, exposure to lead would have to be sustained and morelntense. Most adults who are affected by lead have been exposed in an occupational setting, such as working as a house painter or in a battery recycling plant.

Pregnant women are at special risk because the le.id they absorb crosses the placenta and enters the fetus.

It's important to remember that there Is no known safe level of lead in a human body, Experts now use a reference level of 5 micrograms per deciliter to identify children with blood lead levels that are much higher than most children's levels. This new level is based on the U.S. population of children ages 15 years who are Inthe highest 2.5% of children when tested for lead in their blood.

lead in water can contribute to a child's blood lead level. The Michigan Department of Environmental Quality, who regulates municipal water supplies, has assured us that the water leaving the Flint Water Plant meets all Federal and State requirements. The City of Flint has a documented problem with lead in its drinking water due to service and household lines that may contain lead or lead solder which can leach lead because of the corrosivity of the water since changing to the flint River as the source supply. Generally, those who are most vulnerable

to leads health effects from exposure to unfiltered tap water are the very youngest children. .For this reason, if you are not sure about the lead content In your tap water, it's best to either use a filter that has been found to be effective for reducing or eliminating lead, or to use bottled water instead. Water filters should be National Sanitation Foundation (NSF) certified to remove lead and meet ANSI standard 53. If these options are not available to you, then it's best to let the water run for at least five minutes before using it for either drinking or cooking purposes. Always use cold water instead of hot water for drinking and cooking.

It's especially important to avoid using untested or unfiltered tap water for mixing Infant formula unless you can assure your water is lead free.

When leaded gasoline was In widespread use In this country, the lead came out the tail pipe and was deposited in yards near the roads. That lead may still be in those yards. In addition, lead paint continues to be a major source of childhood lead poisoning and can be found in homes built before 1978 when lead paint was banned in the U.S. and may be a hazard inside and outside the home especially where paint is worn or flaking.

There *are* many other potential sources of lead exposure, including:

- "Home remedies" and cosmetics Imported from other countries
- Tamarind or chili-based candies from Mexico
- Stained glass windows
- fishing sinkers
- Firing ranges
- Old, deteriorated mini-blinds
- Bean pots and painted ceramics
- Crystal decanters
- Lead crystal glassware

Since no safe level has been Identified it is in everyone's interest to reduce exposure to lead as much as possible. Recommendations on ways to reduce lead exposure can be found on the Genesee County Health Department website www.gchd. us and Center for Disease Control and Prevention website: http://www.cdc.gov/nceh/lead/tl ps.htm ,

Recent data provided by Hurley researchers has Indicated a significant increase in blood lead levels in children after the switch to Flint River water. The County Health Officer has requested that MDHHS provide specific data to support their claim that state data is more comprehensive and does not show a significant increase. To date the state has failed to provide the requested data by the September 30, 2015 deadline In our previous request to the state.

Flint Water Crisis
Community Volunteer Resource Center
Event-Based Volunteer Engagement
STANDARD OPERATING GUIDELINES

PURPOSE:
The purpose of these Standard Operating Guidelines is to provide guidance and a standardized methodology for decision making in support of the Volunteer Resource Center (VRC) established by the American Red Cross of Michigan, The United Way, and other partner agencies for Event-Based Volunteers of all qualifications.

ASSUMPTIONS:
Volunteers who are not registered with the American Red Cross will comprise the bulk of volunteers who come to this reception center.

SCOPE:
The standard operating guidelines include the activation, responsibilities, policies, staffing, records, communications, equipment, and closing procedures to be used by the Volunteer Management Support Team. Circumstances and conditions may require the Volunteer Management Support Team to deviate from these standard operation guidelines and make decisions that deviate from these standard procedures.

1. **ACTIVATION**
   1.1. Activation will be in accordance with the Regional Disaster Plan

   1.2. Upon notice of potential activation, the Volunteer Management Support Team Supervisor will deploy to the Staffing function at DRO headquarters and will notify the Volunteer Management Support Team of their alert status.

   1.3. Upon notice of activation, the Volunteer Management Support Team Supervisor will assess support requirements and activate the Volunteer Management Support Team in as per the anticipated need.

   1.4. The Volunteer Management Support Team Supervisor will be responsible for alerting and activating the Volunteer Management Support Team staff

2. **RESPONSIBILITIES AND POLICIES**
   2.1. The Volunteer Management Support Team Supervisor will provide guidance and priorities to the Volunteer Management Support Team staff in accordance with directions from the Emergency Management Command Staff and Michigan American Red Cross Emergency Management.

   2.2. Housing for Volunteer Management Support Team staff from outside the local area is not guaranteed and will be coordinated by the Volunteer Management Support Team Supervisor through the Staffing function at DRO headquarters.

2.3. Housing for spontaneous volunteers from outside the local area is not guaranteed and will be coordinated by the Volunteer Management Support Team Supervisor through the Staffing function at DRO headquarters.

2.4. Comfort/Feeding of spontaneous volunteers will be coordinated by the Volunteer Management Support Team Supervisor through the mass care function at DRO headquarters.

2.5. Volunteer Management Support Team functions include, but are not limited to:

- Welcoming and registration of unaffiliated volunteers;
- Skill determination through checklist and screening, background check & credentialing;
- Release of liability;
- Data entry;
- Work assignment;
- Identification for entry into work area;
- Safety briefing;
- Coordination of transportation to the work site.

2.6. Volunteers may be instructed to return to the Volunteer Management Support Team at the end of the work day to be released and/or for future assignment.

- Control of rental vehicles and the use of the privately owned vehicles of spontaneous volunteers will be the responsibility of the logistics manager.

2.7. Reception, Classification and Assignment of Volunteers.

- The Volunteer Management Support Team staff will receive spontaneous volunteers either as individuals or as part of groups who wish to volunteer. Volunteers will be asked to fill out a volunteer registration form including personal information and job skills.
- The Volunteer Management Support Team staff will screen each volunteer to verify data and any professional qualifications and will review any prioritized job requirements to determine a volunteer request match.
- When a volunteer is assigned to a job, the DRO Member registration form will be marked with the job assignment and filed with the request for volunteer form in an active file.
- An assigned volunteer will be provided a DRO Assignment sheet to the specific group and activity.

2.8. Identification of Volunteers for Entry into the Disaster Area:

- Once a volunteer is matched for a job, the volunteer will be given a Volunteer Management Support Team ID that will identify the volunteer, the location of the volunteer job assignment, and agency or department that has requested the volunteer as well as the date of authorized entry.
- Spontaneous volunteers will be required to get a current ID for each day that he/she enters the disaster area.
- The Volunteer Management Support Team Supervisor will furnish IDs to the Volunteer Management Support Team.

2.9. The DRO staff training function will provide a safety briefing and job training.

- Each volunteer will be given a general safety briefing relevant to the particular emergency. Specific safety information, as may apply to the assigned task, should be briefed by the group & activity.
- Specific job training may be accomplished by the Volunteer Management Support Team or by the receiving agency or department. The receiving agency will be responsible for special job training unless they have requested and coordinated such training with the Volunteer Management Support Team Supervisor.
- A complete and accurate record of safety and training briefings will be maintained by the Volunteer Management Support Team and the receiving agency.

2.10. Transportation Spontaneous volunteers will coordinate their own transportation to and from work sites.

2.11. At the close of business each day, Volunteer Management Support Team staff will be prepared to receive each volunteer that has been referred to a job, at the conclusion of the work day, to verify that the volunteer is physically safe and has exited from the disaster area. Reassignment for future work may be accomplished at this time.

3. Staffing Listed below are brief descriptions of the minimum positions that should be considered for opening the Volunteer Management Support Team.

3.1. Volunteer Management Support Team Supervisor:
- Manages the daily operations of the Reception Center including:
- Scheduling of Volunteer Management Support Team staff
- Set-up for comfort of the staff and efficient response to volunteers
- Briefs and assigns tasks to Reception Center staff
- Supervises key staff; monitors the operation
- Makes changes when necessary and coordinates with the Volunteer Management Support Team Supervisor regarding changing requirements.

3.2. Greeter:
- Greets and ascertains visitors needs and directs them to the appropriate location
- Assists prospective volunteers with completion of forms
- Stresses that there is no monetary compensation for the work performed
- Ensures that traffic flows as smoothly as possible.

3.3. Screener:
- Conducts a brief screening with a potential volunteer, verifies any professional qualifications and then refers potential volunteer to a job in a receiving agency appropriate to the person's abilities and interests
- Completes a DRO member registration and notes referral on the Volunteer Registration Form.

3.4. Staffing/Volunteer Management Support Team Trainer:

- Provides a general safety briefing to every volunteer that is referred to a receiving agency/opportunity. The briefing will include items about weather, use of gloves, drinking of water, and general safety and common sense. Provides general safety/health coordination including basic first aid at the Volunteer Management Support Team.

3.5. Data Coordinator:
- Collects, organizes and posts information about volunteers and referral
- Prepares daily reports to brief staff on number of volunteers referred, denied, unable to place
- Enters information from Volunteer Registration forms into the computer and prints reports.
- Responsible to the Volunteer Management Support Team Supervisor to ensure that the Volunteer Management Support Team Personnel Sign-In / Sign-Out register is maintained.

3.6. Coordinator of Agency Information:
- Coordinates receiving agency requests with Volunteer Management Support Team Supervisor, collects pertinent information from Volunteer Management Support Team Supervisor about needed volunteer assistance; briefs Volunteer Management Support Team staff regularly on requests.

3.7. Staff Wellness:
- Responsible for reviewing Pre-Assignment Health Questionnaire to ensure that volunteers are able to do the work assigned.

3.8. Additional Support: Additional support may be desired depending upon the emergency, duration of the emergency and availability of equipment and personnel. They may include:
- Phone Bank
- Data Entry
- Public Information – assigned by Incident Command at EOC
- Runners

4. RECORDS

4.1. The Volunteer Management Support Team will open and maintain an historical record of major activities or events, including opening and closing of the Volunteer Management Support Team and changes of personnel.

4.2. A record of personnel working in the Volunteer Management Support Team will be maintained on the Volunteer Management Support Team Agency Personnel Sign-in/Sign-out Form.

4.3. Daily Log Documentation will be completed and signed by all Volunteer Management Support Team Staff personnel daily. The Volunteer Management Support Team Supervisor will verify and sign all forms.

4.4. Disaster Relief Operations Pre-Assignment Health Questionnaire

4.5. All spontaneous volunteers will complete a background check within 6 days.

4.6. Disaster Volunteer Registration Form will be signed by registrant. The Volunteer Management Support Team staff will complete the bottom portion of the form and file the completed form with the Request for Volunteers Form when a referral to a receiving agency is accomplished.

4.7. Requests for Volunteers Form:

- The Request for Volunteers Form will be utilized by the Volunteer Management Support Team to track and fill requests for jobs from agencies or departments. Information will be received by the Volunteer Management Support Team Supervisor from a requesting agency. Requests received by the Volunteer Management Support Team direct from an agency will be referred back to the Volunteer Management Support Team Supervisor.
- Receiving agencies will furnish the information on the Request for Volunteers Form to the Volunteer Management Support Team Supervisor.

4.8. Placement Slip: A Placement Slip will be completed by the Volunteer Management Support Team Interviewer upon assignment of a volunteer to a receiving agency. The individual making the referral assignment will initial the slip in the box provided.

- The Placement Slip will be reviewed by the Volunteer Management Support Team
- The receiving agency will collect the Placement Slip, verify any special credentials, provide a job related Safety Briefing and maintain a record of the Safety Briefing.

4.9. Volunteer Sign-Out Register:

- The Volunteer Management Support Team staff will maintain a Sign-Out Register to be completed when a volunteer worker has completed work for the day and has returned to the Volunteer Management Support Team.
- This register records that the volunteer has exited the disaster area and is physically safe at the conclusion of the work day.
- The sign-out process permits the reassignment of a volunteer for the following days' work.

4.10. A record of volunteer hours will provide a cross-check for a record of volunteer hours worked that is to be maintained by every receiving agency.

4.11. Every effort will be made by the Volunteer Management Support Team staff to track the volunteer worker into and out of the Disaster Area and to record the workers hours. The Volunteer Management Support Team Safety Officer will document the attendance of each volunteer receiving the safety briefing using the Record of Safety Briefing

5. COMMUNICATIONS

5.1. Communications between the Volunteer Management Support Team Supervisor/EOC and the Volunteer Management Support Team are essential.

5.2. Volunteer Management Support Team Supervisor will provide priority guidance to the Volunteer Management Support Team Supervisor based upon EOC prioritization requirements.

5.3. The Volunteer Management Support Team Supervisor will provide the status of unfilled volunteer job requests to DRO groups and activities daily at 1030, 1530 and end of day or closing of the Volunteer Management Support Team for the day.

6. SIGNS AND EQUIPMENT

6.1. A list of recommended signs for possible use at the Volunteer Management Support Team.

6.2. A list of Equipment and supplies for the Volunteer Management Support Team.

7. CLOSING RESPONSIBILITIES

7.1. The Volunteer Management Support Team Supervisor will ensure that all Records and Logs will be closed and forwarded to the Volunteer Management Support Team Supervisor at DRO Headquarters.

7.2. Total work hours recorded on the Volunteer Management Support Team Personnel Sign-In / Sign-Out register should concur with the cumulative hours claimed on Daily log Documentation forms.

7.3. Total dollars recorded on Expenses Incurred by Volunteer Management Support Team should concur with the cumulative Material costs claimed on the Daily log Documentation forms.

7.4. The area utilized as the Volunteer Management Support Team will be generally cleaned and furniture and equipment returned to their normal location. Borrowed equipment/furniture shall be returned to its owner. Assistance to move/store purchased equipment/furniture may be requested through Logistics via the Volunteer Management Support Team Supervisor.

7.5. After Action Reports will be completed by Volunteer Management Support Team staff positions as defined in paragraph 3.2 through 3.8, at the conclusion of any activation and will be forwarded to the Volunteer Management Support Team Supervisor.

7.6. After Action Reports are due to the Volunteer Management Support Team Supervisor within 24 hours of de-activation.

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

VRC Operations
Hours: 9 a.m. to 7p.m.
Location: American Red Cross
1401 South Grand Traverse
Flint, Michigan 48503
Dial 2-1-1

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 13, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- **EBL report through 1/12/2016**
  - **23 families contacted**
  - **16 EBL investigations completed.**
  - **16 Water sampling completed.**
  - **9 EBL Reports Received.**
    - **8 homes with lead dust hazards**
    - **3 homes with lead in soil hazards**
    - **7 homes with lead-based paint hazards**
    - **4 homes with lead detected in tap water**
      - **3 homes with lead water levels less than 5 ppb**
      - **1 home with lead water levels greater than 15 ppb**
  - **5 investigations scheduled.**
  - **5 applications received for the Lead Safe Homes Program, 1 family enrolled.**
- **1 home was found to have elevated lead concentrations (72 ppb) in water from a bathroom tap. The family has been advised not to use the tap for consumption or brushing teeth. An additional filter will be provided to the family and options for replacing the fixture will be explored.**

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 3 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 30 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **The Governor's office held a press conference on Legionnaires disease in Genesee County**
- **Blood lead level testing report through 1/8/2016 submitted to the JIC.**
- Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter report through 1/13/2016

	Received	Distributed	Remaining
Water Filters	22,000	13,008	8,992

DEQ Information - Linda Dykema as Liaison

- DLARA plumbers are replacing fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.

DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, Department of Homeland Security, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S.C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R.. §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell:

5. Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number

Mr. Anthony Katarsky Office: 517-336-2686 Cell:

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide

☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds

☐ Tidal Wave ☐ Tomado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm

☒ Other (please specify) Public Health

8. Description of damages (Short description of impacts of disaster on affected area and population). Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,182 residents have been tested for lead blood levels as a result of this incident with 43 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

10. Joint Preliminary Damage Assessment*

☐ Individual Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Individual Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

☐ Public Assistance Dates Performed **Requested** _____ **Start** _____ **End** _____

Public Assistance Accessibility Problems (Areas that could not be accessed, and why)
N/A

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) If additional space is needed, please enclose additional documentation).

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated $53,000,000 to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

Hazard Mitigation* ☐ Statewide **OR**

For the following specific counties, parishes, independent cities or tribes and/or tribal areas.
N/A

12. Mitigation Plan Information*

a. Mitigation Plan Expiration Date April 23, 2019 b. Type of Plan ☐ Enhanced ☒ Standard

13. Other Federal Agency Programs

☐ I do not anticipate requirements from Other Federal Agencies ☒ I do anticipate requirements from Other Federal Agencies

Please see **Enclosure C:** Requirements for Other Federal Agency Programs for additional information in support of this request*.

14. Findings and Certifications

☒ I certify the following:

a. I have determined that this incident is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local government or Indian tribal government and that supplementary federal assistance is necessary.

b. In response to this incident, I have taken appropriate action under State or tribal law and have directed the execution of the State or Tribal Emergency Plan on Jan 5, 2016 in accordance with the Stafford Act.

c. The State and local governments, or Indian tribal government will assume all applicable non-Federal share of costs required by the Stafford Act.

15. List of Enclosures and Supporting Documentation

☒ Cover Letter ☐ Enclosure A (Individual Assistance)* ☐ Enclosure B (Public Assistance)*

☐ Enclosure C (Requirements for Other Federal Agency Programs) ☐ Enclosure D (Historic and Current Snowfall Data)

☐ Additional Supporting Documentation _____

Governor's or Tribal Chief Executive's Signature

Jan 14, 2016
Date

If anyone except the Governor or Tribal Chief Executive signs this document, please provide the documentation that establishes that this individual has the legal authority to act on behalf of the Governor or Tribal Chief Executive.

Not Required for Emergency Declaration Request

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 12, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested for Lead 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/12/2016
  - 22 families contacted
  - 14 EBL investigations completed.
  - 14 Water sampling completed.
  - 7 EBL Reports Received.
    - 6 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - 6 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- CM report through 1/8/2016:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - **# offered CM: 134 (0-5 year olds) and 12 (6-17 year olds)**
  - # CM started: 25 (0-5 year olds) **and 3 (6-17 year olds)**
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) **and 3 (6-17 year olds)**
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: **30 (0-5 year olds)** and 1 (6-17 year olds)
- Weekly Flint Case Management call:
  - Discussed challenges regarding EBL investigations. GCHD reports that families are resistant to allowing EBL investigation for many reasons. Discussed providing participation incentives, potential of using texting to communicate with families, on-site EBL person, etc.

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Blood testing data through 12/8/2016 pulled from the warehouse and summarized for inclusion in bi-weekly blood count report.**
- Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC No updates.

Healthcare/Providers No updates

DEQ Information - Linda Dykema as Liaison

- **DLARA plumbers are replacing fixtures at Freeman Elementary School that were previously tested and found to have > 15 ppb of lead in the water. MDEQ will conduct a "deep flush" of the school plumbing since many lines have been unused for several months. MDEQ will then retest of the water from the new fixtures to confirm whether or not these efforts have been effective in reducing or eliminating exposure to lead in the water.**

Note 11 - Restricted Assets

The balances of the restricted assets accounts in the governmental, business-type activities, and component units are as follows:

	Governmental Activities	Business-type Activities	Component Units
Section 108 business loan proceeds	$ 381,539	$ -	$ -
Equipment replacement and improvement	-	-	252,929
Self-insurance	-	-	15,959,641
Revenue bond indenture held by trustee	-	-	21,056,173
Unspent bond proceeds	-	-	642,739
Revenue bond equipment replacement account - pooled cash	-	3,680,582	-
Debt service reserve - pooled cash	-	2,167,534	-
	$ 381,539	$ 5,848,116	$ 37,911,482

Note 12 - Risk Management

The City is a defendant in various civil and administrative legal actions arising during the normal course of its activities. In accordance with FASB Statement 5, *Accounting for Contingencies*, the City accrues for loss contingencies when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. The city is exposed to various risks of loss related to property loss torts, errors and omissions, employee injuries, unemployment benefits, as well as medical and worker's compensation benefits provided to employees. The City has purchased commercial insurance for fleet equipment and tort claims, boiler and machinery, certain property and equipment damage and theft, employee theft, and limited tort claims for specific City facilities or events. See separate disclosures below for Hurley Medical Center.

The City Attorney protects the legal interests of the City by vigorously defending these actions. The City has estimated the claims that have been incurred through the end of the year, including both those claims that have been reported as well as those that have not yet been reported to the City. The estimate is based on legal counsel's recommendation and past settlement history. Often, the City Attorney negotiates expedient settlements on behalf of the City in amounts substantially less than the amount sought by the claimants. The City does not admit liability, however, in any of the cases settled.

The City has a commercial insurance policy that covers certain general tort liability. The per claim limit is $10,000,000 with a $3,000,000 deductible per occurrence and a $10,000,000 aggregate claim annually. The commercial policy covers public officials, employment practices, employee benefits, law enforcement, and commercial auto.

Risk management of component units

The Flint Economic Development Corporation is exposed to various risks of loss related to property loss, torts, errors and omissions and employee injuries (workers' compensation), as well as medical benefits provided to employees. The government has purchased commercial insurance for all claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three years.

The Flint Downtown Development Authority is exposed to various risks of loss related to property loss, torts, errors and omissions and employee injuries (workers' compensation), as well as medical benefits provided to employees. The government has purchased commercial insurance for all claims.

›mmunity is exposed to various risks of
; and torts. The FAEC has purchased
claims and certain property damage and
to the commercial insurance have not
ırance coverage in any of the past three
reduction in coverage obtained through
the year.

›sed to various risks of loss, including

er currently has no plans or expectation
renovation that would require significant
nolition of the buildings. The Medical
ity in the period sufficient information is
ate the amount of liability.

Note 13 - Self Insurance

General liability

The self-insurance program for general liability is accounted for in the self-insurance internal service fund for claims not covered by the commercial insurance policy. The revenues for this fund's operation are reimbursements from various funds and a transfer from the general fund. Funds are charged for general liability insurance based on total budget. Losses, deductibles, legal and administrative fees are paid from this fund. The liability for known claims is estimated by City with assistance from the City Attorney.

The changes in the claims liability for the fiscal years ended June 30, 2014 and 2013 are as follows:

	Beginning Claims Liability	Current Year Claims and Changes in Reserves	Claims Paid	Ending Claims Liability
6/30/2013	$ 3,968,000	$ (1,493,470)	$ (978,754)	$ 1,495,776
6/30/2014	$ 1,495,776	$ 4,427	$ (863,873)	$ 636,330

Other types of risk are covered by commercial insurance. There were no insurance settlements that exceeded coverage in the last three years.

rance

r medical benefits provided to active benefits are funded on a pay-as-you-go out of the fringe benefits internal service ns and out of the retiree health care trust ns are administered by Blue Cross/Blue ıPlus of Michigan. Once the individual loss amount is reached. Reinsurance enefits. The City is protected from xcess insurance policy which provides specific contract with a $150,000 self- City did not have any claims in excess of ıg the year. The self-insured coverages were protected by specific stop-loss an unlimited excess with a $150,000 ides fully insured HMO health insurance of employees.

ıbility for the fiscal years ended June 30, :

urrent Year laims and hanges in Reserves	Claims Paid	Ending Claims Liability
22,103,342	$ (20,858,794)	$ 1,244,548
20,893,529	$ (20,835,792)	$ 1,302,285

active employee dental and eye care ı basis. The self-insurance program is administrator. All claims and benefits are ts internal service fund. The amount of une 30, 2014 was not material.

Workers' compensation

The City is self-insured for worker's compensation on a pay-as-you-go basis for claims up to $750,000, with reinsurance coverage provided once claims exceed $1,000,000 in the aggregate. The self-insurance program is administered by a third-party administrator. All workers' compensation benefits are paid out of the fringe benefits internal service fund. The claims liability for fiscal year ended June 30, 2013 was not material.

The changes in the claims liability for the fiscal years ended June 30, 2014 are as follows:

	Beginning Claims Liability	Current Year Claims and Changes in Reserves	Claims Paid	Ending Claims Liability
6/30/2014	$ -	$ 1,283,947	$ (453,953)	$ 829,994

Hurley Medical Center

The Medical Center's self-insurance retention is $6 million per occurrence annually with excess claims-made coverage up to $15 million annually. Claims in excess of $15 million are to be covered by the Medical Center. The Medical Center employs the use of an actuary to provide an analysis of the existing claims and to estimate the liability for incurred but not reported (IBNR) claims.

iabilities for claims and defense costs ended June 30, 2014 and 2013 are as

	2014	2013
year	$ 42,047,586	$ 36,699,882
ıbility	(5,065,051)	11,204,087
:penses	(2,118,473)	(2,070,833)
nents	(975,620)	(1,088,550)
	(549,099)	(2,697,000)
	$ 33,339,343	$ 42,047,586

s is reported in accrued expenses, both statement of net position. The long-term ɜ 30, 2014 and 2013 is $29,697,151 and ıe carrying amount of the insurance trust to $15,293,989 and $16,338,354 at June ɜly.

sured for workers' compensation claims. 3, the Medical Center has recorded long- ɔrkers' compensation of $1,610,787 and

Note 14 - Employee Retirement And Benefit Systems

Retirement systems

During the last fiscal year, the City closed out Flint Employees' Retirement System (FERS), the single-employer plan, and transferred approximately $270 million of assets to the Michigan Municipal Employees' Retirement System. The City participates in the various retirement plans as follows:

Michigan Municipal Employees' Retirement System

Plan description – The City participates in the Michigan Municipal Employees' Retirement System (MERS), an agent multiple-employer defined benefit pension plan that covers all employees of the government. The system provides retirement, disability and death benefits to plan members and their beneficiaries. MERS issues a publicly available financial report that includes financial statements and required supplementary information for the system. That report may be obtained by writing to MERS at 1134 Municipal Way, Lansing, Michigan 48917 or on the web at http://www.mersofmich.com.

Funding policy – The City is required to contribute an amount equal to a percentage of covered payroll which is determined based on a flat rate as determined by the actuary. Under the plan, eligible employees are required to contribute 0.0%-12.0% of earned wages to the MERS plan. The contribution requirements of the City are established and may be amended by the Retirement Board of MERS. The contribution requirements of plan members are established and may be amended by the City, depending on the MERS contribution program adopted by the City.

American Red Cross

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

Regional Points of Interest

Tuesday, January 13, 2015

REGIONAL WEATHER & IMPACTS

Frigid forecast for Tuesday night, Wednesday morning

(WTHR)

Indianapolis, IN: Central Indiana picked up another one to three inches of snow and gusty winds are blowing and drifting that snow. Travel will be tough through Tuesday evening. Winds will diminish overnight, with clearing skies. This is a recipe for a frigid start to Wednesday. Wednesday morning temperatures will be in the single digits, with wind chills near -10 degrees. Take precautions from the cold and remember your family, friends and pets. There will be some morning sunshine on Wednesday, with afternoon clouds in the forecast. A weak weather system will move across the northern half of the state and a few snow showers are possible north Wednesday afternoon and evening. Highs on Wednesday will be near 20 degrees. The temperature forecast is tricky over the next several days. Our latest analysis hints at milder air moving our way. We will forecast temperatures to go above freezing on Thursday and Friday. Temperatures will be the key to the precipitation forecast too, as another storm system arrives on Friday. Here is our thinking now. There will be some rain and maybe a wintry mix developing on Friday. This will change to rain before changing to snow later Friday into Saturday. This is a complex storm system and we will keep you updated. It will be cold enough for some snow showers on Saturday and Sunday.

Whiteout conditions cause crashes, close freeway near Holland

(MLive)

Holland, MI: The I-196 freeway in the Holland area is closed in both directions because of multiple crashes in what police described as whiteout conditions. Michigan Department of Transportation officials at about 3 p.m. closed the westbound lanes between Adams Street and M-40. Holland police said they expected the westbound lanes to be closed until at least 4:45 p.m. At about 2:30 p.m., the eastbound lanes at Byron Road were closed due to at least one crash. The extent of any injuries is not known. Heavy lake-effect snow is hitting the lakeshore area.

15 vehicles involved in pile-up crash on I-70 in eastern Indiana

(WTHR)

Richmond, IN: A chain-reaction crash on I-70 near Richmond shut down the interstate Tuesday morning and into the afternoon. It happened around 10:20 a.m. when traffic in the westbound lanes came to a crashing halt after blowing snow created white-out conditions. Marty Watral, a truck driver, said, "I couldn't see anything. We were slowed down to 35 miles an hour and you just couldn't see anything." Within seconds, there was a massive pile-up involving ten semi-trailers and five vehicles. Sgt. John Bowling with the Indiana State Police explained what triggered the crash, which occurred around 11:00 am. "What we know is that a semi was driving too fast for conditions. As he came across the overpass, he lost control and jackknifed across the highway," said Sgt. Bowling. Bowling said it set off the chain reaction, collision leaving three people hurt. While all were transported to a Richmond hospital, he said the worst injury was a broken leg. Sgt. Bowling said the call initially came in as 30 vehicles involved, but that was not accurate. While scores of vehicles were parked in the westbound lanes, approaching traffic was diverted to adjacent roads. I-70 eastbound also slowed to crawl as drivers paused to see the pile-up. Those stuck in it could do nothing but wait for the wreckage to be cleared, something that was expected to take several hours.

LAW ENFORCEMENT & CYBERSECURITY

Capital University says it's safe to return to student union after bomb threat
(The Columbus Dispatch)
Columbus, OH: Capital University says there is no danger at the Harry C. Moores Student Union, which was the subject of a bomb threat this afternoon. "All clear per Capital PD," read a tweet from the university at 3:44. The threat was called in to university police about 2:15 p.m., said Nichole Johnson, university spokeswoman. No other buildings were evacuated. Classes are in session at Capital but classrooms are on the north side of the Bexley campus, far enough away from the student union to be considered safe, she said. Several law-enforcement agencies responded and the student union was being searched, Johnson said.

EMERGENCY MANAGEMENT

Students return to southern Illinois school closed for week due to flooding
(Associated Press)
Wolf Lake, IL: Students are back in class at a southern Illinois high school after it was closed for a week due to flooding, taking time to discuss the effect of flooding on their families. Although waters have started to subside, Illinois in recent weeks saw flooding along rivers including the Mississippi, Sangamon and Illinois. Illinois Gov. Bruce Rauner issued state disaster declarations for 23 counties, largely in central and southern Illinois. Damage assessments are ongoing to see if any areas are eligible for federal assistance. Students returned to Shawnee High School Monday for the first time since flooding closed the Wolf Lake School, The (Carbondale) Southern Illinoisan reported. The school district runs along the Mississippi River, and most students live on flood plain. Eight of 10 students in teacher Jamie Nash-Mayberry's social studies class said they evacuated their homes, and about half said they helped pass sandbags to shore up levees. She asked her students to write down and document their experiences for historical record. Junior Abbey Livesay of Wolf Lake wrote about how she packed up her home that she has lived in since birth, and then drove to Grand Tower to help friends do the same. Junior Wyatt Hassebrock described how he split time between packing up his home and pulling 12-hour shifts at a farm, where thousands of bushels were being taken to higher ground. "It's a lot of stress to wonder, in three days, how do you haul 200,000 bushels?" Hassebrock said. "Well, when everybody pulls together, it can happen. And it did." Nash-Mayberry is behind the school's Levee Project that teaches students about the importance of levees. They write to local, state and federal officials, research fixes and raise money for local levee districts. Students told her that those lessons resonated as waters rose and said they felt anxious about their homes and school. With waters receding, students' fears have waned for now.

Door-to-door effort underway in Flint water crisis
(Associated Press)
Flint, MI: Volunteers and police carrying bottled water, filters and lead test kits knocked on doors in Flint on Tuesday, seeking to help residents in the Michigan city that's confronting a water crisis. State troopers and sheriff's deputies escorted eight teams as they trudged through cold temperatures and 3 inches of snow, with more falling. Flyers were left at homes where no one answered, giving the location of where to pick up the items later. "We plan to go every day this week and we'll continue until everyone has safe drinking water," state police Lt. Dave Kaiser said. They hope to get to 500 to 600 houses a day, Genesee County sheriff's Capt. Casey Tafoya said. Flint has about 99,000 residents in an estimated 30,000 households. The water resource teams are among a number of relief efforts started in the wake of Republican Gov. Rick Snyder declaring an emergency last week. For months, water drawn from the Flint River leached lead from old plumbing into homes after the city switched its drinking water in 2014 from Detroit's system to save money. Testing in October detected increased lead levels in residential water supplies and in children's blood. Exposure to lead can cause behavior problems and learning disabilities in children. Flint has since returned to Detroit's system for its water. The state auditor general and a task

force created by Snyder have faulted the Department of Environmental Quality for not requiring Flint to treat the river water for corrosion and belittling the public's fears. The agency's director stepped down last month.

Snyder activates National Guard to distribute bottled water and filters in Flint
(WXYZ)

Flint, MI: Michigan Gov. Rick Snyder late Tuesday activated the National Guard to help distribute bottled water and filters in Flint as it deals with a drinking water crisis. Snyder's executive order issued late Tuesday is intended to bolster outreach to Flint residents, where volunteers and police have been going door to door with bottled water, filters and lead test kits. Snyder said Monday the water situation is a "crisis" and last week declared an emergency. For months, water drawn from the Flint River leached lead from old plumbing into homes after the city switched its drinking water in 2014 from Detroit's system to save money. Testing in October detected increased lead levels in residential water supplies and in children's blood. Exposure to lead can cause behavior problems and learning disabilities in children. Flint, which has about 99,000 residents in an estimated 30,000 households, has since returned to Detroit's system for its water. The state auditor general and a task force created by Snyder have faulted the Department of Environmental Quality for not requiring Flint to treat the river water for corrosion and belittling the public's fears. The agency's director stepped down last month.

Volunteer Workforce Requests

REQUIRED INFORMATION:

- Brief job description is required
- The requestor of the volunteers must understand they assume responsibility for the volunteer's safety and the volunteer's actions
- The requestor of the volunteers is responsible for managing and providing direction
- 48 hour advance notification required for request
- Reasonable expectations of the volunteer workforce

Today's Date:	
Requestor's Name:	
Requestor's Cell Phone:	
Requestor's Email:	
Who will be serving as the volunteer's supervisor?	
Where do volunteers report? (Name of Facility, Address, City, Zip)	
What Dates are volunteers needed?	
What times are volunteers needed?	
How many volunteers are needed?	
Who is providing transportation for the volunteers?	
Does the volunteer need to provide their own lunch or will the requestor provide meals, snacks and beverages?	
Are there any qualifications needed?	
Additional Notes:	
Submit Request to:	Justin.Bays@redcross.org

Flint Water Crisis
Community Volunteer Resource Center (VRC)
Event-Based Volunteer Engagement

Overview:

Damaged infrastructure and the leaching of lead into the city's water caused damage to public and private water infrastructure and has caused or threatened to cause elevated blood lead levels especially in the population of children and pregnant women. The water situation has resulted in an immediate threat to public health and safety and disrupted vital community services. The city, county and state have all declared a state of emergency and have begun distributing required resources on a city-wide level. Stakeholders, (ex. NGOs, faith-based organizations, businesses and government agencies), acknowledge that a critical component of the Flint Water Crisis response and recovery is a sustainable community volunteer staffing solution.

Purpose:

The purpose of the Volunteer Reception Center (VRC) is to leverage the community partner agencies' expertise recruiting and managing event based volunteers to address the staffing needs of government agencies, community partners, and stakeholders.

The VRC will:

- Expand the existing workforce to meet urgent staffing needs and encourage long term planning of EBV staffed: events, work sites, activities, etc...
- Help set the strategic direction for building, sustaining and delivering the response and recovery programs to facilitate individual, family and community recovery.
- Serve as a mechanism/tool to recognize, capture and focus the good will of the local, regional and national communities and their interest in supporting the city of Flint and its citizens.
- Acknowledge, capture and focus the good will of the local, regional and national communities to support the response and recovery of the city of Flint and its citizens.

Audience:

- Individuals or groups of event-based volunteers (EVBs).
- Community partners and stakeholders, (i.e. non-profit and faith-based organizations, businesses and government agencies).

Volunteer Expectations:

- Match the need of the assignment with the skill set and ability of the volunteer.
- Orientation, education, training, safety briefing and job assignment.
- Providing an efficient and effective volunteer intake process and satisfying work assignment experience.

The Michigan Department of Health and Human Services (MDHHS) continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels. Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels. The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

Flint Data

- Total Flint Population: 99,002
- 40.1 % of the city's population lives poverty. Flint is the second most poverty-stricken city in the nation for its size, just behind Youngstown, Ohio.
- The state's poverty rate is 16.2 percent.
- Children age 0-17 living in poverty:
  - 2012: 31.8%
  - 2006:25.4%
- The median income for Flint residents between 2009 and 2013 was $24,834 a year. The state's median income was $48,411.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with No. 1 the best in the state). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5 % of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47%
  - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.

MDHHS Program Data

City of Flint		
Program	**Cases**	**Recipients**
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Mike Sobocinski's notes on January 12, 2015 SEOC briefing (9:30am):

MSP Resouce unit (acting planning chief?) Amanda Bresler: Reading IAP objectives. SEOC hours will go until 8pm, so 6pm agency situation reports are due. 2pm tactics meeting scheduled.

National Weather Service (Jim Askill?): Contacted Genesee County EOC and added them to the list of NWS contacts. Today's weather is "sloppy," with "off and on" lake effect snow. Some spots might see snow all day, other spots might not see much. Various bands produce spotty effects locally. Today, snow, low temperatures, and winds produce treacherous travel. Frostbite sets in within 15 to 30 minutes on exposed skin. About 1 to 2 inches of snow accumulation will be seen today, then "off and on" snow tomorrow during both day and night—one inch or less. After the next few days it should warm up a bit (to the freezing point?).

MSP SEOC Operations section (Jackie Hampton): Identified shortages need to be addressed: water filters and test kits. Another warehouse is being opened today. Need equipment at DHHS site (loaders, etc.) to move resources on/off vehicles. 9600 cases of water per day are being handled, so space is needed to stockpile that. GCARD (?) to eventually be used for staging only, when more space has been found.

DHHS (Jennifer ??): Currently at a level 2 activation. Processing the request for a warehouse facility. Must sort through the short and long-term storage needs. Distributing guidelines/message information. Also dealing with volunteer information (and organization – the availability of volunteers).

MDARD (Kay Fritz?): Updated guidance document re: food service establishments, and the document is being approved through the JIC. Animal shelters and related tasks are being worked on. Information is going out to veterinarians in Flint. Coordination occurring with Genesee County Health Department and Genesee County animal control. (She quickly reads off their list of actions.)

MDLARA (unknown person?): Doing work with ?plumbing chief? En route. [Didn't catch information clearly.] A list of home-based day care centers is available.

MDEQ (Jen Wolf): Refers to online links for approved water filters. 10,000 water test bottles are on order. Coordination with American Red Cross. More supplied ordered – another 10,000 water test bottles. Would like to always have at least 2,000 on hand, at the warehouse.

Capt. Kelenske: Make sure that the fire stations have what they need. That's the area that is farther from direct control (i.e. outside of state framework).

MDHHS (unknown speaker?): Logistics of coordinating with American Red Cross, etc. Given 10am ETA on truck with provisions from/to ?Home Depot? retail outlets. But it's more useful to be given a current location of the truck, rather than an ETA. About 700 (something – individual bottled water servings, I think?) were obtained and are being delivered.

American Red Cross (Paul Spotten?): Trying to increase staffing. Is it possible to reduce hours (stopping at 7pm) to accommodate the difficulty for volunteers during the cold weather? (Capt. Kelenske: Current

hours are 9am to 9pm, and will remain so.) Some warehouse teams have been established. Tomorrow, a volunteer reception center is opening.

MDHHS (Brian [redacted]): Teams are preparing for distribution activities, but the main current focus is on the procurement of water filters.

MI Dept. Of Civil Rights (Mark [redacted]): About 15,000 Spanish-language and 30,000 English-language palm cards exist. Would like to arrange deliveries to Our Lady of Guadelupe Church and to the Hispanic center. (Capt. Kelenske: Must deliver broadly to all faith based places at once rather than just to one or two specific ones.)

Office of Services on Aging ([redacted]): Delivery to 1400 addresses with seniors – meals, care management services. Working with the Genesee and Valley Area agencies on aging. Care management clients information obtainable from various senior agencies. Becoming aware of a citizen distrust of filters alone, with seniors requesting water in addition. State and local ombudsmen checking on nursing homes to verify the use of bottled water there—these facilities are all mapped in GIS, so the info is available. (Capt. Kelenske: Must broaden messaging to build trust in filters. Jackie Hampton: Are be able to test filtered water, to build that confidence? Jen Wolf DEQ: All samples received are being tested, so filtered water samples won't be turned back, but the lab doesn't want to ask for samples of filtered water. Nicole Lisabeth PIO: hadn't heard about testing filtered water – official info should be distributed if it's to be done.)

MSP ([redacted] in SEOC): Truck shipments, tracking on map, three or more trucks requested. Comparing deployment with supply.

MDMVA (Chad Randall[redacted]): Researching the resources available to fill requests.

MDTMB (Jeannette Doll): Reached out to Meijer, found that they'd already been shifting their filter supply toward their Flint stores. Checking into Amazon as another source. Three trucks with drives are to arrive tomorrow. A 50' trailer is to be procured. (Jackie Hampton: drivers needed 7a to 10p). Emergency can allow extension of the normal 14 hour limit that drivers can be on the road. About 30,000 palm cards being printed.

Capt. Kelenske: All state agency resources are available and can be brought to bear. Any resistance can be overcome through authorities of/in the SEOC. For example, "any" state employee can go door-to-door [i.e. minus those with physical/health limitations]. But logistics do need to be sorted through.

MSP ([redacted]) Team (Brianna Briggs): Presented info in Flint and answered questions. Two kits were given out in some cases instead of just one (per household), when concerns were brought up about filtered water quality. Local volunteers are many. If state agencies do need to eventually contribute more staff, they'll be notified.

PIO (Nicole Lisabeth): Currently stressing the use of filters as the most efficient way to secure good drinking water for each household, long-term. Backed by Dr. Eden Wells in this—announced at about 6pm last night. A warehousing and inventory management system ([redacted]) for an

inventory system. There's a parking issue re: media, but teams are getting out in the field, with instructions not to be delayed/distracted by media inquiries or activities. Teams are not to engage with media, but just to focus squarely upon their assigned tasks. All media are to be referred to the PIOs and the JIC. (Capt. Kelenske: A standard statement to this effect is to be used by workers—not even a "no comment" response, but that all media requests are to go through the PIO/JIC.) The Governor's office is sending daily emails to Flint, advising to use water filters, and that teams are going door-to-door. 2-1-1 is available to call there, a public service announcement (PSA) video has been made, a website is available. Working with Comcast to show the PSA video and to place filter instructions on a public access channel there. Billboards are going up in Flint to inform about the availability of 2-1-1 and of the website. Mailed cards are going out. Working on an Arabic translation for information cards. Getting information on churches to participate—by the weekend? Inquiries obtained regarding any Pb issues in other areas of the state. It's important to have city and county PIOs in the JIC. Some 2-1-1 rumors of lead in bottled water were dismissed/discouraged. Some calls were reported as being made to the FEMA national headquarters, involving concerned agencies such as the NAACP. Questions were also received on how corporations can make donations. (Capt. Kelenske: 2-1-1 is very important. Verify the staffing and system in place there; minimize chance of a shortfall.)

MSP Planning (Amanda Bresler): Updating the 204 form. Working to improve the local tracking sheet for resources at Flint area fire stations.

Local EOC (Mark DuCharme): Volunteers are needed at both warehouses. Don't refer to the new warehouse as "Diplomat" – because there is an existing business it may be confused with.

Capt. Kelenske: Give that warehouse a generic name, not even "DHHS warehouse." Overall, fine job so far. Focus on what we <u>can</u> do, and remember to take a breath or to step back occasionally so that there aren't problems with stress interfering. The smallest detected slip will be portrayed as a significant news event. The next state agency update will be at 4pm at the latest – might occur sooner.

Mike Sobocinski's notes on January 11, 2015 SEOC briefing (9:30am):

MSP Planning Section Chief Tom Weber leads the meeting, reads list of objectives from IAP. A state agency briefing is occurring every afternoon now. The SEOC was open on both Saturday and Sunday this past weekend.

MSP EMHSD Jackie Hampton: Agencies need to stay focused on completing form 204 and their critical tasks. Those who are speaking in the SEOC should now stand to present their information into the microphone.

National Weather Service (Jim [redacted]): During the next 48 hours will get challenging. Fairly tame light snow right now, but from 8pm onward there will be more snow coming in with winds. About 2 to 3 inches are expected in the Flint area from 5pm today to 8pm tomorrow evening. The expected temperatures will be in the teens. Blowing snow will mean that it will be hard to keep roads clear, creating hazardous travel conditions. Temperatures will be cold and will result in wind chill factors below 0 degrees F. Frostbite would be expected on skin exposed for times less than ½ hour. From Wednesday to Friday, only occasional light snow is expected, but the cold temperatures will continue.

MDHHS (Jennifer [redacted]): The CHECC has been opened, with a partial activation. Subject matter experts will be brought in as needed.

MDARD (Justin Henderson): He refers to yesterday's update [as if everyone was here yesterday], and no change to that update. [Several other agencies simply reported no significant change, or didn't mention anything that sounded specific and important enough for me to include here. Some phone-in agencies might have been too brief or garbled to be included.]

MDEQ (Jen Wolf): Coordination between their lab and various other agencies (city of Flint, DTMB, MDARD, DHHS, etc.) on test bottles, kits, and instruction sheets. Seeking appropriate dispersion of bottles within Flint, to match actual local needs (rather than too many at locations whose needs are not as great as others').

MDHHS (Richard Thelen): Things are proceeding on track. Setting up for 1pm training at (site). Getting arrival time estimates on all orders, establishing filter quantities, gave some info to GIS for processing.

American Red Cross: Has staffed distribution sites at 5 fire stations, 9 churches, and helped to organize more (for water and filter distribution). Some larger sites are needed.

Adult Services (Steve [redacted]): Pulling together the list of addresses for Flint seniors who are at higher risk. Exploring the role that could be played by their nutrition network, in response to a "food desert" concern that was raised. The Department of Education feeds children. Better framing is needed for nutritional needs issues. (Jackie: DHHS is working on it.) [My comment: In my experience, the "food desert" concept was completely overblown, applying an exaggerated name and limited definitions that failed to recognize the true variety and accessibility of foods through various transportation options and exaggerating the low quality of food that is readily available locally, fixating upon particular ideas of raw fruits and vegetables while downplaying the substitutability of frozen vegetables, packaged mixes, etc.

But this is actually the topic that Kari Day had researched for her master's degree, and so we should make use of her expertise on this, if she's interested. I mentioned this to her as she was leaving for Flint and she did say that she's interested in coordinating and providing her expertise on the topic. My own views are merely rooted in theoretical and methodological skepticism, and my own experiences, but she is the one who's done actual research on the subject in Detroit, and although she might agree with some of my critiques, I might be off-base in others and certainly don't have her experience in researching the topic. There are legends circulating widely on this topic, typically involving a mythical Detroit grocer selling bad apples for $7 each, and I've pointed out at meetings that such a concept doesn't make any economic sense for a store owner, and that it makes no sense to dismiss the availability of cheap but nutritious frozen vegetables and decently fresh ingredients which are available at places like "Subway" – but the sole emphasis upon gardens and raw produce grocers, and the offhand dismissal of everything that certain researchers have labeled as "fast food" has horribly overstated the "problem" in most areas. At some point, these debates could be resolvable through actual data. Much of my own criticism stems from personal experience at finding nutritious foods while living in poverty for a couple of years without a car in the middle of Lansing. Although Lansing is obvious not a worst-case scenario, certain principles still apply elsewhere. If transportation available through bus routes, those who can use the bus usually have access to major grocery stores. For those who don't want to take a bus, various substitutes can be found which aren't considered in the dubious research designs I've seen on the subject. For those who are simply stuck at home, it might not matter if they have a garden and store one block away, since immobility is immobility.]

MSP (Matt Bolger): Tomorrow, there will be a walking tour in Flint. Electronic tablets would be useful for data entry, rather than the traditional paper forms.

MDTMB (Jeannette Doll): Cards have been printed for the Governor's conference this morning. Trucks are going to Flint, with transport arranged for all this week. Parking improvements are being organized.

Recovery Branch (Brianna Briggs): Working through MSP (Amy Dehner) and going to Flint to provide information, attend training session. Contact lists are being made for teams in Flint. Will coordinate with the JIC and PIO.

SEOC Logistics ([redacted] [person didn't stand]): Four new churches will serve as distribution points. People should specifically label new requests as such when entering/sending the info in. Do not use the Resource Tracking Board (in MI CIMS) to send notes to oneself.

SEOC Finance (Penny Burger): A hotel is set up for direct billing in the Flint area – unsure how many are traveling there. Would like lists of staff who might stay in Flint, to ensure that a room is available there. Some have made their own arrangements, which could be okay, but Finance can help with overnight lodging.

PIO (Nicole [redacted]): Flyer was sent to MDTMB. A Spanish version is being completed. 2:30pm County Office Building media briefing will take place in Flint. News release for that is going out today. Governor Snyder, Capt. Kelenske, and the MDEQ director are speaking, plus others. Video public service

announcement being arranged for Comcast Cable (30 seconds long), similar to radio PSAs—MDHHS worked on these, being broadcast soon.

SEOC Planning: 3:30 agency situation reports and summaries submission deadline. 4pm afternoon agency briefing will occur.

Tony Katarsky: Replacement staffing is underway. It's okay to not overwork, to take time off as needed, although the official leave time may feel limited at this time.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 11, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

The Community Health Emergency Coordination Center (CHECC) is at Level 2 Activation - Elevated Threat/Alert Mode.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - **22 families contacted**
  - 14 EBL investigations completed.
  - 14 Water sampling completed.
  - 7 EBL Reports Received.
    - 6 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - **6 investigations scheduled.**
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)

- # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **Dr. Hanna-Attisha provided the first set of requested data as approved by MDHHS IRB.**
- **Blood testing data through 12/8/2016 pulled from the warehouse: report pending.**
- The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.
- Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

January ??, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C. 20500

Through: Ms. Janet Odeshoo, Acting Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, Illinois 60605

Dear Mr. President:

Under the provisions of Section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207 (Stafford Act), and implemented by 44 CFR § 206.36, I request that you declare a major disaster for the State of Michigan as a result of water system problems and their associated public health impacts within the City of Flint (Genesee County), since May 2014.

The current public health emergency involves serious problems with the water quality supplied through the city's system... (Describe physical human impacts – injuries/deaths)

(Describe voluntary agency assistance provided to Flint to assist with this issue: ARC and its level of operation, Salvation Army, Southern Baptists, MIVOAD, other agencies, municipal programs/shelters, etc. Include numbers and dates – cases, persons, amounts, etc.).

(Indicate the States of Emergency declared, by whom, and for which areas.)

(Describe physical damages which have occurred, utility and service disruptions, impacts upon people, effects upon critical facilities, other emergency conditions, health and safety hazards, status of repairs/improvements and their estimated completion dates, if known.)

(Provide information on PDA findings, how/where conducted, accessibility concerns.)

General background/context:
Throughout the 20th Century, several overarching trends affected cities throughout the United States, in ways which would eventually prove to be very challenging to historical central cities—especially Flint. Through the 1920s, long-established development patterns had involved the expansion of central cities through the method of "annexation," in which outlying lands officially became part of the city and thus became supplied with urban infrastructure which allowed for more intensive development. However, as various technological advances reduced the costs of the infrastructure required to support moderate levels of development in outlying areas, many of these urban fringe areas became developed without a full need for the central city's urban infrastructure. Traditional urban transportation requirements had also been transformed by the mass-production of affordable automobiles, allowing great increases in the distances over which people could commute to work each day. These general national trends tended to then be supported and institutionalized with various laws and policies, solidifying the independent strength of "suburban" developments around each historical central city. For example, Michigan's Charter Township Act of 1947 greatly enhanced the capacity of townships to resist annexation efforts, so long as they provided a suitable level of infrastructure and services on

their own. Other post-war policies included the Federal Housing Administration's support of suburban residential development, the construction of the interstate highway system which provided infrastructure to allow rapid transportation between the central and fringe sections of most major urban areas, and subsequent shifts of retail outlets (e.g. shopping malls) and employment centers (e.g. office and industrial parks) toward outlying areas where taxes were less expensive, land was more plentiful, and metro-area processes had led to suburban areas with concentrations of wealthier consumer and highly educated, specialized labor forces existed which made these suburban locations highly logical choices for new developments of these types.

Although the proliferation of suburbs had been consistent with certain kinds of democratic ideals, allowing more freedom of choice among area schools, municipalities with their own separate electoral processes and budgets and revenue systems, and various lifestyle choices associated with certain locations, there were also serious problems which these processes were creating. One was the development of segregation patterns, which had to be offset over the course of several decades with government action such as Shelley versus Kraemer (1948) and the Fair Housing Act of 1968. Urban planners worked with new principles and requirements involving equity, such as the spatial distribution of subsidized housing according to "fair share" principles, and also involving environmental justice, recognizing that some of the most heavily polluted and disaster-prone areas were tending to be those that were becoming disproportionately occupied by poorer residents and persons identified with ethnic minority groups. Many school districts shared some of the same boundaries which had divided central cities from suburbs, resulting in another set of institutional impacts which required corrective policies to adjust for, such as busing and later Schools of Choice programs.

Although it took only a couple of decades for the negative effects of these processes upon most central cities to become clear, it often took additional decades to start correcting some of their effects. Some of these have continued to this very day because of their complexity, and thus the political, economic, and organizational difficulties of addressing them effectively. Michigan has seen central city budgets shrink greatly along with declines in those municipalities' populations, land values, intensity of development, and tax revenues. A "vicious circle" has sometimes developed, in which declines of one type have gone uncorrected for enough time that related declines are caused or worsened, leading to the dilemma of how to stop such a negative cycle from continuing.

In the case of the City of Flint, it had grown rapidly during the early 20th Century and then saw its population peak in the 1960 census, at a population of nearly 200,000. From this peak, the population had dropped only slightly by 1970, but each decade thereafter saw the loss of more than 10% of the city's population. Today's population is estimated at only about 100,000—only about half of what it had been 50 years before. But despite the loss of important industrial plants and their associated jobs, most of this change in the central city was the result of a dispersion of population and resources across the broader metropolitan area, rather than from an overall metropolitan decline. Genesee County as a whole continued to have its population increase through 1980. As Flint itself lost about 37,000 persons between 1960 and 1980, Genesee County's population increased by about 76,000. Only then did the area as a whole start declining, sporadically and inconsistently, with the county sometimes registering slight

population growth, alternating with periods of larger decline. These simultaneous patterns are shown in the following data table:

	1930	1940	1950	1960	1970	1980	1990	2000	2010
Flint	156,492	151,543	163,143	196,940	193,317	159,611	140,761	124,943	102,434
Genesee	211,641	227,944	270,963	374,313	444,341	450,449	430,459	436,141	425,790
ratio	73.9%	66.5%	60.2%	52.6%	43.5%	35.4%	32.7%	28.6%	24.1%

As Flint was completing its mid-20th Century boom, its population grew substantially, except during the depression decade of the 1930s. During this time, the county as a whole was also expanding, at a somewhat faster rate than the city, so the proportion of the county's population found in the central city did decline during that period. However the city's shrinking proportion within its metropolitan area did not pose much of a problem as long as both the city and the overall area were growing. By contrast, the extent of central city population loss seen after 1970 was very serious, straining the city's budget to the point where an emergency manager was assigned by the governor (in 2011), providing greater authority to sort through the many challenges and shortfalls which had accumulated. Shrinking city revenues, budgets, and services seemed over time to lead to conditions and situations which directly affected the health of its residents—alarming rises in homicide rates, deterioration of the city's housing stock, an accumulation of brownfield sites, episodes of widespread arson, and the current public health emergency involving the city's water supply.

Central cities frequently provide important services and functions for their entire metropolitan areas, but as a result of 20th Century trends, such cities often bore increasing financial burdens while doing so, as many sources of tax revenue dropped off as residents moved to suburbs and increasingly shopped and worked in those suburbs as well. Even when businesses and people remained in the central city, tax revenues often shrank when overall property values declined within an increasingly suburban and exurban metropolitan environment. According to Flint's 2013 Master Plan (page 18), the daytime weekday population of the city increases to nearly 134,000 as a result of worker and student inflows. Thus, the city regularly supports traffic and services for more than 30,000 persons beyond those who are full-time residents of the city. During major events, this number is much higher. Flint falls into the category of city that has been called a "legacy city" (See *Rebuilding America's Legacy Cities*, edited by Alan Mallach in 2012 and published by American Assembly, Columbia University), caught in the problems of transitioning from its historic mid-20th Century manufacturing base into new roles for 21st Century health and success. It has been caught in a long-term trap of an aging infrastructure combined with dwindling municipal revenues. And although there are opportunities available by which the city might successfully make that transition, its current problems must first be overcome. (Mallach xi, 180-183) In order to offset mismatches between a central legacy city and the disproportionate wealth of the surrounding areas it serves, various planners and urban policy experts (e.g. Norman Krumholz, Myron Oldfield, John Rusk) have found that various forms of revenue sharing may be justified, greater integrating the central districts with the overall metropolitan area whose health is mutually intertwined, or finding ways to fund the health of essential central sections and infrastructure within existing political and organizational structures, networks, and capacities. Cities are legally "creatures of the state" and thus subject to the effects of state policy. Where past policies had resulted in an accumulation of fiscal

problems for central cities, new policies have the potential to help solve these same problems in the long-term. But first, the immediate threats to health for nearly 100,000 permanent city residents, plus tens of thousands of non-residents who make daily use of the city's resources, services, and amenities, must be corrected. The importance of the problems of aging city infrastructure has become clear, but the first step is to protect the health of the area's residents, as longer-term solutions continue to be developed with a keener awareness of the relationship between the health of each central city, and the quality of life for each broader metropolitan area and the state as a whole. A successful response to the current emergency will also help to inform the handling of similar challenges that might occur in other legacy cities, with this one crisis potentially providing the urgency and will to address related problems in other locations, lessening the potential for their infrastructure to produce a similar emergency-level situation.

The city's poverty rate is 2.67 times higher than the national poverty rate, and the city's median household income is less than half of that for the nation as a whole. Average unemployment rates within the city were nearly three times the national rates. A disproportionate number of the city's residents have disabilities (functional needs). Although the percentage of elderly residents is slightly below average, the opposite is true for the percentage of young children under age 5, and it is this age category that is most vulnerable to the effects of lead exposure. The percentage of children under 5 is higher in Flint than the respective percentages for Genesee County, the State of Michigan, and the United States as a whole. (Refer to the following table.)

Demographic Profile of the Affected Municipality

	Persons Below Poverty Level	Median Household Income	Children under 5 years	Percent Elderly (65+ years)	Percent with Disabilities	Percent Pre-Disaster Unemployment (5-year estimate)
National Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State Average	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint (Genesee Co.)	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

Data Sources
U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

NOTE: The general direction I had started with my draft text was to historically frame this situation as the result of various trends that affected large central cities during the past 60-100 years, with the choking of central city resources eventually causing mismatches that would eventually have to be addressed. Thus, unlike so many previous administrations, Michigan recently actually undertook some significant actions to directly address some of these issues of budget, debt, bankruptcy, school district losses, etc. in historic cities like Detroit, Flint, Benton Harbor, Pontiac, etc. where huge population losses occurred primarily within the central city, while overall urban area growth continued and resulted in resource splits. Naturally, these references, deriving from a theoretical urban planning perspective, will need to be reviewed for their political feasibility.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Equally troubling, the socio-economic profile of the affected counties and local communities found at Attachment 1 shows these areas are also some of the most economically-distressed in the region and therefore least able to recover from this flood disaster on their own. For example, in Wayne County, where over 23-percent of residents live below the federal poverty level, in the hard-hit cities of Dearborn, Detroit, Highland Park, and Inkster, the poverty levels all exceed 25-percent. In the City of Highland Park, the poverty level is closer to 50-percent. Three significantly affected Wayne County communities (i.e., the cities of Detroit, Highland Park, and Inkster) have median household incomes (at $26,955, $20,298, and $28,095, respectively) that are close to one-half of the state average of $48,471. In Macomb County, the City of Warren's poverty level exceeds 17-percent and its median household income, at $44,982, also lags nearly 8-percent behind the state average. The cities of Dearborn and Dearborn Heights in Wayne County both have poverty levels exceeding the state average, and median household incomes that are less than the state average. The cities of Madison Heights and Oak Park in Oakland County also experience those same conditions. Unemployment in many of the affected communities is also high. For example, all three counties have unemployment rates (at 9.6-percent, 8.4-percent, and 11.1-percent, respectively) that exceed the state average of 7.4-percent. (Unfortunately, Michigan's unemployment rate remains one of the highest in the nation, and well-above the national average of 6.2-percent.) The City of Highland Park has an unemployment rate that exceeds 23-percent, while the City of Detroit's rate exceeds 17-percent. As the table at Attachment 1 shows, several other communities particularly hard-hit by the flooding also have unemployment rates that exceed double-digits."

The following information is furnished on the nature and amount of State and local government resources that have been or will be used to alleviate the conditions of this emergency:

(Describe response actions by state and local governments. Describe any state/local Individual Assistance programs.)

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"In response to this flood disaster, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on August 13, 2014, in accordance with

Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Disaster for the counties of Macomb, Oakland, and Wayne, including the local political subdivisions located therein, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned counties and local political subdivisions in responding to and recovering from this disaster. I must note that numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals; assessing the damage and impacts to affected state facilities, infrastructure, and services under their stewardship; and taking appropriate actions to keep those affected facilities, infrastructure, and services operational.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.
I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that supplemental federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected counties specified in this request, and activation of the Hazard Mitigation Grant Program for all counties within the state. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are tabulated at Enclosures A and B respectively.

(Provide the disaster history of the State over the past 12 months... List areas that have sustained damage from this event and other disasters in the previous 12 months, and include any other pertinent factors that would have a bearing upon the State's ability to respond, such as economy of the area, terrain, inaccessibility, or capacity of voluntary organizations active in disaster.)

(If Individual Assistance is being requested, provide detailed information on the impacted population, including percentage of insurance, percentage below poverty level, median household income, percentage of elderly, percentage of disabled, pre-disaster unemployment rates, and any other special populations [children under 5]. Include a comparison of the percentage of the state and local government averages and national averages. Indicate source of data cited.) NOTE: This data is provided in Attachment 1.

(If Public Assistance is being requested, provide a brief analysis of infrastructure damage by category, including the cost estimates for each category and the percentage of the total eligible Public Assistance cost estimate. Include a discussion of significant impacts to specific areas. If any local communities have sustained significant damage and have incurred extremely high per capita impacts, provide that information, especially if the localized damage is in the tens or even hundreds of dollars per capita. Discuss the level of insurance coverage.

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"Information regarding the nature and amount of state, local, and nongovernmental resources that have been or will be used to alleviate the conditions of this disaster can be found at Attachment 2, "Significant State and Local Response and Recovery Actions." Maps, weather and flood charts, and damage photographs related to this disaster can be found at Attachment 3, "Supporting Maps, Charts, and Photographs.""

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I certify that for this major disaster, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act. Total non-federal share expenditures are expected to equal or exceed $4,816,304, in accordance with the tables at Enclosures A and B."

NOTE: Green-highlighted text is not for this event. It is here as an example, and was from the 2014 metro-Detroit flood disaster request letter.

"I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf."

Sincerely,

Rick Snyder
Governor

About this Guide: The National VOAD Disaster Health Committee Resource Guide aims to articulate activities provided by National VOAD members in the health sector. These organizations or agencies may or may not be responding to a disaster.

American Red Cross
2025 E Street, NW, Washington, D.C. 20006
Phone: 1-800-RED-CROSS/1-800-733-2767
www.redcross.org

The **American Red Cross** prevents and alleviates human suffering in the face of emergencies by mobilizing the power of volunteers and the generosity of donors. The American Red Cross—through its strong network of volunteers, donors and partners—is always there in times of need. We aspire to turn compassion into action so that...
...all people affected by disaster across the country and around the world receive care, shelter and hope;
...our communities are ready and prepared for disasters;
...everyone in our country has access to safe, lifesaving blood and blood products;
...in an emergency, there are always trained individuals nearby, ready to use their Red Cross skills to save lives.

Disaster Health Services

The Health Services (HS) function within Disaster Cycle Services prepares for, responds to and assists in recovery activities to meet the disaster-related health needs of individuals and communities. This step is achieved by working with Red Cross disaster leadership, other Red Cross activities, the health care community and governmental agencies.

The role of Health Services is to:

- Assist Red Cross chapters and regions prepare, respond and recover from disaster by building volunteer capacity and capabilities.
- Participate in building community resilience through partnering with community agencies.
- Assess disaster-affected individuals and communities to determine appropriate response and care needs.
- Provide care and support to persons who have disaster-related or disaster-aggravated unmet health needs.
- Assist clients in finding resources to meet disaster-related unmet health needs. These resources may include Red Cross financial assistance per Red Cross guidance.
- Participate in assessment, care and resource acquisition for clients with functional and access needs.
- Partner with other community, state and federal agencies to fill the needs of clients.
- Participate in disaster-related health research.
- Assist Staff Wellness with the care of Red Cross disaster responders when health related issues occur during a disaster relief operation.

Disaster Health Assets

Individual chapters and regions maintain a small supply of durable medical equipment and supplies for sheltering. The American Red Cross partners with the community, local, state and federal partners and the private sector to provide just in time health assets to our disaster affected clients.

AmeriCares

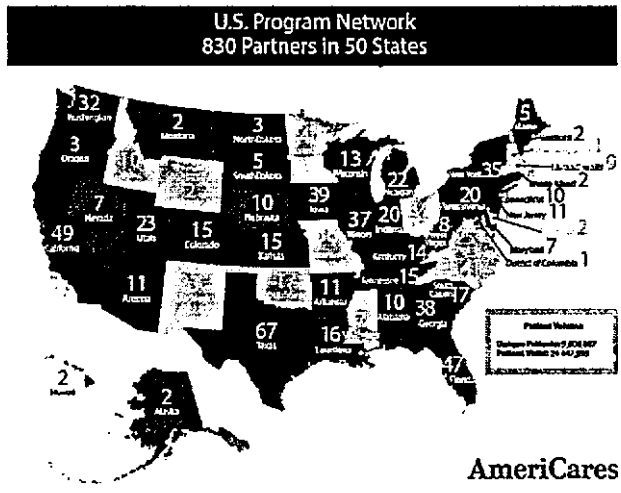
AmeriCares
88 Hamilton Avenue, Stamford, CT 06902
Phone:1-800-486-HELP/1-800-486-4357
Email: Info@AmeriCares.org
www.americares.org

AmeriCares is an emergency response and global health organization that saves lives and builds healthier futures for people in the U.S. and around the world. Every day, AmeriCares puts critically needed medicines in the hands of frontline health workers and develops innovative, sustainable health improvements in their communities. We are the leading nonprofit for delivering donated medicines and medical supplies to health programs around the world. We leverage this core competency with emergency preparedness, response and recovery efforts, and programs that improve health outcomes. Our programs increase access to care in more than 90 countries every year.

AmeriCares responds to an average of 30 natural disasters and humanitarian crises worldwide each ear, establishes long-term recovery projects and brings disaster preparedness programs to vulnerable communities. AmeriCares U.S. Program is the largest nonprofit provider of medical aid to organizations serving low-income uninsured patients in the U.S.

Disaster Health Services

- AmeriCares supports over 800 health clinics and community health programs serving the uninsured and underinsured nationwide with ongoing deliveries of medicines and medical supplies. In times of emergency, we increase aid deliveries to these safety net partners.
- AmeriCares maintains longstanding relationships with some of the world's largest pharmaceutical companies and medical supply manufacturers.
- AmeriCares partners with community first responders, health departments, emergency management offices, federally qualified health centers, free or charitable clinics, non-profit central-fill pharmacies, non-profit hospitals, social service agencies and others addressing the needs of communities impacted by disaster.



Disaster Health Assets

- Prepositioned donated medicines, medical supplies, and disaster relief supplies in our Stamford, CT warehouse that can be quickly mobilized Examples of aid include the following:
  - Prescription and over-the-counter medicines
  - Medical and surgical supplies (syringes, gauze, bandages, etc.)
  - Vitamins and nutritional supplements
  - Personal hygiene products
- AmeriCares Mobile Medical Unit is a 42 foot bus equipped with two exam rooms and on site, point-of-care lab testing that can be deployed anywhere in the United States.
- AmeriCares has the ability to fund flash grants for partners, enabling them to respond locally to critical needs.
- AmeriCares Emergency Response staff are trained in Resilience and Coping for the Caregiver (RCHC) and Pediatric Disaster Mental Health Intervention (PDMHI). These training programs support the community and local caregivers following a disaster.

Buddhist Tzu Chi Foundation
1100 S. Valley Center Ave.
San Dimas, CA 91773
Phone: 1-909-447-7799 ext. 500
Email: tzehuei@us.tzuchi.org
www.tzuchi.us

Buddhist Tzu Chi Foundation
In 1966, Dharma Master Cheng Yen established Tzu Chi Foundation in Hualien. With the spirit of self-discipline, diligence, frugality, and perseverance, Tzu Chi set out to help the poor and relieve suffering. Over time, the Foundation's mission started with Charity and extended into Medicine, Education, and Humanistic Culture. Tzu Chi originated in the remote Hualien area and expanded to all five major continents of the world with chapters and offices in 50 countries. Tzu Chi provides aid to over 90 nations. Its volunteers selflessly contribute through a mindset of gratitude, expressing their sincerest care and support to each and every individual in need.

Tzu Chi USA
In 1984, the Buddhist Tzu Chi Foundation in the U.S. registered as a non-profit 501(c)(3) organization in California. In 1989, the first office in the U.S. was established in Alhambra, California. There are now more than 60 offices and facilities in the U.S. with over 100,000 volunteer and donors working to make a difference in their local communities.

Disaster Health Services
Tzu Chi Medical Foundation takes direct action through a combination of medical outreach, mobile units and permanent clinics. A mix of volunteer healthcare professionals and dedicated non-professional volunteers work together for long hours to create a welcoming, safe and efficient resource for their patients.

- **Flying Doctors to the Rescue! Partnership**: Since 2012, Tzu Chi has collaborated with Flying Doctors, a California-based group that send medical staff wherever they are needed across the country.
- **Vision Care: A Clear Improvement:** Tzu Chi patients receive free eye exams and vision correction prescriptions, and can choose from several different styles of frames. After a short wait, they are presented with their new free glasses.
- **Flu Shots: An Ounce of Prevention is Worth a Pound of Cure**
- **Acupuncture: Freedom From Pain:** Tzu Chi offers free acupuncture treatment to help relieve undocumented workers and low wage earners suffering
- **Dental Care – Key to Overall Health:** Tzu Chi's clinics treat and repair dental problems, as well as educate patients on how to maintain proper dental to avoid future problems.

Disaster Health Assets
Four Permanent Clinics
Tzu Chi operates four permanent medical clinics, three in California and one in Hawaii. A fourth California clinic in Fresno is in the planning stages and medical outreach is ongoing and expanding throughout every region of the country. Tzu Chi's Permanent Clinic Locations provide affordable health services to families in need, all year round. Services include, primary medical care, dental care, acupuncture, women's health services and children immunizations.

Five Mobile Clinics: Three Dental Mobile, One Vision Mobile, One Cancer Screening Mobile

Catholic Charities USA
2050 Ballenger Avenue, Suite 400
Alexandria, VA 22314
Phone: 1-703-549-1390
www.catholiccharitiesusa.org

Catholic Charities USA (CCUSA) is the national office for Catholic Charities agencies nationwide. CCUSA's members provide help and create hope for millions of people a year, regardless of religious, social or economic background. CCUSA provides leadership and support for the work of local agencies in their efforts to reduce poverty, support families, and empower communities. The Disaster Operations Division coordinates the Catholic Church's response to disaster in the United States and territories. CCUSA supports local Catholic Charities agency response and recovery efforts. These agencies provide critical services including emergency food, direct financial assistance, counseling and other support services.

Disaster Health Services

- In 2014, 4,354 clients received disaster-health services related to response or recovery grants provided by CCUSA.
    - In 2013, Catholic Charities agencies provided over 900,000 client health-related services. The CCUSA Disaster Operations team can only track the disaster health services provided through CCUSA disaster grant funding.
- These disaster health services include Behavioral Health Services (counseling, mental health and addiction services), Prescription Assistance, Pregnancy Services, and provision of durable medical equipment.
- Local Catholic Charities agencies provide health services through health clinics, dental clinics, Parish nursing, home health services, skilled nursing facilities, hospice, and intermediate care facilities.

Disaster Health Assets

- Licensed clinical counselors to provide mental health support.
- Prescription replacement services post-disaster.
- Durable medical equipment provision (eyeglasses, crutches, wheelchairs, etc)
- Access to healthcare providers through partnership with Catholic Health Association (network of 600 hospital and 1,400 long term care and other health facilities around the U.S.)

Corporation for National and Community Service (CNCS)
1201 New York Avenue, NW
Washington, DC 20525
Phone: 1-202-606-5000
Email: info@cns.gov
http://www.nationalservice.gov/

We are the **Corporation for National and Community Service**, a federal agency that helps more than 5 million Americans improve the lives of their fellow citizens through service. Working hand in hand with local partners, we tap the ingenuity and can-do spirit of the American people to tackle some of the most pressing challenges facing our nation.

We invest in thousands of nonprofit and faith-based groups that are making a difference across the country. We are AmeriCorps, Senior Corps, the Social Innovation Fund, the Volunteer Generation Fund, and more. We serve, we build, and we make an impact that changes lives and communities.

Disaster Health Services

During a disaster CNCS can call upon its AmeriCorps, National Civilian Community Corps (NCCC), and Disaster Cadre to help and organize. CNCS provides Organizational Support, distribution of supplies, debris clean up and Mold suppression, Health and Wellness checks, Volunteer Management, Client Management and Tracking, Public Situational Awareness, Support to Emergency Management, Support to VOAD, COADs, and LTRCs, Inter-agency Facilitation, Surge Capacity for Staffing and Support for Emergency Farm and Animal Care.

Disaster Health Assets

Individual Assistance

- ✓ Distribution of Life-Sustaining Supplies
- ✓ Direct Service
  - o Mold Suppression
- ✓ Health and Wellness Checks

Volunteer and Donations Management

- ✓ Volunteer Reception Center
  - o Establish and Manage Operations
  - o Database Management (homeowner intake and volunteers)
  - o Track Volunteer Hours
- ✓ Field Leadership for Volunteer Engagement
  - o Deliver training in safety and tasks
  - o Support volunteer housing/logistics
- ✓ Warehousing Support
- ✓ POD and Donations Tracking

Public Assistance

- ✓ Dispatch and Tracking of Donated Equipment

Community Outreach

- ✓ Damage and Other Needs Assessment
- ✓ Support to 2-1-1 or Other Call Centers
- ✓ Client Intake and Tracking
- ✓ Public Situational Awareness
  - o GIS Mapping Support
  - o Social Media
  - o Scouting
- ✓ Case Management
- ✓ Support for Multi Agency Resource Centers
- ✓ Transportation
  - o Emergency Transport
  - o Long-Term Moving Support
- ✓ Staffing for Staging Areas and Logistics
- ✓ Canvassing

Capacity Building

- ✓ Support to Emergency Management
- ✓ Support to VOAD, COADs, and LTRCs
- ✓ Inter-agency Facilitation
- ✓ Surge Capacity for Staffing
- ✓ Support for Emergency Farm and Animal Care

Direct Relief
27 S. La Patera Lane
Santa Barbara, CA 93117
Phone: 1-800-676-1638/
1-805-964-4767
www.directrelief.org

Founded in 1948, **Direct Relief** is a nonprofit, nonpartisan organization that improves the health and lives of millions of people affected by poverty or emergency situations by mobilizing and providing medical resources needed for their care. Each year, more than 150 of the world's largest medical and pharmaceutical manufacturers join Direct Relief in providing critically needed medical aid to people in need. Direct Relief works in more than 70 countries worldwide, and partners with more than 1,200 safety net health centers and clinics, representing 4,000 clinical sites in every state in the U.S.

Direct Relief provides targeted assistance to help communities prepare for and respond to emergencies. Safety net providers deliver essential healthcare services when a disaster strikes. Direct Relief partners with these facilities by providing specifically requested medications, supplies, and cash grants immediately following a disaster.

Disaster Health Services

Direct Relief employs commercial-grade technology for logistics, analytics, and operations to deliver and inform humanitarian aid in the most efficient and effective way possible, utilizing SAP's enterprise technology system.

Emergency response efforts are swift and efficient as a result of extensive partnerships with local, regional, and national associations, pharmaceutical manufacturers, and delivery support from FedEx. Direct Relief is in the unique position to offer appropriate emergency response due to:

- Partnerships with more than 1,200 safety net health centers and clinics across the U.S.
- A network of 150 corporate health care manufactures that donate medicines, supplies, personal care, and over-the counter items
- Years of experience in pharmaceutical distribution and accreditation through the National Association of Boards of Pharmacy

Disaster Health Assets

- Expert warehousing and distribution of medical goods
    - Experienced Emergency Response staff who can provide logistics expertise
    - Implementation of sophisticated supply-chain software from SAP allows Direct Relief to run highly efficient inventory management and logistics.
- Current and on-going relationships with 1,200 nonprofit clinics and health centers nationwide, who are often the first receivers in disaster situations. For more details, visit the interactive US Assistance Map.
- Extensive partnerships with local, regional, and national health center & clinic associations, pharmaceutical and healthcare manufacturers, and FedEx
- Through partnerships with analytics and mapping companies Palantir and Esri, Direct Relief integrates a broad range of relevant data for fine-grained profiling of humanitarian medical needs and rapidly evolving crisis situations

- Existing grant system to distribute financial support responders directly affected by a disaster or assisting with their community's local medical emergency response efforts.
- To prepare partners for emergencies, resources are pre-positioned ensuring essential materials are on hand when a disaster occurs. Direct Relief's emergency preparedness programs include:
    - Hurricane Prep Packs – mobile, waterproof packs that contain medical items to treat 100 patients for 3-5 days
    - Medical Outreach Packs -- backpacks that contain supplies and equipment that meet a variety of prevalent disaster-related health needs, including infection control, diagnostics, trauma care, and personal protection tools
    - Family Emergency Carte Kits – fully stocked personal care and hygiene items for patients in need

Headwaters Relief Organization
9400 Golden Valley Road
Golden Valley, MN 55427
Phone: 1-763-233-7655
www.headwatersrelief.org

Headwaters Relief Organization is a non-profit disaster relief organization. It developed as a grassroots response to Hurricane Katrina. Headwaters is comprised of nearly 1400 volunteers who assist with clean-up, re-building, medical and mental health support nationally and internationally. Headwaters has maintained a free mental health resource center since Hurricane Katrina in New Orleans' Ninth Ward. The organization also provides telecounseling services in partnership with several New Orleans non-profits. Since 2010, Headwaters has provided services to schools and orphanages in Haiti. In addition, Headwaters has worked with the educational ministries in both Haiti and the Philippines to develop children's disaster trauma related materials. Headwaters is a VOAD in Minnesota, North Dakota, South Dakota, Iowa, Wisconsin, Utah, Tennessee, Oklahoma, Ohio, Colorado and Louisiana, all states where we have business related interests. Headwaters has responded in multiple states to hurricanes, tornados, flooding, typhoons, both man-made and natural disasters.

Disaster Health Services

Headwaters uses medical teams to support their work in response to disaster. They have psychologists, social workers and other mental health professionals trained and available to provide mental health support. They have significant experience working with families and children during times of disaster. They have published books for children in Haiti and the Philippines and for those who have been impacted by Ebola. These educational materials assist children with processing trauma, consider loss as it relates to orphans and teach preventative measures. All of the books are accompanied by a teacher's guide.

Disaster Health Assets

- Well trained team of mental health staff
- Telecounseling services
- Multi-disciplinary volunteers who will assist with clean up and re-building as well as mental health support
- Resources with medical teams including physicians and nurses that will deploy with Headwaters
- Volunteers to provide security where needed
- Ability to develop educational materials on a national and international basis
- Partnerships on a national and international basis with government entities, mental health resources, faith-based, community and professional organizations, construction companies, educational institutions and businesses
- Cultural competence including interpreters and translation services.

Heart to Heart International
13250 West 98th Street
Lenexa, KS 66215
Phone: 1-913-764-5200
www.hearttoheart.org

Heart to Heart International strengthens communities through improving health access, providing humanitarian development and crisis relief worldwide. HHI engages volunteers, collaborates with partners and deploys resources to achieve this mission.

Since its founding in 1992, HHI has shipped more than $1 billion in medicines, medical equipment and supplies to partner organizations working in more than 100 countries, including the United States. When responding to crises, HHI collaborates with partner organizations, governmental entities and corporate donors to rapidly assess and identify needs. Based on identified need, HHI delivers shipments of essential relief supplies and deploys experienced and self-sufficient teams of credentialed health care practitioners, disaster response personnel and logisticians to facilitate the provision of direct patient care. HHI has responded to a variety of recent crises, including Hurricane Katrina, the Joplin and Moore Tornados, Typhoon Haiyan, the Ebola outbreak in West Africa and European Refugee Crisis.

Disaster Health Services

- HHI supports partner organizations working in communities throughout the United States with ongoing shipments of medicines, medical equipment and supplies. When responding to crises, HHI works with partner organizations in the affected area, along with relevant governmental agencies and corporate donors, to rapidly assess needs and deliver essential relief supplies.
- The HHI Mobile Medical Unit – an RV equipped with two exam rooms, fully stocked pharmacy and point-of-care laboratory testing – can be deployed for use by partner organizations in crisis affected areas to provide surge capacity or reestablish interrupted health care services.
- HHI can also deploy credentialed health care practitioners to work alongside the staff of partner organizations to provide surge capacity.

Disaster Health Assets

- A robust network of credentialed volunteer health care practitioners.
- Highly trained and experienced disaster response personnel and logisticians.
- The HHI Mobile Medical Unit – an RV equipped with two exam rooms, fully stocked pharmacy.
- Point-of-care laboratory.
- Essential medicines, medical equipment and relief supplies, including Personal Hygiene Kits.

PRESBYTERIAN DISASTER ASSISTANCE

100 Witherspoon St., Louisville, KY 40202

OUT OF CHAOS, HOPE

Presbyterian Disaster Assistance

Presbyterian Disaster Assistance (PDA) is the emergency program of the Presbyterian Church U.S.A.

- The Presbyterian Disaster Assistance (PDA) National Response Team (NRT) members represent PDA following a disaster in the United States. They provide support, long-term recovery, disaster preparedness training, compassion fatigue training, care for caregivers trainings and emotional and spiritual care at the request of local Presbyterian organizations. In 2014, the NRT assisted with disaster recovery in 23 states to 41 natural and human caused disasters. NRT provided over 69 trainings and workshops throughout the country.
- The Presbyterian Disaster Assistance (PDA) Hospitality Program became a permanent program area in 2012 to provide hospitality to volunteer work teams following disasters. A network of trained hospitality volunteers works to assess hosting sites and help determine the hospitality model that will best match their facility to the recovery coordination. In 2014, there were 35 work team host sites in 9 states. 279 ecumenical and civic work teams worked 1,931 days giving over 267,840 hours of service.
- The PDA National Call Center coordinates PDA-related volunteer hosting sites and prospective volunteer work teams as well as managing distribution of PDA materials located at the Ferncliff Disaster Assistance Center in Little Rock, Arkansas. ((866) 732-6121)

Disaster Health Services

- **PDA National Response Team** consists of 100+ volunteer members who are deployed as needed in response to disasters, long term recovery or to provide trainings.

Disaster Health Assets

Gift of the Heart Kits (http://pda.pcusa.org/page/kits/) Offer hygiene, baby care, school, or cleanup supplies. More than 114,000 kits were distributed to partner agencies in the U.S. and around the world during 2014.

Southern Baptist Disaster Relief
North American Mission Board
4200 North Point Parkway
Alpharetta, Georgia 30022-4176
Phone: 1-770-410-6200
www.baptistrelief.org

The North American Mission Board is the National Coordinating entity for **Southern Baptist Disaster Relief**. Our network of 44 member organizations across North America respond to disasters world-wide working with local partners in all 50 states and in countries around the world. More than 70,000 trained volunteers and 1500 mobile units are available to respond to serve individuals and communities. We serve residents and emergency responders by addressing immediate emotional and spiritual care, food, temporary emergency childcare, and property cleanup needs. We work with national partners in areas of mass care (feeding and sheltering), as well as long term recovery issues.

Disaster Health Services

While not one of our primary response areas we do have Disaster Health Services assets that respond in disaster. We have teams of medical personnel trained to respond during disasters in CA, KY, NC, MS, OK, SC and VA. These groups participate in exercises and respond within their states in support of their local Emergency Management Agency. Their primary deployments in disaster are overseas to meet the needs of underserved populations. In addition to these teams of health care personnel, we have individuals across our North American network who deploy with responding teams (especially recovery and feeding teams) to provide health care for the team members.

Disaster Health Assets

7 Disaster Health Services Teams – (MDs, RNs, EMTs, Pharm. D. and support staff)
Equipment varies, most of our state partners have mobile medical/dental units that are used in underserved communities across their state. These are often available to the disaster response teams. The teams carry supplies and equipment dedicated to disaster response in trailers and set up inside available buildings or in tents.

DOING THE MOST GOOD

The Salvation Army
National Headquarters
615 Slaters Lane
Alexandria, VA 22314

The Salvation Army, an international movement, is an evangelical part of the universal Christian church. Founded in London England in 1865, The Salvation Army's authority was formalized in the United States when the organization was incorporated in 1899 as a religious and charitable nonprofit organization. The Salvation Army has a moral and spiritual mandate to provide emergency disaster services (EDS) without discrimination, by meeting the basic human needs of those who have been affected by disasters throughout the United States. The Salvation Army's emergency disaster services program extends from its holistic approach to service - by treating all people as created by God and demonstrating interest in each person. Part of The Salvation Army's mission is to "*...meet human needs in the name of Jesus Christ without discrimination.*" When disasters arise and in the midst of great pain, sorrow, trauma, and loss, The Salvation Army responds not only to the opportunity, but with a clear responsibility to address the physical, emotional, and spiritual needs of hurting people.

Disaster Health Services:

- Provides vouchers to replace prescriptions
- Provides in-kind durable medical equipment, when available (crutches, wheelchairs, etc.)
- Provides referrals to health resources in communities

Disaster Health Assets:

- The Salvation Army has Emergency Social Services offices in over 1,200 communities and serves low income families with a variety of resources (food, rent, utilities, prescriptions, in-kind durable medical equipment, and in-kind goods) year round. In that role, Salvation Army case-workers/case-managers are familiar with health services in each of their communities and can make referrals to appropriate health care resources during times of disaster response.
- National and local partnerships with faith-based organizations
- Distributes hygiene/comfort kits during disaster response
- Distributes Clean up kits during disaster response and recovery
- Over 500 Canteens available for dispensing essential aid directly to survivors of disasters.

Scope

This report is an overview of actions taken in support of the creation of a comprehensive Geographic Information Systems (GIS) Strategy (SEOC Objective 6) during the initial SEOC operational period (01/06/2016 to 01/08/2016). This report focuses on the following tasks assigned by SEOC command staff:

- Task 1: Identify critical needs for maps and overlays
- Task 2: Identify current and potential resources for data collection
- Task 3: Contact and coordinate with identified agencies to obtain and centrally locate all data
- Task 4: Provide spatial analytics in support of SEOC

Based on the Command Emphasis on identifying priorities established in the initial IAP, EMHSD staff surveyed local GIS professionals to gain a baseline understanding of the status of existing data, systems, methods, and issues present with the current GIS infrastructure. The core participants in this survey included:

- Flint Department of Public Works
- Flint Water Maintenance Department
- Flint City Planning and GIS
- Genesee County GIS Department
- University of Michigan (U of M) Flint

Overview of Critical Local GIS Resources

Currently, there are three agencies involved in the management of GIS resources needed to effectively generate products in support of the Flint Water Emergency. Based on interviews with local GIS practitioners, these groups represent the only GIS staff identified as being available within local government to support this incident. The agencies include Genesee County GIS (1 Staff available), City of Flint GIS (1 Staff available), and the City of Flint Department of Public Works (1 staff available). These agencies have varying resources. The following were identified as critical to effectively create a comprehensive GIS solution. However, in order to effectively manage the Flint Water Emergency several of these systems will need to be upgraded, reconfigured, or further developed.

- Flint City ArcGIS Online Site – This system is fully capable of hosting all data, web-based mapping applications, and other GIS resources needed to support this incident for both government and public use. However, there is currently only a limited amount of content available and support from SEOC GIS staff is needed to bring several critical viewers online. Additionally, the City of Flint has a draft of an issues tracking system for public works that could be used to manage the replacement of the City's lead pipes.
- City of Flint's Department of Public Works Water Infrastructure Database – This database is incomplete and nearly 40 years out of date. The vast majority of data needed to bring this database current is only available in print. The Department of Public Works recently contracted U of M Flint to migrate the printed content into a computer based GIS format. However, work isn't projected to be completed until April of 2016 and does not include any service line changes from the past 35 years. As this is arguably the most critical dataset needed to address the Flint Water Crisis a focus of the next operational period will be to further investigate what is needed to fix this issue and provide recommendations to command that can make the data available in a more acceptable timeframe.
- Genesee County Water Filter Tracking System – Currently, Genesee County has developed their own internal tracking system to manage the distribution of water filters throughout the city. This viewer captures address information, but does not capture it accurately or associate it with parcel information that is needed to effectively plan filter distribution operations. Updating this system is a high priority before future resources are

deployed to ensure accurate and actionable data is being captured. As of the conclusion of this operational period approximately 15,000 records exist in this system. SEOC GIS staff has dedicated a significant amount of labor repairing the historic records, and continuing without rebuilding this tool is not sustainable without additional SEOC staff.

- Local Planning iPads and the Problem Spotter App – the city planning department has 30 iPads specially configured to do GIS data collection. Several apps have already been developed for the public works department to manage the update of utilities. However, the tools have not been fully deployed due to training gaps and issues with workflow. Locals discussed that they need support to bring these applications into production.
- Genesee County ArcGIS Online Parcel Viewer and Pictometry imagery viewer – This website can be used to quickly cross reference addresses to parcels and view properties on high resolution imagery.

Critical Needs for Maps and Overlays:

Several GIS key datasets were also made available and have been procured by SEOC GIS in preparation for developing a consolidated GIS data source. Critical Databases include:

- Parcels for City of Flint and surrounding municipalities
- City of Flint fire hydrant locations with date of installation
- Water Filters distribution table (spatial data currently unusable)
- Water Distribution Sites
- Water infrastructure issues report indicating failing or near failure water lines (non-GIS ready format)
- City of Flint Water Mains
- Miscellaneous Flint Base Layers
- City of Flint water service lines and curb stops (combination of printed maps and excel tables listing updates. No digital map data available.)

There are several key issues that must be addressed before this data can be efficiently mobilized to support large scale map production. Below is a priority list of items that must be fixed:

- ACTION ITEM 1: Update the Genesee County Water Filter Tracking System to self-validate addresses and append parcel ID's to effectively track water resources
- ACTION ITEM 2: Update and modernize the City of Flint's Department of Public Works Water Infrastructure Database by working with U of M Flint to expedite the scanning and digitizing of service line information
- ACTION ITEM 3: Use City of Flint Parcel data to determine house age and build estimates for service line lead materials based on standard installation dates
- ACTION ITEM 4: Implement an Asset Management System within Flint's Public Works Department and
- ACTION ITEM 5: Gather information of transmission line problem in the City of Flint water Systems that is causing water latency to the high risk lead exposure areas
- ACTION ITEM 6: Develop a rental properties map to display multi-tenant housing for use in filter distribution planning

Obtain and Centrally Locate All Data:

Based on discussions with all participating GIS practitioners it was determined that the Flint City ArcGIS Online Website is the best option for centrally hosting data. At the close of this operational period the SEOC was granted access to publish to this site. Next week efforts will begin to deploy the core datasets within this environment.

- ACTION ITEM 1: Employ Flint's ArcGIS for sharing and mobilizing GIS data between participating agencies
- ACTION ITEM 2: Ensure apps for mobile data collection are functioning as designed and develop training plan for public works personnel
- ACTION ITEM 3: Contact ESRI disaster response team to temporarily expand the capacity of GIS systems in support of the Flint Water Emergency

Provide spatial analytics in support of SEOC:

In order to effectively assess the scope of the Flint Water Emergency and prescribe action all map data must be able to link back to a master list of all existing addresses within the city. This facilitates the capacity to display where action is being taken while also showing areas in which issues still need to be addressed. During meetings with Flint GIS practitioners it was determined that the parcels are ideal to act as this keystone dataset as they already contain detailed contact information for both the resident and owner per the Flint equalization department. Using this strategy in conjunction with the existing Flint Mobile Collection systems, dashboards can quickly be developed for the city parcels using existing Flint GIS infrastructure and be utilized by local and state EOC staff to track the statuses in near-real-time.

- ACTION ITEM 1: Develop a database linking all flint street address to parcel ID's to facilitate cross referencing water filter information and lead issues with home owner contact information from Flint's equalization records
- ACTION ITEM 2: Utilize existing ArcGIS Online to create a live dashboard to quickly track status of key datasets

Other Critical Notes from Site Visits:

- Water Latency Issue: Flint DPW indicated that a water main within the city has been failing for approximately 10 years that provides service to the highest risk area of the city. They believe that several service cutoffs may have failed in a closed position blocking water distribution along those lines. As such, water to this section of the city is being routed along a much longer route to these homes on alternate lines. Recommend having a specialist from the state review this issue to determine if latency issues identified can be resolved.
- Service Lines Materials Issues: Flint DPW stated that during the growth of the city the vast majority of vacant parcels were fitted with service lines to the curb to the water main for use in future development. DPW estimates that approximately 80% of the city was developed using this method. Although residences may have records showing their service lines are non-lead, DPW believes that this short segment from the main to curb may still be lead. Flint began using copper in the mid-1950s. DPW recommended mapping mains emplaced post 1950 to eliminate parcels that do not have lead lines.

Cost Figures for Flint Water Response: Population and Community Health Administration (PHCSA)

Type	Priority	Intervention	Rationale	Cost
Education				
Secondary Prevetion				
		School nursing	To monitor, case manage, treat, promote wellness (socioemotional), school nutrition, etc...	$500,000
		Special Education	20 percent of children with BLLs greater than or equal to 25 @ age two receive special education for an average of 9 years.	$2,500,000
		Pre-Post school programming	To provide structured, safe supervised programming	$9,000,000
Nutrition				
Secondary Prevention				
		Expand WIC eligibility requirements	To increase availablity of healthy nutrition for impacted children	$1,380,000
		Promote breastfeeding education and support services	To protect children from lead exposure, promote cognitive development	$85,000
Tertiary Prevention		Educate and promote lead-exposure diet	To limit absorption and promote excretion of lead in exposed children	$110,000
Medical Health				
		Immediate Treatment and treatment of lead-*associated* ADHD	Immediate treatment of childr	$18,280,849
Secondary Prevention		Promote caregiver capacity. Increase capacity of maternal infant suppport services	To support parents and programs to improve parenting skills and early identification of developmental delays	$250,000 $325,000 $120,000
		Education for primary care providers regarding toxic stress	To indentify developmental delays early	$100,000
		Increase pediatric healthcare access to a patient centered medical home	To continuously drive patients to their primary care provider	$100,000

Tertiary Prevention	Creation of the Flint Children's Health and Development Fund	To support short and long-term health, medical care, and developmental needs of Flint children exposed to lead	$100,000,000
	Behavorial Health Services	To provide necessary mental/behavioral health services to exposed population	$7,000,000
		To determine extent of injury and long-term neurodevelopmental, medical, socioeconomic impact. To allow for	
	Identification and tracking of exposed children/cohort	identification of exposed children and ongoing surveillance	$100,000
Assessment Subtotal			**$139,155,849**

Budget Estimates
FY16 Supplemental Request

Appropriation	**FTEs**	**Amount**
Cost for epidemiologists	2	$115,000
Cost to abate lead in homes in Flint	3.5	$1,687,500
Additional lead investigations	0	$100,000
Increase nurse case management	1	$75,000
Increase community education	2	$120,000
WIC outreach and trasportation	1	$60,000

Total FY16 fuding Request	**$10**	**$2,157,500**	
FY17 Supplemental Request			
Continuation of FY16 Supplemental	8	$850,000	
Cost for epidemiologists	2	$220,000	
Cost to abate lead homes in Flint	4	$2,261,000	
Additional lead investigations	0	$130,000	
Increase nurse case management	1	$100,000	
Increase community education	2	$180,000	
WIC outreach and transportation	1	$90,000	
Total FY17 Funding Request	**18**	**$3,831,000**	
Total FTE	**27.5**		
GRAND TOTAL			**$145,144,349**

Notes

It is reasonable to have a nurse in 5 schools in Flint. $500,000

Lifetime costs $2.5 million for a cohort of two year olds.

$1,000/9000 children

Low demand for ready to feed formula, Expansion of WIC eligibility and income to children 7-10 yrs require USDA approval. $1.38 M

Promote breasfeeding- We believe an additional lactation consultant would be helpful at GCHD

Dietician for nutrition counseling/education at Genesee County Health Department

Immediate treatment: $280,849
ADHD includes medication and counseling: $18 million annually

Expansion of home visitation programs. Parent education via community classes related to preventing toxic stress (ACEs)- Perhaps this is something that the Genesee Coalition could undertake. 5 grants at $50,000/ea to interested community partners. Parents as teachers program- 5 staff to do home visitation at $65,000/ea. One MDHHS FTE- $120,000 to establish and monitor contracts

$100,000 for provider education to Hurley Hospital

Funding for Children's Healthcare Access Program (CHAP)

Estimate provided by Dr. Mona Hanna Attisha; estimate should be validated by acutarial analysis

700,000/10 years

Identification and tracking of exposed children/cohort- We think it is reasonable to enhance capacity to support health information exchange and integration between laboratories and the MICLPS registry.

Notes

Support two epidemiologists to analyze blood lead levels based on zip codes in the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted. Positions will be supported through contracts with MPHI.

Costs reflect contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 3.5 contractual staff - 2.5 field consultants to conduct abatement and one to assist with client application and form processing (total $187,500). Funds for the service include the cost to abate 100 homes @ $15,000 each ($1.5 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Additional contractual efforts to support lead investigations in 100 additional homes in the City of Flint. Service will be provided by ETC Consulting.

Funds support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, provide nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Contractual FTEs will work with the Genesee County Health Department (GCHD) to build educational efforts in that community to develop a more detailed education plan.

One contractual peer educator FTE at Genessee County Health Department to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and overall health of pregnant moms and infants.

Continue the funds from the original FY16 supplemental for existing nurse case management of EBL home investigations.

Continue the funds from the FY16 request above and support two epidemiologists to analyze blood lead levels and will address broader areas beyond the City of Flint. Work conducted by the epidemiologists will be new functions not currently conducted.

Continue the funds from the FY16 request above and finance contractual and service costs to abate lead from homes in the City of Flint. Contractual funds will support 4 contractual staff - 3 field consultants to conduct abatement and one to assist with client application and form processing (total $311,000). Funds for the service include the cost to abate an increase to 130 homes @ $15,000 each ($1.95 million) which will include internal housing plumbing components where necessary. Current efforts financed in the previous FY16 supplemental did not support lead abatement activities.

Funds support additional lead environmental investigations. This is lead investigations in homes of children with high blood lead levels to determine all of the sources of lead exposure and plan for mitigation of lead. This does not include funding for lead abatement. This is done via contract with ETC Consulting. (No FTEs)

Continue the funds from the FY16 request above to support the increased testing and follow up necessary with the new homes being investigated. Nurse case managers provide follow up with families, nutrition counseling, and coordination with Environmental Blood Level (EBL) investigations.

Continue the contractual health educators at GCHD to work collaboratively with community agencies on awareness of lead hazards, increase lead testing, and nutrition education.

One contractual peer educator FTE at GCHD to help increase WIC enrollment and retention to assist with lead testing, nutrition education, and improve the overall health of pregnant moms and infants. Bus tokens (10,000 at $1 = $10,000), bus signs and other promotion materials for WIC at $5,000.

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 8, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - 21 families contacted
  - 14 EBL investigations completed.
  - **14 Water sampling completed.**
  - **7 EBL Reports Received.**
    - **6 homes with lead dust hazards**
    - 3 homes with lead in soil hazards
    - 5 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - 5 investigations scheduled.
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)
  - # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- **The data specifications and metrics were developed for a report to measure blood lead testing of children in Flint who are enrolled in Medicaid. The preliminary report will be reviewed week of 1/11/15.**
- **Additional Zip code-specific blood lead data on children in Flint was provided in response to a request from the MDHHS Director.**
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly (Friday, 10:00 am) meeting with DEQ, LARA and the city of Flint.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- The State Emergency Operations Center (SEOC) opened a Joint Information Center (JIC). Angela Minicuci is the primary HHS contact to the JIC. All public information documents related to the Flint water response must be routed for approval through the JIC.
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC

- No updates.

Healthcare/Providers

- No updates

DEQ Information - Linda Dykema as Liaison

- No updates

Brainstorm Ideas for Possible VOAD/NGO Support in Flint Water Contamination 1/06/16 Version

The MSP/EMHSD planners asked the Red Cross [ARC] to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. When reviewing the ideas which follow, please keep in mind these considerations:

1. We cannot speak for MI-VOAD and recommend that MI-VOAD be convened so that the members can be briefed and discuss these ideas.
2. NGOs seek funding to implement programs which align with their missions. None of them are funded to conduct recovery efforts for the Flint Water Contamination and would likely need financial support to do so.
3. These ideas are not task assignments or commitments.

POSSIBLE NGO SUPPORT ACTIVITIES

a) NGOs can help educate Flint residents about water filters and ways to mitigate lead exposure in children through nutrition and early childhood education. (Leveraging the Red Cross' Home Fire Prevention Campaign, ARC volunteers could provide education materials, water filters and replacement cartridges when they visit homes to install smoke alarms. Discussions are currently underway to do this.)

b) The ways in which educational information is disseminated may provide an opportunity to rebuild trust in government. If those efforts engage trusted organizations such as faith-based groups and the Red Cross, the positive perceptions may be extended to government.

c) NGOs' places of business could be used as points of distribution for water and filters. In addition to space, the NGOs may be able to provide people to staff them. Perhaps some NGOs could provide the water and filters, but not all. Such arrangements would need to be time limited.

d) Some NGOs can provide language interpretation and translation for those residents who need it and for translation of educational materials.

e) In Flint, Child Care Network trains providers of early childhood education.

f) Some Flint residents affected by the water contamination may benefit from crisis counseling. People who work on the recovery (agency staff and volunteers) may also. There are NGOs which provide such counseling.

g) Some homes contain lead pipes, faucets or related infrastructure. Perhaps some NGOs (Habitat for Humanity?) could install new ones. However, this may require specific licenses or permits.

h) If it's determined that food will be distributed to improve nutrition, NGOs may be able to assist.

i) There may be NGO services available directly to those children who evidence disabilities as a result of lead exposure.

j) There are local agencies which have been and continue to address the needs of Flint residents. Because the recovery may be long term, the capacity of these agencies may be taxed. It's possible that NGOs could support them by providing workers (staff and/or volunteers) to help, depending on their needs (including answering phone calls and responding to email.)

k) Some of the MI-VOAD member agencies may be able to act as liaisons with local government and non-profit agencies.

Mike Sobocinski's notes on January 8, 2015 SEOC briefing (9:30am):

Tom Weber leads meeting, Captain joining later by phone and in person at the end.

MSP Operations (Jaqueline Hampton): Had conference call with local jurisdictions. Water tests are needed. Only about 600 homes have been tested, out of about 45,000. There's a drop-off test kit – samples to be taken in the morning, after the water has sat for at least 6 hours during the night.

American Red Cross: Contacted by county [and?] sheriff, to assist with the distribution of resources/needs.

State Office on Aging: Requested addresses of Flint seniors who are receiving services—the area office on aging is working on that. The Genesee County health department is a local partner. Flint Township is on the water system? (Tom Weber: GIS will sort through which jurisdictions are involved – probably at least 3 other jurisdictions.)

MDARD: A new regulatory requirement is being worked on which would involve water handling information for relevant agencies and establishments.

MI Dept of Education (Louie Burgess): Everyone with an approved child nutrition program is being contacted to learn where water is obtained from, how it's handled, and whether they've received the relevant information about it.

MDEQ (Jennifer Wolf): More water sampling will occur through collaboration with other agencies. Kits must be dropped off at homes, due to 6 hour requirement [see MSP Operations reference at top]. MDEQ lab capacity involves the handling of up to 400 samples per day, 7 days per week. Only about 670 samples processed so far.

MDHHS (Richard Thelen): Have received many resource requests for filters. Working on orders and delivery arrangements. Also, to assist with food and nutrition, improving the healthfulness of foods that are available in the short-term.

MDTMB (Jeannette Doll): A co-located JIC location has been found within a Flint state office building. A toll-free phone line is to begin operation at noon today, both at the new JIC and in Lansing.

NWS [didn't catch his name]: Anticipating some snowfall, perhaps from 2 to 4 inches, with winds from 15 to 30 miles per hour expected over this weekend. Much of next week, we'll have cold air, with daily high temperatures in the 20s or below.

PIO (Ron Leix): Preparing for the transition to the Flint JIC. At 3pm today there will be a meeting of the key PIOs—the first face-to-face meeting rather than through a conference call. There are 4 major topics for public information: (1) Water filters, (2) Water testing, (3) Blood lead level testing, (4) Bottled water. Explanations of who, how, when, why, where are being provided. The web site is good, but we need to go beyond that to access those who are not online (e.g. seniors). Media coverage: some has been good, some bad. The Rachel Maddox show focused on various issues.

MSP Logistics (Michele Kuzera): Verifying equipment and staff for on-site Flint activity. Two MSP staff are in the local EOC, representing planning and logistics.

Tom Weber: Incident Action Plan objectives can have suggestions submitted to the Planning Group Chief by 1pm. Agency situation reports should be submitted by 3:30pm in MI CIMS and/or to the Planning Section.

MSP Ops (Jackie Hampton): The SEOC will be open tomorrow (Saturday) from 8a to 5p.

Capt. Kelenske: He'll be obtaining an important requested document on the subject of water distribution. Staff must update MI CIMS with an ongoing log of their activities. Sunday operation of the SEOC will be determined in the future.

Winter Weather to Impact Michigan

January 11-12, 2016

Very Hazardous Travel at Times through Tuesday

Snow, Blowing Snow – White Outs Likely

Commutes Tonight and Tuesday Affected

Rapidly Changing Road Conditions and Visibility

Very Cold Air Continues

Time to Frostbite From Exposure

Through Thursday: Less Than 30 Minutes

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for January 7, 2016

Governor Snyder declares a state of emergency for Genesee County due to the health and safety issues related to lead in city of Flint drinking water.

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested 10/1/2015 to 12/18/2015: 2,182;
Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 23
Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 7
Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 13
Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

<u>Elevated Blood Level (EBL) Environmental Investigations</u> – ETC Contractors, Wes Priem, Courtney Wisinski

- EBL report through 1/6/2016
  - **21 families contacted**
  - **14 EBL investigations completed.**
  - 11 Water sampling completed.
  - 6 EBL Reports Received.
    - 5 homes with lead dust hazards
    - 3 homes with lead in soil hazards
    - 6 homes with lead-based paint hazards
    - 2 homes with lead detected in tap water
      - 0 homes with lead water levels >5 ppb
      - 0 homes with lead water levels >15 ppb
  - **5 investigations scheduled.**
  - 5 applications received for the Lead Safe Homes Program, 1 family enrolled.
- HHS staff will accompany contractors on investigations to confirm compliance with protocols. Scheduled for 1/6/16.

<u>MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services</u> – Nancy Peeler

- Families that have moved to other counties
  - GCHD forwarded a list of 40 families they were unable to contact: CLPPP staff identified updated contact information for 39 of the 40 families and forwarded that information to GCHD on 1/5/16.
  - GCHD is utilizing the updated information. They have already identified a family that has relocated to Ingham County, and another that relocated to Florida. Nancy has reached out to Mark Miller to initiate contact with Ingham for follow-up with that family.
- CM report through 12/31/15:
  - # of contacts attempted: 186 (0-5 year olds) and 12 (6-17 year olds)
  - # offered CM: 109 (0-5 year olds) and 6 (6-17 year olds)
  - # CM started: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # of children receiving CM who live in Flint: 25 (0-5 year olds) and 2 (6-17 year olds)
  - # billed to Medicaid: 14 (0-5 year olds) and 1 (6-17 year olds)

- # other disposition: 23 (0-5 year olds) and 1 (6-17 year olds)

Epidemiology/Surveillance – Corinne Miller, Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- MDHHS IRB approved Dr. Hanna-Attisha's research project.
- Pending: hiring 2 epidemiologists to provide BLL surveillance support.

Filter & Water Distribution Sheryl Thompson

Filter Distribution 10/1/15 to 1/6/15			
	Received	Distributed	Remaining
Water Filters	15,000	11,587	3,413
Water Pitchers	720	251	469
Replacement Cartridges - Brita	9,000	1,704	7,296
Replacement Cartridges – PUR*	5,706	33	5,603
Replacement Cartridges - Zero	375	8	367

*The PUR replacement cartridges are being made available in all locations for the convenience of residents. Once the PUR cartridges are exhausted and more are needed DHHS will purchase additional ones. The current supply was given to DHHS and GCCARD by United Way.

Communications/Information Sharing – Linda Dykema, Eden Wells

- GCHD (Jim Henry) is working with Flint residential child care facility to further evaluate lead levels in tap water. All current residents are > 6 years of age and have had venous blood tests: the highest was 2.3 mg/dL, most were <0.5 mg/dL.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- The State Emergency Operations Center (SEOC) opened a Joint Information Center (JIC). Angela Minicuci is the primary HHS contact to the JIC. All public information documents related to the Flint water response must be routed for approval through the JIC.
- Continuing to write and coordinate additions to the EBL Case Manager Binder, now known as the MDHHS Lead Safe Family Guide Book. (MB)
- Pending: Filter cartridge changing fact sheet; clarifying uses of filtered/vs unfiltered water (MB)
- Pending: Lead and Nutrition fact sheet and Flint Parent Letter revisions.

Toxicology - Kory Groetsch, Lisa Quiggle, Jennifer Gray

- Working on method(s) to convert lead dust wipe sample results into an intake metric compatible with the IEUBK model.
- Working on Child EBL Access database, which will be used to ensure that each child/family is offered all available SOM services and activities related to EBL cases.

WIC

- No updates.

Healthcare/Providers

- No updates

DEQ Information - Linda Dykema as Liaison

- No updates

Possible organizations that can help us with the Distribution of water filters, water pitchers, 23 cup filters and replacement filters along with distribution of preparedness materials, health department material and smoke detector sign up sheets.

Ennis Center for Children—Caseworkers visit home
Greater Flint Health Coalition—Connection to all local health industries
CAC for hearing/sight impaired--Interpreters
MTA—Bussing--Funds
Catholic Charities –Mass feeding
G-Card—Water filter distributions
Eastern Michigan Food Bank—Distributing bottled water to pregnant mothers and mother's with infant children, breast feeding and infant child
Salvation Army—Water fund—Money for residents who cannot pay their water bills
Meals on Wheels--???
Genesee County Health Department—Water filter distribution, information on water and health, data
United Way--Funding
NCCC---Canvassing and information distribution
U of M—Distribution point
AmeriCorps—City of Flint, Canvassing and education
Grace Emmanuel Church—Information and canvassing
Bethal Methodist –Information and canvassing
Our Savior Lutheran—Information and canvassing
Planned Parent Hood--???
Aged Wellness--???
New Jerusalem—Information and canvassing
Neighborhood Without Borders—Information and canvassing
Metro Community Development--???
Civic Park Neighborhood Association—Information and canvassing
Flint Neighborhoods United—Information and canvassing
United Methodist—Information and canvassing
Youth Build—Information and canvassing
Wow Outreach—Information and canvassing
Concern Pastors Association—Information and canvassing
Universal Unitarian Church—Information and canvassing

Mtg. next Tuesday

Mike Sobocinski's notes on January 7, 2015 SEOC briefing (9:30am):

Tom Weber: situation report #1 was published. ICS202 to be completed shortly (Capt: that document will be for internal use only). Disaster Recovery Unit is being established within Operations Section.

American Red Cross (phone): coordination of some kind [unclear]

DHHS (Richard Thelen): outreach and education to local health care providers. JIC is operational. Web MD Medscape – available [extra details unclear]. Distribution of filters and replacement cartridges continues. Two local MDHHS offices and two Genesee County Community Action Resource Department (GCCARD) offices are involved in this. [I looked GCCARD up online to find and verify its correct name. Some other local government office was also named, but I didn't catch it.]

MSP GIS section: Coordinating with city and county. Online dissemination of mapped info looks likely soon through a viewer that allows users to browse the information themselves. Currently mapping filter locations. MSU extension socioeconomic data is available for city residents, to represent spatially. Pipelines and service entry points (at homes) are mappable. Lead(ing) service lines to homes are mappable. 44,000 records to be worked on through coordination with University of Michigan Flint campus, to make the information digital (probably contracted by the city to do so). Latency time in pipes correlates with lead concentration in homes, so an analysis could be performed with information on pipe and service line locations/lengths...

Capt. Kelenske: Genesee County Sheriff Department using about 50 persons with trucks to distribute about 5,000 filters (of the "screw-on type") to the high-risk areas of the city.

Tom Weber: Genesee County GIS is coordinating with the area's United Way (and?) Food Bank.

MDARD (Brad Deacon): the local health departments inspect restaurants, while the DARD oversees local pop and ice machines.

MI Dept. of Education (Louis Burgess): Crafting a message to the Genesee Intermediate School District regarding all involved schools, including public, private, charters, academies, which have food centers or food programs. To inquire with all who run these regarding their water sources and use. The text of this message is to be reviewed by the state before its local distribution. The Department of Education PIO is needed in the JIC, and will be called.

MI Dept. of Corrections [person not known]: nothing new; precautions taken since last year, with coolers and jugged water being served. Have messages been sent to state employees who work in Flint, especially a general notification to all state employees so that even those who temporarily go to Flint can be informed regarding water?

MDTMB (Jeannette Doll): notes that bottled water is available at the state offices.

Aging and Adult Services Agency (AASA) (Steve Betterly): Outreach to the (Genesee) Valley Area Office on Aging to find/seek a list of seniors.

MSP Operations section: Establishing a State Recovery Task Force, to be headed by Joel Pepper. Establishing a Recovery Branch, to be headed by Brianna Briggs and to involve MIVOAD, DHHS coordination. Use of available subject matter experts, to include Dr. Eden Wells of DHHS and Dr. Mona Hanna-Attisha.

MSP Logistics section: Tracking quantity of water needed, trucks, etc. Two logistics staff from MSP being deployed to the local EOC.

PIO Ron Leix: JIC fully operational as of yesterday afternoon. JIC News Release #1 completed. An 800 number is to be used, and a top-level web site can be found at www.michigan.gov/flintwater. A 9am meeting is occurring between Governor Snyder and the Flint Mayor [Karen Weaver], with a media session to follow. At 1pm, a media roundtable presentation will occur in the Presentation Room at Collins Road, followed by a tour of the SEOC. Tomorrow, legislative and congressional calls.

Capt K: State agency SEOC physical presence this afternoon from 1pm onward.

[Unknown agency] Jeremy Hedges: coordination with MSHDA, potential to provide planning services? (Tom Weber: MSHDA to be included in the State Recovery Task Force.)

Capt K: FEMA has 2 liaison officers arriving about 3pm. These are not Federal Coordinating Officers (FCOs) but are merely to assist the Captain. MI CIMS activity log entries are needed from the PIO and the GIS section. The daily briefings are to occur at 9:30am until otherwise announced.

Brainstorm Ideas for Possible VOAD/NGO *Support in Flint Water Contamination* 1/06/16 Version

The MSP/EMHSD planners asked the Red Cross [ARC] to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. When reviewing the ideas which follow, please keep in mind these considerations:

1. We cannot speak for MI-VOAD and recommend that MI-VOAD be convened so that the members can be briefed and discuss these ideas.
2. NGOs seek funding to implement programs which align with their missions. None of them are funded to conduct recovery efforts for the Flint Water Contamination and would likely need financial support to do so.
3. These ideas are not task assignments or commitments.

POSSIBLE NGO SUPPORT ACTIVITIES

a) NGOs can help educate Flint residents about water filters and ways to mitigate lead exposure in children through nutrition and early childhood education. (Leveraging the Red Cross' Home Fire Prevention Campaign, ARC volunteers could provide education materials, water filters and replacement cartridges when they visit homes to install smoke alarms. Discussions are currently underway to do this.)

b) The ways in which educational information is disseminated may provide an opportunity to rebuild trust in government. If those efforts engage trusted organizations such as faith-based groups and the Red Cross, the positive perceptions may be extended to government.

c) NGOs' places of business could be used as points of distribution for water and filters. In addition to space, the NGOs may be able to provide people to staff them. Perhaps some NGOs could provide the water and filters, but not all. Such arrangements would need to be time limited.

d) Some NGOs can provide language interpretation and translation for those residents who need it and for translation of educational materials.

e) In Flint, Child Care Network trains providers of early childhood education.

f) Some Flint residents affected by the water contamination may benefit from crisis counseling. People who work on the recovery (agency staff and volunteers) may also. There are NGOs which provide such counseling.

g) Some homes contain lead pipes, faucets or related infrastructure. Perhaps some NGOs (Habitat for Humanity?) could install new ones. However, this may require specific licenses or permits.

h) If it's determined that food will be distributed to improve nutrition, NGOs may be able to assist.

i) There may be NGO services available directly to those children who evidence disabilities as a result of lead exposure.

j) There are local agencies which have been and continue to address the needs of Flint residents. Because the recovery may be long term, the capacity of these agencies may be taxed. It's possible that NGOs could support them by providing workers (staff and/or volunteers) to help, depending on their needs (including answering phone calls and responding to email.)

k) Some of the MI-VOAD member agencies may be able to act as liaisons with local government and non-profit agencies.

Damage Assessment and Emergency Status Report

Incident: 2015-10-01-City of Flint-Water Contamination / Shortage

Operational Period

Operational Period Begin:	01/06/2016 08:00:00
Operational Period End:	01/08/2016 17:00:00
Situation Report No.	1
SEOC Status:	Full
SEOC Hours of Operation Begin:	01/06/2016 08:00:00
SEOC Hours of Operation End:	01/06/2016 17:00:00

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a Local State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in the City of Flint, which declared a Local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A "public health emergency" was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels that exceeded past seasonal levels were observed in City of Flint children, and were subsequently confirmed by Michigan Department of Health and Human Services (MDHHS) epidemiologists.

To mitigate the effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the MDHHS in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, is addressing water issues in the environmental investigations facilitated to identify lead sources in the environment of affected children, and providing health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidating data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While the source water has been switched back to DWSD, water in the City of Flint is still not safe to drink, unless specifically filtered.

Incident Response/Recovery Priorities/Objectives

1. Activate the State Recovery Task Force
2. Ensure coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate subject matter experts.
3. Obtain and maintain situational awareness and common operating picture of all activities.
4. Establish operational period and hours of operations.
5. Investigate and identify available programs for assistance with direct or related impacts.
6. Develop a comprehensive GIS strategy.
7. Identify critical resources for acquisition and allocation.
8. Coordinate response and recovery activities and identify mission areas with MIVOAD.
9. Facilitate and coordinate technical assistance among state agencies and to local agencies.
10. Provide technical assistance and facilitate the local Damage Assessment process.
11. Establish a Joint Information Center and develop a public information strategy.
12. Monitor MI CIMS for resource requests and address as appropriate.
13. Establish and disseminate cost center information for the incident.

Emergency Declarations

Local Declarations

Damage Assessment Summary

Agency Summaries

Agriculture and Rural Development (MDARD)

Two areas MDARD is monitoring:
1). Water usage in food processing, food retail, and food service (restaurants). Guidance document has been available since October; MDARD surveyed food processors in October and did not find issues.
2). Water consumption by pets / animals. There has been some evidence of lead toxicity in dogs, and there has been guidance about pets & water included in the Q & A.
MDARD will be reviewing activities in both areas and determine appropriate next steps.
4:15pm update Jan 6th
*Call with Animal Industry Division: they are doing outreach to MI Veterinary Medical Assn; MSU College of Veterinary Medicine, and the MSU Diagnostic Center. They will also talk to Genesee County Animal Control about other animal facilities that may need follow up.
*Call with Food & Dairy Division: we will get addresses of food processing, retail and food service to help create a GIS layer; they will talk with Genesee Co. Health Dept. about restaurants using the existing guidance on water. MDARD did provide the guidance on water to all licensed retail food facilities, including convenience stores.
Food & Drug Administration contacted their regulated facilities in October and found no further action is necessary; USDA-Food Safety Inspection Service is looking into what if any guidance or actions they need to do for meat processors.

American Red Cross (ARC)

The MSP/EMHSD planners asked the American Red Cross to brainstorm and come up with possible ways in which MI-VOAD, the Red Cross and other NGOs might be able to assist in the response and recovery phases of the Flint Water Contamination. We are working on this and calling upon Red Cross colleagues to contribute to it. We've briefed Red Cross Regional and Divisional management on this incident. The Red Cross will provide situational awareness regarding the services related to the water contamination that individual NGOs are providing to Flint residents.

Civil Rights (MDCR)

Monitor and support agencies with issues surrounding outreach and engagement of marginalized populations within the City of Flint impacted by the current water crisis.

Corrections (MDOC)

Brent Travelbee and Mike Farmer attended the briefing and notified all department personnel working in the affected area. Director Washington will be briefed and any additional actions necessary will be completed.

Environmental Quality (MDEQ)

The Michigan Department of Environmental Quality (DEQ) is staffing the SEOC in response to the Flint Water Crisis. Situational awareness has commenced with all state agencies and briefings will continue to be provided. The Flint Action Plan Coordinator continues to report to the Governor's office on department activities associated with this incident. The DEQ Public Information Officer is fully engaged in the Joint Information Center.

Michigan Housing Development Authority (MSHDA)

The grants staff team is already drafting the necessary background materials for a potential grant application request. We would just need to know the recipient of the grant and purpose (allowable uses).
We are exploring CDBG grant funds or other assistance from HUD.

Human Services (MDHS)

Summary for both Health & Human Services
Participated in morning briefing.
Provided update to Executives.
Provided master address list of filter distribution to GIS
Participated in CHECC conference call
CHECC remains at Level 1 Activation - Normal Operations

Licensing and Regulatory Affairs (LARA)

LARA upgraded to a mandatory department for this incident

Attached is a Point of Contact (POC) List

Attached is a Work Report indicating what work LARA has done today in City of Flint

Michigan Economic Development Corporation (MEDC)

MSF/MEDC had offered low interest loans as part of the deep freeze crisis. While this would require legislative action to authorize, it is something that could be considered in this scenario. It would require re-purposing any remaining funds.

Supreme Court

08:50 - State Judiciary EMC John Ort reported to the SEOC regarding the Flint water emergency. Nothing to report from the Judiciary regarding the emergency. DEQ website resources shared with our State Court Administrative Office (attn: Region II) in case our Genesee County courts have any questions regarding the emergency.

Technology, Management and Budget (MDTMB)

Provided update to management on morning briefing and status of items DTMB is addressing.
Reached out to DTMB Commodities Procurement personnel about available and potential contracts to assist in recovery efforts.

Executive Summary

On January 6, 2016, Governor Snyder declared a State of Emergency for the City of Flint and Genesee County. Genesee County requested the Governor's declaration on January 5, 2016, following the declaration of a State of Emergency in the county in response to the presence of lead in the public water supply, and the detection of elevated blood lead levels exceeding governmental standards. These conditions exist in

the City of Flint, which declared a local State of Emergency and activated local response plans and their Emergency Operations Center on December 15, 2015. A public health emergency was declared by the Genesee County Health Department on October 1, 2015.

By early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to the Flint River as their primary water source. The corrosive river water caused the leaching of lead from lead pipes into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Elevated blood lead levels were observed in a significant sampling of young children in the City of Flint, and confirmed by the State Chief Medical Officer.

To mitigate the negative effects of corrosive river water on the water infrastructure in the City of Flint, the city switched back to DSWD as their primary water source on October 16, 2015. Funding to reconnect to DWSD was provided from the City of Flint, the Charles Stewart Mott Foundation, and the State of Michigan. Water is treated with a supplemental phosphate addition to rebuild the protective layer in the distribution system and reduce the leaching of lead into the water supply.

For the mitigation of negative health effects, over 24,000 water filters and replacement cartridges have been distributed to residents in the City of Flint. Approximately 13,000 water filters, water pitchers and replacement cartridges were distributed by the Michigan Department of Health and Human Services (MDHHS) in the timeframe of October 1 to December 31, 2015 alone. MDHHS has increased surveillance of blood lead levels in children, addresses water issues in environmental investigations facilitated to identify lead sources in the environment of affected children, and provide health education and information to residents, health care providers and daycare/educational institutions. Local nonprofit organizations have provided potable water to Flint residents. MSP/EMHSD GIS staff is supporting county and local GIS staff, consolidate data from local sources into comprehensive databases, and providing mapping services that support incident analysis and forecasting. Data and maps will be made available regarding the location of water pipes, affected schools, filter distribution locations, water monitoring results, predictive blood lead levels for affected areas, demographics, etc.

Before December 16, 2015, $9.35 million were provided by the State of Michigan, and $6 million by local agencies and nonprofit partners to manage the effects of the corroded pipes. While drops in lead levels have been observed since reconnecting to the DWSD system, water in the City of Flint is still not safe to drink, unless specifically filtered.

Attached is a Work Report indicating what work LARA has done today in City of Flint

Natural Resources (MDNR)

MDNR is fully engaged at the SEOC. Situational awareness is being maintained and the department stands ready to assist as needed.

Services to the Aging (OSA)

Valley Area Agency on Aging - Region 5 (VAAA), in partnership with other local community agencies such as the Genesee County Health Department and MDHHS, has helped organize local meetings and distribute water and water filters. VAAA is an access point for receiving calls from homebound seniors who are not able to pick up water filters or need assistance installing water filters. VAAA reports they continue to receive calls from seniors who need assistance.

VAAA has distributed 2 bottles of water with each home delivered meal to each HDM client within the City of Flint. Water. VAAA also provided water to homebound seniors who needed water to prepare food as they had limited support to pick up bottled water. Congregate meal participants also have access to water and filters as needed. Once water filters were installed, VAAA discontinued including water with home delivered meals.

VAAA also contacted the Grandparents Raising Grandchildren program to ensure that they were aware of educational efforts and confirm the program had received water filters to distribute to program participants.

Incident Related Images

Mike Sobocinski's notes from the SEOC briefing of January 6, 2015:

Capt. Kelenske: This activation is different from many. Overall goals will include assessing the situation, prioritizing actions, and coordinating between agencies, identifying life-safety issues. SEOC activation hours are currently 8a-5p Mon-Fri. MI CIMS event titled 2015-10-1-City of Flint water contamination/shortage. Maintain activity logs in MI CIMS. Battle order set up for today: IC objectives meeting 10am, assign work tasks 11am IC + general staff, 2pm planning meeting, IAP approved 3pm, Unified command initial meeting 4pm. Governor declared state of emergency. Presidential disaster declaration will not apply here, but an emergency is possible to supplement state efforts. Lead pipe replacement program to be checked into – perhaps by Jen [Boyer?] of MDEQ. GIS mapping to cover filter distribution, home locations, distribution/testing gaps, etc. Nutrition distribution program [correct title?]. More of a long-term recovery style of approach. Goal to restore trust in state government. JIC will be set up.

Dr. Wells (DHHS chief medical executive): Pb as neurotoxin, affecting every system in the body, lowering Fe and Ca. Especially problematic in developing children under age 6, esp if not getting enough Ca, Fe. Standards have become increasingly strict over time, with Pb levels formerly 10ug/dl to warrant action, then lowered to 5ug/dl, and today Pb is treated as having no safe exposure level.

[NOTE: she is referring to **blood** concentration levels of micrograms per deciliter, not to be confused with water concentrations referred to elsewhere in units of micrograms per liter: ug/l. I'm using u to represent the greek letter mu-symbol for the "micro" prefix]

Health problems from lead include gastric problems, ulcers, anemia, etc. including death. Cognitive & developmental delays, attention & behavioral disorders. Pb sources include gasoline and paint (until the 1970s), pipes (esp. pre-1978 home construction), ammunition and firearms, soils & industrial sites, air pollution (especially in summertime). CLPP "clip" Childhood Lead Prevention Program. Screenings at age 1, age 2. Those who test >5ug/dl (national standard) are evaluated for environmental exposures/causes. Critical action level 45ug/dl – immediate medical treatment, chelation treatment to remove Pb, and investigation of Pb sources in environment. Water concentration does vary seasonally, with temperature and Ph changes. Old cities are targeted areas for higher risk. Virginia Tech independent testing of water. [From her limited description, I was unclear in the end of the relationship between these results and other tests.] Elevated Pb levels generally declining, including in Flint, until 3rd quarter of 2014 [fiscal quarter or calendar year???]. Hurley Medical Center deals with the high-risk area in Flint. American Journal of Public Health issue of 2 weeks ago had study published on this topic. Water is not the only source of Pb in the area. An increase was measured in 2 Flint zip codes [485]03 and [485]04 although it didn't reach statistical significance. Need to pin down high-risk areas – Pb levels can and do drop when environmental exposure is reduced. Testing since Oct. 1 [2015], to Dec. 18 [period for specific results, assuming testing still continues after Dec 18?]. Improper water filter use, or non-use (e.g. after Detroit water restored in Flint), has caused problems. Pb has half-life of less than 30 days. Department [hers or in the city of Flint?] surveillance results: 23 children under 6, 7 children age 6+, 13 adults who had blood levels above 5ug/dl. 12 elevated Pb blood level investigations; now including water testing, but Pb in dust, paint, and soil was also found. 1 hospitalized (level in the high

30s of ug/dl). HUD-funded program at the state level [name?] Coordination with Wayne State University and Flint campus of [she had said MSU, but it is likely that it is instead U-M Flint]. Misinformation exists re: questions like whether it's okay to shower or bathe in the water [she provided no answer for her own example – is it okay?]. Much local support exists. Info sent through schools with the children who attend them. SNAF, WIF [double check?] nutritional programs for young children. Would like to test as many young children (under 6) as possible in the city. See MI.gov or Flint Water for information about filters – Home Depot as a partner. MDEQ includes blood Pb level in their testing reports.

Question asked: Are there other substances of concern besides Pb in water? A: yes, bacteria, Cu (esp. for those with Wilson's disease), and "other chemicals." [MDEQ person later fills in a couple of these: total trihalomethanes TTHM and halo-acetic acids HAA5, which both fall under the category of disinfectant by-products DBPs]

George Christian [correct spelling?] of the MDEQ (Flint action plan coordinator): Flint had used the Flint River as a source before 1967, in 1967 switched to use of Detroit Water and Sewer Department DWSD for its water supply. Jan 2006 discussions began with Karegnondi Water Authority KWA. April 17, 2014 [event? Possibly the end of DWSD supply.]. May 2014 city began using Flint River water. Aug-Sept Boil water notices issued in part of the city of Flint, for E. coli and total coliform violations. [NOTE: spoke too quickly for me to accurately catch all of the dates/events he mentioned. People really should provide their info in writing rather than rely upon verbal briefs under distracting SEOG conditions.] Had the Flint River as a back-up supply all along, which is why the facility there was still maintained [paraphrase, didn't catch exact wording]. Late 2014-early 2015 DBPs: HAA5 and TTHM, with carbon as a treatment to remove these compounds. Sequence of tests: first at 6ppb 90th percentile level [he didn't explain this well at all, but normally this would mean that the 90th percentile value is at or above the bottom 90% out of all ranked values in a list]. 2nd round of tests: up to 11ppb, compared to EPA's action level of 15ppb. Corrosion control treatment [a means of reducing lead concentrations in the water]. There were also issues reported involving the color, odor, and taste of Flint water. Virginia Tech Pb testing Sept 5 [?], 2015, with Pb advisory issued by Flint. Fall 2015 schools testing and actions required. Some fixtures and fountains above 100ppb. 4 samples per sampling point, after different flush times, 10 consecutive 1liter samples, 200-300 samples total per facility [math not exact, must be estimates], Info placed into spreadsheets and reports. Oct. 15 Flint switched back to DWSD water. Dec. 9, 2015 supplemental phosphate [PO] addition began. Use of erosion controls do slow but do not stop the leaching process (of lead into the water). Any resident of Flint can obtain a bottle and take water samples in for testing; results posted online. Water filters are available for free. Overall slight downward Pb trend, but some values are well over 100ppb. One child care facility measured at 2500ppb. No historical test results there [in schools] to compare with, but some historical data exists elsewhere to compare. [No mention of the comparisons themselves.] Not a problem only of Flint's, increasing recognition of problem more broadly. "Low-lead brass fixtures" could still have as much as 8% lead. [not sure whether he said this or Dr. Wells]

Dr. Wells: Excavation and manipulation of lead lines tends to exacerbate particulate levels.\

Capt. K: Everyone review the MEMP to look for relevant information. All info to go out through PIOs (except for internal coordination and calculations).

Richard [Thelen?] of DHHS: allocation to buy water and filters, 2 pick-up locations in Genesee – free filters [locations not specified, are they at DHHS offices?]. Water purchases from South Carolina.

Brad [Deacon?] of MDARD: Food services, processing, and restaurants are also of interest. Lead affects animals as it does humans, so companion animals may be affected.

??? of the Dept of Education? "DEA" or "DoA"? [people were not introduced properly!] said something about school meals.

ARC not yet involved at this point.

LARA helped DEQ with testing. Flint & Genesee oversee their won plumbing but lack inspectors – need assist from state (Capt: or through EMAC use)

Terrace Room to be used as initial JIC, with PIOs there.

Governor's Representative [name?]: pending lawsuit against governor, potential lawsuit under Safe Drinking Water Act. Everyone do your jobs, but take care, remembering litigation potential.

MDOT [Eileen Phifer?]: Many pipes are under roads and so coordination would be good; shared objectives probably exist w MDOT, EPA, etc.

Lt. BJ Roach, MSP: Genesee Co. Public Health Dept, GCARP [??] (public assistance forum) are involved: water distribution, filter distribution, education, Pb testing clinics (coordinated with DHHS), United Way, Flint Health Dept. Over 23K filters and replacement cartridges provided so far. County GIS getting under way – coord w MSP GIS?

Capt K: submit action items to Tom Weber for IAP. Everyone stay until noon and review MEMP, then to decide whether needed after lunch today.

Tony: Required agencies already known to be needed to stay: MDEQ, DHHS, Education, Talent & Economic Growth, MDTMB, MDARD.

Objectives and Tactics

1. **Activate the State Recovery Task Force (SRTF). (Operations Section Chief)**
   A. Identify and obtain approval for assignment of Task Force Leader. (Operations Chief)
   B. Task Force leader will provide recommendations and obtain approval for Task Force membership. (MDHS SEMC)
   C. State Recovery Task Force shall determine mission and establish means to provide support as needed. (MDHS SEMC)

2. **Establish and maintain coordination between the City of Flint, Genesee County, state and federal agencies, and appropriate medical experts. (Operations Section Chief)**
   A. Request and establish FEMA LNO in the SEOC to support liaison with other federal agencies (State Director)
   B. Establish Recovery Branch within the Operations Section. (OSC)
   C. Maintain daily SEOC briefing with state agencies. (PSC)
   D. Establish and maintain routine calls with local emergency manager and EMHSD District Coordinator. (State Director)

3. **Obtain and maintain situational awareness and common operating picture of all activities. (PSC)**
   A. Conduct daily briefings with state agency emergency managers. (PSC)
   B. Monitor MICIMS. (All)
   C. Produce maps to include water filter, pitcher and filter distribution, affected areas and infrastructure, and method of distribution. (GIS)
   D. Complete and produce daily situation reports. (PSC)

4. **Establish SEOC operational period and hours of operations. (State Director) – Completed.**
   A. Operation Period has been established as well as SEOC operational hours
   B. Review weekly for alteration of same

5. **Investigate and identify all available programs for assistance with direct or related impacts, including the federal Lead Pipe Replacement Program. (Recovery Branch Director - RBD)**
   A. Identify agencies to research potential assistance programs (RBD)
   B. Named agencies will research programs and determine eligibility guidelines, benefits, application process, contacts, etc. (RBD)
   C. Provide written report to Operations Section Chief as to program availability. (RBD)

6. **Develop a comprehensive GIS strategy. (GIS)**
   A. Identify critical needs for maps and overlays. (GIS)
   B. Identify current and potential resources for data collection. (GIS)
   C. Contact and coordinate with identified agencies to obtain and centrally locate all data. (GIS)
   D. Provide spatial analytics in support of SEOC. (GIS)

7. **Coordinate response and recovery activities with MIVOAD and identify potential mission areas. (RBD)**
   A. Establish Recovery Branch. (OSC)
   B. Gather and compile available resources. (RBD)
   C. Gather and compile available assistance programs. (RBD)
   D. Determine resources already provided to affected area in response to emergency. (RBD)

10. **Establish and coordinate routine communication between SMEs and coordinate technical assistance among state agencies and to local agencies**. (OSC)
    A. Identify subject matter experts (Dr. Wells, Dr. Mona Hatta-Attisha, George Krisztian). (OSC)
